FEDERAL REGISTER

Vol. 79 Thursday,

No. 219 November 13, 2014

Book 1 of 2 Books

Pages 67309–67546

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 77 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Proclamation 9208 of November 7, 2014

Veterans Day, 2014

By the President of the United States of America

A Proclamation

Since the birth of our Nation, American patriots have stepped forward to serve our country and defend our way of life. With honor and distinction, generations of servicemen and women have taken up arms to win our independence, preserve our Union, and secure our freedom. From the Minutemen to our Post-9/11 Generation, these heroes have put their lives on the line so that we might live in a world that is safer, freer, and more just, and we owe them a profound debt of gratitude. On Veterans Day, we salute the Soldiers, Sailors, Airmen, Marines, and Coast Guardsmen who have rendered the highest service any American can offer, and we rededicate ourselves to fulfilling our commitment to all those who serve in our name.

Today, we are reminded of our solemn obligation: to serve our veterans as well as they have served us. As we continue our responsible drawdown from the war in Afghanistan and more members of our military return to civilian life, we must support their transition and make sure they have access to the resources and benefits they have earned. My Administration is working to end the tragedy of homelessness among our veterans, and we are committed to providing them with quality health care, access to education, and the tools they need to find a rewarding career. As a Nation, we must ensure that every veteran has the chance to share in the opportunity he or she has helped to defend. Those who have served in our Armed Forces have the experience, skills, and dedication necessary to achieve success as members of our civilian workforce, and it is critical that we harness their talent.

Across our country, veterans who fought to protect our democracy around the globe are strengthening it here at home. Once leaders in the Armed Forces, they are now pioneers of industry and pillars of their communities. Their character reflects our enduring American spirit, and in their example, we find inspiration and strength.

This day, and every day, we pay tribute to America's sons and daughters who have answered our country's call. We recognize the sacrifice of those who have been part of the finest fighting force the world has ever known and the loved ones who stand beside them. We will never forget the heroes who made the ultimate sacrifice and all those who have not yet returned home. As a grateful Nation, let us show our appreciation by honoring all our veterans and working to ensure the promise of America is within the reach of all who have protected it.

With respect for and in recognition of the contributions our service members have made to the cause of peace and freedom around the world, the Congress has provided (5 U.S.C. 6103(a)) that November 11 of each year shall be set aside as a legal public holiday to honor our Nation's veterans.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, do hereby proclaim November 11, 2014, as Veterans Day. I encourage all Americans to recognize the valor and sacrifice of our veterans through appropriate public ceremonies and private prayers. I call upon Federal, State, and local officials to display the flag of the United States and to participate in patriotic activities in their communities. I call on

all Americans, including civic and fraternal organizations, places of worship, schools, and communities to support this day with commemorative expressions and programs.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of November, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-ninth.

Proclamation 9209 of November 7, 2014

World Freedom Day, 2014

By the President of the United States of America

A Proclamation

For nearly three decades, the Berlin Wall divided a nation and stood as one symbol of a system that denied individuals the freedoms that are the right of every person. It separated families and suppressed free will and self-determination—but while it tried to contain the yearnings of a courageous and unwavering people for liberty and justice, it could not crush them. Twenty-five years ago today, Germans from East and West came together to tear down the Wall and begin the work of building an open and prosperous society. On World Freedom Day, we honor a generation that refused to be defined by a wall, and we reaffirm our commitment to stand with all those who seek to join the free world.

The images of this extraordinary event are seared in our memory and enshrined in our history: brave crowds climbing atop an old barrier and Berliners reuniting in city streets. But the victory of 1989 was not inevitable. We will not forget those who risked bullets, dug through tunnels, leapt from buildings, and crossed barbed wire, minefields, and a mighty river in pursuit of freedom. In their struggle—and in the memory of all those who did not live to see Berlin united and free—Americans see our own past, as well as the spirit of citizens around the world who long for opportunity and are willing to do the hard work of building a democracy.

America stood with those on both sides of the Iron Curtain who held fast to the belief that a better future was possible, and as the Berlin Wall fell, it spurred a more integrated, more prosperous, and more secure Europe. Today, Germany is one of our strongest allies. And as we pay tribute to our shared past, we are reminded that upholding peace and security is the responsibility of every nation. There is no progress without sacrifice and no freedom without solidarity, and we cannot shrink from our role of advancing the values in which we believe.

The story of Berlin shows us that with grit and determination, we have the power to shape our own destiny, even in the face of impossible odds. As we celebrate a triumph over tyranny, we also recognize that the challenges to peace and human dignity continue in our complex world and that complacency is not the character of great nations. Let us resolve to extend a hand to those who reach for freedom still and continue the pursuit of peace in our time.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 9, 2014, as World Freedom Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities, reaffirming our dedication to freedom and democracy.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of November, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-ninth.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 27, 28, 29, 51, 52, 54, 56, 58, 62, 70, 75, and 91

[Document Number AMS–LPS–13–0050]

RIN 0581–AD36

Process for Establishing Rates Charged for AMS Services

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMMARY: The Agricultural Marketing Service (AMS) is amending its regulations to provide for a set of standardized formulas by which fees are calculated. The fees are calculated using formulas to account for all costs incurred by AMS in providing these services. Each year, fees will be announced in a notice in the **Federal Register** by June 1 and take effect at the start of the fiscal year, crop year, or as required by specific laws. This action provides greater transparency to the customers we serve as to how the fees are derived.

The standardized formulas will be used to calculate fees that AMS charges for providing voluntary grading, inspection, certification, auditing and laboratory services for a variety of agricultural commodities including meat and poultry, fruits and vegetables, eggs, dairy products, and cotton and tobacco. The fees will also apply to those persons requesting such services including producers, handlers, processors, importers and exporters. Fees charged for inspection of fruits, vegetables, and specialty crops subject to the Agricultural Marketing Agreement Act of 1937 are also affected by this rule.

Provisions of this rule do not supersede rates established by Memoranda of Understanding, Marketing Orders, or by cooperative agreements already in place. Furthermore, the cotton program will continue to consult with its industry before rates are established.

DATES: *Effective Date:* This rule is effective December 15, 2014.

FOR FURTHER INFORMATION CONTACT: For further information contact, Sonia N. Jimenez, AMS, U.S. Department of Agriculture, Room 3069–S, 1400 Independence Ave. SW., Washington, DC 20250; telephone (202) 720–5115, fax (202) 720–8477.

SUPPLEMENTARY INFORMATION:

Background

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627), provides for the collection of fees to cover costs of various inspection, grading, certification or auditing services covering many agricultural commodities and products. The AMA also provides for the recovery of costs incurred in providing laboratory services. The Cotton Statistics and Estimates Act (7 U.S.C. 471–476) and the U.S. Cotton Standards Act (7 U.S.C. 51–65) provide for classification of cotton and development of cotton standards materials necessary for cotton classification. The Cotton Futures Act (7 U.S.C. 15b) provides for futures certification services and the Tobacco Inspection Act (7 U.S.C. 511–511s) provides for tobacco inspection and grading. These Acts also provide for the recovery of costs associated with these services. This action sets formulas to calculate these fees and any other fee currently being charged under these statutes. The table below shows the program regulations and types of fees charged for AMS services.

Cotton Fees

Cotton Statistics and Estimates Act (7 U.S.C. 471–476)
U.S. Cotton Standards Act (7 U.S.C. 51–65)
Cotton Futures Act (7 U.S.C. 15b)
7 CFR Part 27—Cotton Classification Under Cotton Futures Legislation
  Subpart A—Regulations; §§ 27.80–27.90; Costs of Classifications and Micronaire
7 CFR Part 28—Cotton Classing, Testing, and Standards
  Subpart A—Regulations Under the United States Cotton Standards Act; §§ 28.115–28.126; Fees and Costs
  Subpart D—Cotton Classification and Market News Service for Producers; §§ 28.909; Costs
  §§ 28.910; Classification of samples and issuance of classification data
  §§ 28.911; Review classification

Dairy Fees

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627)
7 CFR Part 58—Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products
  Subpart A—Regulations Governing the Inspection and Grading Services of Manufactured or Processed Dairy Products; §§ 58.38–58.46; Fees and Charges

Fruit and Vegetable Fees

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627)
7 CFR Part 51—Fresh Fruits, Vegetables and Other Products (Inspection, Certification, and Standards)
  Subpart A—Regulations; §§ 51.37–51.44; Schedule of Fees and Charges at Destination Markets
  §§ 51.45; Schedule of Fees and Charges at Shipping Point Areas
7 CFR Part 52—Processed Fruits and Vegetables, Processed Products Thereof, and Other Processed Food Products
  Subpart—Regulations Governing Inspection and Certification; §§ 52.41—52.51; Fees and Charges

Meat and Livestock Fees

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627)
7 CFR Part 54—Meats, Prepared Meats, and Meat Products (Grading, Certification, and Standards)
  Subpart A—Regulations; §§ 54.27–54.28; Charges for Service
7 CFR Part 54—Meats, Prepared Meats, and Meat Products (Grading, Certification, and Standards)
  Subpart C—Regulations Governing the Certification of Sanitary Design and Fabrication of Equipment Used in the Slaughter, Processing and Packaging of Livestock and Poultry Products; §§ 54.1028; Charges for Service
7 CFR Part 62—Livestock, Meat and Other Agricultural Commodities

(Quality Systems Verification Programs)
Subpart A—Quality Systems Verification Definitions §§ 62.300; Fees and Other Costs for Service
7 CFR Part 75—Regulations for Inspection and Certification of Quality of Agricultural and Vegetable Seeds §§ 75.41; General

Poultry Fees

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627)
7 CFR Part 56—Voluntary Grading of Shell Eggs
Subpart A—Grading of Shell Eggs; §§ 56.45–56.54; Fees and Charges
7 CFR Part 70—Voluntary Grading of Poultry and Rabbit Products
Subpart A—Grading of Poultry and Rabbit Products; §§ 70.70–70.78; Fees and Charges

Science and Technology Fees

The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621–1627)
7 CFR Part 91—Services and General Information (Science and Technology)
Subpart I—Fees and Charges; §§ 91.37–91.45

Tobacco Fees

Tobacco Inspection Act (7 U.S.C. 511–511s)
7 CFR Part 29—Tobacco Inspection
Subpart B—Regulations; §§ 29.123–29.129; Fees and Charges
Subpart F—Policy Statement and Regulations Governing the Identification and Certification of Non-quota Tobacco Produced and Marketed in Quota Area; §§ 29.9251; Fees and Charges

Grading, inspection and verification programs facilitate the movement of agricultural products through marketing channels—from growers to wholesalers, retailers and consumers—in a quick, efficient, and equitable manner. These services include the grading, inspection, or certification of quality factors in accordance with established U.S. Grade Standards; audits or accreditation according to International Organization for Standardization (ISO) standards and/or Hazard Analysis and Critical Control Point (HACCP) principles; and other marketing claims. The quality grades serve as a basis to reflect the value of agricultural commodities to both producers and consumers. AMS' grading and quality verification and certification, audit and accreditation, plant process and equipment verification, and laboratory approval services are voluntary tools paid for by the users on a fee-for-service basis. The agriculture industry can use these tools to promote and communicate the quality of agricultural commodities to consumers. Laboratory services are provided for analytic testing, including but not limited to chemical, microbiological, biomolecular, and physical analyses.

Approximately 70 percent of AMS' operational budget is derived from fees assessed for services provided to agricultural industries. Changes in fee-for-service rates may result from fluctuating customer needs, increases in employee salary and benefit expenses, inflationary impact on non-labor operating expenses and fixed costs, and/or uncollected revenue (bad debt). Prior to this action, each AMS program individually proposed a fee change when a revenue shortfall was anticipated for a specific program or activity. As a result, these changes did not appear in a single unified fee schedule. Lack of certainty as to when annual fees would be announced may affect fiscal planning for the users of the services, especially if fees are changed in the middle of a contract or harvest season. In addition, because of the separate and repetitive use of the agency rulemaking process, programs experienced delays in recovering the full cost of the services they provided.

As a result, a number of AMS programs amended their regulations to provide for multi-year annual fee changes that were established by a single rulemaking action. While this enabled the Agency to collect revenue based on a revised fee each year, estimates used to set the projected annual rates did not always result in the Agency collecting revenues sufficient to cover its costs. Instead, in some instances, the Agency recovered partial costs.

In order to provide both transparency and predictability to the industries served and to allow the Agency to effectively plan for staffing, investments in infrastructure, and other resources, AMS is amending its regulations to provide for a set of standardized formulas by which fees are calculated. This process will use formulas established to determine fees for AMS's grading, inspection, certification, auditing, and laboratory services that cover expected costs while maintaining a reasonable reserve. AMS programs are required to sustain a certain minimum level of reserve funds in order to maintain fiscal responsibility should the program area undergo closure. Each program reserve level is affected by factors such as number of employees, salaries, benefits, contracted obligations, and other items.

Currently, AMS performs financial analyses on an annual basis to determine whether the current fees are adequate to recover the costs incurred for providing these services. Historical or prior year cost and workload data, along with applicable projections are used to generate estimates of future obligations and revenues. This rule specifies that the rates be based on the actual cost and workload data of the previous fiscal year(s) or accounting period(s) (e.g. crop year) used by respective programs. On the basis of these analyses and using the formulas, AMS will determine the fees necessary to sustain program services. This increases predictability and provides information for planning purposes for the industries utilizing AMS user fee services.

The components (costs) that AMS will use to calculate the rates for services are the same costs used in calculating past rates.

As required by the Cotton Statistics and Estimates Act (7 U.S.C. 471–476), consultations regarding the establishment of the fee for cotton classification with U.S. cotton industry representatives will continue. Representatives of all segments of the cotton industry, including producers, ginners, bale storage facility operators, merchants, cooperatives, and textile manufacturers will continue to be addressed in various industry-sponsored forums.

Provisions of this rule will not supersede rates established by Memoranda of Understanding, Marketing Orders, cooperative agreements or other similar instruments. Under MOU, cooperative agreements, and similar instruments, fees are established based on specific agreements specified with an individual entity such as a State or university.

The outcome of this action is a transparent system for establishing fee rates for all AMS user fee programs, whereby financial and resource needs for continued operation are reviewed on a pre-determined cycle, using established formulas. This will avoid financial crises that may occur when reserve funds are rapidly depleted due to unanticipated business events, and will allow the Agency to more quickly adjust the cost of the services it provides. The information will also greatly benefit AMS customers by allowing them to better plan for the cost of AMS services.

Currently, AMS publishes a rule for each of the service fees it collects. This rulemaking action supports the

government's initiative to streamline processes and the Department's goal of formalizing processes to integrate openness, transparency, participation and collaboration.

Final Rule

With this action, AMS is amending its regulations in 7 CFR parts 27, 28, 29, 51, 52, 54, 56, 58, 62, 70, 75, and 91 by making public the formulas it uses to calculate user-fee rates. Making the standardized formulas a part of the regulations allows AMS to announce annual fees in a yearly **Federal Register** notice, starting with the effective date of this rule and for subsequent years, by June 1 each year or as required by specific laws. The fee rates will be effective at the beginning of the following fiscal year, crop year, or as required by specific laws and identified in the yearly notice. The yearly notice will include all rates charged by AMS including some that are not currently part of regulations. The yearly notice will include a per-hour rate and, in some instances, the equivalent per-unit cost. The per-unit cost will be provided to facilitate understanding of the costs associated with the services to the industries that historically use a unit-cost basis for payment. In those cases where per-unit cost is necessary, the formulas will have an additional step to convert per hour costs to per unit costs. This process is currently followed for cotton and some fruit and vegetable user fee services.

Travel costs are also part of the costs that are charged for user fee services. Currently, in some instances, travel costs are already included in the fee charged for service. In other instances, travel costs are added to the fee. In both instances, travel costs are charged to the recipient of the service. The annual notice will maintain the same procedure currently used for recovering travel costs.

AMS is also making several administrative changes and corrections to language in the regulations that is obsolete, such as changing ''diskette'' to ''electronic means''.

Definitions

In order to provide additional clarity, AMS defines the following terms used throughout this document as follows:

Bad Debt—Accounts receivable that will likely remain uncollectable and will be written off.

Benefits—various non-wage compensation provided to employees in addition to their normal wages or salaries. Examples of items included in this category are health and unemployment insurance, retirement, workers compensation, Thrift Savings Plan contributions, and other similar compensation.

Cost of Living Adjustment—the cost of maintaining a certain standard of living based on the economic assumptions in the Office of Management and Budget (OMB), ''Update to Civilian Position Full Fringe Benefit Cost Factor, Federal Pay Raise Assumptions, and Inflation Factors used in OMB Circular A–76, Performance of Commercial Activities''.

Direct Hours—the regular hours worked by employees of the Agency. This does not include overtime or holiday hours.

Direct Pay—monetary compensation paid to employees of AMS for work performed. Pay is based on the U.S. Office of Personnel Management pay rate tables. It may include night and Sunday differential costs.

Holiday—the official days of the calendar year established by law (5 U.S.C. 6103) or identified by Executive Order as Federal holidays.

Hour—measure by which grading, certification, inspection, classification, laboratory or other services cost is based and expenses are charged.

Indirect Cost—this cost includes program and AMS activities that support the services provided to the industry. Another common term for this cost category is ''overhead''.

Operating Reserve—funds above expected obligations required to effectively manage uncertainties in demand and cash flow timing.

Operating Cost—costs attributed to performing grading, inspection, certification, or laboratory services duties (i.e. training, equipment, and other such costs), plus operating reserve, plus indirect costs.

Overtime—hours worked in excess of the approved schedule. Work performed after the first 8 hours per day or 40 hours per week is considered overtime.

Regular Rate—the cost per hour for work provided in accordance with an applicant contract. Under Federal labor laws, this rate applies to the first 8 hours per day, or first 40 hours worked per week by AMS employees.

Unit—any measurement that there is one of. For example, one bale of cotton or one truck load of vegetables.

Formulas for Regular, Overtime, and Holiday Rates

With this rulemaking, AMS amends its regulations to provide a set of standardized formulas by which fees are calculated. The methodology used to calculate and implement the fees charged by AMS user-funded programs will be specified in 7 CFR parts 27, 28, 29, 51, 52, 54, 56, 58, 62, 70, 75, and 91.

AMS will use these formulas to calculate annual fee rates starting with the effective date of this rule and for subsequent years. AMS will publish the specific formulas used to calculate service fees. AMS intends to announce the actual annual fee rates in a **Federal Register** notice by June 1 each year or as required by specific laws. These fees will be effective at the beginning of the following fiscal year, crop year, or as required by specific laws.

Salary, hours, and most rates used in the formulas will be based on the prior fiscal year's (or applicable accounting period or historical data) actual costs and hours. AMS will round the final rates up to make the amounts divisible by the quarter hour (15 minutes). Fifteen minutes will be the minimum charge for services covered by these rates.[1] Travel costs may be part of a fee or may be added to the calculated fee.

Currently, some fees are charged on a per unit basis and others are charged on a per hour basis. AMS will continue to provide costs based on a per hour and per unit basis to maintain consistency. For cotton and some fruit and vegetable programs, per unit costs are determined after converting the hourly costs to units.

AMS is establishing the following formulas:

Regular Rate—The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours for the previous year, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

An example of the calculation will look like this: [FY 2013 Direct Pay divided by Total Direct Hours ($2,663,407/82,985) = $32.10, plus ($32.10 * 1.7% (2014 cost of living increase)) = $32.64 + $10.04 (benefits rate) + $28.90 (operating rate) + $.01 (bad debt allowance rate) = $71.59 (rounded to $71.60); rounding is done to reflect billable quarter hour increments of 15 minutes. If applicable, travel expenses may also be added.

Overtime Rate—The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5, plus the benefits rate,

[1] The current minimum charge for some services covered by these rates is 30 minutes.

plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

An example of the calculation will look like this: [FY 2013 Direct Pay divided by Total Direct Hours ($2,663,407/82,985) = $32.10, plus ($32.10 * 1.7% (2014 cost of living increase)) = $32.64, multiplied by 1.5 ($32.64 * 1.5 (overtime rate)) = $48.96 + $10.04 (benefits rate) + 28.90 (operating rate) + $.01 (bad debt allowance rate) = $87.91 (rounded to $87.92); rounding is done to reflect billable quarter hour of 15 minutes. If applicable, travel expenses may also be added.

Holiday Rate—The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

An example of the calculation will look like this: [FY 2013 Direct Pay divided by Total Direct Hours ($2,663,407/82,985) = $32.10, plus ($32.10 * 1.7% (2014 cost of living increase)) = $32.64, multiplied by 2 ($32.64 * 2 (double time or Holiday rate)) = $65.28 + $10.04 (benefits rate) + $28.90 (operating rate) + $.01 (bad debt allowance rate) = $ 104.23(rounded to $104.24); rounding is done to reflect billable quarter hour increments of 15 minutes. If applicable, travel expenses may also be added.

Formula calculations are based on prior fiscal year's actual costs or historical costs, workload data, projection of expenses impacting program costs, cost of living increase and inflation. Cost of living increases and inflation factors are based on the economic assumptions from 2013–2023 which have been updated in the Office of Management and Budget's (OMB) FY 2014 Mid-Session Review. Rather than codify a reference to this OMB budget document in this rule, each year AMS intends to use the most recent economic factors released by OMB for budget development purposes to determine cost impacts for these user fee activities.

Formulas for the Benefits, Operating, and Allowance for Bad Debt Rates

AMS will derive the components of the formulas above, using previous fiscal year's actual costs/historical costs, as follows:

Benefits Rate—The total AMS grading, inspection, classification, certification, audit, or laboratory service program direct benefits costs divided by the total hours worked (regular, overtime, and holiday), which is then multiplied by the next calendar year's percentage cost of living increase.

An example of the calculation will look like this: [2013 Direct Benefits cost/(Total hours + Total Overtime hours + Total Holiday hours) ($819,207/82,985)] = $9.87, plus ($9.87 * 1.7% (2014 Cost of Living)) = $10.04.

Operating Rate—The total AMS grading, inspection, classification, certification, audit, or laboratory service program operating costs divided by total hours worked (regular, overtime, and holiday), which is then multiplied by the percentage of inflation.

An example of the calculation will look like this: [2013 Total Operating Costs/(Total hours + Total Overtime hours + Total Holiday hours) ($2,351,857/82,985)] = $28.34, plus ($28.34 * 2% (2014 Inflation)) = $28.90.

Allowance for Bad Debt Rate—Total AMS grading, inspection, classification, certification, audit, or laboratory service program allowance for bad debt divided by total hours worked (regular, overtime, and holiday).

An example of the calculation will look like this: [2013 Total Bad Debt cost/(Total hours + Total Overtime hours + Total Holiday hours) ($1,000/82,985) = $ 0.01

As noted above, the formulas reflect that the cost of providing services include both direct and indirect costs. Direct costs include the cost of salaries, employee benefits, and if applicable, travel and some operating costs. Indirect or overhead costs include the cost of program and Agency activities supporting the services provided to the industry. Indirect cost expenditures are allocated across the Agency for each direct hour of grading, inspection, classification, certification, auditing, or laboratory service provided. For purposes of these formulas, indirect costs have been included as part of operating costs.

Comments

AMS received two comments on the proposed rule.

One commenter asked whether the industry will be notified as to the amounts of each factor within the calculation, including the factors within the benefits rate and the operating rate; whether the Department will publish a final hourly rate for regular, overtime, and holiday rates; and when will the new fee schedule become effective and put into practice.

The categories of costs included in each fee were stated in the proposed rule and are part of this final rule. The specific amounts within each factor will not be published in the annual notice. However, this information is available upon request from the specific AMS program. The final hourly rate for regular, overtime, and holiday rates will be part of the annual notice.

Each year, fees will be announced in a notice in the **Federal Register** by June 1 and take effect at the start of the fiscal year, crop year, or as required by specific laws. The yearly notice will identify the start date for each fee. AMS plans to have these rates in place in FY 15.

Another commenter recommended that application of this uniform fee regulation maintain the calculation and reporting of the cotton classing fee on a per sample basis and that the procedure used by the AMS Cotton Division maintain the flexibility with the formula to account for an adequate reserve and projection of classing volume.

As stated in the proposed rule and earlier in this rule, the yearly notice will include a per-hour rate and, in some instances, the equivalent per-unit cost which is the same as per sample basis. The per-unit (or per sample) cost will be provided to facilitate understanding of the costs associated with the services to the industries that historically use a unit-cost basis for payment.

An adequate reserve and work load (volume) are part of the standardized formulas as they have been in the past.

No changes were made to the proposed rule based on comments received.

Executive Order 12866 and Executive Order 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563. The Office of Management and Budget has not reviewed this rule under these Orders.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this regulation will not have substantial and direct effect on Tribal governments and will not have significant Tribal implications.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Has no retroactive effect; and (2) does not require administrative proceedings before parties may file suit in court challenging this rule.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612) requires agencies to consider the economic impact of each rule on small entities and evaluate alternatives that would accomplish the objectives of the rule without unduly burdening small entities or erecting barriers that would restrict their ability to compete in the market. The purpose is to fit regulatory actions to the scale of businesses subject to the action. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities.

Most small agricultural service firms have been defined by the Small Business Administration (SBA) (13 CFR 121.201) as those having annual receipts of less than $7,000,000. For certain types of businesses (e.g., dairy, egg, and meat processing; handlers of produce), the SBA considers a small entity as those that employ less than 500 employees.

The grading, inspection, certification and auditing services provided under these regulations are voluntary.[2] [3] The benefits of using grading, inspection, certification, auditing, and laboratory services outpace the costs of obtaining these services. These services are used by meat and poultry establishments, fruit and vegetable handlers and processors, egg processing plants, dairy processors, users of cotton and tobacco program services, importers and exporters of the above commodities, and other interested persons to determine quality and prices of their products.

AMS estimates that approximately 849 entities use voluntary meat grading and certification services. This estimate includes 413 egg, poultry, and rabbit packing plants that use the USDA grade shield. Of these 413 plants, approximately fifteen percent would be considered a small business under the SBA criteria. The remaining 436 entities includes livestock slaughterers, brokers, meat and other processors, distributors, organic certification companies, trade associations, State and Federal entities, and livestock producers and feeders. Of these 436 entities, approximately 70 percent are considered a small business under the SBA criteria.

AMS estimates that 60 cotton merchants use AMS services for cotton futures classification, 20,000 cotton producers and 637 cotton gins use AMS services for normal cotton classification, and 125 tobacco customers use AMS services. Of these entities, approximately 80 percent are considered a small business under the SBA criteria.

AMS estimates that, over the last two fiscal years, we provided user fee services to an average of 2,308 fruit and vegetable companies for fresh products. AMS estimates that, over the last two fiscal years, we provided user fee services to an average of 1,087 fruit and vegetable companies for processed products. We estimate that approximately 98 percent of these 3,395 companies are considered a small business under the SBA criteria. The number of entities referenced above includes those subject to the provisions of the Agricultural Marketing Agreement Act of 1937.

AMS estimates that 360 dairy plants use AMS' dairy grading and inspection services. We believe that approximately 96 percent of these plants are considered a small business under the SBA criteria.

AMS considered the economic impact of this action on these small entities. The formulas will have a minimal impact on entities that request these services. The difference in fee rates are negligible since the costs used in the formulas to calculate the current and future fees will remain the same. For example, it is expected that the Dairy user fee will change from $76 per hour to $78 per hour under the proposed formulas. AMS has not updated several of its programs' user fees for a number of years. For those fees that have not been updated recently, there may be a change in fees. These possible changes will be the result of using current economic data and cost estimates to calculate the fee rates. AMS will take into consideration, when appropriate, economic and industry conditions before adjusting fees. The process will maintain up-to-date fees.

By including the formulas used to calculate annual user fee rates in the regulations, the Agency streamlines the rulemaking process to help ensure that fees are effective at the beginning of each fiscal year or other period as required by law. Fees will cover inflation and national and locality pay raises but will not support any new budgetary initiative. Any cost changes are similar to other changes that the industry would experience because of inflation and wage increases.

The outcome of this rule will be a transparent system for establishing fee rates for all AMS user fee programs, whereby financial and resource needs for continued operation are reviewed on a pre-determined cycle, using established formulas. This will avoid financial crises that occur when reserve funds are rapidly depleted due to unanticipated business events, and will allow the Agency to more quickly adjust the cost of the services it provides. The information will also greatly benefit AMS customers by allowing them to better plan for the cost of AMS services.

The total volume of commodities graded, inspected and certified under the associated regulations in 2012 was approximately 91 billion pounds. An overall increase in cost per pound of product associated with the new fees is estimated at $.0002. Even in competitive industries such as fruit and vegetables, meat, poultry, dairy and eggs, this amount of increase in costs will have an insignificant impact on profits and processes. Accordingly, AMS certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule does not contain any new information collection or recordkeeping requirements that are subject to the Office of Management and Budget (OMB) approval under the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

E-Government Act

AMS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, et seq.) by, among other things, promoting the use of the Internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

Public awareness of all segments of rulemaking and policy development is

[2] Currently, there is no mandatory inspection and grading of tobacco under the Tobacco Inspection Act (7 U.S.C. 511–511s).

[3] Fees charged for inspection of fruits, vegetables, and specialty crops subject to the Agricultural Marketing Agreement Act of 1937 also would be affected by this rule.

important. Consequently, in an effort to ensure that all interested parties, including minorities, women, and persons with disabilities are aware of this rule, AMS will announce it online and make copies of this **Federal Register** publication available through the AMS Web page located at *http://www.ams.usda.gov/AMSv1.0/.* In addition, AMS offers a subscription service which provides automatic and customized access to selected agricultural commodity news and information. Further, each program will make a concerted effort to inform their respective industries while performing inspections and providing services.

Finally, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

List of Subjects

7 CFR Part 27

Commodity futures, Cotton.

7 CFR Part 28

Administrative practice and procedure, Cotton, Reporting and recordkeeping requirements, Warehouses.

7 CFR Part 29

Administrative practice and procedure, Advisory committees, Government publications, Imports, Pesticide and pests, Reporting and recordkeeping requirements, Tobacco.

7 CFR Part 51

Agricultural commodities, Food grades and standards, Fruits, Nuts, Reporting and recordkeeping requirements, Vegetables.

7 CFR Part 52

Food grades and standards, Food labeling, Frozen foods, Fruits, Reporting and recordkeeping requirements, Vegetables.

7 CFR Part 54

Food grades and standards, Food labeling, Meat and meat products, Poultry and poultry products.

7 CFR Part 56

Eggs and egg products, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

7 CFR Part 58

Dairy products, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

7 CFR Part 62

Food grades and standards, Food labeling, Meat and meat products.

7 CFR Part 70

Food grades and standards, Food labeling, Poultry and poultry products, Rabbits and rabbit products, Reporting and recordkeeping requirements.

7 CFR Part 75

Administrative practice and procedure, Agricultural commodities, Reporting and recordkeeping requirements, Seeds, Vegetables.

7 CFR Part 91

Administrative practice and procedure, Agricultural commodities, Laboratories, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR chapter I is amended as follows:

PART 27—COTTON CLASSIFICATION UNDER COTTON FUTURES LEGISLATION

■ 1. The authority citation for part 27 continues to read as follows:

Authority: 7 U.S.C. 15b, 7 U.S.C. 473a–b, 7 U.S.C. 1622(g).

■ 2. Revise § 27.80 by adding paragraphs (a), (b), and (c) and removing paragraph (d) to read as follows:

§ 27.80 Fees; review classification, futures classification and supervision.

* * * * *

(a) For each calendar year, AMS will calculate the rate for services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading or classification program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b) For each calendar year, based on historical costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(1) *Benefits rate.* The total AMS grading or classification program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(2) *Operating rate.* The total AMS grading or classification program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(3) *Allowance for bad debt rate.* Total AMS grading or classification program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(c) *Basis.* The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most current Office of Management and Budget's Presidential Economic Assumptions.

■ 3. Revise § 27.81 to read as follows:

§ 27.81 Fees; certificates.

For each new certificate issued in substitution for a prior certificate at the request of the holder thereof, for the purpose of business convenience, or when made necessary by the transfer of cotton under the supervision of any exchange inspection agency as provided in § 27.73, the person making the request shall pay a fee determined as described in § 27.80.

PART 28—COTTON CLASSING, TESTING, AND STANDARDS

Subpart A—Regulations Under the United States Cotton Standards Act

■ 4. The authority citation for part 28, subpart A, continues to read as follows:

Authority: 7 U.S.C. 55 and 61.

■ 5. Revise § 28.116 to read as follows:

§ 28.116 Amounts of fees for classification; exemption.

(a) For the classification of any cotton or samples, the person requesting the services shall pay a fee, based on the description that follows, subject to the

additional fee provided by paragraph (c) of this section.

(1) For each calendar year, AMS will calculate the rate for services per hour per program employee using the following formulas:

(i) *Regular rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(ii) *Overtime rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(iii) *Holiday rate.* The total AMS grading or classification program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(2) For each calendar year, based on historical costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading or classification program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS grading or classification program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading or classification program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(3) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most current Office of Management and Budget's Presidential Economic Assumptions.

(b) When a comparison is requested of any samples with a type or with other samples, the fees prescribed in paragraph (a) of this section shall apply to every sample involved, including each of the samples of which the type is composed.

(c) An additional fee based on current shipping rates shall be assessed for returning samples unless the request for service is so worded that the samples become government property immediately after classification.

(d) For any review of classification or comparison of any cotton, the fees prescribed in paragraph (a) of this section shall apply. The additional fee prescribed in paragraph (c) of this section is not applicable to review of classification if made on the same sample as the original class or comparison.

■ 6. Revise § 28.117 to read as follows:

§ 28.117 Fee for new memorandum or certificate.

For each new memorandum or certificate issued in substitution for a prior memorandum or certificate at the request of the holder, thereof, on account of the breaking or splitting of the lot of cotton covered thereby or otherwise for his business convenience, the person requesting such substitution shall pay a fee determined as described in § 28.116. If the memorandum is provided by electronic means, the fee shall be determined using the same provisions.

■ 7. Revise § 28.122 to read as follows:

§ 28.122 Fee for practical classing examination.

The fee for the practical classing examination for cotton shall be determined as described in § 28.116. Any applicant who passes the examination may be issued a certificate indicating this accomplishment. Any person who fails to pass the examination may be reexamined. The fee for this practical reexamination will be determined as described in § 28.116.

Subpart D—Cotton Classification and Market News Service for Producers

■ 8. The authority citation for part 28, subpart D, continues to read as follows:

Authority: 7 U.S.C. 51–65; 7 U.S.C. 471–476.

■ 9. Amend § 28.909 by revising paragraph (b) to read as follows:

§ 28.909 Costs.

* * * * *

(b) The cost of High Volume Instrument (HVI) cotton classification service to producers will be based on formulas set forth in § 28.116. The proceeds of the sale of cotton samples shall be used to defray the costs of providing the service under this subpart.

* * * * *

■ 10. Revise § 28.910 to read as follows:

§ 28.910 Classification of samples and issuances of classification data.

(a)(1) The samples submitted as provided in the subpart shall be classified by employees of the Division, and classification memoranda showing the official quality determination of each sample according to the official cotton standards of the United States shall be issued by any one of the following methods at no additional charge:

(i) Electronic means; or

(ii) Telecommunications, with all long distance telephone line charges paid by the receiver of data.

(2) When an additional copy of the classification memorandum is issued by any method listed in paragraph (a)(1) of this section, there will be a charge determined as described in § 28.116. If provided as an additional method of data transfer, the minimum fee for each method issued shall also be determined as described in § 28.116.

(b) Owners of cotton, other than producers, may receive classification data showing the official quality determination of each sample by means of telecommunications from a central database to be maintained by the Division. The fee for this service shall be determined as described in § 28.116, with all communication charges paid by the receiver of data.

(c) Upon request of an owner of cotton for which classification memoranda have been issued under the subpart, a new memorandum shall be issued for the business convenience of such owner without the reclassification of the cotton. Such rewritten memorandum shall bear the date of its issuance and the date or inclusive dates of the original classification. The per-hour fee for a new memorandum shall be determined according to § 28.116, with a minimum per-sheet fee determined under the same provisions.

■ 11. Amend § 28.911 by revising paragraph (a) and the last sentence in paragraph (b) to read as follows:

§ 28.911 Review classification.

(a) A producer may request one review classification for each bale of eligible cotton. The fee for review

classification shall be determined based on the formulas in § 28.116.

(b) * * * Producers who request return of their samples after classing will pay a fee determined based on the formulas in § 28.116.

PART 29—TOBACCO INSPECTION

■ 12. The authority citation for part 29 is revised to read as follows:

Authority: 7 U.S.C. 511–511s.

■ 13. Amend § 29.123 by:
■ a. Revising the first sentence of paragraph (a);
■ b. Revising paragraph (b);
■ c. Redesignating paragraphs (c), (d), and (e) as paragraphs (d), (e), and (f), respectively;
■ d. Adding new paragraph (c); and
■ e. Revising newly redesignated paragraph (d).

The revisions and addition read as follows:

§ 29.123 Fees and charges.

* * * * *

(a) *Mandatory inspection.* For each year, AMS will calculate the rate for services, per hour per program employee as described in § 29.123(b) and (c). * * *

(b) *Domestic permissive inspection and certification*—(1) *Regular rate.* The total AMS grading, inspection, or sampling program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading, inspection, or sampling program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading, inspection, or sampling program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(4) *Applicability.* The fees in paragraphs (b)(1) through (3) of this section shall be applicable for hogshead, bale cases, or sample inspections.

(c)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading, inspection, or sampling program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS grading, inspection, or sampling program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading, inspection, or sampling program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(d) *Export permissive inspection and certification.* The inspection and certification fee for export tobacco will be determined as described in § 29.123(b) and (c).

* * * * *

■ 14. Amend § 29.500 by revising the first sentence of paragraph (a) and revising paragraphs (b) and (c) to read as follows:

§ 29.500 Fees and charges for inspection and acceptance of imported tobacco.

(a) The fee for inspection of imported tobacco will be determined as described in § 29.123 and shall be paid by the importer. * * *

(b) The fee for sampling, accepting, and certification of imported flue-cured and burley tobacco for prohibited pesticide residues will be determined as described in § 29.123 and shall be paid by the importer.

(c) The fee for accepting imported flue-cured and burley tobacco not accompanied by a certification that it is free of prohibited pesticide residues will be determined as described in § 29.123. Fees for services rendered shall be remitted by check or draft in accordance with a statement issued by the Director, and shall be made payable to ''Agricultural Marketing Service.''

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

■ 15. The authority citation for part 51 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 16. Revise § 51.38 to read as follows:

§ 51.38 Basis for fees and rates.

(a) For each calendar year, AMS will calculate the rate for services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS inspection program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS inspection program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS inspection program operating costs divided by total hours (regular,

overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(c) When an inspection is delayed because product is not available or readily accessible, a charge for waiting time shall be determined using the formulas in this section.

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND OTHER PROCESSED FOOD PRODUCTS

■ 17. The authority citation for part 52 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

§ 52.2 [Amended]

■ 18. Amend § 52.2 by removing the definition of ''In-plant sampler''.

■ 19. Revise § 52.42 to read as follows:

§ 52.42 Schedule of fees.

(a) For each calendar year, AMS will calculate the rate for services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS inspection program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(1) *Benefits rate.* The total AMS inspection program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(2) *Operating rate.* The total AMS inspection program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(3) *Allowance for bad debt rate.* Total AMS inspection program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(c) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

■ 20. Revise § 52.50 to read as follows:

§ 52.50 Travel and other expenses.

Charges may be assessed to cover the cost of travel time incurred in connection with the performance of any inspection service, including appeal inspections, as described in § 52.42. This includes time spent waiting for transportation as well as time spent traveling, but not to exceed eight hours of travel time for any one person for any one day: And provided further, that if travel is by common carrier, no hourly charge may be made for travel time outside the employee's official work hours.

■ 21. Amend § 52.51 by revising paragraphs (a), (b), (c), and (d) to read as follows:

§ 52.51 Charges for inspection services on a contract basis.

(a) The Administrator may enter into contracts with applicants to perform continuous inspection services or other types of inspection services pursuant to the regulations in this part and other requirements as prescribed by the Administrator in such contract, and the charges for such inspection service provided in such contracts shall be based on such basis as will reimburse the Agricultural Marketing Service of the Department for the full cost of rendering such inspection service as described in § 52.42.

(b) The Administrator may enter into a written memorandum of understanding or contract, whichever may be appropriate, with any administrative agency charged with the administration of a marketing agreement or a marketing order effective pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*) for the making of inspections pursuant to said agreement or order on such basis as will reimburse the Agricultural Marketing Service of the Department for the full cost of rendering such inspection service based on the formulas in § 52.42. Likewise, the Administrator may enter into a written memorandum of understanding or contract, whichever may be appropriate, with an administrative agency charged with an administration of a similar program operated pursuant to the laws of any State.

(c) Charges for year-round in-plant inspection services on a contract basis will be billed to the applicant monthly for all hours worked with a minimum of 40 hours per week for each inspector assigned to perform the inspection services. Charges for work performed in excess of an employee's regular work schedule will be calculated as described in § 52.42(a)(2).

(d) Charges for less than year-round in-plant inspection services (four or more consecutive 40 hour weeks) on a contract basis will be billed to the applicant monthly for all hours with a minimum of 40 hours for each inspector assigned to perform the inspection services and will be calculated based on the formulas in § 52.42.

* * * * *

PART 54—MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

■ 22. The authority citation for part 54 continues to read as follows:

Authority: 7 U.S.C. 1621—1627.

§ 54.6 [Amended]

■ 23. Amend § 54.6 in paragraph (c)(2), in the first sentence, by removing the phrase ''as provided in § 54.27(b)'' and adding ''as provided in § 54.27'' in its place.

■ 24. Revise § 54.27 to read as follows:

§ 54.27 Fees and other charges for service.

(a) Fees and other charges equal as nearly as may be to the cost of the services rendered shall be assessed and collected from applicants in accordance

with the following provisions unless otherwise provided in the cooperative agreement under which the services are furnished, or as provided in § 54.6. For each calendar year, AMS will calculate the rate for inspection, grading, or certification services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS grading, inspection, or certification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading, inspection, or certification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading, inspection, or certification program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading, inspection, or certification program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS grading, inspection, or certification program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading, inspection, or certification program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(c) *Fees for service on commitment basis.* Minimum fees for service performed under a commitment agreement or an agreement by memorandum shall be on the basis of 8 hours per day, Monday through Friday, excluding Federal legal holidays occurring Monday through Friday on which no grading and certification services are performed. Fees will be based on the formulas in this section. The Agency reserves the right under such a commitment agreement or agreement by memorandum to use any grader assigned to the plant on a commitment basis to perform service for other applicants, as provided in § 54.6(c), crediting the commitment applicant with the number of hours charged to the other applicant, provided the allowable credit hours plus hours actually worked for the applicants do not exceed 8 hours on any day, Monday through Friday, excluding legal holidays.

(d) *Fees for appeal service.* Fees for appeal service shall be determined on the basis of the time of two official graders required to render the service, including the time required for the preparation of certificates and travel of such graders in connection with the performance of the service. *Provided,* that when on appeal it is found that there was error in the original determination equal to or exceeding ten percent of the total number of similar units of the products involved, no charge will be made for the appeal service unless a special agreement therefor was made with the applicant in advance.

(e) *Fees for extra copies of certificates.* In addition to copies of certificates furnished under § 54.14, any financially interested person may obtain not to exceed three copies of any such certificate within one year from its date of issuance upon payment of a fee, and not to exceed three copies of any such certificate at any time thereafter, while a copy of such certificate is on file in the Department. The fee for copies of certificates will be determined using the formulas in this section.

PART 56—VOLUNTARY GRADING OF SHELL EGGS

■ 25. The authority citation for part 56 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 26. Revise § 56.46 to read as follows:

§ 56.46 On a fee basis.

(a) Unless otherwise provided in this part, the fees to be charged and collected for any service performed, in accordance with this part, on a fee basis shall be based on the applicable formulas specified in this section. For each calendar year or crop year, AMS will calculate the rate for grading or audit services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS grading or audit program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading or audit program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading or audit program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading or audit program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS grading or audit program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading or audit program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(c) Fees for grading services will be based on the time required to perform the services. The hourly charges shall include the time actually required to perform the grading, waiting time, travel time, and any clerical costs involved in issuing a certificate.

(d) Fees for audit services will be based on the time and expenses required to perform the audit. The hourly charge shall include the time actually required to perform the audit, waiting time, travel time, and any clerical costs involved in issuing an audit report.

■ 27. Amend § 56.52 by:

■ a. Revising the introductory text;

■ b. Revising the second sentence of paragraph (a)(1); and

■ c. Revising the first sentence of paragraph (a)(2) introductory text.

The revisions read as follows:

§ 56.52 Charges for continuous grading performed on a resident basis.

Fees to be charged and collected for any grading service, other than for an appeal grading, on a resident grading basis, shall be calculated as described in this part. The fees to be charged for any appeal grading shall be as provided in § 56.47.

(a) * * *

(1) * * * The costs for completing the plant survey shall be borne by the applicant on a fee basis as described in § 56.46. * * *

(2) Charges for the cost of each grader assigned to a plant will be calculated as described in § 56.46, except that no charge will be assessed when the assigned grader is temporarily reassigned by AMS to perform grading service for other than the applicant. * * *

* * * * *

■ 28. Amend § 56.54 by revising the introductory text and paragraph (a)(1) introductory text to read as follows:

§ 56.54 Charges for continuous grading performed on a nonresident basis.

Fees to be charged and collected for grading service on a nonresident grading basis, shall be calculated as described in this part. The fees to be charged for any appeal grading shall be calculated as provided in § 56.47.

(a) * * *

(1) A charge for the salary and other costs, calculated as described in § 56.46, for each grader while assigned to a plant, except that no charge will be made when the assigned grader is temporarily reassigned by AMS to perform grading service for other than the applicant. Charges to plants are as follows:

* * * * *

PART 58—GRADING AND INSPECTION, GENERAL SPECIFICATIONS FOR APPROVED PLANTS AND STANDARDS FOR GRADES OF DAIRY PRODUCTS

■ 29. The authority citation for part 58 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 30. Revise § 58.39 to read as follows:

§ 58.39 Fees for holiday or other nonworktime.

If an applicant requests that inspection or grading service be performed on a holiday, Saturday, or Sunday or in excess of each 8-hour shift Monday through Friday, the applicant shall be charged for such service at a rate determined using the formulas in § 58.43.

■ 31. Revise § 58.43 to read as follows:

§ 58.43 Fees for inspection, grading, sampling, and certification.

(a) Unless otherwise provided in this part, the fees to be charged and collected for any service performed, in accordance with this part, on a fee basis shall be based on the applicable formulas specified in this section. For each calendar year, AMS will calculate the rate for grading, certification, or inspection services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS grading, certification, or inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading, certification, or inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading, certification, or inspection program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(1) *Benefits rate.* The total AMS grading, certification, or inspection program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(2) *Operating rate.* The total AMS grading, certification, or inspection program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(3) *Allowance for bad debt rate.* Total AMS grading, certification, or inspection program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(c) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

■ 32. Revise § 58.45 to read as follows:

§ 58.45 Fees for continuous resident services.

Charges for the inspector(s) and grader(s) assigned to a continuous resident program shall be calculated using the formulas in § 58.43.

PART 62—LIVESTOCK, MEAT AND OTHER AGRICULTURAL COMMODITIES (QUALITY SYSTEMS VERIFICATION PROGRAMS)

■ 33. The authority citation for part 62 is revised to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 34. Revise § 62.300 to read as follows:

§ 62.300 Fees and other costs of service.

(a) For each calendar year, AMS will calculate the rate for quality systems verification services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS quality systems verification program (QSVP) personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS QSVP personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS QSVP personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS QSVP direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS QSVP operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS QSVP allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(c) *Transportation costs.* Applicants are responsible for paying actual travel costs incurred to provide QSVP services including but not limited to: Mileage charges for use of privately owned vehicles, rental vehicles and gas, parking, tolls, and public transportation costs such as airfare, train, and taxi service.

(d) *Per diem costs.* The applicant is responsible for paying per diem costs incurred to provide QSVP services away from the auditor's or USDA officials' official duty station(s). Per diem costs shall be calculated in accordance with existing travel regulations (41 CFR, subtitle F—Federal Travel Regulation System, chapter 301).

(e) *Other costs.* When costs, other than those costs specified in paragraphs (a) through (c) of this section, are involved in providing the QSVP services, the applicant shall be responsible for these costs. The amount of these costs shall be determined administratively by the Chief. However, the applicant will be notified of these costs before the service is rendered.

PART 70—VOLUNTARY GRADING OF POULTRY AND RABBIT PRODUCTS

■ 35. The authority citation for part 70 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 36. Revise § 70.71 to read as follows:

§ 70.71 On a fee basis.

Unless otherwise provided in this part, the fees to be charged and collected for any grading or audit service performed in accordance with this part, on a fee basis shall be based on the applicable formulas specified in this section.

(a) For each calendar year, AMS will calculate the rate for grading and audit services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS grading or audit program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading or audit program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading or audit program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading or audit program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The AMS grading or audit program total operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading or audit program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

(c) Fees for grading services will be based on the time required to perform the services. The hourly charges shall include the time actually required to perform the grading, waiting time, travel time, and any clerical costs involved in issuing a certificate.

(d) Fees for audit services will be based on the time and expenses required to perform the audit. The hourly charge shall include the time actually required to perform the audit, waiting time, travel time, and any clerical costs involved in issuing an audit report.

■ 37. Revise § 70.72 to read as follows:

§ 70.72 Fees for appeal grading or review of a grader's decision.

The costs of an appeal grading, or review of a grader's decision, shall be borne by the appellant on a fee basis at

rates determined based on the formulas in § 70.71. If the appeal grading, or review of a grader's decision discloses that a material error was made in the original determination, no fee or expenses will be charged.

■ 38. Amend § 70.76 by revising the introductory text and the first sentence of paragraph (a)(1) introductory text to read as follows:

§ 70.76 Charges for continuous poultry grading performed on a nonresident basis.

Fees to be charged and collected for grading service on a nonresident grading basis shall be based on the formulas provided in this part. The fees to be charged for any appeal grading shall be as provided in § 70.72.

(a) * * *

(1) A charge for the salary and other costs, based on § 70.71, for each grader while assigned to a plant, except that no charge will be made when the assigned grader is temporarily reassigned by AMS to perform grading service for other than the applicant. * * *

* * * * *

■ 39. Amend § 70.77 by revising the introductory text and paragraphs (a)(1) and (2) to read as follows:

§ 70.77 Charges for continuous poultry or rabbit grading performed on a resident basis.

Fees to be charged and collected for any grading service on a resident grading basis and for an appeal grading shall be determined based on the formulas in § 70.71.

(a) * * *

(1) When a signed application for service has been received, the State supervisor or the supervisor's assistant shall complete a plant survey pursuant to § 70.34. The costs for completing the plant survey shall be borne by the applicant on a fee basis based on the formulas in § 70.71. No charges will be assessed when the application is required because of a change in name or ownership. If service is not installed within 6 months from the date the application is filed, or if service is inactive due to an approved request for removal of a grader(s) for a period of 6 months, the application will be considered terminated, but a new application may be filed at any time. In addition, there will be a charge of $300 if the application is terminated at the request of the applicant for reasons other than for a change in location within 12 months from the date of the inauguration of service.

(2) A charge for the salary and other costs, as specified in this part, for each grader while assigned to a plant, except that no charge will be made when the assigned grader is temporarily reassigned by AMS to perform grading service for other than the applicant.

* * * * *

PART 75—REGULATIONS FOR INSPECTION AND CERTIFICATION OF QUALITY OF AGRICULTURAL AND VEGETABLE SEEDS

■ 40. The authority citation for part 75 continues to read as follows:

Authority: 7 U.S.C. 1622 and 1624.

■ 41. Revise § 75.41 to read as follows:

§ 75.41 General.

Fees and charges for inspection or certification services performed by Federal employees shall cover the cost of performing the service. Fees shall be for actual time required to render the service.

(a) For each calendar year, AMS will calculate the rate for inspection or certification services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS inspection or certification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS inspection or certification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS inspection or certification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(1) *Benefits rate.* The total AMS inspection or certification program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(2) *Operating rate.* The total AMS inspection or certification program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(3) *Allowance for bad debt rate.* Total AMS inspection or certification program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(c) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

■ 42. Amend § 75.42 by revising paragraph (b) to read as follows:

§ 75.42 Sampling and sealing.

* * * * *

(b) When onsite inspection services are performed by Federal employees at the request of the applicant, charges will be based on the formulas in § 75.41.

■ 43. Amend § 75.43 by revising paragraphs (a) and (c) to read as follows:

§ 75.43 Laboratory testing.

* * * * *

(a) Fees assessed based on the formulas in § 75.41.

* * * * *

(c) The fee for a preliminary report issued prior to completion of testing shall be assessed in accordance with paragraph (a) of this section.

PART 91—SERVICES AND GENERAL INFORMATION

■ 44. The authority citation for part 91 continues to read as follows:

Authority: 7 U.S.C. 1622, 1624.

■ 45. Amend § 91.37 by:
■ a. Revising paragraphs (a) and (b);
■ b. Removing paragraph (c); and
■ c. Redesignating paragraphs (d) and (e) as paragraphs (c) and (d), respectively.

The revisions read as follows:

§ 91.37 Standard hourly fee rate for laboratory testing, analysis, and other services.

(a) For each fiscal year, AMS will calculate the rate for laboratory testing, analysis, and other services, per hour per program employee using the following formulas:

(1) *Regular rate.* The total AMS laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(b)(1) For each calendar year, based on previous fiscal year/historical actual costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS laboratory service program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS laboratory service program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS laboratory service program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(2) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most recent Office of Management and Budget's Presidential Economic Assumptions.

* * * * *

■ 46. Amend § 91.38 by revising paragraph (a) to read as follows:

§ 91.38 Additional fees for appeal of analysis.

(a) The applicant for appeal sample testing will be charged a fee based on the formulas in § 91.37.

* * * * *

■ 47. Amend § 91.39 by revising paragraph (a) to read as follows:

§ 91.39 Premium hourly fee rates for overtime and legal holiday service.

(a) When analytical testing in a Science and Technology facility requires the services of laboratory personnel beyond their regularly assigned tour of duty on any day or on a day outside the established schedule, such services are considered as overtime work. When analytical testing in a Science and Technology facility requires the services of laboratory personnel on a Federal holiday or a day designated in lieu of such a holiday, such services are considered holiday work. Laboratory analyses initiated at the request of the applicant to be rendered on Federal holidays, and on an overtime basis will be charged fees based on the formulas in § 91.37.

BILLING CODE 3410–02–P

FEDERAL RESERVE SYSTEM

12 CFR Chapter II

[Docket No. OP–1478]

Policy on Payment System Risk

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Policy statement.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) has adopted revisions to part I of its *Federal Reserve Policy on Payment System Risk* (PSR policy) to reflect the prevailing international standards, the *Principles for Financial Market Infrastructures* (PFMI), which were developed by the Committee on Payment and Settlement Systems (CPSS) and the Technical Committee of the International Organization of Securities Commissions (IOSCO) and published in April 2012, and the supervisory framework for designated financial market utilities (FMUs) established in Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act or Act). The Board also made conforming and technical changes to part I of the PSR policy.

DATES: The Board will be guided by the PSR policy revisions when exercising the authorities discussed therein as of December 31, 2014, with the exception of the following measures, which the Board would expect to be met on or before December 31, 2015: Transparency, set forth in section I.B.2; establishing plans for recovery and orderly wind-down as necessary to meet the expectations of principle 3; establishing rules and procedures that explicitly address uncovered credit losses and liquidity shortfalls as necessary to meet the expectations of principles 4 and 7, respectively; maintaining sufficient liquid net assets funded by equity and a viable plan for raising additional equity as necessary to meet the expectations of principle 15; and managing risks arising in tiered participation arrangements as necessary to meet the expectations of principle 19.

FOR FURTHER INFORMATION CONTACT: Jennifer A. Lucier, Deputy Associate Director (202) 872–7581, Paul Wong, Manager (202) 452–2895, or Emily A. Caron, Senior Financial Services Analyst (202) 452–5261, Division of Reserve Bank Operations and Payment Systems; Christopher W. Clubb, Special Counsel (202) 452–3904, Legal Division; for users of Telecommunications Device for the Deaf (TDD) only, contact (202) 263–4869.

SUPPLEMENTARY INFORMATION:

I. Background

In adopting the PSR policy, the Board's objectives have been to foster the safety and efficiency of payment, clearing, and settlement systems. Part I of the policy sets forth the Board's views, and related principles and minimum standards, regarding the management of risks in and transparency of payment, clearing, and settlement systems, including those operated by the Federal Reserve Banks (Reserve Banks).[1] Part I of the policy incorporates relevant international risk-management standards developed by central banks and market regulators as the baseline for its expectations for payment, clearing, and settlement systems.[2] Part I is not intended to exert

[1] Part II governs the provision of intraday credit in accounts at the Reserve Banks and sets out the general methods used by the Reserve Banks to control their intraday credit exposures.

[2] Prior to this notice, part I of the PSR policy incorporated the international standards for payment, clearing, and settlement systems set out

or create supervisory or regulatory authority over any particular class of institutions or arrangements where the Board does not have such authority.

In January 2014, the Board requested comment on proposed revisions to part I of the PSR policy.[3] The key aspects of the proposal were (1) revising the Board's existing minimum risk-management standards in the PSR policy to reflect the PFMI, which now represents the relevant set of international standards;[4] (2) including all central securities depositories, securities settlement systems, and central counterparties (CCPs) in the scope of part I of the PSR policy; (3) expanding the scope of part I of the PSR policy to include trade repositories; (4) establishing six mutually exclusive categories of financial market infrastructures (FMIs) and clarifying the Board's risk-management expectations for FMIs in each category; (5) replacing the existing self-assessment framework with a broader disclosure expectation; and (6) recognizing responsibility E from the PFMI, in addition to other relevant international guidance, as the basis for cooperation with other authorities in overseeing FMIs. The proposed changes did not affect part II of the PSR policy.

The Board proposed revisions to the policy to incorporate the new international risk-management standards for financial market infrastructures in the PFMI, including the expectation for FMIs to complete the disclosure framework set out in the December 2012 CPSS–IOSCO report on the *Principles for Financial Market Infrastructures: Disclosure Framework and Assessment Methodology* (''disclosure framework'' and ''assessment methodology'').[5] The Board also proposed revisions to the policy to reflect the enhanced supervisory framework for designated FMUs as set forth in Title VIII of the Dodd-Frank Act.[6] In particular, the Board proposed certain revisions that were necessary to clarify that designated FMUs for which the Board is the Supervisory Agency under Title VIII of the Act are required to comply with Regulation HH and not the risk-management or transparency expectations set out in the policy.[7] [8] The public comment period for the proposed revisions closed on March 31, 2014.

II. Summary of Comments and Analysis

The Board received three comment letters that were responsive to the January proposal, all from entities that operate designated FMUs.[9] The Board considered each of the comments on the proposed revisions to the PSR policy in developing its final policy as discussed in more detail below. Except as noted herein, the Board is adopting the policy as proposed.[10]

A. Overall Approach To Incorporating the New Standards

The Board proposed to revise part I of the PSR policy by replacing the existing risk-management standards with the 24 headline standards from the PFMI verbatim. Commenters were generally supportive of the Board's overall approach. One commenter, however, raised two general concerns with respect to the Board's overall approach. The commenter expressed concern that one uniform set of standards that applies to all FMIs and all designs of the same type of FMI does not sufficiently take into account material differences that can be found among the different systems. The commenter also expressed concern that differences in language between the risk-management standards in Regulation HH and in part I of the PSR policy may result in two different sets of risk-management standards for FMIs.

With respect to differences among types of systems, the Board believes that a uniform set of standards is appropriate because, in many instances, FMIs face and must manage certain common risks. Although the design of systems may vary, the flexibility in the standards allows individual FMIs to implement, and supervisors to enforce, the standards appropriately based on the design of and risks that arise in a particular FMI. The Board also believes that a uniform set of standards promotes financial stability because it facilitates effective and consistent risk management across different types of FMIs and markets. For specific risk-management standards in the PSR policy that are applicable only to certain types of FMI, however, those standards are made expressly applicable only to those FMI types (for example, only CCPs are expected to have a risk-based margin system to cover credit risk). For these reasons, the Board continues to believe the overall approach is appropriate.

With respect to the differences in the language between Regulation HH and part I of the PSR policy, the Board continues to believe that such differences are appropriate. Regulation HH is an enforceable rule applicable to designated FMUs other than those supervised by the CFTC or SEC, so additional details from the key considerations and explanatory notes of the PFMI were incorporated in the rule text to provide greater clarity on the Board's expectations. The PSR policy, on the other hand, is a policy statement that provides guidance with respect to the Board's exercise of its other supervisory or regulatory authority over other financial market infrastructures (including those operated by the Federal Reserve Banks) or their participants, its participation in cooperative oversight arrangements for financial market infrastructures, or the provision of intraday credit to eligible Federal

in the CPSS *Core Principles for Systemically Important Payment Systems,* the CPSS–IOSCO *Recommendations for Securities Settlement Systems,* and the CPSS–IOSCO *Recommendations for Central Counterparties,* which are available at *http://www.bis.org/cpmi/publ/d43.pdf*, *http://www.bis.org/cpmi/publ/d46.pdf*, and *http://www.bis.org/cpmi/publ/d64.pdf*, respectively. (Effective September 2014, the CPSS changed its name to the Committee on Payments and Market Infrastructures.)

[5] The CPSS–IOSCO report on the *Principles for Financial Market Infrastructures: Disclosure Framework and Assessment Methodology* is available at *http://www.bis.org/cpmi/publ/d106.pdf.*

[6] The term ''financial market utility'' is defined in Title VIII as ''any person that manages or operates a multilateral system for the purpose of transferring, clearing, or settling payments, securities, or other financial transactions among financial institutions or between financial institutions and the person'' (12 U.S.C. 5462(6)). FMUs are a subset of FMIs; for example, trade repositories are excluded from the definition of a FMU. Pursuant to section 804 of the Dodd-Frank Act, the Financial Stability Oversight Council (Council) is required to designate those FMUs that the Council determines are, or are likely to become, systemically important. Such a designation by the Council makes an FMU subject to the supervisory framework set out in Title VIII of the Dodd-Frank Act.

[7] Concurrent with this final policy statement, the Board is adopting final revisions to Regulation HH that take into consideration the PFMI.

[8] The term ''Supervisory Agency'' is defined in Title VIII as the ''Federal agency that has primary jurisdiction over a designated financial market utility under Federal banking, securities, or commodity futures laws'' (12 U.S.C. 5462(8)). Currently, the Board is the Supervisory Agency for two FMUs that have been designated by the Council—The Clearing House Payments Company, L.L.C., on the basis of its role as operator of the Clearing House Interbank Payments System, and CLS Bank International; these designated FMUs are subject to the Regulation HH risk-management standards promulgated by the Board under section 805(a)(1)(A). The Regulation HH standards also apply to any designated FMU for which another Federal banking agency is the appropriate Title VIII Supervisory Agency. At this time, there are no designated FMUs in this category.

[9] Concurrent with the proposal, the Board issued in a separate **Federal Register** notice a proposal to amend Regulation HH by replacing the existing risk-management standards with a set of standards based on the PFMI and making conforming changes to the definitions (79 FR 3666 (January 22, 2014)). All three commenters addressed the proposed revisions to both part I of the PSR policy and Regulation HH in one letter. Where the commenters addressed specific provisions of Regulation HH that did not appear in the revisions to the PSR policy, the Board addressed those comments only in the notice of final rulemaking for Regulation HH.

[10] In addition, the Board is making several technical edits to the proposed policy. These edits are minor and are not discussed in this notice.

Reserve account holders. Incorporating the headline standards from the PFMI is consistent with the purpose of the document and the Board's long-standing principles-based approach to its PSR policy. Further, the Board will be guided by the key considerations and the explanatory text of the PFMI, as well as its interpretation of the corresponding provisions of Regulation HH, in its application of the PSR policy. The Board does not intend for the differences in language in the two documents to lead to inconsistent policy results.

B. Overall Approach To Applying the Policy

The proposed revised policy stated that the Board sets out its views regarding management of risks in FMIs in part I of the PSR policy in order to encourage these systems and their primary regulators to take the standards in the policy into consideration in the design, operation, monitoring, and assessment of these systems. One commenter stated that the Board should acknowledge in the final PSR policy that if a regulatory agency other than the Board is the Supervisory Agency for a designated FMU, then the Board would consider compliance by the designated FMU with the corresponding PFMI-based regulations of such Supervisory Agency as sufficient.

In carrying out its Title VIII responsibilities, the Board participates in examinations of designated FMUs by other Supervisory Agencies and provides input to those Agencies with respect to the designated FMU's risk-management practices. Although the Supervisory Agency would apply its own rules in assessing the sufficiency of the designated FMU's compliance, the Board's input will be informed by the principles in the PSR policy as well as the Agency's rules and the general framework of Title VIII of the Dodd-Frank Act. Therefore, the Board will maintain the overall approach of the policy as proposed.

C. Governance

Proposed principle 2 stated that an FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders. One commenter noted that public interest considerations is a vague concept, and that private-sector systems should not be required to consider public interest considerations and should focus exclusively on the needs of participants.

The Board believes that taking public interest considerations into account is consistent with the objectives of Title VIII of the Act to promote robust risk management, promote the safety and soundness of the designated FMU, and reduce systemic risks. For example, public interests may include supporting fair and efficient markets because an FMI that creates inefficiencies in the market may drive market participants toward less-safe alternatives that could increase systemic risks. Market transparency is another public interest consideration that may be relevant because, for example, an FMI that provides information to relevant authorities and the public about payment flows may help to identify and reduce sources of systemic risk. For certain FMIs, stability of the broader financial system may be the only relevant public interest consideration. The final policy retains the text of the principle as proposed.

D. Credit Risk

Proposed principle 4 stated that an FMI should measure, monitor, and manage effectively its credit exposures to its participants and the credit exposures arising from its payment, clearing, and settlement processes. The principle also stated that an FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest credit exposure to the CCP in extreme but plausible market conditions (a ''cover 2'' expectation).

One commenter stated that, in setting a ''cover 2'' expectation for a particular FMI, the Board should also consider ''the proportion of the CCP's clearing activities involving products with complex risk profiles as well as the manner in which the CCP manages those risks.'' The commenter asked the Board to confirm that the ''cover 2'' expectation would not be triggered if a CCP has a small amount of activity with a complex risk profile relative to overall activity or if the CCP addresses the added risk incurred, such as through enhanced margin systems. The Board's ''cover 2'' expectation for a particular FMI would depend on all relevant facts and circumstances, including the mix of activities with varying risk profiles. The Board believes that the proposed policy language provides sufficient flexibility and has adopted the text of the principle as proposed.

E. Collateral

Proposed principle 5 stated that an FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks and should set and enforce appropriately conservative haircuts and concentration limits. One commenter supported the flexibility in the wording of the principle and urged that it not be interpreted to exclude the use of equity securities as collateral for equity options. The Board believes that the principle would permit, where appropriate, an FMI to integrate the management of risk from participant positions with the risk from fluctuations in the value of collateral provided by participants. One example would be for a CCP to hold equity securities as collateral for options on those same securities. The final policy retains the text of the principle as proposed.

F. Liquidity Risk

In the proposed policy, the Board defined liquidity risk as ''the risk that a counterparty, whether a participant or other entity, will be unable to meet fully its financial obligations when due, although it may be able to do so in the future.'' The definition went on to explain that an FMI, through its design or operation, may bear or generate liquidity risk in one or more currencies in its payment or settlement process. In this context, liquidity risk may arise between or among the system operator and the participants in the FMI, the system operator and other entities (such as settlement banks, nostro agents, or liquidity providers), the participants in the FMI and other entities, or two or more participants in the FMI.

After further consideration, the Board has added a footnote to the definition of liquidity risk to clarify that the Board believes that deliveries of currency are payments, and FMIs that conduct such activity should consider these deliveries to be payments in the management of liquidity risk. The Board added this footnote to clarify that it does not believe that such deliveries of currency should be treated as physical deliveries under principle 10 in the revised risk-management standards, but rather it would expect an FMI subject to its authority to manage effectively the liquidity risk related to these payments.

G. Settlement Finality

Proposed principle 8 stated that an FMI should provide clear and certain final settlement, at a minimum by the end of the value date. One commenter requested confirmation that the proposed provision would not require an FMI that is a CCP to accelerate its novation of certain noncompetitive transactions, such as backloaded over-the-counter options. The principle applies to an FMI's obligations to deliver funds and other financial instruments, at a minimum, by the end of the value date in accordance with the terms of the underlying contract and does not address the timing of novation. The Board believes that the proposed policy language provides sufficient flexibility, and the final policy retains the text of the principle as proposed.

H. Segregation and Portability

Proposed principle 14 stated that a CCP should have rules and procedures that enable the segregation and portability of positions of a participant's customers and the collateral provided to the CCP with respect to those positions. The Board received two comment letters on this principle that addressed portability and alternative segregation regimes.

Portability. One commenter noted that, while porting positions is a highly desirable result where feasible, there may be scenarios where liquidating positions is preferred. The commenter suggested that the Board allow an FMI to retain broad discretion to liquidate positions promptly where it has determined that timely transfer would not be feasible. The Board interprets the principle, which states that a central counterparty should have rules and procedures that enable the segregation and portability of positions, not to exclude the possibility that liquidation of positions may take place if a timely transfer would not be feasible. The Board believes that the proposed policy language provides sufficient flexibility, and the final policy retains the text of the principle as proposed.

Alternative segregation regimes. One commenter encouraged the Board to state in the policy that different segregation regimes are appropriate for different markets and different classes of market participant. Another commenter requested that the final text of the policy acknowledge the different legal frameworks for cash markets. The Board acknowledges that effective segregation and portability arrangements depend not only on the operational capabilities of the CCP but also on the applicable legal framework. The Board notes that a CCP serving certain cash markets, for example, may operate in a legal regime that offers the same degree of protection for a participant's customers as the segregation and portability approaches addressed in principle 14 of the PFMI. Where an alternative regime exists, the Board will consider the CCP's assessment of whether the applicable legal or regulatory framework achieves the same degree of protection and efficiency for customers that would otherwise be achieved by segregation and portability arrangements at the CCP level. Additionally, the Board will consider whether the CCP's own rules enable the operation of the relevant legal and regulatory framework.

Where alternative segregation and portability arrangements offer the same degree of protection, proposed principle 14 would not prohibit the use of such arrangements. As noted above, the expectation is that an FMI's rules and procedures enable segregation and portability of positions, and the policy does not prescribe a single means by which this could be achieved. The final policy retains the text of the principle as proposed.

I. General Business Risk

Proposed principle 15 stated that an FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialize. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services. Commenters generally supported the principle, but made two specific points that are addressed below.

Treatment of Reserve Bank services under the principle. One commenter stated that the Board should ensure that the requirements with respect to principle 15 in Regulation HH for designated FMUs are the same as those imposed on the equivalent Reserve Bank service. The Board expects that the Fedwire Services will meet or exceed the applicable standards set forth in this policy. The Board will be guided by the key considerations and explanatory notes in the PFMI, including the guidance on central bank-operated systems, as well as its interpretation of the corresponding provisions of Regulation HH, in supervising the Fedwire Services. This expectation is consistent with past practice.

Consistent with the previous international standards, the PFMI recognizes that flexibility in implementation is warranted for central bank-operated systems to meet the objectives of the standards because of central banks' roles as monetary authorities and liquidity providers. As noted in the proposal, the Board will allow flexibility in application of principle 15 on general business risk for the Fedwire Services. A key consideration in principle 15 of the PFMI requires FMIs to maintain viable recovery or orderly wind-down plans that consider general business risk and to hold sufficient liquidity and capital reserves to implement the plans. The Fedwire Services do not face the risk that a business shock would cause the service to wind down in a disorderly manner and disrupt the stability of the financial system. Given the fundamental role of the Fedwire Services in the U.S. financial system, the Federal Reserve would need to consider the impact of sudden or disorderly changes and would need to pursue policies consistent with financial stability and established principles of entering and exiting priced services. Therefore, the Board will not require the Fedwire Services to develop recovery or orderly wind-down plans under principle 3.

In order to foster competition with private-sector FMIs, however, the Board will require the Federal Reserve priced services to hold six months of the Fedwire Funds Service's current operating expenses as liquid financial assets and equity on the pro forma balance sheet used in determining Reserve Bank fees for priced services.[11] [12] This balance sheet is used for imputing costs in the private-sector adjustment factor used to establish Fedwire Funds Service fees.[13] If it is

[11] As required by the Monetary Control Act of 1980, the Board has historically required and will continue to require that the Fedwire Services be operated and priced in a manner that fosters competition, improves the efficiency of the payment mechanism, and lowers costs of these services to society. The Board established a set of pricing principles that governs the schedule of fees for the Federal Reserve priced services, including the Fedwire Services, that is consistent with these objectives. (12 U.S.C. 248a(c)(3); *http://www.federalreserve.gov/paymentsystems/pfs_principles.htm*).

[12] Consistent with the PFMI, the calculation of these current operating expenses would exclude depreciation and amortization expenses.

[13] Federal Reserve priced services fees are set to recover, over the long run, all direct and indirect costs and imputed costs, including financing costs, taxes, and certain other expenses, as well as the return on equity (profit) that would have been earned if a private business provided the services. The imputed costs and imputed profit are collectively referred to as the private-sector adjustment factor. The Board's current method for calculating the private-sector adjustment factor involves developing an estimated Federal Reserve priced services pro forma balance sheet using actual

Continued

necessary to impute additional assets or equity, the incremental cost will be incorporated into the pricing of Fedwire Funds Service fees. In applying the PSR policy, the Board will monitor the implementation of Regulation HH and the final policy for issues of consistency and competitive equity between private-sector systems and the Fedwire Funds Service.

Expectations for certain FMIs that are part of a larger legal entity. An FMI may be one of several business lines of a larger legal entity. As a single legal entity, the firm's equity supports all of the business lines, but the Board's expectations under principle 15 may only apply to one of those business lines. In the proposal, the Board asked whether there are any reasonable methodologies for determining which of the liquid financial assets and equity held at the legal entity level belong to a particular business line. One commenter suggested that separate pro forma balance sheets could be created for a particular business line. After consideration of the comment, the Board believes it may not be useful for certain FMIs to attribute assets and equity to a business line on separate pro forma statements because it may not be possible to ring-fence assets within a legal entity in insolvency. Therefore, consistent with the approach described above for the Fedwire Funds Service and the approach in the final rule for Regulation HH, the Board would allow an FMI to use the assets and equity held at the legal entity level to meet the relevant requirements in principle 15.

J. Tiered Participation Arrangements

Proposed principle 19 stated that an FMI should identify, monitor, and manage the material risks to the FMI arising from tiered participation arrangements. These arrangements are those in which firms that are not members in the FMI (indirect participants) rely on the services provided by members of the FMI (direct participants) to access the FMI's payment, clearing, and settlement facilities. The Board received two comment letters that addressed this proposed principle.

Applicability of the proposed principle. A commenter stated that the Board did not adequately articulate the risk that tiered participation arrangements pose and opposed the principle because it does not believe that it or its participants bear any significant risk from its participants' relationships with their customers. After consideration of the comment and analysis, the Board continues to believe that for certain FMIs, based on the design of their settlement arrangements, material risks could arise from tiered participation arrangements that are borne by the FMI, including by its participants. For example, in an FMI in which a direct participant processes large transaction values on behalf of a large customer such as a large correspondent bank, the failure of the customer could jeopardize the direct participant's ability to meet its obligations to the FMI or to the other participants in the FMI, potentially resulting in liquidity dislocations.

Tiered participation arrangements could also pose other risks to the FMI, including operational risk. For example, an FMI may need to understand how its direct participants manage any spikes in volume submitted to the FMI on behalf of indirect participants. Understanding the potential for spikes in volume will allow the FMI to prepare to have the scalable operational capacity necessary to process those volumes effectively, such that it is able to achieve its service-level objectives.

Therefore, the Board believes that material risks to an FMI, including to its participants, may arise from tiered participation arrangements. The Board expects FMIs to seek to understand the risks associated with the relationships between direct participants and their customers in order to be able to assess whether any material risk to the FMI, including to its other participants, exists. The Board recognizes, however, that certain FMIs, including their participants, may not bear any material risks from these arrangements due to the design of their settlement arrangements or due to the characteristics of the markets they serve. These FMIs should conduct an analysis to support their conclusion.

Expectations for an FMI with respect to tiered participation arrangements. One commenter stated that it is unclear what would actually be expected of an FMI under the proposed principle. The commenter stated that the Board should make clear that it does not expect an FMI that does not bear any risk from its participants or their customers to take any action with respect to principle 19.

The Board expects that an FMI will conduct an analysis to determine whether any material risks arise from tiered participation arrangements that are borne by the FMI, including by its participants as a result of their participation in the FMI. Depending on the nature of their payment, clearing, settlement, or recording activities, FMIs' methodologies for conducting the analysis may differ. For example, some FMIs may choose to gather information about the volume and value of activity processed by direct participants on behalf of indirect participants in the FMI or other relevant information. Where such information would be useful, an FMI may consider defining reasonable thresholds and other factors for gathering the information in order to minimize burden. If the FMI determines that no material risks exist to the FMI, including to its participants, from tiered participation arrangements, the Board would not expect the FMI to take any further action. If material risks are identified, the Board would expect the FMI to take steps to mitigate or manage these risks. The Board does not expect, however, an FMI to manage risks that arise between a direct participant and its customers, but rather only to manage the material risks to the FMI, including to its other participants.

The Board expects that an FMI will review and update its analysis of risks arising from tiered participation arrangements at the earlier of every two years or following material changes to the system design or operations or the environment in which the FMI operates if those changes could affect its analysis. If an FMI's review of its analysis indicates that the FMI faces no material risks from tiered participation arrangements, then no further action would be required.

Duplicative monitoring. One commenter stated that an expectation that an FMI will monitor the risks posed by indirect participants would be costly and duplicative of monitoring activities of regulators and the direct participants in the FMI. After consideration of the comment, the Board continues to believe that monitoring by direct participants or by their supervisors may not fully address all risks that may arise from tiered participation arrangements. Direct participants would likely monitor risks posed to them by their customers but may not consider how their actions to mitigate or manage those risks could affect the FMI, including its other participants. In addition, the supervisory focus for certain direct participants is typically different from that for FMIs, and supervisory monitoring of direct participants also might not take into account the effects of tiered participation arrangements on the FMI, including its other participants. Direct participants in an

priced services assets and liabilities. The remaining components on the balance sheet, such as equity, are imputed as if these services were provided by a publicly traded firm. The capital structure of imputed equity is derived from the market for publicly traded firms, subject to minimum equity constraints consistent with those required by the Federal Deposit Insurance Corporation for a well-capitalized institution.

FMI may also be subject to varying degrees of supervision. Therefore, the onus should be on the FMI to understand the tiered participation arrangements in the system and the impact of these relationships on the FMI, including on its participants.

Scope of the principle. One commenter stated that the Board should expect FMIs to consider material risks arising from tiered participation arrangements only where the indirect participants are known by the FMI, have an agreement binding them to the FMI's rules, or may have a direct connection to the FMI. The Board believes that material risks can originate from arrangements with a range of indirect participants having a range of relationships or arrangements with the FMI. If such arrangements may pose material risks, the FMI should seek to gather information from its direct participants on those arrangements and assess the risks from those arrangements. Therefore, the Board will expect an FMI to understand generally the arrangements between its direct participants and firms that access the services of the FMI through the direct participants, whether or not these firms are bound by some part of the rules or have a direct connection to the FMI.[14] The FMI, however, should focus its analysis on the direct customers of the direct participants and need not extend its analysis to other tiers of customers, such as the customers of the customers of the direct participants.

Conflicts of interest and antitrust issues. One commenter stated that proposed principle 19 raises conflicts of interest and antitrust issues. The commenter stated that collecting data on indirect participation would give the board of directors of the FMI a complete picture of each participant's relationships with its most important customers, which could create a conflict of interest if the FMI's board of directors is made up of representatives of the member banks. The commenter also stated that the proposed principle appeared to require FMIs to encourage indirect participants that are large relative to their direct participants to move to a larger direct participant or become direct participants themselves, which could create antitrust issues if the FMI's actions to meet the principle appear to third parties as an effort by the FMI to favor its owner banks.

The Board believes that conflicts of interest or antitrust issues that may arise from expectations with respect to principle 19 can be avoided through the careful design of the information-gathering and risk-management processes developed by the FMI. First, the FMI's board of directors does not have to see a complete picture of each participant's relationships with its customers. The FMI can put controls in place that would minimize potential conflicts to ensure that information is shared in an appropriate manner that would allow the board of directors to carry out its responsibility for the comprehensive management of risks. Second, the Board does not necessarily expect an FMI to encourage indirect participants that are large relative to their direct participants to move to a larger direct participant or become direct participants themselves. The FMI may choose other methods for mitigating or managing risks arising from tiered participation arrangements. For example, if the FMI is concerned that a direct participant's exposures to its indirect participants could cause it to default to the FMI, the FMI may require the direct participant to provide additional collateral to mitigate the relevant financial risks posed by its relationships with its customers.

The Board has adopted the text of this principle as proposed.

K. Efficiency and Effectiveness

Proposed principle 21 stated that an FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves. One commenter stated that an FMI that does not meet the requirements of its participants and the market it serves or that does not meet its objectives efficiently will not survive in the market. The commenter suggested that the Board remove the principle or redefine efficiency and effectiveness in terms of market judgments.[15]

The Board continues to believe that the expectation for an FMI to be efficient and effective should be included in the policy and that the terms efficiency and effectiveness should not be defined solely in terms of market judgments. The Board agrees with the comment that market forces may encourage an FMI to be efficient and effective, particularly in cases where it has a direct competitor. Many markets for payment, clearing, and settlement services, however, are monopolies or oligopolies. Furthermore, it may be difficult for market participants to determine if a particular FMI is efficient and effective due to imperfect information about the FMI. Therefore, market judgments alone may be insufficient to encourage the FMI to operate efficiently and effectively. The Board has adopted the text of this principle as proposed.

L. Transparency

Proposed principle 23 stated that an FMI should publicly disclose all relevant rules and key procedures. Consistent with the principle, section I.B.2 of the proposed policy sets forth the Board's expectation that FMIs subject to its supervisory authority complete the CPSS–IOSCO disclosure framework and make their disclosure readily available to the public.[16] A commenter stated that certain procedures should not be publicly disclosed because they would help unauthorized persons gain access to the system.

The Board agrees that certain procedures should not be publicly disclosed in detail if such detail would undermine the FMI's safety and soundness. The Board stated in the proposed policy that, although disclosures should be robust, the Board does not expect FMIs to disclose to the public sensitive information that could expose system vulnerabilities or otherwise put the FMI at risk. For example, disclosing the detail included in the FMI's business continuity plan could expose the vulnerabilities of the system, and in this case it would be sufficient to disclose publicly only key highlights of the plan. The Board has adopted the text of the policy as proposed.

M. Compliance Dates

The Board proposed that the revised policy become effective upon publication of the final version in the **Federal Register**. The Board also noted that several of the expectations in the proposed policy were new or heightened and may require additional time to implement, such as up to six months after adoption of the policy. The Board noted that these expectations may include the revised expectations in section I.B.2 on transparency and the expectation to manage risks arising in

[14] For example, some firms may submit transactions or instructions to an FMI directly under the account of a direct participant. In this case, the firm may be bound by the FMI's rules, but the direct participant would be accountable for the firm's performance on its obligations. In other FMIs, indirect participants are not bound by the rules of the FMI and do not have a direct connection to the FMI.

[15] In the NPRM for Regulation HH, the Board explained that efficiency generally encompasses what a designated FMU chooses to do, how it does it, and the resources required by the designated FMU to perform its functions. Effectiveness refers to whether the designated FMU is meeting its goals and objectives, which include the requirements of its participants and the markets it serves.

[16] Designated FMUs are subject to Regulation HH (§ 234.3(a)(23)(iv)) rather than this policy.

tiered participation arrangements under principle 19. New or heightened expectations also included the establishment of plans for recovery and orderly wind-down as necessary to meet the expectations under principle 3; the establishment of rules and procedures that explicitly address uncovered credit losses and liquidity shortfalls as necessary to meet the expectations under principles 4 and 7, respectively; and the maintenance of sufficient liquid net assets funded by equity and a viable plan for raising additional equity as necessary to meet the expectations under principle 15. In the proposal, the Board asked whether there are any other expectations that may require additional time to implement and whether six months is sufficient to implement the changes necessary to meet the expectations.

The Board received three comment letters that addressed the compliance date for the new or heightened expectations proposed in the revised policy. One commenter agreed with the six-month extension. Two commenters stated that a longer extension may be necessary, and one of these suggested that a minimum of 18 months be allowed to meet the expectations in the proposed policy, especially if the expectations under principle 19 on tiered participation arrangements are finalized as proposed.

After consideration of the comments and analysis, the Board is adopting an overall effective date for the PSR policy revisions of December 31, 2014. However, the Board will begin to apply the new or heightened risk-management and transparency expectations as of December 31, 2015. The Board believes that this additional time may be necessary to allow FMIs time to complete their processes and procedures for changes to their rulebooks and to minimize burden on FMIs and the markets they serve. FMIs, however, are encouraged to meet the expectations in the PSR policy as soon as possible.

One commenter also stated that the expectations under proposed principle 20 on links may require additional time to implement because implementation will require extensive cooperation and coordination between FMIs. These expectations, however, are included in the existing PSR policy and are not new or heightened.[17] Therefore, the Board will retain its expectation that FMIs subject to the policy meet principle 20 on the effective date of the final revised PSR policy.

III. Administrative Law Matters

A. Competitive Impact Analysis

The Board has established procedures for assessing the competitive impact of rule or policy changes that have a substantial impact on payment system participants.[18] Under these procedures, the Board will assess whether a change would have a direct and material adverse effect on the ability of other service providers to compete effectively with the Federal Reserve in providing similar services due to differing legal powers or constraints, or due to a dominant market position of the Federal Reserve deriving from such differences. If no reasonable modifications would mitigate the adverse competitive effects, the Board will determine whether the anticipated benefits are significant enough to proceed with the change despite the adverse effects.

This final policy sets forth revised risk-management standards, which are based on the PFMI, for certain FMIs, including the Federal Reserve Bank-operated Fedwire Services. In a separate, related **Federal Register** notice, the Board amended its Regulation HH risk-management standards, which apply to certain designated FMUs as required by Title VIII of the Dodd-Frank Act, based on the PFMI. At least one currently designated FMU that is subject to Regulation HH (The Clearing House Payments Company, L.L.C., with respect to its operation of the Clearing House Interbank Payments System (CHIPS)) competes with the Fedwire Funds Service. One commenter expressed concern that differences in language between the risk-management standards in Regulation HH and in part I of the PSR policy may result in two different sets of risk-management standards for FMUs. The commenter also stated that the Board should ensure that the requirements for designated FMUs in Regulation HH with respect to general business risk in § 234.3(a)(15) should also be imposed on the equivalent Reserve Bank service.

The final revisions to the risk-management and transparency expectations in part I of the PSR policy are consistent with those in final Regulation HH. As discussed above, a different level of detail is required for Regulation HH as compared to part I of the PSR policy. Regulation HH is an enforceable rule applicable to designated FMUs other than those supervised by the CFTC or SEC, so additional details from the key considerations and explanatory notes of the PFMI were incorporated in the rule text to provide greater clarity on the Board's expectations. The PSR policy, on the other hand, is a policy statement that provides guidance with respect to the Board's exercise of its other supervisory or regulatory authority over other financial market infrastructures (including those operated by the Federal Reserve Banks) or their participants, its participation in cooperative oversight arrangements for financial market infrastructures, or the provision of intraday credit to eligible Federal Reserve account holders. Incorporating the headline standards from the PFMI is consistent with the purpose of the document and the Board's long-standing principles-based approach to its PSR policy. The Board will be guided by the key considerations and the explanatory text of the PFMI, as well as its interpretation of the corresponding provisions of Regulation HH, in its application of the PSR policy. The Board does not intend for differences in language in the two documents to lead to inconsistent requirements for Reserve Bank-operated FMIs and their private sector competitors.

The Board recognizes the critical role that the Fedwire Services play in the financial system and is committed to applying risk-management standards to the Reserve Banks' Fedwire Funds Service that are at least as stringent as the applicable Regulation HH standards applied to designated FMUs that provide similar services. The final revisions to part I of the PSR policy provide that the treatment of Reserve Bank systems will be consistent with that of private-sector systems in order to avoid any material adverse effect on the ability of other service providers to compete effectively with the Reserve Banks.

There are, however, several risk-management standards for which flexibility in implementation will be necessary for the Fedwire Services given the Federal Reserve's legal framework and structure and its roles as monetary authority and liquidity provider.[19] The Board does not expect that the difference in approach to implementing

[17] See sections I.C.2.a.xix and I.C.2.b.xi of the existing policy.

[18] These procedures are described in the Board's policy statement ''The Federal Reserve in the Payments System,'' as revised in March 1990 (55 FR 11648 (Mar. 29, 1990)).

[19] These standards include principle 2 on governance, principle 3 on the framework for the comprehensive management of risks, principle 4 on credit risk, principle 5 on collateral, principle 7 on liquidity risk, principle 13 on participant-default rules and procedures, principle 15 on general business risk, and principle 18 on access and participation requirements.

these standards for the Fedwire Funds Service as compared to the requirements for CHIPS would create a significant difference in operating costs for the two entities, with the possible exception of the expectation to hold unencumbered liquid financial assets and equity under principle 15. In order to foster competition with private-sector systems, the Board will incorporate the cost of this requirement into the pricing of the Fedwire Funds Service. As discussed above, although the Fedwire Funds Service does not face the risk that a business shock would cause the service to wind down in a disorderly manner and disrupt the stability of the financial system, in order to foster competition with private-sector systems, the Board will require the Fedwire Funds Service to impute the cost of maintaining liquid assets and equity to cover general business losses, similar to the requirement for designated FMUs in § 234.3(a)(15)(i). The Board will also monitor the implementation of the final policy for issues of consistency and competitive equity between private-sector systems and the Fedwire Funds Service. Therefore, the Board believes the policy will have no material adverse effect on the ability of other service providers to compete effectively with the Reserve Banks.

B. Paperwork Reduction Act Analysis

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506; 5 CFR part 1320, Appendix A.1), the Board reviewed the final policy under the authority delegated to the Board by the Office of Management and Budget. For purposes of calculating burden under the Paperwork Reduction Act, a ''collection of information'' involves 10 or more respondents. Any collection of information addressed to all or a substantial majority of an industry is presumed to involve 10 or more respondents (5 CFR 1320.3(c), 1320.3(c)(4)(ii)). The Board estimates there are fewer than 10 respondents, and these respondents do not represent all or a substantial majority of payment, clearing, and settlement systems. Therefore, no collections of information pursuant to the Paperwork Reduction Act are contained in the final policy.

IV. Federal Reserve Policy On Payment System Risk

Introduction

Financial market infrastructures (FMIs) are critical components of the nation's financial system. FMIs are multilateral systems among participating financial institutions, including the system operator, used for the purposes of clearing, settling, or recording payments, securities, derivatives, or other financial transactions.[1] [2] FMIs include payment systems, central securities depositories, securities settlement systems, central counterparties, and trade repositories. The safety and efficiency of these systems may affect the safety and soundness of U.S. financial institutions and, in many cases, are vital to the financial stability of the United States. Given the importance of FMIs, the Board of Governors of the Federal Reserve System (Board) has developed this policy to set out the Board's views, and related standards, regarding the management of risks that FMIs present to the financial system and to the Federal Reserve Banks (Reserve Banks). In adopting this policy, the Board's objective is to foster the safety and efficiency of payment, clearing, settlement, and recording systems and to promote financial stability, more broadly.

Part I of this policy sets out the Board's views, and related standards, regarding the management of risks in FMIs, including those operated by the Reserve Banks. In setting out its views, the Board seeks to encourage FMIs and their primary regulators to take the standards in this policy into consideration in the design, operation, monitoring, and assessment of these systems. The Board will be guided by this part, in conjunction with relevant laws, regulations, and other Federal Reserve policies, when exercising its supervisory and regulatory authority over FMIs or their participants, providing accounts and services to FMIs, participating in cooperative oversight and similar arrangements for FMIs with other authorities, or providing intraday credit to eligible Federal Reserve account holders. Designated financial market utilities subject to the Board's Regulation HH are not subject to the risk-management or transparency expectations set out in this policy.[3]

[1] This definition is based on the definition provided in the Committee on Payment and Settlement Systems (CPSS) and Technical Committee of the International Organization of Securities Commissions (IOSCO) report on *Principles for Financial Market Infrastructures* (PFMI), April 2012, available at *http://www.bis.org/cpmi/publ/d101a.pdf*. (Effective September 2014, the CPSS changed its name to the Committee on Payments and Market Infrastructures.) Further, an FMI generally embodies one or more of the following characteristics: (1) A multilateral arrangement with three or more participants; (2) a set of rules and procedures, common to all participants, that govern the clearing (comparison and/or netting), settlement, or recording of payments, securities, derivatives, or other financial transactions; (3) a common technical infrastructure for conducting the clearing, settlement, or recording process; and (4) a risk-management or capital structure that takes into account the multilateral dependencies inherent in the system.

[2] The term ''financial institution,'' as used in this policy, refers to a broad array of organizations that engage in financial activity, including depository institutions, securities dealers, and futures commission merchants.

[3] The term ''financial market utility'' is defined in Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) as ''any person that manages or operates a multilateral system for the purpose of transferring, clearing, or settling payments, securities, or other financial transactions among financial institutions or between financial institutions and the person.'' Trade repositories, which the Dodd-Frank Act defines as providing ''facilities for comparison of data respecting the terms of settlement of securities or futures transactions,'' are not included in the term ''financial market utility'' (12 U.S.C. 5462). Financial market utilities are, therefore, a subset of the broader set of entities defined as FMIs. Under Title VIII, the Financial Stability Oversight Council designates certain financial market utilities as

Continued

Part II of this policy governs the provision of intraday credit or ''daylight overdrafts'' in accounts at the Reserve Banks and sets out the general methods used by the Reserve Banks to control their intraday credit exposures.[4] Under this part, the Board recognizes that the Federal Reserve has an important role in providing intraday balances and credit to foster the smooth operation of the payment system. The Reserve Banks provide intraday balances by way of supplying temporary, intraday credit to healthy depository institutions, predominantly through collateralized intraday overdrafts.[5] The Board believes that such a strategy enhances intraday liquidity while controlling risk to the Reserve Banks by providing incentives to collateralize daylight overdrafts. The Board also aims to limit the burden of the policy on healthy depository institutions that use small amounts of intraday credit.

Through this policy, the Board expects financial system participants, including private-sector FMIs and the Reserve Banks, to reduce and control settlement and other systemic risks arising in FMIs, consistent with the smooth operation of the financial system. This policy is also designed to govern the provision of intraday balances and credit while controlling the Reserve Banks' risk by (1) making financial system participants and FMIs aware of the types of basic risks that may arise in the payment, clearing, settlement, or recording process; (2) setting explicit risk-management expectations; (3) promoting appropriate transparency by FMIs to help inform participants and the public; and (4) establishing the policy conditions governing the provision of Federal Reserve intraday credit to eligible account holders. The Board's adoption of this policy in no way diminishes the primary responsibilities of financial system participants to address the risks that may arise through their operation of or participation in FMIs.

Risks in Payment, Clearing, Settlement, and Recording Systems

The basic risks in payment, clearing, settlement, and recording systems may include credit risk, liquidity risk, operational risk, and legal risk. In the context of this policy, these risks are defined as follows:[6]

- Credit risk: The risk that a counterparty, whether a participant or other entity, will be unable to meet fully its financial obligations when due, or at any time in the future.
- Liquidity risk: The risk that a counterparty, whether a participant or other entity, will be unable to meet fully its financial obligations when due, although it may be able to do so in the future. An FMI, through its design or operation, may bear or generate liquidity risk in one or more currencies in its payment or settlement process.[7] In this context, liquidity risk may arise between or among the system operator and the participants in the FMI, the system operator and other entities (such as settlement banks, nostro agents, or liquidity providers), the participants in the FMI and other entities, or two or more participants in the FMI.
- Operational risk: The risk that deficiencies in information systems or internal processes, human errors, management failures, or disruptions from external events will result in the reduction, deterioration, or breakdown of services provided by the FMI.[8]
- Legal risk: The risk of loss from the unexpected or uncertain application of a law or regulation.

These risks also arise between financial institutions as they clear, settle, and record payments and other financial transactions and must be managed by institutions, both individually and collectively.[9]

Further, FMIs may increase, shift, concentrate, or otherwise transform risks in unanticipated ways. FMIs, for example, may pose systemic risk to the financial system because the inability of one or more of its participants to perform as expected may cause other participants to be unable to meet their obligations when due. The failure of one or more of an FMI's participants to settle their payments or other financial transactions as expected, in turn, could create credit or liquidity problems for participants and their customers, the system operator, other financial institutions, and the financial markets the FMI serves. Thus, such a failure might lead ultimately to a disruption in the financial markets more broadly and undermine public confidence in the nation's financial system.

Mitigating the risks that arise in FMIs is especially important because of the interdependencies such systems inherently create among financial institutions. In many cases, interdependencies are a normal part of an FMI's structure or operations. Although they can facilitate the safety and efficiency of the FMI's payment, clearing, settlement, or recording processes, interdependencies can also present an important source or transmission channel of systemic risk. Disruptions can originate from any of the interdependent entities, including the system operator, the participants in the FMI, and other systems, and can spread quickly and widely across markets if the risks that arise among these parties are not adequately measured, monitored, and managed. For example, interdependencies often create complex and time-sensitive transaction and payment flows that, in combination with an FMI's design, can lead to significant demands for intraday credit or liquidity, on either a regular or an extraordinary basis.

The Board recognizes that the Reserve Banks, as settlement institutions, have an important role in providing intraday balances and credit to foster the smooth operation and timely completion of money settlement processes among financial institutions and between financial institutions and FMIs. To the extent that the Reserve Banks are the source of intraday credit, they may face a risk of loss if such intraday credit is not repaid as planned. In addition, measures taken by Reserve Banks to limit their intraday credit exposures

systemically important. The Board's Regulation HH is discussed in section I.B.1.b below.

[4] To assist depository institutions in implementing part II of this policy, the Board has prepared two documents, the *Overview of the Federal Reserve's Payment System Risk Policy* (Overview) and the *Guide to the Federal Reserve's Payment System Risk Policy* (Guide), which are available at *http://www.federalreserve.gov/paymentsystems/psr_relpolicies.htm.* The Overview summarizes the Board's policy on the provision of intraday credit, including net debit caps and daylight overdraft fees, and is intended for use by institutions that incur only small amounts of daylight overdrafts. The Guide explains in detail how these policies apply to different institutions and includes procedures for completing a self-assessment and filing a cap resolution, as well as information on other aspects of the policy.

[5] The term ''depository institution,'' as used in this policy, refers not only to institutions defined as depository institutions in 12 U.S.C. 461(b)(1)(A), but also to U.S. branches and agencies of foreign banking organizations, Edge and agreement corporations, trust companies, and bankers' banks, unless the context indicates a different reading.

[6] The definitions of credit risk, liquidity risk, operational risk, and legal risk are consistent with those presented in the PFMI.

[7] Deliveries of currency are payments, and FMIs that conduct such activity should consider these deliveries to be payments in the management of liquidity risk.

[8] Operational risk also includes physical threats, such as natural disasters and terrorist attacks, and information security threats, such as cyberattacks. Further, deficiencies in information systems or internal processes include errors or delays in processing, system outages, insufficient capacity, fraud, data loss, and leakage.

[9] Several existing regulatory and bank supervision guidelines and policies also are directed at financial institutions' management of the risks posed by interbank payment and settlement activity. For example, the Board's Regulation F (12 CFR part 206) directs insured depository institutions to establish policies and procedures to avoid excessive exposures to any other depository institution, including exposures that may be generated through the clearing and settlement of payments.

may shift some or all of the associated risks to financial institutions and FMIs.

In addition, mitigating the risks that arise in certain FMIs is critical to the areas of monetary policy and banking supervision. The effective implementation of monetary policy, for example, depends on both the orderly settlement of open market operations and the efficient movement of funds throughout the financial system via the financial markets and the FMIs that support those markets. Likewise, supervisory objectives regarding the safety and soundness of financial institutions must take into account the risks FMIs, both in the United States and abroad, pose to financial institutions that participate directly or indirectly in, or provide settlement, custody, or credit services to, such systems.

Part I. Risk Management for Financial Market Infrastructures

This part sets out the Board's views, and related standards, regarding the management of risks in FMIs, including those operated by the Reserve Banks. The Board will be guided by this part, in conjunction with relevant laws, regulations, and other Federal Reserve policies, when exercising its authority in (1) supervising the Reserve Banks under the Federal Reserve Act; (2) supervising state member banks, Edge and agreement corporations, and bank holding companies, including the exercise of authority under the Bank Service Company Act, where applicable; (3) carrying out certain of its responsibilities under Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act); (4) setting or reviewing the terms and conditions for the use of Reserve Bank accounts and services; and (5) developing and applying policies for the provision of intraday liquidity to eligible Reserve Bank account holders. This part will also guide the Board, as appropriate, in its interactions and cooperative efforts with other domestic and foreign authorities that have responsibilities for regulating, supervising, or overseeing FMIs within the scope of this part. The Board's adoption of this policy is not intended to exert or create supervisory or regulatory authority over any particular class of institutions or arrangements where the Board does not have such authority.

A. Scope

FMIs within the scope of part I include public- and private-sector payment systems that expect to settle a daily aggregate gross value of U.S. dollar-denominated transactions exceeding $5 billion on any day during the next 12 months.[10] [11] FMIs within the scope of this part also include central securities depositories, securities settlement systems, central counterparties, and trade repositories irrespective of the value or nature of the transactions processed by the system.[12] These FMIs may be organized, located, or operated within the United States (domestic systems), outside the United States (offshore systems), or both (cross-border systems) and may involve currencies other than the U.S. dollar (non-U.S. dollar systems and multi-currency systems).[13] The scope of the policy also includes any payment system based or operated in the United States that engages in the settlement of non-U.S. dollar transactions if that payment system would be otherwise subject to the policy.[14]

Part I does not apply to market infrastructures such as trading exchanges, trade-execution facilities, or multilateral trade-compression systems. This part is also not intended to apply to bilateral payment, clearing, or settlement relationships, where an FMI is not involved, between financial institutions and their customers, such as traditional correspondent banking and government securities clearing services. The Board believes that these market infrastructures and relationships do not constitute FMIs for purposes of this policy and that risk-management issues associated with these market infrastructures and relationships are more appropriately addressed through other relevant supervisory and regulatory processes.

B. Policy Expectations for Certain Financial Market Infrastructures

This section sets out the Board's views, and related standards, with respect to risk-management and transparency for the subset of FMIs described below in section B.1, including the Reserve Banks' Fedwire Funds Service and Fedwire Securities Service (collectively, Fedwire Services). The Board believes these FMIs should have comprehensive risk management as well as a high degree of transparency.

1. Risk Management

Authorities, including central banks, have promoted sound risk-management practices by developing internationally accepted minimum standards that promote the safety and efficiency of FMIs. Specifically, the Committee on Payment and Settlement Systems (CPSS) and Technical Committee of the International Organization of Securities Commissions (IOSCO) report on *Principles for Financial Market Infrastructures* (PFMI) establishes minimum standards for payment systems that are systemically important, central securities depositories, securities settlement systems, central counterparties, and trade repositories for addressing areas such as legal risk, governance, credit and liquidity risks, general business risk, operational risk, and other types of risk.[15] The PFMI reflects broad market input and has been widely recognized, supported, and endorsed by U.S. authorities, including the Federal Reserve, U.S. Securities and Exchange Commission (SEC), and U.S. Commodity Futures Trading Commission (CFTC). These standards are also part of the Financial Stability Board's (FSB's) Key Standards for Sound Financial Systems.[16]

The Board believes that the implementation of the PFMI by the FMIs within the scope of this section will help promote their safety and

[10] A ''payment system'' is a set of instruments, procedures, and rules for the transfer of funds between or among participants. Payment systems include, but are not limited to, large-value funds transfer systems, automated clearinghouse systems, check clearinghouses, and credit and debit card settlement systems. The scope of this policy also includes payment-versus-payment settlement systems for foreign exchange transactions.

[11] In determining whether it is included in the scope of this policy, a payment system should look at its projected ''next'' twelve-month period. ''Aggregate gross value of U.S. dollar-denominated transactions'' refers to the total dollar value of individual U.S. dollar transactions settled in the payment system, which also represents the sum of total U.S. dollar debits (or credits) to all participants before or in absence of any netting of transactions.

[12] A ''central securities depository'' is an entity that provides securities accounts and central safekeeping services. A ''securities settlement system'' is an entity that enables securities to be transferred and settled by book entry and allows transfers of securities free of or against payment. A ''central counterparty'' is an entity that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer. A ''trade repository'' is an entity that maintains a centralized electronic record of transaction data. These definitions are based on those in the PFMI.

[13] Non-U.S. dollar systems may be of interest to the Board if they are used by U.S. financial institutions or may have the ability to affect financial stability, more broadly.

[14] The daily gross value threshold will be calculated on a U.S. dollar equivalent basis.

[15] In addition to these risk-management standards, the PFMI sets out responsibilities for authorities for FMIs, including central banks, in order to provide for effective regulation, supervision, and oversight of FMIs.

[16] The FSB's Key Standards for Sound Financial Systems are available at *http://www.financialstabilityboard.org/cos/key_standards.htm*. The FSB is an international forum that was established to develop and promote the implementation of effective regulatory, supervisory and other financial sector policies. The FSB includes the U.S. Department of the Treasury, the Board, and the SEC.

efficiency in the financial system and foster greater financial stability in the domestic and global economy. Accordingly, the Board has incorporated into the PSR policy principles 1 through 24 from the PFMI, as set forth in the appendix.[17] In applying part I of this policy, the Board will be guided by the key considerations and explanatory notes from the PFMI as well as its interpretation of the corresponding provisions of Regulation HH.[18]

a. Fedwire Services

The Board recognizes the critical role the Reserve Banks' Fedwire Services play in the financial system and requires them to meet or exceed the standards set forth in the appendix to this policy, consistent with the guidance on central bank-operated systems provided in the PFMI and with the requirements in the Monetary Control Act.[19]

b. Designated Financial Market Utilities for Which the Board is the Supervisory Agency Under Title VIII of the Dodd-Frank Act

The Board's Regulation HH imposes risk-management standards applicable to a designated financial market utility for which the Board is the Supervisory Agency.[20] The risk-management standards in Regulation HH are based on the PFMI. As required under Title VIII of the Dodd-Frank Act, the risk-management standards seek to promote robust risk management, promote safety and soundness, reduce systemic risks, and support the stability of the broader financial system. Designated financial market utilities for which the Board is the Supervisory Agency are required to comply with the risk-management standards in Regulation HH and are not subject to the standards in the appendix.

c. Other Financial Market Infrastructures That are Subject to the Board's Supervisory Authority Under the Federal Reserve Act

The Board expects all other FMIs that are subject to its supervisory authority under the Federal Reserve Act, including FMIs that are members of the Federal Reserve System, to meet or exceed the risk-management standards in the appendix.

d. All Other Central Securities Depositories, Securities Settlement Systems, Central Counterparties, and Trade Repositories

The Board encourages all other central securities depositories, securities settlement systems, central counterparties, and trade repositories, whether they are located within or outside the United States, to meet or exceed the risk-management standards in the appendix to this policy. Where the Board does not have authority over a central securities depository, securities settlement system, central counterparty, or trade repository, the Board will be guided by this policy in its cooperative efforts with other FMI authorities.

e. Other Systemically Important Offshore and Cross-Border Payment Systems

The Board encourages systemically important offshore and cross-border payment systems that are not included in any of the categories above to meet or exceed the risk-management standards in the appendix to this policy.[21] The Board will be guided by this policy in its cooperative efforts with other payment system authorities.

2. Transparency

Transparency helps ensure that relevant information is provided to an FMI's participants, authorities, and the public to inform sound decisionmaking, improve risk management, enable market discipline, and foster confidence in markets more broadly. In particular, public disclosures play a critical role in allowing current and prospective participants, as well as other stakeholders, to understand an FMI's operations and the risks associated with using its services and to manage more effectively their risks with respect to the FMI. The Board believes that FMIs are well-positioned to provide the information necessary to support greater market transparency and to maintain financial stability.

The Board expects an FMI that is subject to its supervisory authority, but not subject to Regulation HH, to disclose to its participants information about the risks and costs that they incur by participating in the FMI, consistent with the requirements in principle 23 in the appendix.[22] At a minimum, the FMI should disclose to its participants overviews of the FMI's system design and operations, rules and key procedures, key highlights of business continuity arrangements, fees and other material costs, aggregate transaction volumes and values, levels of financial resources that can be used to cover participant defaults, and other information that would facilitate its participants' understanding of the FMI and its operations and their evaluation of the risks associated with using that FMI.

In addition, the Board expects such an FMI to complete the disclosure framework set forth in the CPSS–IOSCO *Principles for Financial Market Infrastructures: Disclosure Framework and Assessment Methodology* (''disclosure framework'' and ''assessment methodology'').[23] The disclosure framework establishes the international baseline set of information that all FMIs are expected to disclose publicly and review regularly.[24] An FMI is encouraged to use the guiding questions in the assessment methodology to guide the content and level of detail in their disclosures. The Board expects each FMI to make its disclosure readily available to the public, such as by posting it on the FMI's public Web site, to achieve maximum transparency.

To ensure each FMI's accountability for the accuracy and completeness of its disclosure, the Board expects the FMI's

[17] The Board's Regulation HH contains risk-management standards that are based on the PFMI for certain designated financial market utilities. Regulation HH (12 CFR part 234) is available at *http://www.federalreserve.gov/bankinforeg/reglisting.htm#HH.*

[18] The Board will also look to the CPSS–IOSCO *Principles for Financial Market Infrastructures: Disclosure Framework and Assessment Methodology,* which is available at *http://www.bis.org/cpmi/publ/d106.pdf,* and other related documents.

[19] Certain standards may require flexibility in the way they are applied to central bank-operated systems because of central banks' unique role in the financial markets and their public responsibilities. These principles include principle 2 on governance, principle 3 on the framework for the comprehensive management of risks, principle 4 on credit risk, principle 5 on collateral, principle 7 on liquidity risk, principle 13 on participant-default rules and procedures, principle 15 on general business risk, and principle 18 on access and participation requirements. For instance, the Reserve Banks should refer to part II of this policy for managing their credit risk arising from the provision of intraday credit to users of the Fedwire Services.

[20] The term ''Supervisory Agency'' is defined in Title VIII as the ''Federal agency that has primary jurisdiction over a designated financial market utility under Federal banking, securities, or commodity futures laws'' (12 U.S.C. 5462(8)). Under Title VIII, the Board must prescribe risk-management standards for designated financial market utilities for which the Board or another Federal banking agency is the appropriate Supervisory Agency (12 U.S.C. 5464(a)). There are currently no designated financial market utilities for which another federal banking agency is the Supervisory Agency.

[21] These systems may be used by U.S. financial institutions, clear or settle U.S. dollars, or have the ability to affect financial stability, more broadly.

[22] The Board's Regulation HH imposes an equivalent public disclosure requirement.

[23] See CPSS–IOSCO, *Principles for Financial Market Infrastructures: Disclosure Framework and Assessment Methodology,* December 2012, available at *http://www.bis.org/cpmi/publ/d106.pdf.*

[24] Although the Board expects disclosures to be robust, it does not expect FMIs to disclose to the public sensitive information that could expose system vulnerabilities or otherwise put the FMI at risk (for example, specific business continuity plans).

senior management and board of directors to review and approve each disclosure upon completion. Further, in order for an FMI's disclosure to reflect its current rules, procedures, and operations, the Board expects the FMI to update the relevant parts of its disclosure following changes to the FMI or the environment in which it operates, which would significantly change the accuracy of the statements in its disclosure. At a minimum, the FMI is expected to review and update as warranted its disclosure every two years.

As part of its ongoing oversight of FMIs, the Board will review public disclosures by FMIs subject to its supervisory authority to ensure that the Board's policy objectives and expectations are being met.[25] Where necessary, the Board will provide feedback to the FMIs regarding the content of these disclosures and their effectiveness in achieving the policy objectives discussed above.[26] The Board acknowledges that FMIs vary in terms of the scope of instruments they settle and markets they serve. It also recognizes that FMIs may operate under different legal and regulatory constraints, charters, and corporate structures. The Board will consider these factors when reviewing the disclosures and in evaluating how an FMI addresses a particular standard. Where the Board does not have statutory or exclusive authority over an FMI, it will be guided by this policy in cooperative efforts with other domestic or foreign authorities to promote comprehensive disclosures by FMIs as a means to achieve greater safety and efficiency in the financial system.

C. General Policy Expectations for Other Payment Systems Within the Scope of the Policy

The Board encourages payment systems within the scope of this policy, but that are not included in any of the categories in section B above, to implement a general risk-management framework appropriate for the risks the payment system poses to the system operator, system participants, and other relevant parties as well as the financial system more broadly.

1. Establishment of a Risk-Management Framework

A risk-management framework is the set of objectives, policies, arrangements, procedures, and resources that a system employs to limit and manage risk. Although there are a number of ways to structure a sound risk-management framework, all frameworks should

a. identify risks clearly and set sound risk-management objectives;

b. establish sound governance arrangements to oversee the risk-management framework;

c. establish clear and appropriate rules and procedures to carry out the risk-management objectives; and

d. employ the resources necessary to achieve the system's risk-management objectives and implement effectively its rules and procedures.

a. Identify Risks Clearly and Set Sound Risk-Management Objectives

The first element of a sound risk-management framework is the clear identification of all risks that have the potential to arise in or result from the system's settlement process and the development of clear and transparent objectives regarding the system's tolerance for and management of such risks. System operators should identify the forms of risk present in their system's settlement process as well as the parties posing and bearing each risk. In particular, system operators should identify the risks posed to and borne by them, the system participants, and other key parties such as a system's settlement banks, custody banks, and third-party service providers. System operators should also analyze whether risks might be imposed on other external parties and the financial system more broadly.

In addition, system operators should analyze how risk is transformed or concentrated by the settlement process. System operators should also consider the possibility that attempts to limit one type of risk could lead to an increase in another type of risk. Moreover, system operators should be aware of risks that might be unique to certain instruments, participants, or market practices. Where payment systems have inter-relationships with or dependencies on other FMIs, system operators should also analyze whether and to what extent any cross-system risks exist and who bears them.

Using their clear identification of risks, system operators should establish the risk tolerance of the system, including the levels of risk exposure that are acceptable to the system operator, system participants, and other relevant parties. System operators should then set risk-management objectives that clearly allocate acceptable risks among the relevant parties and set out strategies to manage this risk. Risk-management objectives should be consistent with the objectives of this policy, the system's business purposes, and the type of payment instruments and markets for which the system clears and settles. Risk-management objectives should also be communicated to and understood by both the system operator's staff and system participants.

System operators should reevaluate their risks in conjunction with any major changes in the settlement process or operations, the transactions settled, the system's rules or procedures, or the relevant legal and market environments. System operators should review the risk-management objectives regularly to ensure that they are appropriate for the risks posed by the system, continue to be aligned with the system's purposes, remain consistent with this policy, and are being effectively adhered to by the system operator and participants.

b. Establish Sound Governance Arrangements To Oversee the Risk-Management Framework

Systems should have sound governance arrangements to implement and oversee their risk-management frameworks. The responsibility for sound governance rests with a system operator's board of directors or similar body and with the system operator's senior management. Governance structures and processes should be transparent; enable the establishment of clear risk-management objectives; set and enforce clear lines of responsibility and accountability for achieving these objectives; ensure that there is appropriate oversight of the risk-management process; and enable the effective use of information reported by the system operator's management, internal auditors, and external auditors to monitor the performance of the risk-management process.[27] Individuals responsible for governance should be qualified for their positions, understand their responsibilities, and understand their system's risk-management framework. Governance arrangements should also ensure that risk-management information is shared in forms, and at times, that allow

[25] Any review of a disclosure by the Board should not be viewed as an approval or guarantee of the accuracy of an FMI's disclosure. Without the express approval of the Board, an FMI may not state that its disclosure has been reviewed, endorsed, approved, or otherwise not objected to by the Board.

[26] If the Board materially disagrees with the content of an FMI's disclosure, it will communicate its concerns to the FMI's senior management and possibly to its board of directors, as appropriate. The Board may also discuss its concerns with other relevant authorities, as appropriate.

[27] The risk-management and internal audit functions should also be independent of those responsible for day-to-day functions.

individuals responsible for governance to fulfill their duties effectively.

c. Establish Clear and Appropriate Rules and Procedures To Carry out the Risk-Management Objectives

Systems should have rules and procedures that are appropriate and sufficient to carry out the system's risk-management objectives and that are consistent with its legal framework. Such rules and procedures should specify the respective responsibilities of the system operator, system participants, and other relevant parties. Rules and procedures should establish the key features of a system's settlement and risk-management design and specify clear and transparent crisis management procedures and settlement failure procedures, if applicable.[28]

d. Employ the Resources Necessary To Achieve the System's Risk-Management Objectives and Implement Effectively its Rules and Procedures

System operators should ensure that the appropriate resources and processes are in place to allow the system to achieve its risk-management objectives and implement effectively its rules and procedures. In particular, the system operator's staff should have the appropriate skills, information, and tools to apply the system's rules and procedures and achieve the system's risk-management objectives. System operators should also ensure that their facilities and contingency arrangements, including any information system resources, are sufficient to meet their risk-management objectives.

2. Other Considerations for a Risk-Management Framework

Payment systems differ widely in form, function, scale, and scope of activities, and these characteristics result in differing combinations and levels of risks. Thus, the exact features of a system's risk-management framework should be tailored to the risks of that system. The specific features of a risk-management framework may entail tradeoffs between efficiency and risk reduction, and payment systems will need to consider these tradeoffs when designing appropriate rules and procedures. In considering such tradeoffs, however, it is critically important that system operators take into account the costs and risks that may be imposed on all relevant parties, including parties with no direct role in the system. Furthermore, in light of rapidly evolving technologies and risk-management practices, the Board encourages all system operators to consider making risk-management improvements when cost-effective.

The Board may seek to understand how a system achieves the four elements of a sound risk-management framework set out above. In this context, the Board may seek to obtain information from system operators regarding their risk-management framework, risk-management objectives, rules and procedures, significant legal analyses, general risk analyses, analyses of the credit and liquidity effects of settlement disruptions, business continuity plans, crisis management procedures, and other relevant documentation.[29] The Board also may seek to obtain data or statistics on system activity on an ad hoc or ongoing basis. All information provided to the Federal Reserve for the purposes of this policy will be handled in accordance with all applicable Federal Reserve policies on information security, confidentiality, and conflicts of interest.

D. Cooperation With Other Authorities in Regulating, Supervising, and Overseeing Financial Market Infrastructures

When the Board does not have statutory or exclusive authority over an FMI covered by this policy, this section will guide the Board, as appropriate, in its interactions with other domestic and foreign authorities to promote effective risk management in and transparency by FMIs. For example, the Federal Reserve may have an interest in the safety and efficiency of FMIs outside the United States that are subject to regulation, supervision, or oversight by another authority but that provide services to financial institutions supervised by the Board or conduct activity that involves the U.S. dollar.[30] In its interactions with other domestic and foreign authorities, the Board will encourage these authorities to adopt and to apply the internationally accepted principles set forth in the appendix when evaluating the risks posed by and to FMIs and individual system participants that these authorities regulate, supervise, or oversee.

In working with other authorities, the Board will seek to establish arrangements for effective and practical cooperation that promote sound risk-management outcomes. The Board believes that cooperative arrangements among relevant authorities can be an effective mechanism for, among other things, (1) sharing relevant information concerning the policies, procedures, and operations of an FMI; (2) sharing supervisory views regarding an FMI; (3) discussing and promoting the application of robust risk-management standards; and (4) serving as a forum for effective communication, coordination, and consultation during normal circumstances, as well as periods of market stress.

When establishing such cooperative arrangements, the Board will be guided, as appropriate, by international principles on cooperative arrangements for the regulation, supervision, and oversight of FMIs. In particular, responsibility E in the PFMI addresses domestic and international cooperation among central banks, market regulators, and other relevant authorities and provides guidance to these entities for supporting each other in fulfilling their respective mandates with respect to FMIs. The CPSS report on *Central Bank Oversight of Payment and Settlement Systems* also provides important guidance on international cooperation among central banks.[31] The Board believes this international guidance provides important frameworks for cooperating and coordinating with other authorities to address risks in domestic, cross-border, multi-currency, and, where appropriate, offshore FMIs.

Part II. Federal Reserve Intraday Credit Policies

[No change to existing part II of the policy.]

Appendix—CPSS–IOSCO Principles for Financial Market Infrastructures

Principle 1: Legal basis

An FMI should have a well-founded, clear, transparent, and enforceable legal

[28] Examples of key features that might be specified in a system's rules and procedures are controls to limit participant-based risks, such as membership criteria based on participants' financial and operational health; limits on credit exposures; and the procedures and resources to liquidate collateral. Other examples of key features might be business continuity requirements and loss-allocation procedures.

[29] To facilitate analysis of settlement disruptions, systems may need to develop the capability to simulate credit and liquidity effects on participants and on the system resulting from one or more participant defaults, or other possible sources of settlement disruption. Such simulations may need to include, if appropriate, the effects of changes in market prices, volatilities, or other factors.

[30] An FMI may be subject to supervision or oversight by the Board and other authorities, as a result of its legal framework, operating structure (for example, multi-currency or cross-border systems), or participant base. In such cases, the Board will be sensitive to the potential for duplicative or conflicting requirements, oversight gaps, or unnecessary costs and burdens imposed on the FMI.

[31] See *Central Bank Oversight of Payment and Settlement Systems,* part B on ''Principles for international cooperative oversight,'' May 2005, available at *http://www.bis.org/cpmi/publ/d68.pdf.*

basis for each material aspect of its activities in all relevant jurisdictions.

Principle 2: Governance

An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.

Principle 3: Framework for the Comprehensive Management of Risks

An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.

Principle 4: Credit Risk

An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a central counterparty that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the central counterparty in extreme but plausible market conditions. All other central counterparties should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate credit exposure to the central counterparty in extreme but plausible market conditions.

Principle 5: Collateral

An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.

Principle 6: Margin

A central counterparty should cover its credit exposures to its participants for all products through an effective margin system that is risk-based and regularly reviewed.

Principle 7: Liquidity Risk

An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.

Principle 8: Settlement Ginality

An FMI should provide clear and certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.

Principle 9: Money Settlements

An FMI should conduct its money settlements in central bank money where practical and available. If central bank money is not used, an FMI should minimize and strictly control the credit and liquidity risk arising from the use of commercial bank money.

Principle 10: Physical Deliveries

An FMI should clearly state its obligations with respect to the delivery of physical instruments or commodities and should identify, monitor, and manage the risks associated with such physical deliveries.

Principle 11: Central Securities Depositories

A central securities depository should have appropriate rules and procedures to help ensure the integrity of securities issues and minimize and manage the risks associated with the safekeeping and transfer of securities. A central securities depository should maintain securities in an immobilized or dematerialized form for their transfer by book entry.

Principle 12: Exchange-of-Value Settlement Systems

If an FMI settles transactions that involve the settlement of two linked obligations (for example, securities or foreign exchange transactions), it should eliminate principal risk by conditioning the final settlement of one obligation upon the final settlement of the other.

Principle 13: Participant-Default Rules and Procedures

An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.

Principle 14: Segregation and Portability

A central counterparty should have rules and procedures that enable the segregation and portability of positions of a participant's customers and the collateral provided to the central counterparty with respect to those positions.

Principle 15: General Business Risk

An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialize. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.

Principle 16: Custody and Investment Risks

An FMI should safeguard its own and its participants' assets and minimize the risk of loss on and delay in access to these assets. An FMI's investments should be in instruments with minimal credit, market, and liquidity risks.

Principle 17: Operational Risk

An FMI should identify the plausible sources of operational risk, both internal and external, and mitigate their impact through the use of appropriate systems, policies, procedures, and controls. Systems should be designed to ensure a high degree of security and operational reliability and should have adequate, scalable capacity. Business continuity management should aim for timely recovery of operations and fulfilment of the FMI's obligations, including in the event of a wide-scale or major disruption.

Principle 18: Access and Participation Requirements

An FMI should have objective, risk-based, and publicly disclosed criteria for participation, which permit fair and open access.

Principle 19: Tiered Participation Arrangements

An FMI should identify, monitor, and manage the material risks to the FMI

arising from tiered participation arrangements.

Principle 20: FMI Links

An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.

Principle 21: Efficiency and Effectiveness

An FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves.

Principle 22: Communication Procedures and Standards

An FMI should use, or at a minimum accommodate, relevant internationally accepted communication procedures and standards in order to facilitate efficient payment, clearing, settlement, and recording.

Principle 23: Disclosure of Rules, Key Procedures, and Market Data

An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.

Principle 24: Disclosure of Market Data by Trade Repositories

A trade repository should provide timely and accurate data to relevant authorities and the public in line with their respective needs.

By order of the Board of Governors of the Federal Reserve System, November 6, 2014.

Robert deV. Frierson,

Secretary of the Board.

[FR Doc. 2014–26791 Filed 11–12–14; 8:45 am]

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2014–0437; Directorate Identifier 2012–CE–036–AD; Amendment 39–18019; AD 2014–23–03]

RIN 2120–AA64

Airworthiness Directives; Piper Aircraft, Inc.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 76–06–09 for certain Piper Aircraft, Inc. Model PA–31P airplanes. AD 76–06–09 required repetitive inspection of certain exhaust system parts with replacement of parts mating with the turbocharger, as necessary, and allowed installation of a certain tailpipe v-band coupling as terminating action. This new AD requires the use of new service information and expands the scope of the inspections of the turbocharger exhaust system. This AD was prompted by reports of exhaust system failures, new service information, and the tailpipe v-band coupling used for terminating action is obsolete. We are issuing this AD to correct the unsafe condition on these products.

DATES: This AD is effective December 18, 2014.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 18, 2014.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of July 17, 2013 (78 FR 35110, June 12, 2013).

ADDRESSES: For service information identified in this AD, contact Piper Aircraft, Inc., 2926 Piper Drive, Vero Beach, Florida 32960; telephone: (772) 567–4361; fax: (772) 978–6573; Internet: *www.piper.com/home/pages/Publications.cfm;* or Lycoming Engines, 652 Oliver Street, Williamsport, Pennsylvania 17701; telephone: (570) 323–6181; Internet: *http://www.lycoming.textron.com/support/publications/index.html;* as applicable. You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*by searching for and locating Docket No. FAA–2014–0437; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Gary Wechsler, Aerospace Engineer, Atlanta Aircraft Certification Office, FAA, 1701 Columbia Avenue, College Park, Georgia 30337; telephone: (404) 474–5575; fax: (404) 474–5606; email: *gary.wechsler@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 76–06–09, Amendment 39–3325 (43 FR 50417, October 30, 1978), (''AD 76–06–09''). AD 76–06–09 applied to certain Piper Aircraft, Inc. Model PA–31P airplanes. The NPRM published in the **Federal Register** on July 9, 2014 (79 FR 38806). The NPRM was prompted by reports of exhaust system failure. The NPRM proposed to retain certain requirements of AD 76–06–09. The NPRM also proposed to require the use of the new service information and expand the scope of the inspections of the turbocharger exhaust system. We are issuing this AD to correct the unsafe condition on these products.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (79 FR 38806, July 9, 2014) or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (79 FR 38806, July 9, 2014) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (79 FR 38806, July 9, 2014).

Costs of Compliance

We estimate that this AD affects 85 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Visual inspection	3 work-hours × $85 per hour = $255	Not applicable	$255	$21,675
Review of maintenance records.	.5 work-hour × $85 per hour = $42.50	Not applicable	42.50	3,612.50

We have no way of determining how much damage may be found on each airplane during the inspection. The scope of damage on the exhaust system could vary from airplane to airplane due to the manner and environments the airplane may operate. We estimate the following costs to do any necessary modification, installation, and/or replacement that would be required based on the results of the inspection. We have no way of determining what damage may be found or the number of airplanes that might need the modification, installation, and/or replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Modification of the exhaust pipe slip joint	5 work-hours × $85 per hour = $425	$2,841	$3,266
Installation of the bracket and clamp assembly	5 work-hours × $85 per hour = $425	5,000	5,425
Replacement of v-band coupling	2 work-hours × $85 per hour = $170	780	950

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 76–06–09, Amendment 39–3325 (43 FR 50417, October 30, 1978), and adding the following new AD:

2014–23–03 Piper Aircraft, Inc.: Amendment 39–18019; Docket No. FAA–2014–0437; Directorate Identifier 2012–CE–036–AD.

(a) Effective Date

This AD is effective December 18, 2014.

(b) Affected ADs

This AD supersedes AD 76–06–09, Amendment 39–3325 (43 FR 50417, October 30, 1978).

(c) Applicability

This AD applies to Piper Aircraft, Inc. Model PA–31P airplanes, serial numbers 31P–1 through 31P–80 and 31P–7300110 through 31P–7730012, that are certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC)/ Air Transport Association (ATA) of America Code 78, Engine Exhaust.

(e) Unsafe Condition

This AD was prompted by reports of exhaust system failures, new service information issued by the manufacturer, and the tailpipe v-band coupling used for terminating action is obsolete. We are issuing this AD to prevent the possibility of an in-flight powerplant fire due to an exhaust system failure.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection of Exhaust System

(1) Within the next 60 hours time-in-service (TIS) after December 18, 2014(the effective date of this AD) or within the next 6 months after December 18, 2014 (the effective date of this AD), whichever occurs first, and repetitively thereafter at intervals not to exceed 60 hours TIS or 6 months, whichever occurs first, inspect the parts as specified in table 1 of paragraph (g)(1) of this AD, if installed.

TABLE 1 OF PARAGRAPH (g)(1) OF THIS AD: INSPECTION FOR PIPER AND LYCOMING EXHAUST SYSTEM PARTS

Product/part nomenclature	Make	Model/part No.	With a light and mirror or other method capable of achieving an equivalent visual resolution, inspect for the following conditions
Airplane	Piper	PA–31P	
Engine	Lycoming	TIGO–541–E series	
Pipe, exhaust, right-rear	Lycoming	78012	Bulges, cracks, and exhaust leak stains.
Pipe, exhaust, left-rear	Lycoming	78008	Bulges, cracks, and exhaust leak stains.
Pipe, rear exhaust adapter	Lycoming	LW–13027	Bulges, cracks, and exhaust leak stains.
Tail pipe assembly, upper	Piper	46323–05	Bulges, cracks, and exhaust leak stains.
Tail pipe assembly, lower	Piper	48788–05	Bulges, cracks, and exhaust leak stains.
V-band coupling	Lycoming	LW–12093–5	Cracks and exhaust leak stains.
V-band coupling	Piper	555–366 or 557–369	Cracks and exhaust leak stains.
Isolator (CA–3383–1)	Piper	467–442	Cracks, looseness, and distortion.
Bracket—isolator, upper	Piper	47014–02	Cracks, looseness, and distortion.
Bracket—isolator, lower	Piper	47013–02	Cracks, looseness, and distortion.

(2) If any damage is found in any inspection required in paragraph (g)(1) of this AD, before further flight, do the corrective actions, as applicable, in paragraphs (g)(2)(i) through (g)(2)(iv).

(i) Replace Piper v-band couplings exhibiting cracks and/or exhaust leak stains with airworthy parts following Piper Aircraft, Inc. Mandatory Service Bulletin No. 644E, dated May 9, 2012. Replace Lycoming v-band couplings exhibiting cracks and/or exhaust leak stains with airworthy parts following Lycoming Service Instruction No. 1238B, Revision B, dated January 6, 2010.

Note to paragraphs (g)(2)(i) and (h)(2)(iii): During replacement of v-band couplings, we recommend not opening the v-band coupling more than the MINIMUM diameter necessary to clear coupled flanges. It is recommended to replace any locknuts and/or mating couplings with airworthy parts when locknuts do not exhibit a prevailing torque when installed.

(ii) Replace Lycoming exhaust system parts exhibiting bulges, cracks, and/or exhaust leak stains with airworthy parts following Lycoming Service Instruction No. 1320, dated March 7, 1975; or Textron Lycoming Service Instruction No. 1391, dated October 5, 1979, as applicable.

(iii) Replace Piper tail pipe assembly parts exhibiting bulges, cracks, and/or exhaust leak stains with airworthy parts following Piper Aircraft, Inc. Mandatory Service Bulletin No. 644E, dated May 9, 2012.

(iv) Replace Piper isolators and brackets exhibiting cracks, looseness and/or distortion following Piper Aircraft Corporation Service Bulletin No. 462A, dated November 3, 1975; and Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012.

(h) Exhaust System Modifications

(1) Within the next 100 hours TIS after December 18, 2014 (the effective date of this AD) or within the next 12 months after December 18, 2014 (the effective date of this AD), whichever occurs first, review the airplane maintenance records to positively identify whether the modifications described in paragraphs (h)(1)(i) through (h)(1)(iii) of this AD have been done.

(i) Exhaust pipe slip joint modification following Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012; and Textron Lycoming Mandatory Service Bulletin No. 393C, dated November 26, 1976.

(ii) Installation of bracket and clamp assembly following Piper Kit No. 760–974 as specified in Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012; or Piper Aircraft, Inc. Service Bulletin 462A, dated November 3, 1975.

(iii) Replacement of Piper v-band coupling, part number 556–053, with Piper v-band coupling, part number 557–369, following Piper Aircraft, Inc. Mandatory Service Bulletin No. 644E, dated May 9, 2012.

(2) If you cannot positively identify that the modifications described in paragraphs (h)(1)(i) through (h)(1)(iii) of this AD have been done, before further flight, you must do the modifications described in paragraphs (h)(2)(i) through (h)(2)(iii), as applicable.

(i) Exhaust pipe slip joint modification following Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012, and Textron Lycoming Mandatory Service Bulletin SB 393C, dated November 26, 1976.

(ii) Installation of bracket and clamp assembly following Piper Kit No. 760–974 as specified in Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012; or Piper Aircraft Corporation Service Bulletin 462A, dated November 3, 1975.

(iii) Replacement of Piper v-band coupling, part number 556–053, with Piper v-band coupling, part number 557–369, following Piper Aircraft, Inc. Mandatory Service Bulletin No. 644E, dated May 9, 2012.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Atlanta Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in the Related Information, paragraph (j)(1) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

For more information about this AD, contact Gary Wechsler, Aerospace Engineer, Atlanta ACO, FAA, 1701 Columbia Avenue, College Park, Georgia 30337; telephone: (404) 474–5575; fax: (404) 474–5606; email: *gary.wechsler@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following service information was approved for IBR on December 18, 2014.

(i) Piper Aircraft Corporation Service Bulletin No. 462A, dated November 3, 1975.

(ii) Piper Aircraft, Inc. Mandatory Service Bulletin No. 492A, dated May 29, 2012.

(iii) Textron Lycoming Mandatory Service Bulletin SB 393C, dated November 26, 1976.

(4) The following service information was approved for IBR on July 17, 2013 (78 FR 35110, June 12, 2013).

(i) Piper Aircraft, Inc. Mandatory Service Bulletin No. 644E, dated May 9, 2012.

(ii) Lycoming Service Instruction No. 1238B, Revision B, dated January 6, 2010.

(iii) Lycoming Service Instruction No. 1320, dated March 7, 1975.

(iv) Textron Lycoming Service Instruction No. 1391, dated October 5, 1979.

(5) For the service information identified in this AD, contact Piper Aircraft, Inc., 2926 Piper Drive, Vero Beach, Florida 32960; telephone: (772) 567–4361; fax: (772) 978–6573; Internet: *www.piper.com/home/pages/Publications.cfm;* or Lycoming Engines, 652 Oliver Street, Williamsport, Pennsylvania 17701; telephone: (570) 323–6181; Internet: *http://www.lycoming.textron.com/support/publications/index.html;* as applicable.

(6) You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Kansas City, Missouri, on November 4, 2014.

Earl Lawrence,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2014–0594; Directorate Identifier 2014–CE–022–AD; Amendment 39–18005; AD 2014–22–01]

RIN 2120–AA64

Airworthiness Directives; PILATUS AIRCRAFT LTD. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2012–26–16 for all PILATUS AIRCRAFT LTD. Models PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a need to incorporate new revisions into the Limitations section, Chapter 4, of the FAA-approved maintenance program (e.g., maintenance manual). We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective December 18, 2014.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of December 18, 2014.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2014–0594; or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact PILATUS AIRCRAFT LTD., Customer Service Manager, CH–6371 STANS, Switzerland; telephone: +41 (0) 41 619 33 33; fax: +41 (0) 41 619 73 11; Internet: *http://www.pilatus-aircraft.com* or email: *SupportPC12@pilatus-aircraft.com.* You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: *doug.rudolph@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to add an AD that would apply to all PILATUS AIRCRAFT LTD. Models PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes. That NPRM was published in the **Federal Register** on August 18, 2014 (79 FR 48701), and proposed to supersede AD 2012–26–16, Amendment 39–17311 (78 FR 11572, February 19, 2013).

Since we issued AD 2012–26–16, Amendment 39–17311 (78 FR 11572, February 19, 2013), PILATUS AIRCRAFT LTD. has issued revisions to the Limitations section of the airplane maintenance manual to include repetitive inspections of the inboard flap drive arms for cracks.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued AD No. 2014–0170, dated July 17, 2014 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> The maintenance instructions and airworthiness limitations applicable to the Structure and Components of PC–12 aeroplanes are specified in the Aircraft Maintenance Manual (AMM) under Chapter 4, Airworthiness Limitation Section (ALS).
>
> The instructions contained in the ALS document have been identified as mandatory actions for continued airworthiness and failure to comply with these instructions and limitations could potentially lead to an unsafe condition.
>
> Pilatus Aircraft Ltd. recently issued Pilatus PC–12 AMM report 02049 issue 28 for PC–12, PC–12/45 and PC–12/47 aeroplanes and PC–12 AMM report 02300 issue 11 for PC–12/47E aeroplanes to incorporate new repetitive inspection intervals of the inboard flap drive arms because of the detection of cracked parts.
>
> For the reason described above, this AD retains the requirements of EASA AD 2013–0031, which is superseded, and requires implementation of the new maintenance requirements and/or airworthiness limitations.

The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/#!documentDetail;D=FAA-2014-0594-0003.*

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the proposal and the FAA's response to each comment.

Request To Remove Actions Retained From AD 2012–26–16, Amendment 39–17311 (78 FR 11572, February 19, 2013) (''AD 2012–26–16'')

Johan Kruger, Pilatus Aircraft Ltd., requested that we remove the actions retained from AD 2012–26–16, paragraphs (f)(1) and (f)(2) of the proposed AD from the final rule AD action. These actions were originally in AD 2009–14–13, Amendment 39–15963 (74 FR 34213, July 15, 2009), which was superseded by AD 2012–26–16.

Johan Kruger stated that the need to retain the actions previously required in AD 2012–26–16, paragraphs (f)(1) and (f)(2) of the proposed AD, no longer exists for the following reasons:

- In AD 2012–26–16, the initial compliance time for replacing the nose landing gear (NLG) torque tubes part number (P/N) 532.50.12.047 on Models PC–12 and PC–12/45 airplanes is within the next 100 hours time-in-service (TIS) after August 19, 2009 (the effective date retained from AD 2009–14–13) or 1 year after August 19, 2009, whichever occurs first. Compliance with this requirement should have been completed by September 20, 2010. AD 2012–26–16 also prohibits installing any NLG torque tube P/N 532.50.12.047 as of March 26, 2013 (the effective date retained from AD 2012–26–16).
- Even if P/N 532.50.12.047 had not been replaced as required in AD 2012–26–16, the life limit for P/N 532.50.12.047 in the airworthiness limitations section (ALS) of the airplane maintenance manual (AMM) referenced in the proposed AD is deemed adequate to address the potential unsafe condition.
- Since August 19, 2009, the effective date of AD 2009–14–13, Pilatus has not provided any P/N 532.50.12.047 as spares to any owners/operators in the United States. Pilatus is implying that

after the issuance of AD 2009–14–13, NLG torque tube P/N 532.50.12.047 has not been installed as a spare on any affected Model PC–12 and PC–12/45 airplane in the United States.

Johan Kruger clarified that the unsafe condition caused by NLG torque tube P/N 532.50.12.047 that was addressed in AD 2012–26–16, which was a carryover from AD 2009–14–13, has sufficiently been addressed and is now covered by the ALS of the AMM that is referenced in the proposed AD, which is unchanged from AD 2012–26–16.

We agree with the commenter. We have changed the final rule AD action based on this comment and have removed paragraphs (f)(1) and (f)(2) as presented in the proposed AD from this final rule AD action. Any airplane that has not operated since the torque tube requirement was initiated through AD 2009–14–13 may apply for an alternative method of compliance.

Request To Remove the Effective Date Imposed in the Proposed AD

Johan Kruger, Pilatus Aircraft Ltd., and Gerard Terpstra requested that the effective date imposed in paragraph (f)(3) of the proposed AD be removed.

The commenters stated that it is out of the ordinary to have a compliance effective date imposed in a proposed AD. The commenters also pointed out that the effective date is before the comment close date.

We agree with the commenters that compliance effective dates are not normally put in a proposed AD. The September 22, 2014, effective date in paragraph (f)(3) of the proposed AD was a mistake. There will be no enforcement for that date in the final rule AD action and comments were still allowed through the comment close date of October 6, 2014, before final rule action was taken.

We changed the final rule AD action based on these comments.

Request To Withdraw the Proposed AD

Gerard Terpstra requested that the proposed AD be withdrawn because compliance with the new airworthiness limitations is already mandatory under federal regulations.

Gerard Terpstra stated that Title 14 of the Code of Federal Regulations (CFR), part 23, Appendix G, makes the requirements in the ALS of the AMM mandatory and 14 CFR 91.403 additionally prohibits the operation of an airplane unless the requirements of the ALS of the AMM are complied with. Therefore, 14 CFR 39.5 cannot be the basis for issuing the proposed AD because no unsafe condition exists.

Gerard Terpstra also stated that by using 14 CFR part 39 here the FAA has in fact induced an unintended consequence of allowing an operator to delay the implementation of the new ALS requirements. For example, the FAA publishes an AD periodically to require compliance with the then ''current'' version of the ALS of the Pilatus PC–12 AMM, most recently with AD 2012–26–16, which became effective on March 26, 2013. Pilatus Aircraft Ltd. subsequently revised the ALS of the AMM by publishing two temporary revisions on March 13, 2014. Gerard Terpstra estimated the compliance date for the final rule AD action to be around the first week of November 2014 (if the FAA observes the 45-day comment period and the 35 days for complying with the AD after it becomes effective). Between the time that Pilatus Aircraft Ltd. published their temporary revision and the time the proposed AD becomes effective as a final rule AD action is approximately six months, thereby delaying compliance with the ALS by around six months.

Gerard Terpstra stated his understanding of the desire and requirement to have regulations harmonized between different countries and that is what is being done here. EASA issues an AD and the FAA follows suit and issues an AD. But in this instance the proposed AD is not required as the proper and appropriate Federal regulations are already in place to ensure that the ALS of the AMM are complied with.

We don't agree with the commenter. Based on guidance from the FAA's Office of the Chief Counsel (AGC), the definition of the word ''current'' is the ALS of the AMM that was delivered with the original airworthiness (A/W) certificate of each airplane. The only way the FAA can enforce the use of a newer version of the ALS to the AMM on the entire existing fleet is through 14 CFR part 39 AD action.

We agree that the new ALS to the AMM is binding for a new airplane upon the issuance of the A/W certificate or existing airplanes that have the requirement as part of their operational specifications (e.g., 14 CFR part 135 operations), but not for the entire existing fleet (e.g., 14 CFR part 91 operations). EASA is in agreement with the FAA and understands that the only way to require the most recent revision to the ALS section for existing fleets in either state of registry system is through AD action.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously and minor editorial changes. We have determined that these changes:

- Are consistent with the intent that was proposed in the NPRM (79 FR 48701, August 18, 2014) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (79 FR 48701, August 18, 2014).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of the AD.

Costs of Compliance

We estimate that this AD will affect 770 products of U.S. registry. We also estimate that it will take about 16.5 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $300 per product. Based on these figures, we estimate the cost of this AD on U.S. operators to be $1,310,925, or $1,702.50 per product. This breaks down as follows:

- New inspections, etc. through incorporating maintenance manual limitations: 3.5 work-hours with parts about $300 for a fleet cost of $460,075, or $597.50 per product.
- Wing main spar fastener holes inspection: 12 work-hours with no parts cost for fleet cost of $785,400 or $1,020 per product.
- Inboard flap drive arm inspection: 1 work-hour with no parts cost for fleet cost of $65,450 or $85 per product.

In addition, we estimate that any necessary corrective actions (on-condition costs) that must be taken based on the above inspections, etc. will take about 16 work-hours and require parts costing approximately $10,000 for a cost of $11,360 per product. We have no way of determining the number of products that may need these necessary corrective actions. This breaks down as follows:

- Replacements based on damaged parts or reduced life limits as a result of the new maintenance manual limitations: 6 work-hours with parts about $4,000 for a cost of $4,510 per product.
- Repairs to the wing spar as a result of the wing main spar fastener holes inspection: 7 work-hours with parts about $5,000 for a cost of $5,595 per product.
- Replacement of the inboard flap drive arm as a result of the inboard flap drive arm inspection: 3 work-hours with parts about $1,000 for a cost of $1,255.

The only costs that will be imposed by this AD over that already required by AD 2012–26–16 is the inboard flap arm inspection and replacement as necessary and the addition of 92 airplanes from 678 airplanes to 770 airplanes.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2014–0594; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Amendment 39–17311 (78 FR 11572, February 19, 2013), and adding the following new AD:

2014–22–01 PILATUS AIRCRAFT LTD.: Amendment 39–18005; Docket No. FAA–2014–0594; Directorate Identifier 2014–CE–022–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective December 18, 2014.

(b) Affected ADs

This AD supersedes AD 2012–26–16, Amendment 39–17311 (78 FR 11572, February 19, 2013).

(c) Applicability

This AD applies to PILATUS AIRCRAFT LTD. Models PC–12, PC–12/45, PC–12/47, and PC–12/47E airplanes, all manufacturer serial numbers (MSNs), certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 5: Time Limits.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a need to incorporate new revisions into the Limitations section, Chapter 4, of the FAA-approved maintenance program (e.g., maintenance manual). The limitations were revised to include repetitive inspections of the inboard flap drive arms for crack(s). These actions are required to ensure the continued operational safety of the affected airplanes.

(f) Actions and Compliance

Unless already done, do the actions in paragraphs (f)(1) through (f)(5) of this AD:

(1) Before further flight after December 18, 2014 (the effective date of this AD), insert Data module code 12–A–04–00–00–00A–000A–A, ''STRUCTURAL, COMPONENT AND MISCELLANEOUS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12, PC–12/45, PC–12/47, Aircraft Maintenance Manual (AMM), Document No. 02049, 12–A–AM–00–00–00–I, revision 28, dated May 31, 2014, for Models PC–12, PC–12/45, PC–12/47, and Data module code 12–B–04–00–00–00A–000A–A, ''STRUCTURAL AND COMPONENT LIMITATIONS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12/47E MSN–1001–UP, Aircraft Maintenance Manual (AMM), Document No. 02300, 12- B–AM–00–00–00–I, revision 11, dated May 31, 2014, for Model PC–12/47E, into the Limitations section of the FAA-approved maintenance program (e.g., maintenance manual). These limitations section revisions do the following:

(i) Establish an inspection of the inboard flap drive arms,

(ii) Specify replacement of components before or upon reaching the applicable life limit, and

(iii) Specify accomplishment of all applicable maintenance tasks within certain thresholds and intervals.

(2) Only authorized Pilatus Service Centers can do the Supplemental Structural Inspection Document (SSID) as required by the documents in paragraph (f)(1) of this AD because deviations from the type design in critical locations could make the airplane ineligible for this life extension.

(3) If no compliance time is specified in the documents listed in paragraph (f)(1) of this AD when doing any corrective actions where discrepancies are found as required in paragraph (f)(1)(iii) of this AD, do these corrective actions before further flight after doing the applicable maintenance task.

(4) During the accomplishment of the actions required in paragraphs (f)(1)(i), (f)(1)(ii), and (f)(1)(iii) of this AD, if a discrepancy is found that is not identified in the documents listed in paragraph (f)(1) of this AD, before further flight after finding the discrepancy, contact PILATUS AIRCRAFT LTD. at the address specified in paragraph (i) of this AD for a repair scheme and incorporate that repair scheme.

(5) Within the next 3 months after December 18, 2014 (the effective date of this AD) or within the next 150 hours TIS after December 18, 2014 (the effective date of this AD), whichever occurs first, inspect the inboard flap drive arms for cracks and take all necessary corrective actions.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to Doug Rudolph, Aerospace Engineer, FAA,

Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: *doug.rudolph@faa.gov.*

(i) Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(ii) AMOCs approved for AD 2012–26–16, Amendment 39–17311 (77 FR 11572, February 19, 2013) are not approved as AMOCs for this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Special Flight Permit

Special flight permits are prohibited.

(i) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No. 2014–0170, dated July 17, 2014, for related information. The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/#!documentDetail;D=FAA-2014-0594-0003*.

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Data module code 12–A–04–00–00–00A–000A–A, ''STRUCTURAL, COMPONENT AND MISCELLANEOUS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12, PC–12/45, PC–12/47, Aircraft Maintenance Manual (AMM), Document No. 02049, 12–A–AM–00–00–00–I, revision 28, dated May 31, 2014.

(ii) Data module code 12–B–04–00–00–00A–000A–A, ''STRUCTURAL AND COMPONENT LIMITATIONS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12/47E MSN–1001–UP, Aircraft Maintenance Manual (AMM), Document No. 02300, 12- B–AM–00–00–00–I, revision 11, dated May 31, 2014.

Note to paragraph (j)(2) of this AD: Data module code 12–A–04–00–00–00A–000A–A, ''STRUCTURAL, COMPONENT AND MISCELLANEOUS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12, PC–12/45, PC–12/47, Aircraft Maintenance Manual (AMM), Document No. 02049, 12–A–AM–00–00–00–I, revision 28, dated May 31, 2014; and Data module code 12–B–04–00–00–00A–000A–A, ''STRUCTURAL AND COMPONENT LIMITATIONS—AIRWORTHINESS LIMITATIONS,'' dated March 13, 2014, of the Pilatus Model type—PC–12/47E MSN–1001–UP, Aircraft Maintenance Manual (AMM), Document No. 02300, 12- B–AM–00–00–00–I, revision 11, dated May 31, 2014, were issued as complete updates to the AMM Airworthiness Limitations sections.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 61 and 121

Pilot Age Limit Crew Pairing Requirement

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of policy.

SUMMARY: This document notifies the public of the Federal Aviation Administration's policy regarding enforcement of the pilot pairing requirement in the ''Part 121 Pilot Age Limit'' final rule. Currently, while the International Civil Aviation Organization (ICAO) standards allow a person between the age of 60 and 65 to serve as pilot in command (PIC) of an airplane with two or more pilots, in international commercial air transport operations, the PIC must be paired with a pilot younger than 60 years of age. Parts 61 and 121 of title 14, of the Code of Federal Regulations contain similar limitations. However, a recent amendment to the ICAO standards would remove this pilot pairing requirement. Instead, all pilots serving on airplanes in international commercial air transport operations with more than one pilot may serve beyond 60 years of age (until age 65) without being paired with a pilot under 60 years of age. This ICAO amendment triggers the sunset of the statutory authority that provides the basis for the crew pairing limitations in title 14.

DATES: Effective November 13, 2014. If implementation by the International Civil Aviation Organization of Amendment 172 to Annex 1 is delayed, the FAA will publish notification of the date changes.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this document, contact Nancy Lauck Claussen, email: *Nancy.L.Claussen@faa.gov;* Air Transportation Division (AFS–200), Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8166. For legal questions concerning this document, contact Sara Mikolop, email: *Sara.Mikolop@faa.gov;* Office of Chief Counsel (AGC–200), Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–3073.

SUPPLEMENTARY INFORMATION:

Fair Treatment of Experienced Pilots Act

On December 13, 2007, the Fair Treatment of Experienced Pilots Act (Pub. L. 110–135) amended title 49 of the United States Code by adding section 44729. Section 44729(a) raised the age limit for pilots serving in operations under part 121 [1] from age 60 to age 65, subject to the limitations in section 44729(c) applicable to pilots in command on international flights.

Section 44729(c) specified a pilot pairing limitation for PICs serving on international flights. Specifically, section 44729(c)(1) provides, ''A pilot who has attained 60 years of age may serve as pilot-in-command in covered operations between the United States and another country only if there is another pilot in the flight deck crew who has not yet attained 60 years of age.'' The pilot pairing requirement in section 44729(c)(1) is consistent with the pilot pairing standard in ICAO Annex 1 (Personnel Licensing), Chapter 2 (Licenses and Ratings for Pilots), Standard 2.1.10.

The crew pairing requirement in section 44729(c)(1) will sunset in accordance with section 44729(c)(2), on the date that ICAO removes the pilot pairing limitation in Standard 2.1.10. Section 44729(c)(2) states, ''Paragraph

[1] The statute uses the term ''covered operations'' to describe part 121 operations. *See* 49 U.S.C. 44729(b).

[c](1), shall cease to be effective on such date as the Convention on International Civil Aviation provides that a pilot who has attained 60 years of age may serve as pilot-in-command in international commercial operations without regard to whether there is another pilot in the flight deck crew who has not attained age 60.''

During a meeting of the ICAO Council on March 3, 2014, Council members adopted Amendment 172 to Annex 1, Personnel Licensing. The amendment removes the requirement in Standard 2.1.10 to pair a pilot in command over age 60 with a pilot under age 60. Without the pairing requirement, all pilots on multi-pilot crews serving in international air transport commercial operations may continue to serve as long as they have not reached 65 years of age.[2] The Council anticipates implementation of Amendment 172 to Annex 1, Personnel Licensing, to be November 13, 2014.[3] Accordingly, on November 13, 2014, the pilot pairing limitation in 49 U.S.C. 44729(c)(1) ceases to be effective.

''Part 121 Pilot Age Limit'' Final Rule

On July 15, 2009, the Federal Aviation Administration (FAA) published the ''Part 121 Pilot Age Limit'' final rule (74 FR 34229) to conform FAA regulations to the statutory requirements in the Fair Treatment for Experienced Pilots Act (codified at 49 U.S.C. 44729). Based on the statutory authority in 49 U.S.C. 44729, the 2009 final rule raised the pilot age limitation from 60 to 65 and added the pilot pairing requirement for pilots conducting part 121 operations and other multi-pilot operations between or over the territory of more than one country using U.S. registered airplanes.[4]

In the final rule preamble, the agency stated that it believed that the Fair Treatment for Experienced Pilots Act intended to harmonize FAA regulations with the ICAO standard pertaining to pilot age limitations and pilot pairing requirements, which would encompass international operations in addition to the part 121 operations identified by the Act. *See* 74 FR 34229, 34230 (July 15, 2009). The ICAO standard pertaining to pilot age limitations and pilot pairing applies to pilots serving in operations between his or her home state and another country as well as between two territories outside of his or her home state. Accordingly, to harmonize the agency's regulations with the ICAO standard and further the intent of the Act, the 2009 final rule added the pilot age limitations and pilot pairing requirement for pilots conducting operations between two international territories using U.S. registered airplanes.[5] As a result, for multi-pilot operations, the final rule increased the maximum age for a pilot to serve and added the pilot pairing requirement for part 121 operations and certain other international air service and air transportation operations using airplanes on the U.S. registry (14 CFR 121.383(d) and (e), 61.3(j) and 61.77(g)).

Effect of ICAO Amendment and Sunset of 49 U.S.C. 44729(c)(1) on Enforcement of FAA Regulations

As discussed previously, 49 U.S.C. 44729(c)(2) states that the pilot pairing requirement in 49 U.S.C. 44729(c)(1) ceases to be effective when ICAO amends its standard to remove the pilot pairing limitation. Once the pilot pairing limitation of 49 U.S.C. 44729(c)(1) ceases to be effective, the statutory basis for pilot pairing in §§ 121.383(d)(2), 121.383(e)(2), 61.3(j)(2) and 61.77(g) of title 14 of the Code of Federal Regulations will no longer exist and those regulations will be contrary to 49 U.S.C. 44729. For this reason, beginning on the date the ICAO amendment is implemented, the FAA will no longer enforce the crew pairing requirements contained in14 CFR 121.383(d)(2), 121.383(e)(2), 61.3(j)(2) and 61.77(g).

The FAA has initiated a rulemaking to conform applicable relevant regulations to the statute and anticipates publication of a final rule in 2015.[6]

Issued in Washington, DC, on November 5, 2014.

Reginald C. Govan,

Chief Counsel.

[FR Doc. 2014–26783 Filed 11–12–14; 8:45 am]

BILLING CODE 4910–13–P

[2] Amendment 172 to Annex 1, Personnel Licensing, does not affect the maximum age permitted for pilots of engaged in single-pilot operations. Pilots serving in single-pilot operations must be below 60 years of age.

[3] On March 25, 2014, ICAO notified the FAA that the date of implementation is anticipated to be November 13, 2014, to the extent the majority of ICAO contracting States have not registered their disapproval before July 14, 2014. On October 1, 2014, the FAA confirmed that ICAO has not amended the implementation date of November 13, 2014.

[4] The 2009 final rule implemented the crew pairing requirements by amending part 121 as well as the regulations applicable to pilots with certificates issued under part 61, including a special purpose pilot authorization issued in accordance with § 61.77. As discussed in footnote 5, foreign air carrier operations and certain other operations conducted with U.S. registered aircraft solely outside of the U.S. must comply with ICAO standards in Annex 1 to the Convention on International Civil Aviation without further agency action.

[5] The agency notes that in accordance with 14 CFR 129.5(b), ''Each foreign air carrier conducting operations within the United States must conduct its operations in accordance with the Standards contained in Annex 1 (Personnel Licensing), Annex 6 (Operation of Aircraft), Part I (International Commercial Air Transport—Aeroplanes) or Part III (International Operations—Helicopters), as appropriate, and in Annex 8 (Airworthiness of Aircraft) to the Convention on International Civil Aviation.'' Additionally, in accordance with 14 CFR 129.1(b), operations of U.S. registered aircraft solely outside of the U.S. in common carriage by a foreign person or a foreign air carrier must also be in compliance with the ICAO Standards identified in 14 CFR 129.5(b). Accordingly, for these operations, the ICAO amendment to the crew pairing limitation applies without further change to title 14 of the Code of Federal Regulations. The FAA further notes that beginning on the date of the ICAO amendment implementation, as an ICAO member state, no foreign air carrier conducting operations under part 129 may conduct operations to or from the United States with any pilot who has reached 65 years of age. This same limitation applies to operations covered by 14 CFR 129.1(b).

[6] The FAA expects to make conforming changes to 14 CFR 61.3(j), 61.77(g) and 121.383(d)(2) and (e)(2).

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1260

RIN 2700–AD79

Profit and Fee Under Federal Financial Assistance Awards

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: NASA is revising the NASA Grant & Cooperative Agreement Handbook to clarify that NASA does not pay profit or fee on Federal Financial Assistance awards, i.e. grants and cooperative agreements, to non-profit organizations. This rule makes changes to NASA regulations to reflect that revision.

DATES: Effective December 15, 2014.

FOR FURTHER INFORMATION CONTACT: William Roets, NASA Office of Procurement, Contract Management Division, Suite 5K34, 202–358–4483, *william.roets-1@nasa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

NASA published a proposed rule for Profit and Fee under Financial Assistance Awards in the **Federal Register** on January 11, 2012 (77 FR 1657). The public comment period closed on March 11, 2012. By the end of the established comment period, NASA received comments from one entity. However, those comments were subsequently determined to have been submitted to the incorrect docket and were not applicable to the proposed rule. After the specified end date for the

submission of comments had passed, three organizations submitted late comments to the proposed rule. NASA accepted the late comments. Based on the comments received and subsequent revisions to the proposed rule, NASA published a second proposed rule in the **Federal Register** on February 25, 2014 (79 FR 10346). The public comment period closed on April 28, 2014. By the end of the established comment period, NASA received comments from three entities. After the specified end date for the submission of comments had passed, one organization submitted supplementary comments to their original comments. NASA accepted these late comments.

II. Discussion and Analysis

Historically, NASA has discouraged the payment of profit or fee under its Federal Financial Assistance awards because payment in excess of costs is inconsistent with the intent of grants and cooperative agreements which provide funding in the form of financial assistance to recipients for their performance of a public purpose. For commercial firms, payment of profit or fee is specifically prohibited under NASA grants and cooperative agreements (See NASA Grant and Cooperative Handbook, Subpart 1274.204). Because this prohibition does not include non-profit organizations, NASA's policy has been misinterpreted and inconsistent application has occurred.

Therefore, this final rule extends the prohibition on the payment of profit or fee to all recipients of NASA grants and cooperative agreements, alleviating the misinterpretation and inconsistent application of the policy.

Based on a review of the public comments discussed below, NASA has concluded that no change to the second proposed rule is necessary. NASA received comments from three respondents. New comments, not already addressed in response to the first proposed rule, are discussed below. Comments that were received in response to the first proposed rule were addressed in the second proposed rule at 79 FR 10346, February 25, 2014.

Comment 1: Respondent inquired if this rule impacts NASA Grant and Cooperative Handbook, Subpart 1274.204(f), profit applicability, which allows profit in some cases.

Response: This rule does not impact NASA Grant and Cooperative Handbook, Subpart 1274.204(f). Profit associated with cooperative agreements awarded to commercial firms may be paid by the recipient to subcontractors in accordance with Subpart 1274.204(f).

Comment 2: Respondent inquired as to whether profit or fee can be paid in the situation where a private consultant might be hired to help inform the effort. Private consultant's hourly rate could have profit or fee built into the rate and we may not have visibility into the components (direct and indirect costs, profit, etc. . . .) that comprise the hourly rate.

Response: This rule does not impact this situation. In this case, the hourly rate would invariably represent a commercial market rate for these services where a detailed cost breakdown of the hourly rate by cost element would not be required. Thus, profit or fee analysis would not be required.

Comment 3: Prohibiting the payment of profit or fee to non-profit organizations will have a devastating and large detrimental effect on non-profit organizations and their partners.

Response: NASA continues to support non-profit entities and the valuable contributions they supply to the NASA mission. NASA has historically discouraged the payment of profit or fee to non-profit entities. The intent of this rule is to clarify this point that NASA will not pay for profit or fee where profit or fee is defined as the amount above allowable costs. Management fees that are allowable costs within the guidelines established in OMB Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR Chapter I, Chapter II, Parts 200, 215, 220, 225, and 230) will continue to be paid.

Comment 4: Management fee is intended to provide a non-profit entity with a modest source of funds to meet business expenses that are not reimbursable. Non-profits have many costs that are not allowable under government regulations but must be paid by non-profit entities in order to keep operating. Without management fee, non-profits would find it impossible to continue operations.

Response: NASA pays for business expenses/costs that are reimbursable in accordance with the guidelines in OMB Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR Chapter I, Chapter II, Parts 200, 215, 220, 225, and 230). Paying business expenses/costs that are not reimbursable through a management fee would be circumventing these OMB guidelines, and inappropriate for financial assistance instruments.

Comment 5: Respondent stated that NASA's interpretation of statutory authorities was too narrowly focused and that NASA has the statutory authority to pay a management fee to non-profit entities.

Response: NASA agrees that the Space Act of 1958 (42 U.S.C. 2473(c)(5)) provides NASA with broad authority and discretion to award grants and cooperative agreements to fulfill its mission. However, these authorities do not expressly or explicitly allow for the payment of profit or fee, sometimes referred to as a management fee, when such fee is defined as the amount above allowable costs. The payment of profit or fee under Federal Financial Assistance awards is inconsistent with the intent of grants and cooperative agreements which provide funding in the form of financial assistance to recipients for their performance of a public purpose and therefore should not be allowed.

Comment 6: Respondent took issue with the NASA statement that ''Federal agencies are only authorized to pay for allowable, allocable, reasonable, and necessary costs'' stating that there is no cost principle that requires that a cost must be ''necessary'' to the performance of a cooperative agreement.

Response: Pursuant to OMB Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, section 200.403, Factors affecting allowability of costs, ''necessary'' is part of the general criteria that a cost must meet in order to be allowable under Federal awards.

Comment 7: Respondent took issue with NASA statement that ''grant and cooperative agreement regulation is incomplete in its coverage of profit and fee in that it fails to address non-profit organizations''. Respondent stated that this statement is inaccurate. NASA Grant Information Circular (GIC) 99–1 is specific regulatory action regarding payment of management fees on grants and cooperative agreements to non-profit entities.

Response: NASA Grant Information Circulars (GICs) are non-regulatory, internal guidance and the grant and cooperative agreement regulation referred to was the NASA Grant and Cooperative Agreement Handbook which is codified beginning at 14 CFR part 1260.

Comment 8: Respondent stated that the final OMB Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR Chapter I, Chapter II, Parts 200, 215, 220, 225, and 230) rule provides NASA the authority to authorize fee or profit under an award. Specifically, the guidance states that ''the non-Federal entity may not earn or keep any profit resulting from Federal financial

assistance, unless expressly authorized by the terms and conditions of the Federal award''.

Response: In implementing the OMB Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR Chapter I, Chapter II, Parts 200, 215, 220, 225, and 230), it is NASA policy to not pay profit or fee under grant and cooperative agreement awards. NASA maintains that it is inappropriate to pay profit and fee under its Federal Financial Assistance awards because payment in excess of costs is inconsistent with the intent of grant and cooperative agreements which provide funding in the form of financial assistance to recipients for their performance of a public purpose.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

NASA certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq., because the rule does not impose any additional requirements on small entities and currently less than 1 percent of recipients of NASA grants and cooperative agreements receive profit or management fees.

V. Paperwork Reduction Act

The Paper Reduction Act (Pub. L. 104–13) is not applicable because the prohibition on payment of profit and management fees by NASA does not require the submission of any information by recipients that requires the approval of the Office of Management and Budget under 44 U.S.C. 3501, et seq.

List of Subjects in 14 CFR 1260

Colleges and universities, Business and Industry, Grant programs, Grants administration, Cooperative agreements, State and local governments, Non-profit organizations, Commercial firms, Recipients.

Cynthia Boots,

Alternate Federal Register Liaison

Accordingly, 14 CFR Part 1260 is amended as follows:

PART 1260–GRANTS AND COOPERATIVE AGREEMENTS

■ 1. The authority citation for 14 CFR 1260 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1), Pub. L. 97–258, 96 Stat. 1003 (31 U.S.C. 6301, et seq.), and OMB Circular A–110.

■ 2. In § 1260.4, paragraph (b)(2) is revised to read as follows:

§ 1260.4 Applicability.

* * * * *

(b) * * *

(2) Payment of fee or profit is consistent with an activity whose principal purpose is the acquisition of goods and services for the direct benefit or use of the United States Government, rather than an activity whose principal purpose is assistance. Therefore, the grants officer shall use a procurement contract, rather than assistance instrument, in all cases where fee or profit is to be paid to the recipient of the instrument or the instrument is to be used to carry out a program where fee or profit is necessary to achieving program objectives. Grants and cooperative agreements shall not provide for the payment of fee or profit to the recipient.

* * * * *

■ 3. In § 1260.10, paragraph (b)(1)(iv) is added to read as follows:

§ 1260.10 Proposals.

* * * * *

(b) * * *

(1) * * *

(iv) Payment of fee or profit is consistent with an activity whose principal purpose is the acquisition of goods and services for the direct benefit or use of the United States Government, rather than an activity whose principal purpose is assistance. Therefore, the grants officer shall use a procurement contract, rather than assistance instrument, in all cases where fee or profit is to be paid to the recipient of the instrument or the instrument is to be used to carry out a program where fee or profit is necessary to achieving program objectives. Grants and cooperative agreements shall not provide for the payment of fee or profit to the recipient.

* * * * *

■ 4. In § 1260.14, paragraph (e) is added to read as follows:

§ 1260.14 Limitations.

* * * * *

(e) Payment of fee or profit is consistent with an activity whose principal purpose is the acquisition of goods and services for the direct benefit or use of the United States Government, rather than an activity whose principal purpose is assistance. Therefore, the grants officer shall use a procurement contract, rather than assistance instrument, in all cases where fee or profit is to be paid to the recipient of the instrument or the instrument is to be used to carry out a program where fee or profit is necessary to achieving program objectives. Grants and cooperative agreements shall not provide for the payment of fee or profit to the recipient.

Arbitrage Rebate Overpayments on Tax-Exempt Bonds

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations that provide guidance on the recovery of overpayments of arbitrage rebate on tax-exempt bonds and other tax-advantaged bonds. These final regulations provide the deadline for filing a claim for an arbitrage rebate overpayment and certain other rules. These final regulations affect issuers of tax-exempt and tax-advantaged bonds.

DATES: *Effective date:* These regulations are effective on November 13, 2014.

Applicability date: For dates of applicability, see § 1.148–11(l)(4).

FOR FURTHER INFORMATION CONTACT: Timothy Jones at (202) 317–6980 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On September 16, 2013, the IRS published a Notice of Proposed Rulemaking (REG–148812–11) in the **Federal Register** (78 FR 56841) (the ''Proposed Regulations''). A public hearing was scheduled for February 5, 2014, but later was cancelled because no one requested to speak. However, two comments responding to the Proposed Regulations were received. After consideration of these comments, the Proposed Regulations are adopted as revised by this Treasury decision.

Explanation of Provisions and Summary of Comments

The final regulations amend the Income Tax Regulations (26 CFR part 1) on the arbitrage investment restrictions on tax-exempt bonds and other tax-advantaged bonds under section 148 of the Internal Revenue Code (Code). Section 1.148–3(i) of the existing Income Tax Regulations provides that an issuer may recover an overpayment of arbitrage rebate and similar payments on an issue of tax-exempt bonds if the issuer establishes to the satisfaction of the Commissioner that the overpayment occurred.

Rev. Proc. 2008–37 (2008–2 CB 137) provides procedures for filing claims for the refund of arbitrage rebate and similar payments and imposes a deadline for filing such claims. In particular, a claim for a refund must be filed no later than two years after the final arbitrage computation date for the issue from which the claim arose. A transition rule applies to issues with a final computation date on or before June 24, 2008. Like the Proposed Regulations, the final regulations include this two-year limitation on filing claims as well as the transition rule.

The final regulations also adopt the rule in the Proposed Regulations that the Commissioner may request additional information to support a claim, specify a date for a return of that information, and deny the claim if the information is not returned by the date specified in the Commissioner's request or, if the Commissioner grants the issuer an extension to provide the information, by the extension date. Under both the Proposed Regulations and final regulations, if the Commissioner denies a claim because the Commissioner asserts that it was filed after the two-year deadline or that the information requested by the Commissioner was not received by the date specified in the request for such additional information, the issuer may appeal the denial to the Office of Appeals. If the Office of Appeals concludes that the claim was timely filed or the requested information was timely submitted, as applicable, the case will be returned to the Commissioner for further consideration of the merits of the claim.

The final regulations amend the Proposed Regulations to take into account a comment received suggesting that the Proposed Regulations be revised to provide a minimum time period for issuers to respond to any request by the Commissioner for additional information. In response to this request, the final regulations revise the Proposed Regulations to provide that issuers will be given at least 21 calendar days to respond to a request for additional information. The 21 day period is consistent with the time period provided by the IRS in other instances for submitting additional information. See, for example, section 8.05 of Rev. Proc. 2014–1, 2014–1 IRB 1, 31 (providing taxpayers with 21 days to submit additional information requested by the IRS in connection with the evaluation of a letter ruling request).

Another commenter questioned the Commissioner's authority to impose the two-year limitation on filing of claims for recovery of an overpayment of arbitrage rebate. The commenter also expressed a concern that an issuer's right to proceed to court could expire while the issuer's claim awaits review by the Commissioner.

Treasury and the IRS believe that the Commissioner's authority to impose the two-year limitation arises from the broad grant of authority to prescribe regulations under section 148(i). In addition, an issuer's right to proceed to court cannot expire in the manner suggested by the commenter because sections 6532 and 7422 apply to the recovery of arbitrage rebate overpayments. Under section 7422, a claim for the recovery of an alleged arbitrage overpayment cannot be filed in any court until a claim for such amount has been filed with the Secretary. Under section 6532, a proceeding to recover an alleged overpayment of arbitrage generally may not begin before the expiration of six months from the date the claim required by section 7422 has been filed with the Secretary, nor after the expiration of two years from the date the taxpayer is notified of the claim denial. Thus, the final regulations adopt the two-year limitation without change.

Certain changes made by the final regulations to the procedures for processing arbitrage rebate overpayment claims are not reflected in Rev. Proc. 2008–37. As a result, the Treasury Department and the IRS intend to publish guidance updating Rev. Proc. 2008–37 to take into account changes made by the final regulations. Comments are requested on whether other changes should be made to the procedures as part of that guidance.

Effective/Applicability Date

In accordance with section 7805(b)(1)(C) and Rev. Proc. 2008–37, § 1.148–3(i)(3)(i) of the final regulations applies to refund claims arising from an issue of bonds to which § 1.148–3(i) applies and for which the final

computation date is after June 24, 2008. For purposes of applying § 1.148–3(i)(3)(i), issues for which the actual final computation date is on or before June 24, 2008, are deemed to have a final computation date of July 1, 2008. Section 1.148–3(i)(3)(ii) and (iii) of the final regulations apply to refund claims arising from an issue of bonds to which § 1.148–3(i) applies and for which the final computation date is after September 16, 2013.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866, as supplemented by Executive Order 13563. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. The final regulations reaffirm or clarify filing deadlines previously published in other administrative guidance. Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking that preceded these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business, and no comments were received.

Drafting Information

The principal author of these regulations is Timothy Jones, Office of Associate Chief Counsel (Financial Institutions and Products), IRS. However, other personnel from the IRS and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by revising the entry for §§ 1.148–0 through 1.148–11 to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.148–0 through 1.148–11 also issued under 26 U.S.C. 148(i). * * *

■ **Par. 2.** Section 1.148–0 is amended by adding entries to paragraph (c) Table of contents for §§ 1.148–3(i)(3) and 1.148–11(k) and (l), and revising § 1.148–11 section heading to read as follows:

§ 1.148–0 Scope and table of contents.

* * * * *

(c) * * *

* * * * *

§ 1.148–3 General arbitrage rebate rules.

* * * * *

(i) * * *

(3) Time and manner for requesting refund.

* * * * *

§ 1.148–11 Effective/applicability dates.

* * * * *

(k) [Reserved]

(l) Additional arbitrage guidance updates.

(1) [Reserved]

(2) [Reserved]

(3) [Reserved]

(4) Application.

■ **Par. 3.** Section 1.148–3 is amended by adding paragraph (i)(3) to read as follows:

§ 1.148–3 General arbitrage rebate rules.

* * * * *

(i) * * *

(3) *Time and manner for requesting refund.* (i) An issuer must request a refund of an overpayment (claim) no later than the date that is two years after the final computation date for the issue to which the overpayment relates (the filing deadline). The claim must be made using the form provided by the Commissioner for this purpose.

(ii) The Commissioner may request additional information to support a claim. The issuer must file the additional information by the date specified in the Commissioner's request, which date may be extended by the Commissioner if unusual circumstances warrant. An issuer will be given at least 21 calendar days to respond to a request for additional information.

(iii) A claim described in either paragraph (i)(3)(iii)(A) or (B) of this section that has been denied by the Commissioner may be appealed to the Office of Appeals under this paragraph (i)(3)(iii). Upon a determination in favor of the issuer, the Office of Appeals must return the undeveloped case to the Commissioner for further consideration of the substance of the claim.

(A) A claim is described in this paragraph (i)(3)(iii)(A) if the Commissioner asserts that the claim was filed after the filing deadline.

(B) A claim is described in this paragraph (i)(3)(iii)(B) if the Commissioner asserts that additional information to support the claim was not submitted within the time specified in the request for information or in any extension of such specified time period.

* * * * *

■ **Par. 4.** Section 1.148–11 is amended by revising the section heading and adding reserved paragraph (k) and paragraph (l) to read as follows:

§ 1.148–11 Effective/applicability dates.

* * * * *

(k) [Reserved]

(l) *Additional arbitrage guidance updates.*

(1) [Reserved]

(2) [Reserved]

(3) [Reserved]

(4) *Application.* (i) Section 1.148–3(i)(3)(i) applies to claims arising from an issue of bonds to which § 1.148–3(i) applies and for which the final computation date is after June 24, 2008. For purposes of this paragraph (l)(4), issues for which the actual final computation date is on or before June 24, 2008, are deemed to have a final computation date of July 1, 2008 for purposes of applying § 1.148–3(i)(3)(i).

(ii) Section 1.148–3(i)(3)(ii) and (iii) apply to claims arising from an issue of bonds to which § 1.148–3(i) applies and for which the final computation date is after September 16, 2013.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Approved: October 17, 2014.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 801

[TD 9703]

RIN 1545–BL89

Balanced System for Measuring Organizational and Employee Performance Within the Internal Revenue Service

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary and final regulations.

SUMMARY: This document contains temporary and final regulations relating

to the IRS system for measuring organizational and employee performance within the IRS, by measuring customer satisfaction, employee satisfaction, and business results. The temporary regulation will eliminate the requirement that information measuring employee satisfaction must be reported to the first-level supervisor in addition to other levels throughout the organization, thus permitting the IRS to stop using the IRS-specific Workforce Questionnaire and, instead, use the same employee satisfaction survey that is used government-wide. The text of the temporary regulation also serves as the text of proposed regulation set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section in this issue of the **Federal Register**.

DATES: *Effective date:* November 13, 2014.

Applicability date: These regulations are applicable for reporting of employee satisfaction information within the meaning of 26 CFR 801.5T that occurs on or after November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Karen Keller, at (202) 317–5772 (not a toll free number).

SUPPLEMENTARY INFORMATION:

Background

This document amends regulations at 26 CFR Part 801 that implemented sections 1201 and 1204 of the Internal Revenue Service Restructuring and Reform Act of 1998, Public Law 105–206, 112 Stat. 685, 713 (1998) (the Act), and provided rules relating to the establishment of a performance management system.

Explanation of Provision

The temporary regulation contained in this document relates to the Employee Satisfaction Measure, Section 801.5. When the existing regulations were promulgated in 1999, the employee satisfaction measure incorporated the features of an existing employee satisfaction survey, which measured and reported the satisfaction of employees in ''pay and duty status'' (non-seasonal employees) to first-level supervisors and up through the organization. Other surveys, such as OPM's Federal Employee Viewpoint Survey (FEVS), which did not exist in 1999 but are now administered government-wide, required reporting of employee satisfaction data to a higher level of agency leadership than first-level supervisors. Although the IRS began conducting the FEVS when it was created by OPM, the IRS modified its pre-existing survey to enable the continued reporting of data to first-level supervisors as required by the regulation. Currently, the IRS conducts both the FEVS and the survey that complies with Section 801.5. The administration of both surveys has resulted in an undue burden on employees and duplication of effort by the IRS. Accordingly, the temporary regulation eliminates the requirement to use the IRS' pre-existing survey and permits the reporting of employee satisfaction data from the FEVS to agency leadership, alleviating ''survey fatigue'' and the unnecessary expenditure of resources and promoting consistency between the IRS and other government agencies when reporting employee satisfaction information.

This regulation is published as a temporary regulation to immediately eliminate the unnecessary requirement for the IRS to administer a second employee satisfaction survey in addition to FEVS. This temporary regulation does not affect taxpayers or taxpayer rights. The temporary regulation only impacts the internal operations of the IRS by eliminating unnecessary burden and expenditure of limited resources.

Special Analyses

It has been determined that as this is not a significant regulatory action as defined in Executive Order 12866, as supplemented by Executive Order 13563, a regulatory assessment is not required, and it has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to this regulation. Because this regulation does not impose a collection of information on small entities, the provisions of the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply. Pursuant to section 7805(f) of the Internal Revenue Code, this regulation will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small businesses.

Drafting Information

The principal author of these regulations is Karen F. Keller, Office of Associate Chief Counsel (General Legal Services). However, other personnel from the IRS participated in their development.

List of Subjects in 26 CFR Part 801

Federal employees, Organization and functions (Government agencies).

Amendment to the Regulations

Accordingly, 26 CFR part 801 is amended as follows:

PART 801—BALANCED SYSTEM FOR MEASURING ORGANIZATIONAL AND EMPLOYEE PERFORMANCE WITHIN THE INTERNAL REVENUE SERVICE

■ **Paragraph 1.** The authority citation for Part 801 continues to read in part as follows:

Authority: 5 U.S.C. 9501 * * *

■ **Par. 2.** Section 801.5 is revised to read as follows:

§ 801.5 [Reserved]. For further guidance see § 801.5T.

■ **Par. 3.** Section 801.5T is added to read as follows:

§ 801.5T Employee satisfaction measures (temporary).

(a) The employee satisfaction numerical ratings to be given to a Business Operating Division (BOD) or equivalent office within the IRS will be determined on the basis of information gathered through various methods. For example, questionnaires, surveys, and other information gathering mechanisms may be employed to gather data regarding satisfaction. The information gathered will be used to measure, among other factors bearing upon employee satisfaction, the quality of supervision, and the adequacy of training and support services. All full and part-time permanent employees of a BOD or equivalent office who are in pay and duty status will have an opportunity to provide information regarding employee satisfaction under conditions that guarantee them confidentiality.

(b) *Effective date.* Section 801.5T is effective on or after November 13, 2014 and expires on or before November 10, 2017.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Approved: October 14, 2014.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2014–0971]

Special Local Regulation; Southern California Annual Marine Events for the San Diego Captain of the Port Zone

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the Hanohano Ocean Challenge special local regulations on January 24, 2015. This marine event occurs on the navigable waters of Mission Bay, in San Diego, California. This action is necessary to provide for safety of the participants, crew, spectators, safety vessels, and general users of the waterway. During the enforcement period, persons and vessels are prohibited from entering into, transiting through, or anchoring within this regulated area unless authorized by the Captain of the Port, or his designated representative.

DATES: The regulations for the marine event listed in 33 CFR 100.1101, Table 1, Item 16, will be enforced from 6:00 a.m. to 2:00 p.m. on January 24, 2015.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Petty Officer Nick Bateman, Waterways Management, U.S. Coast Guard Sector San Diego, CA; telephone (619) 278–7656, email *D11-PF-MarineEventsSanDiego@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the special local regulations in Mission Bay for the Hanohano Ocean Challenge Nationals in 33 CFR 100.1101, Table 1, Item 16 from 6:00 a.m. to 2:00 p.m.

Under the provisions of 33 CFR 100.1101, persons and vessels are prohibited from entering into, transiting through, or anchoring within the regulated race course area during designated racing times unless authorized by the Captain of the Port, or his designated representative. Persons or vessels desiring to enter into or pass through the regulated area may request permission from the Captain of the Port or designated representative. If permission is granted, all persons and vessels shall comply with the instructions of the Captain of the Port or designated representative. Spectator vessels may safely transit outside the regulated area, but may not anchor, block, loiter, or impede the transit of participants or official patrol vessels. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in patrol notification and education of the marine event special local regulations.

This notice is issued under authority of 5 U.S.C. 552 (a) and 33 CFR 100.1101. In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via the Local Notice to Mariners, Broadcast Notice to Mariners, and local advertising by the event sponsor. If the Captain of the Port Sector San Diego or his designated representative determines that the regulated area need not be enforced for the full duration stated on this notice, he or she may use a Broadcast Notice to Mariners or other communications coordinated with the event sponsor to grant general permission to enter the regulated area.

Dated: October 28, 2014.

J. S. Spaner,

Captain, U.S. Coast Guard, Captain of the Port San Diego.

33 CFR Part 165

[Docket No. USCG–2014–0950]

RIN 1625–AA00

Safety Zone: Carquinez Strait Cable Repair Operation, Martinez, CA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone in the navigable waters of Carquinez Strait near Martinez, CA in support of a cable repair operation. This temporary safety zone is established to ensure the safety of the mariners and vessels from the dangers associated with the cable repairs being done in Carquinez Strait. Unauthorized persons or vessels are prohibited from entering into, transiting through, or remaining in the safety zone without the permission of the Captain of the Port or a designated representative.

DATES: This rule is effective without actual notice from November 13, 2014 until 8:00 p.m. on December 5, 2014. For the purposes of enforcement, actual notice will be used from 6 a.m. on November 4, 2014, until November 13, 2014.

ADDRESSES: Documents mentioned in this preamble are part of docket USCG–2014–0950. To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Junior Grade Joshua Dykman, U.S. Coast Guard Sector San Francisco; telephone (415) 399–3585 or email at *D11-PF-MarineEvents@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

DHS Department of Homeland Security
FR Federal Register
NOAA National Oceanic and Atmospheric Administration
PATCOM U.S. Coast Guard Patrol Commander

A. Regulatory History and Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that it would be impracticable to publish a notice of proposed rulemaking (NPRM) with respect to this rule because immediate action is necessary to protect the public from the dangers associated with the cable repair operation. The cable repairs in the Carquinez Strait are the result of a previous emergency anchorage and are an unforeseeable event that poses an immediate danger to mariners.

For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Providing 30 days notice and delaying its effective date would be impracticable

because immediate action is needed to protect persons, property, and infrastructure from potential damage and safety hazards associated with the cable repair operation in Carquinez Strait in Martinez, CA.

B. Basis and Purpose

The legal basis for the proposed rule is 33 U.S.C 1231; 46 U.S.C Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to establish safety zones.

On October 10, 2014, Coast Guard Sector San Francisco received notification that the Manson 71 Barge would be conducting cable repairs following an anchoring incident in Carquinez Strait. The cable repairs are necessary to ensure that power is not lost to the San Francisco Bay area in the future due to damage done to the cable during the anchoring incident. The safety zone is necessary to protect people, vessels, and other property from the hazards associated with the cable repair operations in Carquinez Strait.

C. Discussion of the Final Rule

The Coast Guard is establishing a temporary safety zone in navigable waters of the Carquinez Strait enclosed within the following points: 38°02′26″ N, 122°07′41″ W; 38°02′13″ N, 122°07′34″ W; 38°02′07″ N, 122°07′48″ W; and 38°02′15″ N, 122°08′03″ W (NAD83) during the cable repair operations following an anchoring incident in Carquinez Strait. Anchors will be placed at each of the coordinates and the Manson 71 Barge will be tied off in a four-point configuration. This will allow the barge to remain on top of the cable and move up and down to conduct all repairs. This rule is effective and enforceable from 6 a.m. on November 4, 2014 until 8 p.m. on December 5, 2014.

Unauthorized persons or vessels are prohibited from entering into, transiting through, or remaining in the safety zone without the permission of the Captain of the Port or a designated representative. The effect of the safety zones will be to restrict navigation in the vicinity of the Manson 71 Barge while the vessel is conducting a cable repair operation. Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the restricted area. These regulations are needed to keep people, vessels, and other property safe by preventing interaction between the Manson 71 Barge and small craft during restricted maneuvering and to ensure safety of life on the navigable waters.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes and executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders.

We expect the economic impact of this rule will not rise to the level of necessitating a full Regulatory Evaluation. The safety zones are limited in duration, and are limited to a narrowly tailored geographic area. In addition, although this rule restricts access to the waters encompassed by the safety zones, the effect of this rule will not be significant because the local waterway users will be notified via public Broadcast Notice to Mariners to ensure the safety zones will result in minimum impact. The entities most likely to be affected are waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

This rule may affect owners and operators of waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities and sightseeing. These safety zones would not have a significant economic impact on a substantial number of small entities for the following reasons. These safety zones would be activated, and thus subject to enforcement, for a limited duration. When the safety zones are activated, vessel traffic may coordinate movements around the safety zones by contacting PATCOM on VHF channel 16. The maritime public will be advised in advance of these safety zones via Broadcast Notice to Mariners.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone of limited size and duration. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701; 50 U.S.C. 191, 195; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T11–675 to read as follows:

§ 165.T11–675 Safety zone; Carquinez Strait Cable Repair Operation, Martinez, CA.

(a) *Location.* This temporary safety zone is established for the navigable waters of Carquinez Strait near Martinez, CA as depicted in National Oceanic and Atmospheric Administration (NOAA) Chart 18656. The temporary safety zone in the navigable waters of the Carquinez Strait is enclosed within the following points: 38°02′26″ N, 122°07′41″ W; 38°02′13″ N, 122°07′34″ W; 38°02′07″ N, 122°07′48″ W; and 38°02′15″ N, 122°08′03″ W (NAD83).

(b) *Enforcement period.* The zone described in paragraph (a) of this section will be enforced from 6 a.m. on November 4, 2014 until 8 p.m. on December 5, 2014. The Captain of the Port San Francisco (COTP) will notify the maritime community of periods during which this zone will be enforced via Broadcast Notice to Mariners in accordance with 33 CFR 165.7.

(c) *Definitions.* As used in this section, ''designated representative'' means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or local officer designated by or assisting the COTP pursuant to a Memorandum of Understanding with that agency, to assist in the enforcement of the safety zone.

(d) *Regulations.* (1) Entry into, transiting or anchoring within these safety zones is prohibited unless authorized by the COTP or a designated representative.

(2) The safety zones are closed to all vessel traffic, except as may be permitted by the COTP or a designated representative.

(3) Vessel operators desiring to enter or operate within the safety zones must contact the COTP or a designated representative to obtain permission to do so. Vessel operators given permission to enter or operate in the safety zones must comply with all directions given to them by the COTP or a designated representative. Persons and vessels may request permission to enter the safety zones on VHF–16 or through the 24-hour Command Center at telephone (415) 399–3547.

Dated: October 28, 2014.

Gregory G. Stump,

Captain, U.S. Coast Guard, Captain of the Port San Francisco.

BILLING CODE 9110–04–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 14–139; RM–11732; DA 14–1579]

Television Broadcasting Services; Mount Vernon, Illinois

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission issued in response to a petition for rulemaking filed by WPXS, Inc. (''WPXS''), the licensee of WPXS(TV), channel 21, Mount Vernon, Illinois, requesting the substitution of channel 11 for channel 21 at Mount Vernon. WPXS filed comments reaffirming its interest in the proposed channel substitution and states that it will apply for the channel if allotted,

and promptly construct if authorized. Substituting channel 11 for channel 21 will further the Commission's goal of clearing UHF spectrum for new uses and allow WPXS to provide improved service to viewers, which serves the public interest.

DATES: This rule is effective December 15, 2014.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, *Joyce.Bernstein@fcc.gov,* Media Bureau, (202) 418–1647.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MB Docket No. 143–139, adopted October 30, 2014, and released October 31, 2014. The full text of this document is available for public inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 12th Street SW., Washington, DC, 20554. This document will also be available via ECFS (*http://fjallfoss.fcc.gov/ecfs/*). This document may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street SW., Room CY–B402, Washington, DC 20554, telephone 1–800–478–3160 or via the company's Web site, *http://www.bcpiweb.com.* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

The Commission will send a copy of this Report and Order in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional review Act, *see* 5 U.S.C. 801(a)(1)(A).

List of Subjects in 47 CFR Part 73

Television.

Federal Communications Commission.

Barbara A. Kreisman,

Chief, Video Division, Media Bureau.

Final Rule

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR Part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336, and 339.

§ 73.622 [Amended]

■ 2. Section 73.622(i), the Post-Transition Table of DTV Allotments under Illinois is amended by removing channel 21 and adding channel 11 at Mount Vernon.

[FR Doc. 2014–26796 Filed 11–12–14; 8:45 am]

BILLING CODE 6712–01–P

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

48 CFR Parts 217 and 219

Defense Federal Acquisition Regulation Supplement; Technical Amendments

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD is making technical amendments to the Defense Federal Acquisition Regulation Supplement (DFARS) to provide needed editorial changes.

DATES: Effective November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Mr. Manuel Quinones, Defense Acquisition Regulations System, OUSD(AT&L)DPAP(DARS), Room 3B941, 3060 Defense Pentagon, Washington, DC 20301–3060. Telephone 571–372–6088; facsimile 571–372–6094.

SUPPLEMENTARY INFORMATION:

This final rule amends the DFARS as follows:

1. Directs contracting officers to additional procedures and guidance by adding references at 217.207 to DFARS PGI 217.207.

2. Corrects paragraph designation at 219.201.

List of Subjects in 48 CFR Parts 217 and 219

Government procurement.

Manuel Quinones,

Editor, Defense Acquisition Regulations System.

Therefore, 48 CFR parts 217 and 219 are amended as follows:

■ 1. The authority citation for 48 CFR parts 217 and 219 continues to read as follows:

Authority: 41 U.S.C. 1303 and 48 CFR chapter 1.

PART 217—SPECIAL CONTRACTING METHODS

■ 2. Revise section 217.207 to read as follows:

217.207 Exercise of options.

(c) In addition to the requirements at FAR 17.207(c), exercise an option only after determining that the contractor's record in the System for Award Management database is active and the contractor's Data Universal Numbering System (DUNS) number, Commercial and Government Entity (CAGE) code, name, and physical address are accurately reflected in the contract document. See PGI 217.207 for the requirement to perform cost or price analysis of spare parts prior to exercising any option for firm-fixed-price contracts containing spare parts.

PART 219—SMALL BUSINESS PROGRAMS

219.201 [Amended]

■ 3. Amend section 219.201 by redesignating paragraphs (d) and (e) as paragraphs (c) and (d) respectively.

50 CFR Part 17

[Docket No. FWS–HQ–ES–2014–0055; 4500030113]

RIN 1018–BA63

Endangered and Threatened Wildlife and Plants; Adding 20 Coral Species to the List of Endangered and Threatened Wildlife

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), in accordance with the Endangered Species Act of 1973, as amended (Act), are amending the List of Endangered and Threatened Wildlife (List) by adding 20 species of corals: Boulder star coral (*Orbicella franksi*), lobed star coral (*Orbicella annularis*), mountainous star coral (*Orbicella faveolata*), pillar coral (*Dendrogyra cylindrus*), rough cactus

coral (*Mycetophyllia ferox*), *Acropora globiceps, Acropora jacquelineae, Acropora lokani, Acropora pharaonis, Acropora retusa, Acropora rudis, Acropora speciosa, Acropora tenella, Anacropora spinosa, Euphyllia paradivisa, Isopora crateriformis, Montipora australiensis, Pavona diffluens, Porites napopora,* and *Seriatopora aculeata.* These amendments are based on previously published determinations by the National Marine Fisheries Service (NMFS) of the National Oceanic and Atmospheric Administration, Department of Commerce, which has jurisdiction for these species.

DATES: This rule is effective November 13, 2014. *Applicability date:* The 20 coral listings were applicable as of October 10, 2014.

FOR FURTHER INFORMATION CONTACT: Douglas Krofta, Chief, Branch of Endangered Species Listing, U.S. Fish and Wildlife Service, MS–ES, 5275 Leesburg Pike, Falls Church, VA 22041–3803; 703–358–2171.

SUPPLEMENTARY INFORMATION:

Background

In accordance with the Act (16 U.S.C. 1531 et seq.) and Reorganization Plan No. 4 of 1970 (35 FR 15627; October 6, 1970), NMFS has jurisdiction over the marine and anadromous taxa identified in this rule. Under section 4(a)(2) of the Act, NMFS must decide whether a species under its jurisdiction should be classified as an endangered or threatened species. NMFS makes these determinations via its rulemaking process. We, the Service, are then responsible for publishing final rules to amend the List in title 50 of the Code of Federal Regulations (CFR) at 50 CFR 17.11(h).

On December 7, 2012, NMFS published a proposed rule (77 FR 73220) to list 66 petitioned coral species, 12 as endangered and 54 as threatened, and to reclassify from threatened to endangered two coral species (elkhorn coral (*Acropora palmata*) and staghorn coral (*Acropora cervicornis*)) already listed under the Act. NMFS solicited public comments on the proposed rule through March 7, 2013. On September 20, 2013, NMFS published a notice of 6-month extension of the deadline for the final coral species' determinations because of substantial disagreement regarding the sufficiency and accuracy of the data and analyses relevant to the proposed listing determinations (78 FR 57835).

On September 10, 2014, NMFS published a final rule (79 FR 53852) to list 20 of the 66 proposed coral species as threatened species. The listing of the 20 species was effective October 10, 2014. In that same rule, NMFS also determined that elkhorn coral and staghorn coral did not warrant reclassification from threatened to endangered. However, we revise the elkhorn coral and staghorn coral listings in this rule to make the information in the Historic Range column consistent with the other coral entries; the listing status of threatened remains unchanged for these two species.

In the September 10, 2014, final rule (79 FR 53852), NMFS addressed all public comments received in response to the proposed rule. By publishing this final rule, we are simply taking the necessary administrative step to codify these changes in the List in 50 CFR 17.11(h).

Administrative Procedure Act

Because NMFS provided a public comment period on the proposed rules for these taxa, and because this action of the Service to amend the List in accordance with the determination by NMFS is nondiscretionary, the Service finds good cause that the notice and public comment procedures of 5 U.S.C. 553(b) are unnecessary for this action. We also find good cause under 5 U.S.C. 553(d)(3) to make this rule effective immediately. The NMFS rules extended protection under the Act to these species and listed them in 50 CFR parts 223 and 224; this rule is an administrative action to add the species to the List of Endangered and Threatened Wildlife at 50 CFR 17.11(h). The public would not be served by delaying the effective date of this rulemaking action.

Required Determinations

National Environmental Policy Act

We have determined that an environmental assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. We outlined our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11(h) under Corals by:
■ a. Revising the entries for ''Coral, elkhorn'' and ''Coral, staghorn'' to read as set forth below; and
■ b. Adding 20 entries in alphabetical order for: ''Coral, [no common name]'' (15 entries); ''Coral, boulder star''; ''Coral, lobed star''; ''Coral, mountainous star''; ''Coral, pillar''; and ''Coral, rough cactus'', to read as follows:

§ 17.11 Endangered and threatened wildlife.

BILLING CODE 4310–55–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 300

[Docket No. 140131088–4913–02]

RIN 0648–BD94

International Fisheries; Western and Central Pacific Fisheries for Highly Migratory Species; Fishing Effort Limits in Purse Seine Fisheries for 2014

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFC Implementation Act) to revise the 2014 limit on fishing effort by U.S. purse seine vessels in the U.S. exclusive economic zone (U.S. EEZ) and on the high seas between the latitudes of 20° N. and 20° S. in the area of application of the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention). The total limit for 2014 is revised from 2,588 fishing days to 1,828 fishing days. This action is necessary for the United States to implement provisions of a conservation and management measure (CMM) adopted by the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Commission) and to satisfy the obligations of the United States under the Convention, to which it is a Contracting Party.

DATES: This rule is effective December 15, 2014.

ADDRESSES: Copies of supporting documents prepared for this final rule, including the regulatory impact review (RIR) and the Supplemental Information Report prepared for National Environmental Policy Act (NEPA) purposes, as well as the proposed rule, are available via the Federal e-Rulemaking Portal, at *www.regulations.gov* (search for Docket ID NOAA–NMFS–2014–0081). Those documents, and the small entity compliance guide prepared for this final rule, are also available from NMFS at the following address: Michael D. Tosatto, Regional Administrator, NMFS, Pacific Islands Regional Office (PIRO), 1845 Wasp Blvd., Building 176, Honolulu, HI 96818. The initial regulatory flexibility analysis (IRFA) and final regulatory flexibility analysis (FRFA) prepared under the authority of the Regulatory Flexibility Act (RFA) are included in the proposed rule and this final rule, respectively.

FOR FURTHER INFORMATION CONTACT: Tom Graham, NMFS PIRO, 808–725–5032.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 2014, NMFS published a proposed rule in the **Federal Register** (79 FR 43373) to revise regulations at 50 CFR part 300, subpart O, to implement a decision of the Commission. The proposed rule was open for public comment through August 25, 2014.

This final rule is issued under the authority of the WCPFC Implementation Act (16 U.S.C. 6901 *et seq.*), which authorizes the Secretary of Commerce, in consultation with the Secretary of State and the Secretary of the Department in which the United States Coast Guard is operating (currently the Department of Homeland Security), to promulgate such regulations as may be necessary to carry out the obligations of the United States under the Convention, including the decisions of the Commission. The authority to promulgate regulations has been delegated to NMFS.

This final rule implements for U.S. fishing vessels some of the purse seine-related provisions of the Commission's Conservation and Management Measure (CMM) 2013–01, ''Conservation and Management Measure for Bigeye, Yellowfin and Skipjack Tuna in the Western and Central Pacific Ocean.'' The preamble to the proposed rule includes detailed background information, including on the Convention and the Commission, the provisions of CMM 2013–01 being implemented in this rule, and the bases for the proposed regulations, which is not repeated here.

New Requirements

This final rule revises the existing limit on the number of fishing days that may be used by U.S. purse seine vessels in 2014 in an area called the Effort Limit Area for Purse Seine (ELAPS). The ELAPS includes all areas of the high seas and U.S. EEZ within the Convention Area between the latitudes of 20° North and 20° South (but not the U.S. territorial sea). The limit is revised from 2,588 fishing days to 1,828 fishing days.

Once NMFS determines during 2014 that, based on available information, the limit is expected to be reached by a specific future date, NMFS will issue a notice in the **Federal Register** announcing the closure of the U.S. purse seine fishery in the ELAPS starting on that specific future date. Upon any closure, it will be prohibited to use a U.S. purse seine vessel to fish in the ELAPS through the end of the calendar year. NMFS will publish the notice at least seven calendar days before the effective date of the closure to provide fishermen advance notice of the closure.

Comments and Responses

NMFS received three sets of comments on the proposed rule and supporting documents. The comments are summarized below, followed by responses from NMFS.

Comment 1: I support this rule to reduce fishing days in order to conserve our fish stocks.

Response: NMFS acknowledges the comment.

Comment 2: I fail to see how the proposed rule would protect the stock with the Asian and Pacific Island countries continuing to add boats to their Pacific Ocean fleets while the United States plays into their hands and continues to strangle-hold our fleet. Soon, all fish sold in the U.S. market will be sourced from foreign vessels, which are less-than-ideal role models.

These areas are highly regulated, as U.S. boats must be U.S.-built and have a fisheries endorsement to fish in these areas; and that is less than one third of the U.S. fleet. My boat is U.S.-built but cannot fish in U.S. waters. But instead of our government helping me to gain access, it just adds more unnecessary regulations.

There are countries that continue to add boats and to fish on fish aggregating devices even during the closure while not living up to their responsibilities that are already in place.

I propose to postpone implementing the limit until a long-term solution is agreed and implemented by all in the Commission, as this is not a permanent solution. These areas are not in danger from U.S. boats. However, the U.S. boats are the eyes and ears, and have in the past found and reported illegal, unreported, and unregulated fishing in the U.S. EEZ. The U.S. boats do not receive any reimbursement for time or

fuel for this reporting, but it is the right thing to do.

While areas continue to be closed off, we are only hurting the stocks as we are allowing the Pacific Island Parties to focus international fishing efforts into their exclusive economic zones for purely economic reasons, rather than focusing on efforts to truly conserve, by limiting vessels. Remember these are highly migratory species. I compare the focusing of effort to sunlight: Normally, it will not hurt you, but if you focus sunlight through a magnifying glass, it will burn; this is what is being done by driving effort into smaller areas.

Postpone this proposed rule, or better, cancel it, as these areas are already regulated by the United States. The problem can be addressed and solved on the international level rather than strangle-holding our fleet while others continue to add boats, skirt regulations, and worst of all, not even enforce what is already in place.

Support the U.S. fleet and the stock and push for vessel limits on all fleets, as the catch phrase ''domestic fleet'' is simply Asian boats that are flagged in the islands. Work with the U.S. fleet instead of against it; we are the highest regulated fleet in the world, and we are ahead of the curve, as we have already dropped our fishing efforts (numbers of boats) in the 1980s when the U.S. Tuna Treaty (Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America, also known as the South Pacific Tuna Treaty, or SPTT) was signed, well ahead of other fleets that are continuing to add effort.

Let's be logical and work together and protect the stock and our food source.

Response: NMFS recognizes that if the United States imposes Commission-mandated requirements on its vessels, such as limits on fishing effort, and other members of the Commission do not do the same—despite being required to do so under the Convention—for their vessels, U.S. fishing vessels can be put at a competitive disadvantage relative to the fishing vessels of other members. If that disadvantage is severe enough, U.S. vessels could supply less product than they formerly did, resulting in shifts in the sources of fish sold in U.S. and other markets. NMFS also recognizes that if other Commission members fail to fully implement the decisions of the Commission, such as the provisions of CMM 2013–01, those decisions are less likely to achieve their fish stock conservation objectives. However, in order to satisfy the obligations of the United States as a party to the Convention and member of the Commission, NMFS is required to implement the Commission-mandated fishing effort limits for U.S. purse seine vessels. Accordingly, the commenter's proposal to postpone or cancel implementation would not satisfy U.S. obligations under the Convention. NMFS is proceeding with implementation through this final rule. NMFS also notes that the United States, as a member of the Commission, is contributing to and has prioritized the development of the Commission's compliance monitoring scheme, with the aim of improving compliance with Commission decisions by all its members.

Comment 3: The American Tunaboat Association (ATA) is composed of the owners of all U.S.-flag purse seine vessels fishing in the western Pacific Ocean. There will be a direct and significant impact on the U.S. fleet should this proposed rule be finalized as written.

The proposed reduction in allowable fishing days in the ELAPS from 2,588 to 1,828 would be a substantial loss of fishing opportunities for U.S. vessels at a time of great uncertainty regarding fishing access under the SPTT. The ATA understands that there may be little flexibility in implementing the Commission measure establishing a fishing day limit on the high seas, but we note that there is flexibility for the U.S. EEZs. Therefore, in combining the two areas as the ELAPS, a level higher than 1,828 fishing days is justified.

The ELAPS limits are not based on science relative to the conservation of the tuna stocks. The science provider to the Commission has not recommended, as a conservation measure, limits on catches of tunas on the high seas, or in any particular economic zones. This is an important point, because that truth provides the United States with more flexibility in the manner in which it regulates the U.S. fleet. For example, the United States could establish a larger number for allowable catches in the U.S. EEZ based on using certain past high years as base years. Given the variability in the availability of highly migratory stocks in different areas during different years, and the relevance of the fishing strategies that are employed in any given year, such an approach would not be unreasonable.

The ATA urges NMFS to develop such an alternative approach and provide for a larger ELAPS limit than 1,828 fishing days. We also believe that, if all fishing by purse seine vessels is prohibited in these remote island areas as a result of an expansion of the Pacific marine monuments, as is being contemplated by the Administration (an action strongly opposed by ATA), the consequent lost fishing opportunities should be compensated for by allowing more fishing on the same stocks elsewhere; that is, on the high seas. From a science or conservation point of view, there would be no detriment to the tuna stocks from such an approach.

Response: NMFS acknowledges that the proposed rule could have direct economic impacts on participants in the U.S. purse seine fleet in the western and central Pacific Ocean (WCPO). As described in the RIR and IRFA prepared for this action, the impacts could be minor or substantial, depending on such factors as the length of the closure of the ELAPS in the event the limit is reached, whether the EEZs of the FFA members remain available for fishing during such a closure, and oceanic conditions.

This rule implements certain provisions of CMM 2013–01, which directs coastal members like the United States to ''establish effort limits, or equivalent catch limits for purse seine fisheries within their EEZs that reflect the geographical distributions of skipjack, yellowfin, and bigeye tunas, and are consistent with the objectives for those species'' (excerpt from paragraph 23 of CMM 2013–01). CMM 2013–01 further requires, ''Those coastal States that have already notified limits to the Commission shall restrict purse seine effort and/or catch within their EEZs in accordance with those limits'' (excerpt from paragraph 23 of CMM 2013–01). Because the United States has previously notified the Commission of its purse seine effort limits for the U.S. EEZ since the limits were first established in 2009 (in a final rule published August 4, 2009; 74 FR 38544), the United States is obligated to continue to apply the same limits for the U.S. EEZ. Thus, CMM 2013–01 does not change the applicable purse seine fishing effort limit for the U.S. EEZ, and for that reason NMFS does not agree that there is flexibility in the limit for the U.S. EEZ or that a limit for the ELAPS of more than 1,828 fishing days is justified in this rule to implement provisions of CMM 2013–01.

Finally, on September 25, 2014, President Obama issued Proclamation 9173 extending the boundaries of the Pacific Remote Islands Marine National Monument around Jarvis Island, Wake Island, and Johnston Atoll to the outer limit of the U.S. EEZ. Under the Proclamation, commercial fishing is prohibited in the expansion area. NMFS acknowledges that the prohibition of commercial fishing within the expansion area will limit the fishing grounds available to U.S. purse seine vessels; however, we note that the expansion area represents a small

fraction of the U.S. purse seine fleet's typical fishing grounds in the WCPO.

Changes From the Proposed Rule

No changes from the proposed rule have been made in this final rule.

Classification

The Administrator, Pacific Islands Region, NMFS, has determined that this final rule is consistent with the WCPFC Implementation Act and other applicable laws.

Executive Order 12866

This final rule has been determined to be not significant for purposes of Executive Order 12866.

Regulatory Flexibility Act (RFA)

A FRFA was prepared. The FRFA incorporates the IRFA prepared for the proposed rule. The analysis in the IRFA is not repeated here in its entirety.

A description of the action, why it is being considered, and the legal basis for this action are contained in the preamble of the proposed rule and in the **SUMMARY** and **SUPPLEMENTARY INFORMATION** sections of this final rule, above. The analysis follows.

Significant Issues Raised by Public Comments in Response to the IRFA

NMFS did not receive any comments on the IRFA itself, but two sets of comments could pertain to small entities. See Comments 2 and 3 on the proposed rule, and NMFS' responses, above.

Description of Small Entities to Which the Rule Will Apply

Small entities include ''small businesses,'' ''small organizations,'' and ''small governmental jurisdictions.'' The Small Business Administration (SBA) has established size standards for all major industry sectors in the United States, including commercial finfish harvesters (NAICS code 114111). A business primarily involved in finfish harvesting is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $20.5 million for all its affiliated operations worldwide.

This final rule will apply to owners and operators of U.S. purse seine vessels used for fishing in the Convention Area. The number of affected vessels is the number licensed under the Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America (South Pacific Tuna Treaty, or SPTT). The current number of licensed vessels is 40, the maximum number of licenses available under the SPTT (excluding joint-venture licenses, of which there are five available under the SPTT, none of which have ever been applied for or issued).

Based on (limited) available financial information about the affected fishing vessels and the SBA's small entity size standards for commercial finfish harvesters, and using individual vessels as proxies for individual businesses, NMFS believes that all the affected fish harvesting businesses are small entities. As stated above, there are currently 40 purse seine vessels in the affected purse seine fishery. Neither gross receipts nor ex-vessel price information specific to the 40 vessels are available to NMFS. Average annual receipts for each of the 40 vessels during the last 3 years for which reasonably complete data are available (2010–2012) were estimated as follows: The vessel's reported retained catches of skipjack tuna, yellowfin tuna, and bigeye tuna in each year were each multiplied by an indicative Asia-Pacific regional cannery price for that species and year (developed by the Pacific Islands Forum Fisheries Agency and available at *https://www.ffa.int/node/425#attachments*); the products were summed across species for each year; and the sums were averaged across the 3 years. The estimated average annual receipts for each of the 40 vessels were less than the $20.5 million threshold used to classify businesses as small entities under the SBA size standard for finfish harvesting businesses.

Recordkeeping, Reporting, and Other Compliance Requirements

The final rule will not establish any new reporting or recordkeeping requirements within the meaning of the Paperwork Reduction Act. The classes of small entities subject to the requirements and the types of professional skills necessary to fulfill each of the requirements are described in the IRFA.

Disproportionate Impacts

There would be no disproportionate economic impacts between small and large entities operating purse seine vessels as a result of this final rule. Furthermore, there would be no disproportionate economic impacts based on vessel size, gear, or homeport.

Steps Taken To Minimize the Significant Economic Impacts on Small Entities

In previous rulemakings to establish or revise U.S. purse seine fishing effort limits in the ELAPS in accordance with Commission decisions, NMFS considered a number of alternatives. The alternatives included different time scales for the limits (e.g., single-year versus multiple-year limits); whether separate limits or a combined limit would be established in the U.S. EEZ and high seas portions of the ELAPS; whether the limit(s) would be allocated to individual vessels; and different magnitudes of the limit(s).

The first category of alternatives, time scales, is not relevant here because the objective is to implement the required fishing effort limit for 2014 only.

The second category of alternatives—whether or not to break up the ELAPS limit into separate limits for the U.S. EEZ and the high seas portions of the ELAPS—would provide less operational flexibility for affected purse seine vessels, and thus be more constraining and costly than the proposed limit. It is rejected for that reason.

The third category of alternatives, allocating the limit among individual vessels, would likely alleviate any adverse impacts of a race-to-fish that might occur as a result of establishing the competitive fishing effort limits as in the proposed rule. As described in the IRFA, those potential impacts include lower prices for landed product, as well as risks to performance and safety stemming from fishing during sub-optimal times. Those impacts, however, are expected to be minor. Furthermore, developing the necessary allocation criteria and procedures would be a substantial and lengthy process that probably could not be completed in time to implement this limit for 2014. For these reasons, this alternative is rejected.

Regarding the fourth category of alternatives (the magnitude of the limits), NMFS considered, for the 2013 rule that established the 2013 ELAPS limit and existing 2014 ELAPS limit, both smaller and larger limits for the ELAPS. Smaller limits, being more constraining and costly to affected fishing businesses, are not considered further here. With respect to larger limits, in the 2013 rule, NMFS considered an alternative that would be based in part on the fleet's greatest annual level of fishing effort in the U.S. EEZ (on an average per-vessel basis, then expanded to a 40-vessel-equivalent) during the 1997–2010 time period. For this rule, NMFS considered an alternative using the same approach considered in the 2013 rule. Using that approach, the limit in the U.S. EEZ would be 1,655 fishing days, and when combined with the high seas limit of 1,270 fishing days, the total ELAPS limit would be 2,925 fishing days. Because

this alternative limit is greater and thus less constraining than a limit of 1,828 fishing days (as well as the existing limit of 2,588 fishing days), the costs of complying with this alternative would be less than or equal to those of the proposed limit of 1,828 fishing days. This alternative is rejected because it would depart from the way that the effort limits established for the period 2009–2013 were determined. The approach used in formulating the limit in this final rule is the same as that used to establish ELAPS limits in the 2009 rule, the 2011 rule, and the 2013 rule, and affected entities have been exposed to the impacts of those limits for the past 5 years. Furthermore, as explained in NMFS' response to Comment 3, above, CMM 2013–01 does not all allow for higher purse seine effort limits in the U.S. EEZ than those already notified to the Commission.

The alternative of taking no action at all, which would leave the existing 2014 ELAPS limit of 2,588 fishing days in place, is rejected because it would fail to accomplish the objective of the WCPFC Implementation Act or satisfy the obligations of the United States as a Contracting Party to the Convention.

Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, a small entity compliance guide has been prepared. The guide will be sent to permit and license holders in the affected fisheries. The guide and this final rule will also be available at *www.fpir.noaa.gov* and by request from NMFS PIRO (see **ADDRESSES**).

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Fish, Fisheries, Fishing, Marine resources, Reporting and recordkeeping requirements, Treaties.

Dated: November 6, 2014.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 300 is amended as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 1. The authority citation for 50 CFR part 300, subpart O, continues to read as follows:

Authority: 16 U.S.C. 6901 *et seq.*

■ 2. In § 300.223, paragraph (a)(1) is revised to read as follows:

§ 300.223 Purse seine fishing restrictions.

* * * * *

(a) * * *

(1) For calendar year 2014 there is a limit of 1,828 fishing days.

* * * * *

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 141002822–4933–01]

RIN 0648–BE56

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Northeast Groundfish Fishery; Fishing Year 2014; Emergency Gulf of Maine Cod Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; interim action; request for comments.

SUMMARY: This temporary rule implements commercial and recreational fishery management measure changes for Gulf of Maine cod protection in response to a recent updated assessment of the status of this severely depleted stock. The measures of this interim rule are necessary to reduce fishing mortality on GOM cod and to provide additional stock and spawning protection. The intended effect of these interim measures are to decrease fishing year 2014 catch so that overfishing is reduced and protect the stock until more permanent measures can be developed by the New England Fishery Management Council (Council).

DATES: Effective November 13, 2014, until May 12, 2015. Comments must be received by December 13, 2014.

ADDRESSES: You may submit comments, identified by NOAA–NMFS–2014–0125, by any of the following methods:

- *Electronic submissions:* Submit all electronic public comments via the Federal eRulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2014-0125,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to John K. Bullard, Regional Administrator, National Marine Fisheries Service, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope, ''Comments on the GOM Cod Interim Action.''

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Copies of an environmental assessment (EA) prepared by the Greater Atlantic Regional Fisheries Office (GARFO) and Northeast Fisheries Science Center (Center) for this rulemaking are available from John K. Bullard, Regional Administrator, National Marine Fisheries Service, 55 Great Republic Drive, Gloucester, MA 01930. The EA is also accessible via the Internet at *www.nero.noaa.gov/sfd/sfdmulti.html.*

FOR FURTHER INFORMATION CONTACT: Michael Ruccio, Fishery Policy Analyst, phone: 978–281–9104.

SUPPLEMENTARY INFORMATION:

Interim Measures

At the request of the Council, and in response to a recent updated assessment of Gulf of Maine (GOM) cod indicating that this stock is at a historically low abundance level, NMFS, on behalf of the Secretary of Commerce, is taking interim action to implement GOM cod fishing mortality reductions and other management measures designed to reduce overfishing, protect aggregations and spawning, and keep GOM cod on a rebuilding trajectory. These actions are being implemented as interim measures under the authority provided in section 305(c) of the Magnuson-Stevens Fishery

Conservation and Management Act (Magnuson-Stevens Act) with the expectation that the Council will recommend additional permanent measures for fishing year 2015 and beyond to end overfishing and rebuild this stock. The measures are summarized here with additional detail provided under specific headings that appear below in this rule's preamble. The measures are:

1. Time and area closures applicable to federally permitted vessels using commercial and recreational fishing gear capable of catching GOM cod;

2. A 200-lb (90.7-kg) GOM cod trip limit both the common pool and sector vessels;

3. Changes to commercial fishing declarations prohibiting sector vessels declaring into the GOM Broad Stock Area from fishing in another broad stock area on the same trip;

4. Prohibition on the possession of recreationally caught GOM cod (applies to entire GOM Broad Stock Area); and

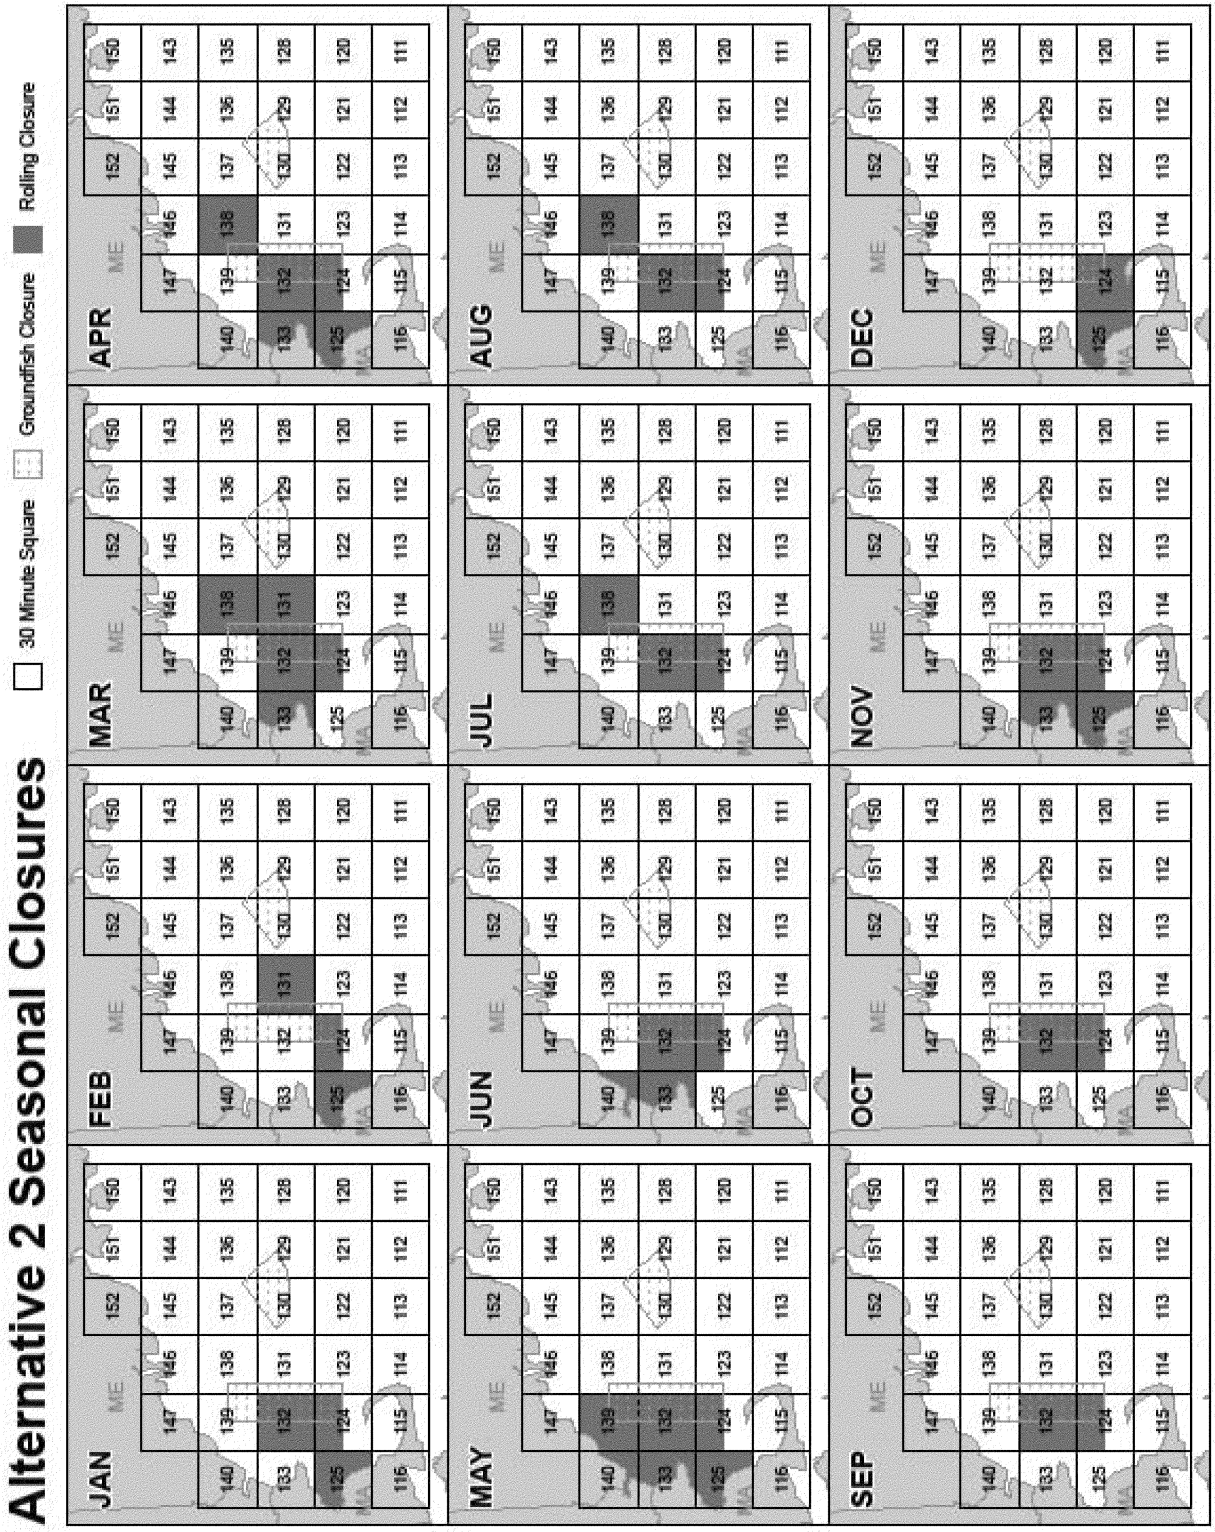
5. Revocation of a previously authorized GOM exemption that allowed sector vessels declared into the gillnet fishery to use more gillnets.

This rule implements these measures for an initial 180 days, as authorized by section 305(c) of the Magnuson-Stevens Act. These measures may be extended, or modified, as needed, for an additional 186 days pursuant to section 305(c) of the Magnuson-Stevens Act. Any modification or extension will be published in the **Federal Register**. This rule is consistent with the requirements established under section 305(c) and NMFS policy guidance for emergency rulemaking.

Seasonal Interim Closure Areas

The following areas are closed to federally permitted vessels using fishing gear (commercial and recreational, including party and charter) capable of catching GOM cod, which does not include ''exempted gear'' as defined in § 648.2, in the times and areas indicated in Figure 1, beginning on the date this rule is published in the **Federal Register**. These measures temporarily replace and expand on the existing GOM rolling closures. Although the closures will be in effect upon this rule's publication, we will delay implementing the closure areas for 2 weeks following publication of this rule to allow fixed gear (gillnets, longline) time to remove fishing gear from the November closure areas (i.e., 30-minute squares 132, 133, 125, and the northern half of 124). The portions of the year-round Western Gulf of Maine (WGOM) Closure Area not otherwise closed by the 30-minute squares that overlap the area in this action will continue remain accessible for federally permitted party and charter vessels through a Letter of Authorization.

Figure 1. Seasonal Interim Closed Areas, Closed to all Fishing Gear Capable of Catching GOM Cod, by Month.



Seasonal Interim Closure Area Rationale

Three objectives were used in evaluating areas for interim closures: Reducing fishing mortality by reducing GOM cod commercial and recreational catch; protecting core areas where the remaining GOM cod stock is believed to be located; and protecting areas of likely cod spawning activities. These objectives were analyzed in the context of not closing down the entire GOM so as to allow some harvesting of other groundfish stocks but still reducing mortality and fishing on cod while the Council develops more permanent measures for Framework Adjustment 53.

Furthermore, it is unnecessary to try and prevent all fishing mortality for the remainder of fishing year 2014 as the stock can rebuild if subject to overfishing in 2014 and sufficient measures are in place beginning in 2015. To achieve zero fishing mortality would require closing all fisheries in the Gulf of Maine, including those that do not target groundfish. The impacts of such measures would be substantial and, as a result, such a closure is impracticable and unwarranted to ensure effective cod conservation.

In requesting the emergency action, the Council was not specific in describing measures it recommended to reduce fishing mortality for the remainder of fishing year 2014. We agree that, based on the updated assessment, fishing mortality must be greatly reduced for GOM cod as soon as possible to help ensure that overfishing can be ended and the stock can rebuild. To allow fishing on GOM cod for the rest of this fishing year without any additional measures and under the available annual catch limit (ACL), would reduce the likelihood of ending overfishing and successfully rebuilding the stock in subsequent years. We contemplated making changes to the ACL for the rest of fishing year 2014, which would trigger a quota recall. However, doing so would be administratively complex and a challenge to implement quickly. Given the stage of the fishing year, it would also be challenging to administer a quota recall in an equitable fashion. The Council is developing specifications for the 2015 fishing year (May 1, 2015, to April 30, 2016) in Framework Adjustment 53 that would reduce the GOM cod ACLs based on the 2014 stock assessment update for cod.

We chose time and area closures as the best means to reduce catch for the remainder of fishing year 2014 in light of the objectives stated above. In selecting these areas, we analyzed where the majority of 2010 to mid-calendar year 2014 GOM cod catches have occurred. The basis for our analysis is that fishermen have fished where the stock is located and by selectively closing some of these areas, catch can be reduced and the standing stock protected. These analyses indicated several locations where cod have consistently been taken in commercial and recreational fisheries during this time. Our analysis indicates that while catches were more inshore during 2010–12, a higher proportion of catch occurred east of the year-round WGOM Closure Area in 2013 and thus far in 2014. It is not known if this is a shift in fishing behavior, redistribution of the GOM cod stock, or some combination of both. It is also not known if effort and the stock may shift back inshore during peak spawning periods yet to come for winter and spring 2015. This redistribution mirrors anecdotal information recently provided by the fishing industry. The areas and times selected for closure, therefore, were informed by these most recent trends of fishing but also provide protection for areas of high catch earlier in the period evaluated.

We also chose measures to reduce fishing mortality on GOM cod based on the potential of effort shifting to other groundfish stocks. We were particularly concerned about potential haddock interactions, as we are undertaking concurrent action to increase the fishing year 2014 commercial haddock catch allowance for the remainder of the year. We kept open areas where the amount of non-cod species catch might be strong but the potential cod catch relatively low. In cases where co-occurrence of cod and other likely target stocks were high, the areas were closed to reduce cod fishing mortality and to discourage intentional targeting of cod or incidental take of cod while fishing for other stocks.

For GOM cod to have a meaningful chance to recover, not only must fishing mortality be controlled, but the complex courtship and spawning process must be protected. To this end, we are also closing areas important to spawning and spawning potential. The spawning-related closure measures are based on information assembled by the Closed Area Technical Team for the Council's Omnibus Habitat Amendment 2, information from the Industry Based Survey, Massachusetts Division of Marine Fisheries research, and scientific literature. Because of difficulty in pinpointing spawning spatially and temporally, we used broad, larger areas for the spawning-related closures. The use of larger areas is expected to provide more protection for spawning activities than would smaller or disaggregated areas. This is because there is strong evidence that pre-spawning courtship and foraging, spawning activities, and post-spawning egress from areas can be substantially impacted by fishing activities and result in high fishery removals. In particular, the focused harvest of spawning aggregations in Atlantic Canada is often cited as a substantial contribution to the cod stock collapse there in the early 1990s. More information on the analyses we performed is available in the EA and not repeated here.

In selecting spawning-related closures, we first examined if areas were known or likely to be cod spawning or spawning activity related areas. When areas/times were verified, we designated those areas for closure irrespective of how much cod catch had historically occurred in the time/area. Next, we looked for areas that produced a proportionately high cod catch relative to the total cod caught in a given month because there is a strong correlation between high cod catch and spawning activity. Accordingly, those areas that provide high proportional catches, particularly in recent years, were designated for closure.

As another basis for selecting the closed areas, if an area produced moderate catches or had variable catch contributions over time, we evaluated the tradeoff between closing the area for cod mortality reduction and the potential foregone access to other, more abundant stocks. We attempted to strike a balance between ensuring cod mortality would, in fact be reduced, while providing access to other stocks.

The analyses we undertook indicate that by closing areas identified as producing a high proportion of cod catch and/or are involved with cod spawning activities, it may be possible to reduce GOM cod catch by a sizable amount—ranging from 68 to 82 percent for commercial and 73 to 81 percent for recreational catch, depending on which of the years from 2010 to 2014 are included in the analysis. These potential reductions should be viewed with the caveat that they are the result of evaluating how much catches would be reduced had the interim measure closures been in place for 12 months, fishing behaviors remained unchanged, and stock distribution stayed the same. This evaluation does not consider the catch that has already occurred for fishing year 2014, so it is not appropriate to conclude that approximately 75 percent of the ACL will be taken, for example. Any number of these assumptions may change and, as a result, the reductions should be viewed as a potential relative reduction in fishing mortality/catch. In particular, effort may shift to areas not heavily targeted for cod following implementation of these seasonal closures. In any given year, no more than 32 percent of the total commercial and 27 percent of the total recreational cod catch occurred in the areas being left open under this interim action. As a result, it is not possible to precisely quantify the potential magnitude of fishing mortality reduction that will result from the area closures; however, the analysis indicates closing these areas should be effective in reducing GOM cod catch and reducing

overfishing, in lieu of reducing commercial ACL inseason. The closure areas also provide the added benefit protecting fall/winter/spring GOM cod spawning activities.

As previously indicated, implementation of these closure areas will be delayed for 2 weeks so that fixed gear can be removed from the November closure areas. However, on and after the date of publication of this rule, vessels transiting these closed areas must have gear stowed in accordance with regulations found in § 648.2. Trawl vessels may use on-net storage provisions in § 648.2 not available for immediate use that pertain to transiting seasonal closure areas.

Commercial Fishery Trip Limits

This action implements a 200-lb (90.7-kg) GOM cod trip limit for all vessels fishing in fishing year 2014 sectors. This means that sector vessels and common pool vessels are now limited to possessing and landing limit of 200 lb (90.7 kg) of GOM cod per trip regardless of the length of a trip. This does not change the current possession and landing limit for Handgear A and Small Vessel category permitted vessels because they were already subject to a 200-lb (90.7-kg) per trip limit under Framework Adjustment 51 measures.

Commercial Fishery Trip Limit Rationale

The 200-lb (90.7-kg) trip limit is necessary to ensure open-area catch does not result in excessive GOM cod fishing mortality by reducing the incentive to target on this stock in areas that would remain open. We evaluated a trip limit versus reducing the ACL and chose the trip limit because reducing ACLs would be administratively complex and something that could not be done quickly. Without a trip limit, there would be a possibility that if GOM cod occurred in any concentrations not expected, then catch reduction objectives from closed areas would be compromised.

A 200-lb (90.7-kg) limit was chosen based on analysis of trip-level catch data from calendar year 2013, the most recent calendar year available for analysis, which indicates that approximately 75 percent of the trips taken in areas that will remain open in this action caught less than 200 lb (90.7 kg). While the range of these trips above 200 lb (90.7 kg) varies from just over 200 lb (90.7 kg) to upwards of 2,000 lb (90.7 kg), these data suggest that the frequency and magnitude of discards would not be excessive even if fishing behaviors are unchanged. This is particularly true when paired with the expected mortality reductions provided by the interim measure closed areas. If fishing behavior is changed such that fishermen actively seek to avoid catching GOM cod, the likelihood of regulatory discards should be even lower. Overall, even if discards of GOM cod on individual trips increase somewhat as a result of this trip limit, the overall reduction of fishing mortality of this stock should be greater than if no trip limit was in place.

Approximately 25 percent of sector trips are subject to at-sea monitoring or observation. The remaining 75 percent of GOM sector trips are not monitored at sea. Very few fishermen report discards on their Vessel Trip Reports. However, we are hopeful that fishermen will take measures to avoid catching GOM cod by either avoiding areas of known cod concentration, using selective gear, leaving areas where cod are unexpectedly captured, and, when necessary, reporting cod discards. There are several uncertainties about how effort may shift in response to the closed areas and what GOM cod catch rates may be in the remaining open areas. Trip limits are an essential component to mitigating these uncertainties while attempting to ensure the overarching objectives for GOM cod are not compromised if effort and catches would otherwise be high in open areas. We expect trip limits to effectively dissuade targeting behavior, even with concerns about discards and monitoring. However, our message is clear: Avoid cod, if at all possible.

We expect the Council will put in place 2015 GOM cod catch limits that will constrain operations because of low common pool sector catch limits. Thus, it is likely that sector trip limits will only be necessary until May 1, 2015, as a way to ensure overfishing is reduced for the remainder of the 2014 fishing year. The Council's SSC has recommended 485 mt as an acceptable biological catch (ABC) for the 2015 fishing year.

Commercial Fishery Declaration Changes

This interim rule also prohibits commercial fishing vessels in both the sector program and common pool that declare trips in the GOM Broad Stock Area from fishing in other broad stock areas (i.e., Georges Bank (GB) or Southern New England (SNE)) on the same trip.

Broad Stock Area Declaration Changes Rationale

NMFS, the Council, and Council's Groundfish Oversight Committee have expressed concern that there is a strong incentive to misreport catch on unobserved trips in situations where catch limits or available annual catch entitlement (ACE) may be constraining. There are retrospective patterns in many groundfish stock assessments that may be the result of unaccounted-for mortality, one source of which may be misreported or unreported catch. To better ensure that accurate apportionment of catch, we are implementing a requirement that restricts trips declared into the GOM Broad Stock Area to fishing in that area only, irrespective of whether the trip is monitored/observed or not. Although recognizing that this measure impedes flexibility previously provided to fish in multiple stock areas on a trip, we have determined that the short-term benefits of this measure are necessary in the context of this interim rule and its objectives to ensure the effectiveness of all of the other measures in this interim rule.

The Council and Committee contemplated a similar requirement restricting vessels to fishing in the inshore GOM area (defined as west of 70° W. longitude) unless an at-sea monitor or observer was onboard. We understood the objective of such a measure was to ensure better catch reporting accuracy and discard estimation for unobserved trips occurring in the inshore GOM area while allowing multiple area trips when the fishing activity was monitored or observed. We considered this approach but were unable to adopt the specific approach discussed by the Committee and Council for two reasons: First, the existing reporting areas are based on broad stock areas (e.g., GOM). We would have to create a new inshore reporting area which would require changes to Vessel Monitoring System (VMS) areas and reporting requirements. Furthermore, new monitoring strata would be required for estimating discards inside and outside this area. This change would have implications for prescribed monitoring coverage levels and funding for the year. Such changes would also extend the development and implementation time of an emergency action and, as a result, were not implemented because of the overarching need to put in place cod conservation measures quickly.

Second, putting in place this type of flexibility can create a bias for observed trips that are randomly selected for observer or at-sea monitoring coverage through the pre-trip notification system (PTNS). We are concerned that the flexibility to fish in multiple areas on a trip provides a strong incentive to wait and undertake a multiple-area trip if

selected for monitoring. This could mean fewer observers/monitors deploy on standard trips which would undermine the reliability of discard rates for unobserved trips that are operating in areas differently than those that are observed.

Because of these concerns, the most expeditious way to improve GOM cod catch apportionment in the context of this interim rule is to restrict fishing activity to the GOM for trips declared into the broad stock area. Vessels may continue to declare into the Inshore and Offshore Georges Bank or Southern New England Broad Stock Areas and fish in both on a trip, provided all other existing declaration and reporting requirements for so doing are satisfied. We will encourage the Council to consider the implications of multiple stock area trips moving forward as long-term GOM cod recovery measures are discussed for Framework Adjustment 53 implementation.

Prohibition on Recreationally Caught GOM Cod

This interim rule extends the current prohibition on possession or landing GOM cod in or from Federal waters by recreational anglers and federally permitted party and charter vessels to the end of the fishing year, April 30, 2015. The prohibition may be extended beyond May 1, 2015, pending further Council discussion and/or agency evaluation of fishing year 2015 accountability measures.

The possession of recreationally caught GOM cod was already in place for September 1, 2014, to April 14, 2015, under the measures implemented for fishing year 2014 (77 FR 22419; April 22, 2014). This rule extends that prohibition until at least April 30, 2015.

Recreational Possession Prohibition Rationale

This change is necessary to minimize additional recreational catch and discard mortality for GOM cod. Marine Recreational Information Program (MRIP) data for May–August 2014 indicates that the fishing year 2014 recreational sub-ACL has already been exceeded, prior to the opening of the scheduled spring fishery. MRIP data through waves 3 and 4 (May–August 2014) indicate a recreational GOM cod catch of approximately 500 mt. The recreational GOM cod sub-ACL for the 2014 fishing year is 486 mt. A prohibition on possession does not preclude recreational fishing in areas not otherwise closed to gear capable of catching cod by this interim rule. However, similar to commercial trip limits, we expect that a prohibition on retention will dissuade fishing activity in areas where cod are frequently taken in recreational fisheries. As with the commercial fishery, even if discards may increase on some individual trips, overall mortality due to recreational fishing is expected to decrease, particularly since a portion of recreationally captured cod are estimated to survive. Discard survivability may be enhanced further by good handling techniques and through use of baited hooks that better ensure mouth hooking. Preliminary work by several New England fisheries research institutions shows a higher incidence of severe body injury and associated mortality for cod taken with unbaited jig tackle.

Additional measures to reduce GOM cod recreational mortality are anticipated for the May 1, 2015, start date of fishing year 2015, given the 2014 overage and expected reduction in the overall catch limit next year. We will work with the Council as such measures are developed and will either implement interim measures, as needed for fishing year 2015, or will assist in implementing recreational measures through Framework Adjustment 53 rulemaking.

Sector Day Gillnet Limit on Number of Gillnets; Exemption Revocation

This action rescinds a previously issued fishing year 2014 sector exemption (79 FR 23278; April 28, 2014) for the number of gillnets that Day gillnet vessels fishing in the GOM can use. With this exemption rescinded, Day gillnet vessels will be subject to the existing regulation restricting them to using no more than 100 gillnets of 300 feet (91.4 m), or 50 fathoms (91.4 m) in length in the GOM. Of these 100 gillnets, no more than 50 gillnets may be rigged for roundfish (i.e., gillnets that are constructed with floats on the float line and that have no tie-down twine between the float line and the lead line).

Number of Gillnets for Day Gillnet Vessels Exemption Revocation Rationale

We examined all fishing year 2014 issued sector exemptions, seeking to evaluate their potential impact on GOM cod. The Council discussed including exemption review in its emergency action request. Although ultimately, the Council did not ask us to review the possibility of rescinding sector exemptions, we examined which exemptions may be negatively impacting cod through high cod selectivity or disruption to spawning activity. We determined that that the closed areas and other management measures in this rule provide sufficiently robust catch reduction and stock protection measures that, other than the gillnet exemption, no other exemption needed to be modified or revoked for the remainder of the 2014 fishing year.

Day gillnet fishermen leave their nets fishing when they come in and out of port. The 2014 sector exemption allowed them to fish up to 150 nets, all of which could be roundfish nets. In both 2013 and 2014, we reduced this flexibility by removing the exemption when fishing in 30-minute blocks 124 and 125 in May and blocks 132 and 133 in June, because of concerns relating to mortality to GOM cod caused by continuous fishing by gillnets left in the water and the potential to disrupt spawning when cod are caught. In addition to the overall amount of Day gillnet gear in the water, we are also concerned that continuing the exemption could cause barriers of gillnets along the boundaries of closed areas that would otherwise catch cod going into or coming out of the closed areas. As a result, we are revoking this exemption as a discrete and effective measure that could reduce the overall mortality of GOM cod.

We will allow a 2-week window from the date of publication of this rule for Day gillnet vessels to remove excess gear from the GOM Broad Stock Area.

Other Measures Considered But Rejected

In our consideration of what measures would provide catch reduction and stock protection in the context of an interim rule with the objectives stated above, we felt it important that measures must be developed, analyzed, and implemented quickly to be of benefit for the remainder of fishing year 2014 and to provide stop-gap measures while the Council develops Framework Adjustment 53 to address on a long-term basis the updated assessment. This limited the scope and scale of options.

We considered wholescale closure of the GOM; however, we thought that the negative socio-economic impacts were not justified for the conservation return that could be realized for such an action. As indicated in current analyses, it is not necessary to stop all mortality on this stock for it to be rebuilt over time as long as appropriate measures are implemented in 2015 and onward.

We considered requiring selective trawl gear use in conjunction with closed areas. These types of nets have demonstrated an ability to reduce cod catch when properly outfitted and fished. We were concerned that the benefits of requiring such gear would be

diluted due to delays necessary to allow fishermen to comply with this action. In light of this delay and the difficulty in quantifying the amount of reduction in overall GOM cod mortality that would come from such a measure, we determined that costs that fishermen would incur for purchasing or rigging new gear did not justify imposing this requirement as a potentially short-term interim measure.

We constrained our evaluation to modifications of existing measures or things that could be quickly implemented. This was necessary because new concepts and measures would take more time to develop and would potentially delay implementation of any action. For example, changes in VMS require clearance under the Paperwork Reduction Act. Although by itself this is not an insurmountable issue, it would require additional time to complete the required clearances, which would be contrary to the purpose of this action to reduce overfishing of GOM cod as soon as possible. We also started our evaluation by considering what the Council and Committee discussed, including evaluating the alternatives that the Council has initiated for Framework Adjustment 53 because these interim measures should attempt to complement and bolster the potential Council actions. As an interim action, the scope, scale and type of the measures are necessarily different than those the Council may consider and has discussed for fishing year 2015. For example, the Council may choose to make use of catch limits that end overfishing in fishing year 2015 whereas this interim rule was constricted to using closed areas and trip limits as explained above.

We were also concerned about concurrently increasing the GOM haddock catch limits in response to new assessment information for that stock. We considered not increasing haddock catch limits in the face of this action but recognize the desire for fisheries flexibility to target healthy stocks and the need to further mitigate the negative consequences of this action and relatively low overall catch limits for many stocks including GOM haddock in Framework Adjustment 51. We believe the combination of closed areas that will reduce cod and to some extent haddock catch, trip limits, and limitations of available sector annual catch entitlement (ACE) for other stocks will help ensure that cod mortality associated with targeting haddock will not jeopardize the overall objective of this action in reducing cod overfishing while the Council develops longer-term measures in Framework Adjustment 53.

6-Month Renewal of Interim Measures

NMFS' interim authority is available for up to 180 days in an initial action and is open to public comments. After considering public comments, the interim rule may be extended or modified up to an additional 186 days after the date of publication by a subsequent rulemaking, which provides for a full year (12 consecutive months) of interim measures, if necessary. NMFS may renew and modify interim measures on or about March 2015 to provide cod mortality reduction and protection measures for the beginning of the 2015 fishing year that begins May 1, 2015, as needed. Our intent is to work with the Council as it develops measures for Framework Adjustment 53; however, should the Council either not take action or not recommend sufficient measures for fishing year 2015, we may extend these or other interim measures for an additional period not to exceed an additional 186 total days. As examples of measures that could be implemented on May 1, it may be necessary to implement recreational measures for the start of the fishing year or modify closure area locations and times based on more protracted evaluation of spawning information or catch distribution. We are accepting comment on these initial interim measures for consideration on the extension, should one be warranted.

Justification for Interim Action

The Magnuson-Stevens Act authorizes the Secretary to act if (1) the Secretary finds that an emergency involving a fishery exists; or (2) the Secretary finds that interim measures are needed to reduce overfishing in any fishery; or (3) if the Council finds one of those factors exists and requests that the Secretary act. See section 305 of the Magnuson-Stevens Act, 16 U.S.C. 1855(c). Where such circumstances exist, the Secretary may promulgate emergency rules or interim measures ''to address the emergency or overfishing'' 16 U.S.C. 1855(c)(1) and (2). The Secretary has delegated this authority to NMFS. Further, NMFS has issued guidance defining when ''an emergency'' involving a fishery exists (62 FR 44421; August 21, 1997). This guidance defines an emergency as a situation that (1) arose from recent, unforeseen events, (2) presents a serious conservation problem in the fishery, and (3) can be addressed through interim emergency regulations for which the immediate benefits outweigh the value of advance notice, public comment, and the deliberative consideration of the impacts on participants to the same extent as would be expected under the formal rulemaking process. Under the statute and guidance, the rationale for issuing these emergency and interim regulations is as follows: The August 2014 GOM cod assessment update indicates that the stock is overfished, is subject to overfishing, and is at a historically low level of abundance. The measures currently in place for fishing year 2014 may result in substantial overfishing of the stock and compromise the stock's ability to rebuild over the long term if not implemented as soon as possible. This action is necessary to reduce overfishing, consistent with the stated authority in section 305(c) of the Magnuson-Stevens Act.

Both NMFS and the Council agree with the stock assessment update's findings and that the stock is in need of immediate emergency measures to reduce overfishing and protect stock aggregations and spawning activities as a stop-gap while the Council develops longer-term measures necessitated by the updated assessment. Stated more simply, catch must be reduced and when and where cod are caught matters. The Council process would not be able to develop and recommend a framework adjustment, or other management measures, until its November 2014 meeting at earliest and most likely later. NMFS would not be able to consider and implement any such Council recommendations, even if issued directly as a final rule without prior public comment, until late winter or early spring. Based on these considerations, the Council voted 14 for, 3 against, to recommend that NMFS take emergency action as expeditiously as possible on behalf of the Secretary. NMFS stated its support for this request during Council deliberations, as the agency believes GOM cod is in need of immediate and rigorous protection. The Council's request is to use measures to reduce fishing mortality in fishing year 2014 while the Council works on long-term measures for May 1, 2015, implementation through Framework Adjustment 53. Accordingly, under the Magnuson-Stevens Act, NMFS, issues these emergency interim measures to address the need to reduce overfishing and protect the stock of GOM cod more expeditiously than the Council process or standard Administrative Procedure Act (APA) agency rulemaking could achieve.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has made a determination that this interim rule is consistent with the Northeast

Multispecies Fishery Management plan (FMP), section 305(c) and other provisions of the Magnuson-Stevens Act, the APA, and other applicable law.

Section 553 of the APA establishes procedural requirements applicable to rulemaking by Federal agencies. The purpose of these requirements is to ensure public access to the Federal rulemaking process and to give the public adequate notice and opportunity for comment. Pursuant to 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3), the Assistant Administrator for Fisheries finds good cause to waive the otherwise applicable requirements for both notice and comment rulemaking and a 30-day delay in effectiveness for this temporary rule implementing GOM cod management measures.

The availability of information and need for expedient action makes it impracticable to provide prior notice-and-comment opportunity and a 30-day cooling off period. The updated GOM cod assessment was initially made available in August and peer review was conducted late in that same month. The assessment indicates the GOM cod stock continues to be overfished, subject to substantial overfishing, and is estimated to be the smallest total size in recorded history. Over the course of September, the Council's Plan Development Team and Scientific and Statistical Committee received the results of the assessment and peer-review before providing advice to the Council's Groundfish Oversight Committee on September 24, 2014. In turn, the Committee recommended to the Council that a recommendation for emergency action be forwarded to NMFS. The Council deliberated on the Committee recommendation on October 1, 2014. The Council overwhelmingly agreed that the fishing mortality for GOM cod needed to be reduced as quickly as possible for the remainder of fishing year 2014. The existing catch limits, if left in place with no additional management changes, have the potential to result in fishing at a rate four times the desired fishing mortality for the year. This is substantial overfishing. The temporary rule is designed to implement measures that will decrease fishing mortality and reduce overfishing, shift fishing effort from areas of recent high catches where cod are believed to be aggregated, and to protect cod spawning areas and activities. Reducing catch limits, which would include recalling previously issued sector ACE during the fishing year, would be administratively complex and time consuming. By taking the approach outlined in this temporary rule, NMFS can put in place measures that have the potential to reduce fishing mortality, as requested by the Council. In the interim between this action and the start of the 2015 fishing year that begins May 1, 2015, the Council will develop and recommend long-term solutions, including potentially lower ACLs, designed to protect and rebuild GOM cod.

These timing-related issues paired with the need to complete analyses and the rulemaking processes as quickly as possible to reduce cod catches and end overfishing make it impracticable to propose GOM cod measures through notice-and-comment rulemaking. During the delay in which measures were developed and implemented, additional and potentially excessive GOM cod fishing mortality was expected to occur. In addition, some empirical data indicate that spawning, as indicated by ripe and running fish, begins in November. To provide protection for the 2014 spawning activities that begin in fall and continue through winter into spring, expediting these emergency measures is necessary.

For the reasons outlined, NMFS finds it impracticable and contrary to the public interest to provide prior opportunity to comment on these GOM cod emergency measures and provide a 30-day delay in implementation. Therefore, there exists good cause to waive both of those requirements.

NMFS has consulted with the Office of Information and Regulatory Affairs (OIRA) and due to the circumstances described above this action is exempt from review under Executive Order 12866.

This interim final rule does not contain policies with Federalism or ''takings'' implications as those terms are defined in E.O. 13132 and E.O. 12630, respectively.

This interim final rule is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior notice and opportunity for public comment.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping and reporting requirements.

Dated: November 6, 2014.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Therefore, NOAA amends 50 CFR part 648 as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. Section 648.2 is amended by:
■ a. Suspending from November 13, 2014 until April 30, 2015, the definition for ''Gillnet gear capable of catching multispecies''; and
■ b. Temporarily add from November 13, 2014 until April 30, 2015, a definition for ''Gillnet gear capable of catching multispecies (for purposes of the interim action)'', in alphabetical order.

The addition reads as follows.

§ 648.2 Definitions.

* * * * *

Gillnet gear capable of catching multispecies (for purposes of the interim action) means all gillnet gear except pelagic gillnet gear specified at § 648.81(o)(2)(ii) and pelagic gillnet gear that is designed to fish for and is used to fish for or catch tunas, swordfish, and sharks.

* * * * *

■ 3. Section 648.10 is amended by adding paragraph (k)(3)(i)(A) and reserved paragraph (k)(3)(i)(B) to read as follows:

§ 648.10 VMS and DAS requirements for vessel owners/operators.

* * * * *

(k) * * *
(3) * * *
(i) * * *

(A) Vessels that notify NMFS of their intended fishing activity in accordance with paragraphs (g), (h), or (k) of this section, must declare one or more NE multispecies broad stock areas, as defined in paragraphs (k)(3)(i) through (iv) of this section, unless otherwise specified in this paragraph (k)(3)(i)(A). If a vessel declares to fish in the GOM Stock Area I as defined in paragraph (k)(3)(i), the vessel is prohibited from fishing outside of the GOM Stock Area I on that trip.

(B) [Reserved]

* * * * *

■ 4. Section 648.14 is amended by:
■ a. Suspending from November 13, 2014 until April 30, 2015, paragraphs (k)(6)(i)(E), (k)(7)(i)(A) and (B), (k)(12)(v)(E) and (F), (k)(13)(i)(D)(1) through (4), (k)(13)(ii)(B) through (D), (k)(14)(viii), and (k)(16)(iii)(A) through (C);
■ b. Revising paragraphs (k)(12)(i) introductory text, (k)(13)(i) introductory text; and
■ c. Temporarily adding from November 13, 2014 until April 30, 2015, paragraphs (k)(6)(i)(H), (k)(7)(i)(H) through (J), (k)(12)(v)(K) and (L), (k)(13)(i)(D)(*5*) and (*6*), (k)(13)(ii)(K) through (M), (k)(14)(xii), and (k)(16)(iii)(D) through (F).

The revisions and additions read as follows:

§ 648.14 Prohibitions.

* * * * *

(k) * * *

(6) * * *

(i) * * *

(H) Use, set, haul back, fish with, or possess on board a vessel, unless not available for immediate use as defined in § 648.2, or fail to remove, sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(o)(2)(ii)), in the areas and for the times specified in § 648.80(g)(6)(iii) and (iv), except as provided in § 648.80(g)(6)(iii) and (iv), and § 648.81(o)(2)(ii), or unless otherwise authorized in writing by the Regional Administrator.

* * * * *

(7) * * *

(i) * * *

(H) *Seasonal Interim Closure Areas.* Fish for, harvest, possess, or land regulated species in or from the closed areas specified in in § 648.81(o)(1), except as provided in § 648.81(o)(2).

(I) Enter, be on a fishing vessel in, or fail to remove gear from the EEZ portion of the areas described in § 648.81(d)(3) through (g)(1), except as provided in § 648.81(d)(4), (e)(3), (g)(2), and (i), and (o)(2).

(J) Fish for, harvest, possess, or land regulated species in or from the closed areas specified in § 648.81(a) through (f) and (o), unless otherwise specified in § 648.81(c)(2)(iii), (i), (o)(2), or as authorized under § 648.85.

* * * * *

(12) *SAP restrictions.* (i) It is unlawful for any person to:

* * * * *

(v) * * *

(K) If fishing in the Regular B DAS Program specified in § 648.85(b)(6), fail to comply with the landing limits specified in § 648.85(b)(6)(iv)(K).

(L) If fishing under a Regular B DAS in the Regular B DAS Program, fail to comply with the DAS flip requirements of § 648.85(b)(6)(iv)(E) if the vessel harvests and brings on board more than the landing limit for a groundfish stock of concern specified in § 648.85(b)(6)(iv)(K), other groundfish specified under § 648.86, or monkfish under § 648.94.

(13) *Possession and landing restrictions.* (i) It is unlawful for all persons to:

* * * * *

(D) * * *

(*5*) Enter port, while on a NE multispecies trip, in possession of more than the allowable limit of cod specified in § 648.82(b)(7) or (8); § 648.86(b)(5), unless the vessel is fishing under the cod exemption specified in § 648.86(b)(7); § 648.87(c)(2)(ii)(E); or § 648.88(a)(1).

(*6*) Fail to declare through VMS an intent to be exempt from the GOM cod trip limit under § 648.86(b)(5), as required under § 648.86(b)(7), or fish north of the exemption line if in possession of more than the GOM cod trip limit specified under § 648.86(b)(5).

(ii) * * *

(K) Possess or land per trip more than the possession or landing limits specified in § 648.86(a), (b), (c), (e), (g), (h), (j), (l), (m), (n), and (o); § 648.82(b)(7) and (8); § 648.85; or § 648.88, if the vessel has been issued a limited access NE multispecies permit or open access NE multispecies permit, as applicable.

(L) Fish for, possess at any time during a trip, or land regulated NE multispecies or ocean pout specified in § 648.86 after using up the vessel's annual DAS allocation or when not participating in the DAS program pursuant to § 648.82, unless otherwise exempted by §§ 648.82(b)(7), 648.87, or 648.89, or allowed pursuant to §§ 648.85(b)(6) or 648.88.

(M) *Atlantic cod.* (*1*) Enter port, while on a NE multispecies DAS trip, in possession of more than the allowable limit of cod specified in § 648.86(b)(5), unless the vessel is fishing under the cod exemption specified in § 648.86(b)(7).

(*2*) Enter port, while on a NE multispecies DAS trip, in possession of more than the allowable limit of cod specified in § 648.86(b)(6).

(*3*) Fail to declare through VMS an intent to be exempt from the GOM cod trip limit under § 648.86(b)(5), as required under § 648.86(b)(7), or fish north of the exemption line if in possession of more than the GOM cod trip limit specified under § 648.86(b)(5).

(14) * * *

(xii) With the exception of GOM cod, discard legal-sized regulated species or ocean pout allocated to sectors pursuant to § 648.87(b)(1)(i), as prohibited by § 648.87(b)(1)(v).

* * * * *

(16) * * *

(iii) * * *

(D) If fishing under the recreational or charter/party regulations, fish for or possess cod caught in the GOM Regulated Mesh Area as specified under § 648.89(c)(8), or fail to abide by the appropriate restrictions if transiting with cod on board.

(E) If the vessel has been issued a charter/party permit or is fishing under charter/party regulations, fail to comply with the requirements specified in § 648.81(o)(2)(iii) when fishing in the areas described in § 648.81(d)(3) through (o)(1) during the time periods specified.

(F) If the vessel is a private recreational or charter/party boat fishing vessel, fail to comply with the GOM cod possession prohibition described in § 648.89(c)(8).

* * * * *

■ 5. Section 648.80 is amended by:

■ a. Suspending from November 13, 2014 until April 30, 2015, paragraphs (a)(3)(vi), (a)(4)(iii), and (g)(6)(i) and (ii); and

■ b. Temporarily adding from November 13, 2014 until April 30, 2015, paragraphs (a)(3)(viii), (a)(4)(ix), and (g)(6)(iii) and (iv).

The additions read as follows:

§ 648.80 NE multispecies regulated mesh areas and restrictions on gear and methods of fishing.

* * * * *

(a) * * *

(3) * * *

(viii) *Other restrictions and exemptions.* A vessel is prohibited from fishing in the GOM or GB Exemption Area as defined in paragraph (a)(17) of this section, except if fishing with exempted gear (as defined under this part) or under the exemptions specified in paragraphs (a)(5) through (7), (a)(9) through (16), (a)(18) and (19), (d), (e), (h), and (i) of this section; or if fishing under a NE multispecies DAS; or if fishing on a sector trip; or if fishing under the Small Vessel or Handgear A permit specified in § 648.82(b)(7) and (8), respectively; or if fishing under a Handgear B permit specified in § 648.88(a); or if fishing under the scallop state waters exemptions specified in § 648.54 and paragraph (a)(11) of this section; or if fishing under a scallop DAS in accordance with paragraph (h) of this section; or if fishing pursuant to a NE multispecies open access Charter/Party or Handgear permit specified in § 648.88; or if fishing as a charter/party or private recreational vessel in compliance with § 648.89. Any gear used by a vessel in this area must be authorized under one of these exemptions. Any gear on a vessel that is not authorized under one of these exemptions must not be available for immediate use as defined in § 648.2.

(4) * * *

(ix) *Large-mesh vessels.* When fishing in the GB Regulated Mesh Area, the minimum mesh size for any trawl net, or sink gillnet, and the minimum mesh size for any trawl net, or sink gillnet, when fishing in that portion of the GB

Regulated Mesh Area that lies within the SNE Exemption Area, as described in paragraph (b)(10) of this section, that is not stowed and available for immediate use as defined in § 648.2, on a vessel or used by a vessel fishing under a DAS in the Large-mesh DAS program, specified in § 648.82(b)(7), is 8.5-inch (21.6-cm) diamond or square mesh throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

* * * * *

(g) * * *

(6) * * *

(iii) *Requirements for gillnet gear capable of catching NE multispecies to reduce harbor porpoise takes.* In addition to the requirements for gillnet fishing identified in this section, all persons owning or operating vessels in the EEZ that fish with sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(o)(2)(ii)), must comply with the applicable provisions of the Harbor Porpoise Take Reduction Plan found in § 229.33 of this title.

(iv) *Requirements for gillnet gear capable of catching NE multispecies to prevent large whale takes.* In addition to the requirements for gillnet fishing identified in this section, all persons owning or operating vessels in the EEZ that fish with sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(o)(2)(ii)), must comply with the applicable provisions of the Atlantic Large Whale Take Reduction Plan found in § 229.32 of this title.

* * * * *

■ 6. Section 648.81 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraphs (d)(1) and (2), (e)(1) and (2), (f)(1) and (2), and (g)(1)(i); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraphs (d)(3) and (4), (e)(3) and (4), (g)(1)(vii), and (o).

The additions read as follows:

§ 648.81 NE multispecies closed area and measures to protect EFH.

* * * * *

(d) * * *

(3) No fishing vessel or person on a fishing vessel may enter, fish in, or be in, and no fishing gear capable of catching NE multispecies, unless otherwise allowed in this part, may be in, or on board a vessel in the area known as the Cashes Ledge Closure Area, as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (d)(4) and (i) of this section (a chart depicting this area is available from the Regional Administrator upon request):

CASHES LEDGE CLOSURE AREA

Point		W.
CL1	43°07′	69°02′
CL2	42°49.5′	68°46′
CL3	42°46.5′	68°50.5′
CL4	42°43.5′	68°58.5′
CL5	42°42.5′	69°17.5′
CL6	42°49.5′	69°26′
CL1	43°07′	69°02′

(4) Unless otherwise restricted under the EFH Closure(s) specified in paragraph (h) of this section, paragraph (d)(3) of this section does not apply to persons aboard fishing vessels or fishing vessels:

(i) That are fishing with or using exempted gear as defined under this part, or in the Midwater Trawl Gear Exempted Fishery as specified under 648.80(d), and excluding pelagic gillnet gear capable of catching NE multispecies, except for vessels fishing with a single pelagic gillnet not longer than 300 ft (91.4 m) and not greater than 6 ft (1.83 m) deep, with a maximum mesh size of 3 inches (7.6 cm), provided:

(A) The net is attached to the boat and fished in the upper two-thirds of the water column;

(B) The net is marked with the owner's name and vessel identification number;

(C) There is no retention of regulated species; and

(D) There is no other gear on board capable of catching NE multispecies;

(ii) That are fishing under charter/party or recreational regulations, provided that:

(A) For vessels fishing under charter/party regulations in the Cashes Ledge Closure Area or Western GOM Area Closure, as described under paragraph (d) and (e) of this section, respectively, it has on board a letter of authorization issued by the Regional Administrator, as specified in § 648.89(e)(6);

(B) Fish species managed by the NEFMC or MAFMC that are harvested or possessed by the vessel, are not sold or intended for trade, barter or sale, regardless of where the fish are caught; and

(C) The vessel has no gear other than rod and reel or handline on board and is fishing for pelagic recreational species; and

(D) The vessel does not use any NE multispecies DAS during the entire period for which the letter of authorization is valid;

(iii) That are fishing with or using scallop dredge gear when fishing under a scallop DAS or when lawfully fishing in the Scallop Dredge Fishery Exemption Area as described in § 648.80(a)(11), provided the vessel does not retain any regulated NE multispecies during a trip, or on any part of a trip; or

(iv) That are fishing in the Raised Footrope Trawl Exempted Whiting Fishery, as specified in § 648.80(a)(15).

(e) * * *

(3) No fishing vessel or person on a fishing vessel may enter, fish in, or be in, and no fishing gear capable of catching NE multispecies, unless otherwise allowed in this part, may be in, or on board a vessel in, the area known as the Western GOM Closure Area, as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (d)(4) and (i) of this section:

WESTERN GOM CLOSURE AREA [1]

Point	N. lat.	W. long.
WGM1	42°15′	70°15′
WGM2	42°15′	69°55′
WGM3	43°15′	69°55′
WGM4	43°15′	70°15′
WGM1	42°15′	70°15′

[1] A chart depicting this area is available from the Regional Administrator upon request.

(4) Unless otherwise restricted under paragraph (h) of this section, paragraph (e)(3) of this section does not apply to fishing vessels that meet the criteria in paragraphs (e)(4) of this section, or consistent with the requirements specified under § 648.80(a)(5).

* * * * *

(g) * * *

(1) * * *

(vii) That meet the criteria in paragraphs (o)(2)(i) or (ii) of this section;

* * * * *

(o) *Seasonal Interim Closure Areas.* (1) No fishing vessel, recreational or commercial, with gear capable of catching GOM cod, may enter or fish in, the Seasonal Interim Closure Areas, as described in paragraphs (o)(1)(i) through (x) of this section, except as specified in paragraphs (o)(2)(i) through (v) of this section. A chart depicting these areas is available from the Regional Administrator upon request.

(i) From January 1 through January 31, the restrictions specified in this

paragraph (o)(1) apply to Seasonal Interim Closure Area 1, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of Massachusetts:

SEASONAL INTERIM CLOSURE AREA 1

[January 1–January 31]

Point	Latitude	Longitude
JAN 1 ..	42°30′ N	(1)
JAN 2 ..	42°30′ N	70°30′ W
JAN 3 ..	43°00′ N	70°30′ W
JAN 4 ..	43°00′ N	70°00′ W
JAN 5 ..	42°15′ N	70°00′ W
JAN 6 ..	42°15′ N	70°30′ W
JAN 7 ..	42°00′ N	70°30′ W
JAN 8 ..	42°00′ N	(2)

1 The intersection of 42°30′ N latitude and the Massachusetts coastline.
2 The intersection of 42°00′ N latitude and the Massachusetts coastline.

(ii) From February 1 through February 28, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 2, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of Massachusetts:

SEASONAL INTERIM CLOSURE AREA 2

[February 1–February 28]

Point	Latitude	Longitude
FEB 1 ..	42°30′ N	(1)
FEB 2 ..	42°30′ N	70°00′ W
FEB 3 ..	43°00′ N	70°00′ W
FEB 4 ..	43°00′ N	69°30′ W
FEB 5 ..	42°30′ N	69°30′ W
FEB 2 ..	42°30′ N	70°00′ W
FEB 7 ..	42°15′ N	70°00′ W
FEB 8 ..	42°15′ N	70°30′ W
FEB 9 ..	42°00′ N	70°30′ W
FEB 10	42°00′ N	(2)

1 The intersection of 42°30′ N latitude and the Massachusetts coastline.
2 The intersection of 42°00′ N latitude and the Massachusetts coastline.

(iii) From March 1–March 31, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 3, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of Massachusetts and New Hampshire:

SEASONAL INTERIM CLOSURE AREA 3

[March 1–March 31]

Point	Latitude	Longitude
MAR 1	43°00′ N	(1)
MAR 2	43°00′ N	70°00′ W
MAR 3	43°30′ N	70°00′ W
MAR 4	43°30′ N	69°30′ W

SEASONAL INTERIM CLOSURE AREA 3—Continued

[March 1–March 31]

Point	Latitude	Longitude
MAR 5	42°30′ N	69°30′ W
MAR 6	42°30′ W	70°00′ W
MAR 7	42°15′ N	70°00′ W
MAR 8	42°15′ N	70°30′ W
MAR 9	42°30′ N	70°30′ W
MAR 10	42°30′ N	(2)

1 The intersection of 43°00′ N latitude and the New Hampshire coastline.
2 The intersection of 42°30′ N latitude and the Massachusetts coastline.

(iv) From April 1–April 30, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 4, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of Massachusetts and New Hampshire:

SEASONAL INTERIM CLOSURE AREA 4

[April 1–April 30]

Point	Latitude	Longitude
MAR 1	43°00′ N	(1)
MAR 2	43°00′ N	70°00′ W
MAR 3	43°30′ N	70°00′ W
MAR 4	43°30′ N	69°30′ W
MAR 5	43°00′ N	69°30′ W
MAR 2	43°00′ N	70°00′ W
MAR 7	42°15′ N	70°00′ W
MAR 8	42°15′ N	70°30′ W
MAR 9	42°00′ N	70°30′ W
MAR 10	42°00′ N	(2)

1 The intersection of 43°00′ N latitude and the New Hampshire coastline.
2 The intersection of 42°00′ N latitude and the Massachusetts coastline.

(v) From May 1–May 30, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 5, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of the United States:

SEASONAL INTERIM CLOSURE AREA 5

[May 1–May 30]

Point	Latitude	Longitude
MAY 1	43°30′ N	(1)
MAY 2	43°30′ N	70°00′ W
MAY 3	42°15′ N	70°00′ W
MAY 4	42°15′ N	70°30′ W
MAY 5	42°00′ N	70°30′ W
MAY 6	42°00′ N	(2)

1 The intersection of 43°30′ N latitude and the Maine coastline.
2 The intersection of 42°00′ N latitude and the Massachusetts coastline.

(vi) From June 1–June 30, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 6, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of the United States:

SEASONAL INTERIM CLOSURE AREA 6

[June 1–June 30]

Point	Latitude	Longitude
JUN 1 ..	(1)	70°30′ W
JUN 2 ..	43°00′ N	70°30′ W
JUN 3 ..	43°00′ N	70°00′ W
JUN 4 ..	42°15′ N	70°00′ W
JUN 5 ..	42°15′ N	70°30′ W
JUN 6 ..	42°30′ N	70°30′ W
JUN 7 ..	42°30′ N	(2)

1 The intersection of 70°00′ W longitude and the Maine coastline.
2 The intersection of 42°30′ N latitude and the Massachusetts coastline.

(vii) From July 1–August 30, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 7, which is defined by the following points, connected in the order listed by straight lines:

SEASONAL INTERIM CLOSURE AREA 7

[July 1–August 30]

Point	Latitude	Longitude
JUL 1 ..	43°00′ N	70°30′ W
JUL 2 ..	43°00′ N	70°00′ W
JUL 3 ..	43°30′ N	70°00′ W
JUL 4 ..	43°30′ N	69°30′ W
JUL 5 ..	43°00′ N	69°30′ W
JUL 2 ..	43°00′ N	70°00′ W
JUL 7 ..	42°15′ N	70°00′ W
JUL 8 ..	42°15′ N	70°30′ W
JUL 1 ..	43°00′ N	70°30′ W

(viii) From September 1–October 31, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 8, which is defined by the following points, connected in the order listed by straight lines:

SEASONAL INTERIM CLOSURE AREA 8

[September 1–October 31]

Point	Latitude	Longitude
JUL 1 ..	43°00′ N	70°30′ W
JUL 2 ..	43°00′ N	70°00′ W
JUL 3 ..	42°15′ N	70°00′ W
JUL 4 ..	42°15′ N	70°30′ W
JUL 1 ..	43°00′ N	70°30′ W

(ix) From November 1–November 30, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 9, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the

coastlines of Massachusetts and New Hampshire:

SEASONAL INTERIM CLOSURE AREA 9

[November 1–November 30]

Point	Latitude	Longitude
NOV 1	43°00′ N	(1)
NOV 2	43°00′ N	70°00′ W
NOV 3	42°15′ N	70°00′ W
NOV 4	42°15′ N	70°30′ W
NOV 5	42°00′ N	70°30′ W
NOV 6	42°00′ N	MA coast

1 The intersection of 43°00′ N latitude and the New Hampshire coastline.
2 The intersection of 42°00′ N latitude and the Massachusetts coastline.

(x) From December 1–December 31, the restrictions specified in this paragraph (o)(1) apply to Seasonal Interim Closure Area 9, which is defined by the following points, connected in the order listed by straight lines, and bounded on the west by the coastline of Massachusetts:

SEASONAL INTERIM CLOSURE AREA 10

[December 1–December 31]

Point	Latitude	Longitude
DEC 1	42°30′ N	(1)
DEC 2	42°30′ N	70°00′ W
DEC 3	42°00′ N	70°00′ W
DEC 4	42°00′ N	(2)

1 The intersection of 42°30′ N latitude and the Massachusetts coastline.
2 The intersection of 42°00′ N latitude and the Kingston, Massachusetts (mainland) coastline.

(2) Paragraph (o)(1) of this section does not apply to persons aboard fishing vessels or fishing vessels:

(i) That have not been issued a Federal multispecies permit and that are fishing exclusively in state waters;

(ii) That are fishing with or using exempted gear as defined under this part, or in the Midwater Trawl Gear Exempted Fishery as specified under 648.80(d), and excluding pelagic gillnet gear capable of catching NE multispecies, except for vessels fishing with a single pelagic gillnet not longer than 300 ft (91.4 m) and not greater than 6 ft (1.83 m) deep, with a maximum mesh size of 3 inches (7.6 cm), provided:

(A) The net is attached to the boat and fished in the upper two-thirds of the water column;

(B) The net is marked with the owner's name and vessel identification number;

(C) There is no retention of regulated species; and

(D) There is no other gear on board capable of catching NE multispecies;

(iii) That are fishing with or using scallop dredge gear when fishing under a scallop DAS or when lawfully fishing in the Scallop Dredge Fishery Exemption Area as described in § 648.80(a)(11), provided the vessel does not retain any regulated NE multispecies during a trip, or on any part of a trip; or

(iv) That are fishing in the Raised Footrope Trawl Exempted Whiting Fishery, as specified in § 648.80(a)(15).

(v) That are transiting through the Seasonal Interim Closure Areas described in paragraph (o)(1) of this section, provided that gear is not available for immediate use as defined in § 648.2.

■ 7. Section 648.82 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraphs (b)(5) and (6); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraphs (b)(7) and (8)

The additions read as follows:

§ 648.82 Effort-control program for NE multispecies limited access vessels.

* * * * *

(b) * * *

(7) *Small Vessel category*—(i) *DAS allocation.* A vessel qualified and electing to fish under the Small Vessel category may retain up to 300 lb (136.1 kg) of cod, haddock, and yellowtail flounder, combined, and one Atlantic halibut per trip, without being subject to DAS restrictions, and the daily possession limits specified for other regulated species and ocean pout, as specified at § 648.86, unless otherwise specified in this paragraph (b)(7). If the vessel elects to fish in the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), the vessel may not possess or retain more than 200 lb (90.7 kg) of cod for the entire trip. If the vessel elects to fish south of the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), the vessel may retain up 300 lb (136.1 kg) of cod. Any vessel may elect to switch into the Small Vessel category, as provided in § 648.4(a)(1)(i)(I)(2), if the vessel meets or complies with the following:

(A) The vessel is 30 ft (9.1 m) or less in length overall, as determined by measuring along a horizontal line drawn from a perpendicular raised from the outside of the most forward portion of the stem of the vessel to a perpendicular raised from the after most portion of the stern.

(B) If construction of the vessel was begun after May 1, 1994, the vessel must be constructed such that the quotient of the length overall divided by the beam is not less than 2.5.

(C) Acceptable verification for vessels 20 ft (6.1 m) or less in length shall be USCG documentation or state registration papers. For vessels over 20 ft (6.1 m) in length overall, the measurement of length must be verified in writing by a qualified marine surveyor, or the builder, based on the vessel's construction plans, or by other means determined acceptable by the Regional Administrator. A copy of the verification must accompany an application for a NE multispecies permit.

(D) Adjustments to the Small Vessel category requirements, including changes to the length requirement, if required to meet fishing mortality goals, may be made by the Regional Administrator following framework procedures of § 648.90.

(ii) [Reserved]

(8) *Handgear A category.* A vessel qualified and electing to fish under the Handgear A category, as described in § 648.4(a)(1)(i)(A), may retain up to 300 lb (135 kg) of cod, per trip, one Atlantic halibut and the daily possession limit for other regulated species and ocean pout, as specified under § 648.86, unless otherwise specified in this paragraph (b)(8). If the vessel elects to fish in the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), the vessel may not possess or retain more than 200 lb (90.7 kg) of cod for the entire trip. If the vessel elects to fish south of the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), the vessel may retain up 300 lb (136.1 kg) of cod. If the GB cod trip limit applicable to a vessel fishing under a NE multispecies DAS permit, as specified in § 648.86(b)(6) is reduced below 300 lb (135 kg) per DAS by NMFS, the cod trip limit specified in this paragraph (b)(8) shall be adjusted to be the same as the applicable cod trip limit specified for NE multispecies DAS permits. For example, if the GB cod trip limit for NE multispecies DAS vessels was reduced to 250 lb (113.4 kg) per DAS, then the cod trip limit for a vessel issued a Handgear A category permit that is fishing outside of the GOM Regulated Mesh Area would also be reduced to 250 lb (113.4 kg). Qualified vessels electing to fish under the Handgear A category are subject to the following restrictions:

(i) The vessel must not use or possess on board gear other than handgear while in possession of, fishing for, or landing NE multispecies, and must have at least one standard tote on board.

(ii) A vessel may not fish for, possess, or land regulated species from March 1 through March 20 of each year.

(iii) Tub-trawls must be hand-hauled only, with a maximum of 250 hooks.

(iv) Declaration. For any such vessel that is not required to use VMS pursuant to § 648.10(b)(4), to fish for GB cod south of the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), a vessel owner or operator must obtain, and retain on board, a letter of authorization from the Regional Administrator stating an intent to fish south of the GOM Regulated Mesh Area and may not fish in any other area for a minimum of 7 consecutive days from the effective date of the letter of authorization. For any such vessel that is required, or elects, to use VMS pursuant to § 648.10(b)(4), to fish for GB cod south of the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), a vessel owner or operator must declare an intent to fish south of the GOM Regulated Mesh Area on each trip through the VMS prior to leaving port, in accordance with instructions provided by the Regional Administrator. Such vessels may transit the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), provided that their gear is not available for immediate use as defined in § 648.2.

* * * * *

■ 8. Section 648.85 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraph (b)(6)(iv)(D); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraph (b)(6)(iv)(K).

The addition reads as follows:

§ 648.85 Special Management Programs.

* * * * *

(b) * * *

(6) * * *

(iv) * * *

(K) *Landing limits.* Unless otherwise specified in this paragraph (b)(6)(iv)(K), or restricted pursuant to § 648.86, a NE multispecies vessel fishing in the Regular B DAS Program described in this paragraph (b)(6), and fishing under a Regular B DAS, may not land more than 100 lb (45.5 kg) per DAS, or any part of a DAS, up to a maximum of 1,000 lb (454 kg) per trip, of any of the following species/stocks from the areas specified in paragraph (b)(6)(v) of this section: Cod, American plaice, witch flounder, SNE/MA winter flounder, and GB yellowtail flounder; and may not land more than 25 lb (11.3 kg) per DAS, or any part of a DAS, up to a maximum of 250 lb (113 kg) per trip of CC/GOM yellowtail flounder. If the vessel elects to fish in the GOM Regulated Mesh Area, as defined at § 648.80(a)(1), the vessel may not possess or retain more than 200 lb (90.7 kg) of cod for the entire trip. In addition, trawl vessels, which are required to fish with a haddock separator trawl, as specified in paragraph (a)(3)(iii)(A) of this section, or a Ruhle trawl, as specified in paragraph (b)(6)(iv)(J) of this section, and other gear that may be required in order to reduce catches of stocks of concern as described in paragraph (b)(6)(iv)(J) of this section, are restricted to the trip limits specified in paragraph (e) of this section.

■ 9. Section 648.86 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraphs (b)(1) through (4); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraphs (b)(5) through (7).

The additions read as follows:

§ 648.86 NE Multispecies possession restrictions.

* * * * *

(b) * * *

(5) *GOM cod landing and possession limit.* Except as provided in paragraph (b)(7) of this section, or unless otherwise restricted under § 648.85, a vessel fishing under a NE multispecies limited access permit, including a vessel issued a monkfish limited access permit and fishing under the monkfish Category C or D permit provisions, may possess or land up to 200 lb (90.7 kg) of GOM cod per trip, provided that it complies with this paragraph (b)(5). Cod on board a vessel subject to this landing limit must be separated from other species of fish and stored so as to be readily available for inspection.

(i) *Declaration.* A limited access multispecies vessel that fishes or intends to fish on a NE multispecies trip in the GOM Regulated Mesh Area, defined in § 648.80(a)(1), must declare its intention to do so through the VMS or IVR, and is prohibited from fishing outside of this area for the remainder of the trip, as specified in § 648.10(k)(3)(i)(1).

(ii) [Reserved]

(6) *GB cod landing and maximum possession limits.* Unless otherwise restricted under § 648.85, a vessel fishing under a NE multispecies DAS permit, including a vessel issued a monkfish limited access permit and fishing under the monkfish Category C or D permit provisions, may land up to 2,000 lb (907.2 kg) of cod per DAS, or part of a DAS, up to 20,000 lb (9,072 kg) provided it complies with the requirements specified in paragraph (b)(7) of this section).

(7) *Exemption.* A NE multispecies limited access vessel fishing under a NE multispecies DAS is exempt from the landing limit described in paragraph (b)(5) of this section when fishing south of the GOM Regulated Mesh Area, defined in § 648.80(a)(1), provided that, when fishing under the common pool fishery, the vessel complies with the requirement of this paragraph (b)(7).

(i) *Declaration.* With the exception of a vessel declared into the U.S./Canada Management Area, as described in § 648.85(a)(3)(ii), a sector vessel, or a common pool vessel that fishes or intends to fish under a NE multispecies DAS south of the line described in paragraph (b)(7) of this section under the cod trip limits described in paragraph (b)(6) of this section, must, prior to leaving port, declare its intention to do so through the VMS, in accordance with instructions to be provided by the Regional Administrator. In lieu of a VMS declaration, the Regional Administrator may authorize such vessels to obtain a letter of authorization. If a letter of authorization is required, such vessel may not fish north of the exemption area for a minimum of 7 consecutive days (when fishing under the multispecies DAS program), and must carry the letter of authorization on board.

(ii) A NE multispecies limited access vessel exempt from the GOM cod landing limit pursuant to paragraph (b)(7)(i) of this section may not fish north of the line specified in paragraph (b)(7) of this section for the duration of the trip, but may transit the GOM Regulated Mesh Area, provided that its gear is unless not available for immediate use as defined in § 648.2.

* * * * *

■ 10. Section 648.87 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraphs (b)(1)(v)(A), (b)(1)(ix), (c)(2)(i), and (c)(2)(ii)(A) and (B); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraphs (b)(1)(v)(C), (b)(1)(x), (c)(2)(ii)(E) and (F), and (c)(2)(iii).

The additions read as follows:

§ 648.87 Sector allocation.

* * * * *

(b) * * *

(1) * * *

(v) * * *

(C) *Discards.* Except for GOM cod, a sector vessel may not discard any legal-sized regulated species or ocean pout allocated to sectors pursuant to paragraph (b)(1)(i) of this section, unless otherwise required pursuant to

§ 648.86(l). For GOM cod, a sector vessel must discard all GOM cod that is in excess of 200 lb (90.7 kg) when fishing on a groundfish trip. Discards of undersized regulated species or ocean pout, as well as discards of GOM cod that exceed the 200 lb (90.7 kg) trip limit, by a sector vessel must be reported to NMFS consistent with the reporting requirements specified in paragraph (b)(1)(vi) of this section. Discards shall not be included in the information used to calculate a vessel's PSC, as described in § 648.87(b)(1)(i)(E), but shall be counted against a sector's ACE for each NE multispecies stock allocated to a sector.

* * * * *

(x) *Trip limits.* With the exception of the GOM cod trip limit at § 648.86(b)(5), the Atlantic halibut trip limit at § 648.86(c), and the stocks listed in § 648.86(1), a sector vessel is not limited in the amount of allocated NE multispecies stocks that can be harvested on a particular fishing trip, unless otherwise specified in the operations plan.

(c) * * *

(2) * * *

(ii) * * *

(E) Trip limits on NE multispecies stocks for which a sector receives an allocation of ACE pursuant to paragraph (b)(1)(i) of this section (i.e., all stocks except Atlantic halibut, ocean pout, windowpane flounder, and Atlantic wolffish), unless otherwise specified § 648.86(b)(5) and paragraph (b)(1)(x) of this section.

(F) The GB Seasonal Closed Area specified in § 648.81(g).

(iii) *Regulations that may not be exempted for sector participants.* The Regional Administrator may not exempt participants in a sector from the following Federal fishing regulations: Specific time and areas within the NE multispecies year-round closure areas; permitting restrictions (e.g., vessel upgrades, etc.); gear restrictions designed to minimize habitat impacts (e.g., roller gear restrictions, etc.); reporting requirements; and AMs specified at § 648.90(a)(5)(i)(D). For the purposes of paragraph (c)(2)(i) of this section, the DAS reporting requirements specified at § 648.82; the SAP-specific reporting requirements specified at § 648.85; and the reporting requirements associated with a dockside monitoring program are not considered reporting requirements, and the Regional Administrator may exempt sector participants from these requirements as part of the approval of yearly operations plans. For the purpose of paragraph (c)(2)(i) of this section, the Regional Administrator may not grant sector participants exemptions from the NE multispecies year-round closures areas defined as Essential Fish Habitat Closure Areas as defined at § 648.81(h); the Fippennies Ledge Area as defined in paragraph (c)(2)(i)(A) of this section; Closed Area I and Closed Area II, as defined at § 648.81(a) and (b), respectively, during the period February 16 through April 30; and the Western GOM Closure Area, as defined at § 648.81(e), where it overlaps with any Sector Rolling Closure Areas, as defined at § 648.81(o)(2)(vi). This list may be modified through a framework adjustment, as specified in § 648.90.

(A) *Fippennies Ledge Area.* The Fippennies Ledge Area is bounded by the following coordinates, connected by straight lines in the order listed:

FIPPENNIES LEDGE AREA

Point	N. Latitude	W. Longitude
1	42°50.0′	69°17.0′
2	42°44.0′	69°14.0′
3	42°44.0′	69°18.0′
4	42°50.0′	69°21.0′

(B) [Reserved]

* * * * *

■ 11. Section 648.88 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraph (a)(1); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraph (a)(3).

The addition reads as follows:

§ 648.88 Multispecies open access permit restrictions.

(a) * * *

(3) The vessel may possess and land up to 75 lb (90.7 kg) of cod, and up to the landing and possession limit restrictions for other NE multispecies specified in § 648.86, provided the vessel complies with the restrictions specified in paragraph (a)(2) of this section. If either the GOM or GB cod trip limit applicable to a vessel fishing under a NE multispecies DAS permit, as specified in § 648.86(b)(5) and (6), respectively, is adjusted by NMFS, the cod trip limit specified in this paragraph (a)(1) shall be adjusted proportionally (rounded up to the nearest 25 lb (11.3 kg)). For example, if the GOM cod trip limit specified at § 648.86(b)(5) doubled, then the cod trip limit for the Handgear B category fishing in the GOM Regulated Mesh Area would also double to 150 lb (68 kg).

* * * * *

■ 12. Section 648.89 is amended as follows:

■ a. Suspend from November 13, 2014 until April 30, 2015, paragraphs (b)(3), (c)(1) and (2), and (e)(1) through (3); and

■ b. Temporarily add from November 13, 2014 until April 30, 2015, paragraphs (c)(8) and (e)(4) through (6).

The additions as follows:

§ 648.89 Recreational and charter/party vessel restrictions.

* * * * *

(c) * * *

(8) *Private recreational and charter/party vessels.* (i) Unless otherwise restricted in this paragraph (c)(2), each person on a private recreational vessel may possess no more than 10 cod per day in, or harvested from, the EEZ, and no person on a charter/party vessel man possess more than 10 cod per day. When fishing in the GOM Regulated Mesh Area defined in § 648.80(a)(1), unless otherwise restricted by the GOM Seasonal Interim Closure Areas specified under § 648.81(o), charter and party vessels fishing under this part, and recreational vessels fishing in the EEZ, may not fish for or possess GOM cod.

(ii) For purposes of counting fish, fillets will be converted to whole fish at the place of landing by dividing the number of fillets by two. If fish are filleted into a single (butterfly) fillet, such fillet shall be deemed to be from one whole fish.

(iii) Cod harvested by charter/party vessels, or recreational fishing vessels in or from the EEZ, with more than one person aboard may be pooled in one or more containers. If there is a violation of the possession limit on board a vessel carrying more than one person, the violation shall be deemed to have been committed by the owner or operator of the vessel.

(iv) Private recreational, and charter and party vessels in possession of cod caught outside the GOM Regulated Mesh Area may transit the GOM area, provided all bait and hooks are removed from fishing rods and any cod on board has been gutted and stored.

* * * * *

(e) * * *

(4) *GOM Closed Areas.* Unless otherwise specified in this paragraph (e)(3), a vessel fishing under charter/party regulations may not fish in the GOM closed areas specified at § 648.81(d)(3), (e)(3), and (o)(1) during the time periods specified in those paragraphs, unless the vessel has on board a valid letter of authorization issued by the Regional Administrator pursuant to § 648.81(d)(4) of this section. The conditions and restrictions

of the letter of authorization must be complied with for the rest of the fishing year, beginning with the start of the participation period of the letter of authorization. A vessel fishing under charter/party regulations may not fish in the GOM Cod Spawning Protection Area specified at § 648.81(n)(1) or the GOM Seasonal Interim Closure Areas at § 648.81(o)(1)(i) through (x) during the time periods specified in that paragraph, unless the vessel complies with the requirements specified at § 648.81(n)(2)(iii).

(5) *Nantucket Lightship Closed Area.* A vessel fishing under the charter/party regulations may not fish in the Nantucket Lightship Closed Area specified in § 648.81(c)(1) unless the vessel has on board a letter of authorization issued by the Regional Administrator pursuant to paragraph (e)(6) of this section.

(6) *Letters of authorization.* To obtain either of the letters of authorization specified in paragraphs (e)(4) and (5) of this section, a vessel owner must request a letter from the Greater Atlantic Regional Fisheries Office of NMFS, either in writing or by phone (see Table 1 to 50 CFR 600.502). As a condition of these letters of authorization, the vessel owner must agree to the following:

(i) The letter of authorization must be carried on board the vessel during the period of participation;

(ii) Fish species managed by the NEFMC or MAFMC that are harvested or possessed by the vessel, are not sold or intended for trade, barter or sale, regardless of where the fish are caught;

(iii) The vessel has no gear other than rod and reel or handline gear on board; and

(iv) For the GOM charter/party closed area exemption only, the vessel may not fish on a sector trip, under a NE multispecies DAS, or under the provisions of the NE multispecies Small Vessel Category or Handgear A or Handgear B permit categories, as specified at § 648.82, during the period of participation.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 130925836–4174–02]

RIN 0648–XD610

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Using Pot Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by vessels using pot gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2014 Pacific cod total allowable catch (TAC) apportioned to vessels using pot gear in the Central Regulatory Area of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), November 10, 2014, through 2400 hours, A.l.t., December 31, 2014.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679. Regulations governing sideboard protections for GOA groundfish fisheries appear at subpart B of 50 CFR part 680.

The 2014 Pacific cod TAC apportioned to vessels using pot gear in the Central Regulatory Area of the GOA is 11,352 metric tons (mt), as established by the final 2014 and 2015 harvest specifications for groundfish of the GOA (79 FR 12890, March 6, 2014) and one reallocation (79 FR 64334, October 29, 2014).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator) has determined that the 2014 Pacific cod TAC apportioned to vessels using pot gear in the Central Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 11,832 mt and is setting aside the remaining 10 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by vessels using pot gear in the Central Regulatory Area of the GOA. After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the directed fishing closure of Pacific cod for vessels using pot gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 6, 2014.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 7, 2014.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 79, No. 219
Thursday, November 13, 2014

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 875

RIN 3206–AN05

Federal Long Term Care Insurance Program Eligibility Changes

AGENCY: U.S. Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The United States Office of Personnel Management (OPM) is proposing to amend the Federal Long Term Care Insurance Program (FLTCIP) regulation to expand eligibility to apply for coverage under the Program. Under the proposed regulation, the definition of ''qualified relative'' is expanded to cover all individuals who are domestic partners (both same-sex and opposite-sex) of Federal and U.S. Postal Service employees, annuitants, members of the uniformed services, and retired members of the uniformed services. In addition, the proposed regulation provides that adult children of domestic partners will be considered one of the types of individuals comprising the statutory term ''qualified relative'' who may apply for FLTCIP coverage.

DATES: Comments are due on or before January 12, 2015.

ADDRESSES: Send written comments to Ronald Brown, Policy Analyst, Planning & Policy Analysis, Office of Personnel Management, 1900 E Street NW., Washington, DC 20415–9700; or deliver to OPM, Room 2309, 1900 E Street NW., Washington, DC; or FAX to (202) 606–0636. Comments may also be sent through the Federal eRulemaking Portal at: *http://www.regulations.gov*. All submissions received through the Portal must include the agency name and docket number or the Regulation Identifier Number (RIN) for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Ronald Brown, Policy Analyst, (202) 606–0004, or by email to *Ronald.Brown@opm.gov*.

SUPPLEMENTARY INFORMATION: In support of the President's Memoranda of June 17, 2009 and June 2, 2010, concerning Federal Benefits and Non-Discrimination, OPM has identified certain benefits under FLTCIP that may be extended to additional individuals consistent with existing law, whose relationship to the workforce member is considered to constitute a family relationship. The proposed regulation enhances the ability of Federal agencies to provide for the needs of an increasingly diverse workforce. OPM changed its regulation on June 1, 2010 to allow same-sex domestic partners of employees and annuitants to apply for FLTCIP coverage as a qualified relative. OPM now proposes to expand the term ''qualified relative'' to include all individuals who are domestic partners (both same-sex and opposite-sex) of employees, annuitants, members of the uniformed services and retired members of the uniformed services. In addition, OPM's June 1, 2010 regulation did not include same-sex domestic partners of members of the uniformed services. This proposed regulation includes domestic partners, both same-sex and opposite-sex, of members and retired members of the uniformed services.

Additionally, just as is currently required for same-sex domestic partners, newly eligible individuals (both same-sex and opposite-sex) will be required to provide documentation to establish that they meet the regulatory criteria for domestic partners.

Finally, OPM has determined that eligibility may be extended to adult children of domestic partners by defining the term ''stepchild,'' which is one of the types of individuals comprising the statutory term ''qualified relative,'' to include the child of a domestic partner. The definition of ''stepchild'' set forth in this proposed regulation appropriately encompasses and reflects the variety of parent-child relationships that exist today.

The proposed changes and clarifications are:

Changes:

(1) We propose to expand the definition of ''qualified relative'' under 5 U.S.C. 9001(5)(D) to include both same-sex and opposite sex domestic partners of Federal and U.S. Postal Service employees and annuitants and members and retired members of the uniformed services. This revision can be found in section 875.101 and 875.213 of the proposed rule.

(2) We propose to expand the definition of ''qualified relative'' to include adult children of domestic partners of Federal and U.S. Postal Service employees and annuitants, and members and retired members of the uniformed services consistent with Presidential Memoranda issued on June 17, 2009 and June 2, 2010. This revision can be found in section 875.101 of the proposed rule.

(3) We propose that the workforce member or his or her domestic partner must provide notice to the employing office if at any time between the time of application and the time coverage is scheduled to go into effect, any of the conditions for a domestic partnership are no longer met, in which case a domestic partnership is deemed terminated. Such notification must be made as soon as possible, but in no event later than thirty calendar days after such conditions are no longer met. This change can be found in 875.101 of the proposed rule.

(4) As is currently the case for same-sex domestic partners, opposite-sex domestic partners will be required to provide documentation to establish that they meet the criteria for domestic partners. This revision can be found in section 875.101 of the proposed rule.

(5) This proposed rule makes other technical conforming amendments to the FLTCIP rules that would be amended by this proposed rule. These changes can be found in section 875.405 of the proposed rule.

Clarification:

(1) We clarify that once coverage has begun, termination of a domestic partnership does not terminate a domestic partner's insurance coverage as long as the Carrier continues to receive the required premium when due. This revision can be found in section 875.412 of the changes.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation only adds additional groups to the list of groups eligible to apply for coverage under the FLTCIP. The FLTCIP is a voluntary, self-pay, benefits program with no Government contribution.

Executive Order 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

Federalism

We have examined this rule in accordance with Executive Order 13132, Federalism, and have determined that this rule will not have any negative impact on the rights, roles and responsibilities of State, local, or tribal governments.

List of Subjects in 5 CFR Part 875

U.S. Office of Personnel Management.

Katherine Archuleta,

Director, U.S. Office of Personnel Management.

Accordingly, OPM is proposing to amend 5 CFR part 875 as follows:

PART 875—FEDERAL LONG TERM CARE INSURANCE PROGRAM

■ 1. The authority citation for part 875 continues to read as follows:

Authority: 5 U.S.C. 9008.

Subpart A—Administration and General Provisions

■ 2. Section 875.101 is amended by revising the definitions of ''domestic partner'' and ''domestic partnership'' and by adding in alphabetical order a definition of ''stepchild(ren)'' to read as follows:

§ 875.101 Definitions.

* * * * *

Domestic partner is defined as a person in a domestic partnership with an employee, annuitant, member of the uniformed services, or retired member of the uniformed services.

Domestic partnership means:

(1) A committed relationship between two adults, of the opposite sex or same sex, in which the partners—

(i) Are each other's sole domestic partner and intend to remain so indefinitely;

(ii) Maintain a common residence, and intend to continue to do so (or would maintain a common residence but for an assignment abroad or other employment-related, financial, or similar obstacle);

(iii) Are at least 18 years of age and mentally competent to consent to a contract;

(iv) Share responsibility for a significant measure of each other's financial obligations;

(v) Are not married or joined in a civil union to anyone else;

(vi) Are not a domestic partner of anyone else;

(vii) Are not related in a way that would prohibit legal marriage in the U.S. jurisdiction in which the domestic partnership was formed;

(viii) Provide documentation demonstrating fulfillment of the requirements of (i) through (vii) as prescribed by OPM; and

(ix) Certify that they understand that willful falsification of the documentation described in subparagraph (viii) of this section may lead to disciplinary action and the recovery of the cost of benefits received related to such falsification and may constitute a criminal violation under 18 U.S.C. 1001.

(2) You or your domestic partner must notify the employing office if at any time between the time of application and the time coverage is scheduled to go into effect, any of the conditions listed in paragraphs (1)(i) through (vii) of this definition are no longer met, in which case a domestic partnership is deemed terminated. Such notification must be made as soon as possible, but in no event later than thirty calendar days after such conditions are no longer met.

* * * * *

Stepchild(ren), as set forth in section 9001 of title 5, United States Code, means the child(ren) of the spouse or domestic partner of an employee, annuitant, member of the uniformed services, or retired member of the uniformed services.

* * * * *

Subpart B—Eligibility

■ 3. Section 875.208 is revised to read as follows:

§ 875.208 May I apply as a qualified relative if the person on whom I am basing my eligibility status has died?

You may not apply as a qualified relative if the workforce member on whom you are basing your qualified relative status died prior to the time you apply for coverage, unless you are receiving a survivor annuity as the spouse or an insurable interest annuity as the domestic partner of a deceased workforce member. In this case, your adult children and your current spouse or domestic partner are also considered to be qualified relatives.

■ 4. In § 875.213, paragraph (a) is revised to read as follows:

§ 875.213 May I apply as a qualified relative if I am the domestic partner of a workforce member?

(a) You may apply for coverage as a qualified relative if you are a domestic partner, as described in section 875.101 of this chapter. As prescribed by OPM, you will be required to provide documentation to demonstrate that you meet these requirements, and you must submit to full underwriting requirements. However, as explained in section 875.210 of this chapter, if you lose your status as a domestic partner, and therefore a qualified relative, before your coverage goes into effect, you are no longer eligible for FLTCIP coverage.

* * * * *

Subpart D—Coverage

■ 5. Section 875.405 is revised to read as follows:

§ 875.405 If I marry, may my new spouse apply for coverage? If I become a domestic partner, may my new domestic partner apply for coverage? May other qualified relatives apply for coverage?

(a)(1) If you are an active workforce member and you have married, your spouse is eligible to submit an application for coverage under this section within 60 days from the date of your marriage and will be subject to the underwriting requirements in force for the spouses of active workforce members during the most recent open season. You, however, are not eligible for abbreviated underwriting because of your marriage. You, your spouse, or both you and your spouse may apply for coverage during this 60-day period, but full underwriting will be required for you. After 60 days from the date of your marriage, you and/or your spouse may still apply for coverage but will be subject to full underwriting.

(2) If you are an active workforce member and you have entered into a domestic partnership, your domestic partner is eligible to submit an application for coverage under this section at any time from the commencing date of your domestic partnership and will be subject to full underwriting requirements. You are not eligible for abbreviated underwriting because of your domestic partnership. You, your domestic partner, or both you and your domestic partner may apply for coverage at any time, but full underwriting will be required for both of you.

(b) The new spouse or domestic partner of an annuitant or retired member of the uniformed services may apply for coverage with full underwriting at any time following the

marriage or commencing date of the domestic partnership.

(c) Other qualified relative(s) of a workforce member may apply for coverage with full underwriting at any time following the marriage or commencing date of the domestic partnership.

■ 6. In § 875.412, the introductory text is revised and paragraph (e) is added to read as follows:

§ 875.412 When will my coverage terminate?

Except as provided in paragraph (e) of this section, your coverage will terminate on the earliest of the following dates:

* * * * *

(e) Termination of a domestic partnership does not terminate insurance coverage as long as the Carrier continues to receive the required premium when due.

RIN 2120–AA64

Airworthiness Directives; the Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all the Boeing Company Model 707 airplanes, and Model 720 and 720B series airplanes. This proposed AD is intended to complete certain mandated programs intended to support the airplane reaching its limit of validity (LOV) of the engineering data that support the established structural maintenance program. This proposed AD would require repetitive inspections for cracking of the inboard and outboard midspar fittings of the nacelle struts and of the torque bulkhead, midspar chords, drag fitting, and front spar support, and doing applicable related investigative and corrective actions; replacing the midspar fittings; and doing other specified actions. We are proposing this AD to detect and correct cracking in the midspar fittings of the inboard and outboard nacelle struts, which could result in the loss of the structural integrity of the midspar fitting. This condition could cause an unsafe separation of the engine and consequent wing fire.

DATES: We must receive comments on this proposed AD by December 29, 2014.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- Fax: 202–493–2251.
- Mail: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- Hand Delivery: Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2014–0756; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Chandra Ramdoss, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office (ACO), 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5239; fax: 562–627–5210; email: *chandraduth.ramdoss@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2014–0756; Directorate Identifier 2014–NM–103–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

As described in FAA Advisory Circular 120–104 (*http://www.faa.gov/documentLibrary/media/Advisory_Circular/120-104.pdf*), several programs have been developed to support initiatives that will ensure the continued airworthiness of aging airplane structure. The last element of those initiatives is the requirement to establish a limit of validity (LOV) of the engineering data that support the structural maintenance program under 14 CFR 26.21. This proposed AD is the result of an assessment of the previously established programs by Boeing during the process of establishing the LOV for Model 707 airplanes and Model 720 and 720B series airplanes. The actions specified in this proposed AD are necessary to complete certain programs to ensure the continued airworthiness of aging airplane structure and to support an airplane reaching its LOV.

We received reports of cracked midspar fittings on the inboard and outboard nacelle struts. The airplanes had accumulated between 9,900 and 63,000 total flight hours. Five of these airplanes had cracked midspar fittings that resulted in separation of the inboard strut and engine from the airplane inflight. In two of those events the inboard nacelle strut contacted the outboard engine, causing it to separate from the airplane. Operators have also reported cracking in the transition radius of the inboard and outboard midspar fittings of the nacelle struts of the numbers 1 and 4 engines.

The reported cracks on the inboard and outboard midspar fittings of the nacelle struts of engines numbers 1, 2, 3, and 4 were found to be vertical at the

lug hole or across the double horizontal tangs at the radius where the tangs merge with the lug. Analysis determined that the 4330 steel midspar fittings cracked as a result of stress corrosion and fatigue at the lug and fatigue at the tangs.

Cracked midspar fittings, if not detected and corrected, could result in the loss of the structural integrity of the midspar fitting. This condition could cause an unsafe separation of the engine and consequent wing fire.

Relevant Service Information

We reviewed Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014. For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2014–0756.

Related Rulemaking

AD 93–11–02, Amendment 39–8594, Docket No. 92–NM–230–AD, which applies to The Boeing Company Model 707 and 720 series airplanes, requires repetitive inspections for cracking of the midspar fittings on the inboard struts, related investigative and corrective actions if necessary, and replacement of the midspar fittings with new, improved fittings, which constitutes terminating action for the repetitive inspections.

AD 2012–16–12, Amendment 39–17159 (77 FR 49708, August 17, 2012), which applies to The Boeing Company Model 707 airplanes, and Model 720 and 720B series airplanes, requires a detailed inspection of the midspar fittings of the nacelle struts for engine numbers 2 and 3 to confirm that the correct part number is installed, and installing the correct part number if it is not installed. The correct part number is the new, improved midspar fitting required by AD 93–11–02, Amendment 39–8594, Docket No. 92–NM–230–AD. AD 2012–16–12 also requires repetitive high frequency eddy current inspections (HFEC) of the midspar fittings of engine numbers 2 and 3 nacelle struts for cracks and repair if necessary. In addition, AD 2012–16–12 requires repetitive general visual inspections of the nacelle struts of engine numbers 1, 2, 3, and 4 to verify that the nacelle strut has not drooped below its normal position, and repair if necessary.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the inspections for cracking of the inboard and outboard midspar fittings of the nacelle struts and of the torque bulkhead, midspar chords, drag fitting, and front spar support, and doing applicable related investigative and corrective actions; replacing the midspar fittings; and doing other specified actions; as specified in parts 2 through 6, inclusive, of the Accomplishment Instructions of the service information described previously, except as discussed under ''Differences Between this Proposed AD and the Service Information.''

The phrase ''related investigative actions'' is used in this proposed AD. ''Related investigative actions'' are follow-on actions that (1) are related to the primary actions, and (2) further investigate the nature of any condition found. Related investigative actions in an AD could include, for example, inspections.

The phrase ''corrective actions'' is used in this proposed AD. ''Corrective actions'' are actions that correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

The phrase ''other specified actions'' is used in this proposed AD. Other specified actions in this proposed AD include installing new inboard and outboard midspar fittings, installing oversized fasteners in the two forward most fastener holes common to the inboard side of the nacelle strut overwing support fitting and the wing front spar upper chord, applying sealant to the midspar area, and applying corrosion inhibiting compound to the midspar fitting areas.

We have determined that the actions specified in table 1 of paragraph 1.E., ''Compliance,'' of Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, should not be required in this AD, as noted in the service bulletin.

Differences Between This Proposed AD and the Service Information

Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, specifies to contact the manufacturer for fitting installation instructions and instructions on how to repair certain conditions, but this proposed AD would require doing those corrective actions in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 12 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	214 work-hours × $85 per hour = $18,190 per inspection cycle.	$0	$18,190	$218,280.
Replacement of midspar fitting.	18 work-hours × $85 per hour = $1,530	Up to $7,867	Up to $9,397	Up to $112,764.
Mid-interval inspections	107 work-hours × $85 per hour = $9,095 per inspection cycle.	$0	$9,095	$109,140.

We estimate the following costs to do any additional inspections that would be required based on the results of the proposed inspections. We have no way of determining the number of aircraft that might need these inspections:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Inspections	Up to 21 work-hours × $85 per hour = $1,785	$0	$1,785

We have received no definitive data that would enable us to provide cost estimates for the on-condition corrective actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2014–0756; Directorate Identifier 2014–NM–103–AD.

(a) Comments Due Date

We must receive comments by December 29, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 707–100 long body, –200, –100B long body, and –100B short body series airplanes; Model 707–300, –300B, –300C, and –400 series airplanes; and Model 720 and 720B series airplanes; certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 54, Nacelles/Pylons.

(e) Unsafe Condition

This AD was prompted by certain mandated programs intended to support the airplane reaching its limit of validity (LOV) of the engineering data that support the established structural maintenance program. We are issuing this AD to detect and correct cracking in the midspar fittings of the inboard and outboard nacelle struts, which could result in the loss of the structural integrity of the midspar fitting. This condition could cause an unsafe separation of the engine and consequent engine fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspections of Nacelle Struts and Surrounding Structure and Replacement of Inboard and Outboard Midspar Fittings

At the applicable time specified in table 2 or table 3 of paragraph 1.E., ''Compliance,'' of Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, except as required by paragraph (i)(1) of this AD: Do the inspections required by paragraphs (g)(1), (g)(2), and (g)(3) of this AD in accordance with part 2 or part 3, as applicable, of the Accomplishment Instructions of Boeing Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, except as required by paragraph (i)(2) of this AD. Before further flight, do all applicable related investigative and corrective actions, replace the inboard and outboard midspar fittings with new parts, and do other specified actions (including installing new bushings and oversize fasteners) in accordance with part 2 or part 3, as applicable, of the Accomplishment Instructions of Boeing Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, except as required by paragraph (i)(2) of this AD. Repeat the inspections required by paragraphs (g)(1), (g)(2), and (g)(3) of this AD thereafter at the applicable intervals specified in table 2 or table 3 of paragraph 1.E., ''Compliance,'' of Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, except as required by paragraph (i)(1) of this AD.

(1) A detailed inspection and a high frequency eddy current inspection (HFEC) for cracks in the inboard and outboard midspar fittings of the nacelle struts.

(2) Open hole HFEC inspections for cracks in the torque bulkhead, midspar chords, drag fitting, and front spar support.

(3) A surface HFEC inspection of the front spar support for cracks.

(h) Mid-Interval Inspections and Replacement of Nacelle Strut Midspar Fittings

At the applicable time specified in table 4 or 5 of paragraph 1.E., ''Compliance,'' of Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014: Do the inspections required by paragraphs (h)(1), (h)(2), and (h)(3) of this AD, in accordance with part 4 or part 5, as applicable, of the Accomplishment Instructions of Boeing Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, except as required by paragraph (i)(2) of this AD. Do all applicable related investigative, corrective, and other specified actions (including installing new bushings and oversize fasteners) before further flight. Repeat the inspections required by paragraphs (h)(1), (h)(2), and (h)(3) of this AD thereafter at the applicable intervals specified in table 4 or 5 of paragraph 1.E., ''Compliance,'' of Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014. The threshold for the repetitive inspections required by paragraphs (h)(1), (h)(2), and (h)(3) of this AD is 1,500 flight cycles or 48 months, whichever occurs first, since the most recent midspar fitting replacement.

(1) A detailed inspection and a surface HFEC inspection for cracks in the inboard

and outboard midspar fittings of the nacelle struts.

(2) An open hole HFEC inspection for cracks in the drag fitting and front spar support.

(3) A surface HFEC inspection for cracks in the front spar support.

(i) Exceptions to Service Information Specifications

(1) Where Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, specifies a compliance time ''after the Revision 6 date of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) Where Boeing 707 Alert Service Bulletin A3183, Revision 6, dated February 7, 2014, specifies to contact Boeing for appropriate action: Do corrective actions before further flight using a method approved in accordance with the procedures specified in paragraph (k) of this AD.

(j) Special Flight Permit

Special flight permits, as described in Section 21.197 and Section 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199), are not allowed.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (l)(1) of this AD. Information may be emailed to: *9–ANM–LAACO–AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA*)* that has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane and the approval must specifically refer to this AD.

(l) Related Information

(1) For more information about this AD, contact Chandra Ramdoss, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office (ACO), 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5239; fax: 562–627–5210; email: *chandraduth.ramdoss@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 5, 2014.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2014–0903; Directorate Identifier 2013–SW–043–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters Deutschland GmbH (Previously Eurocopter Deutschland GmbH) (Airbus Helicopters)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Airbus Helicopters Model EC135P1, EC135P2, EC135P2+, EC135T1, EC135T2, and EC135T2+ helicopters. This proposed AD would require reducing the life limit of certain parts and removing each part that has reached its life limit. The proposed actions are intended to reduce the life limits of certain critical parts to prevent failure of a part and subsequent loss of control of the helicopter.

DATES: We must receive comments on this proposed AD by January 12, 2015.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Docket:* Go to *http://www.regulations.gov.* Follow the online instructions for sending your comments electronically.
- *Fax:* 202–493–2251.
- *Mail:* Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.
- *Hand Delivery:* Deliver to the ''Mail'' address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the European Aviation Safety Agency (EASA) AD, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Matt Fuller, Senior Aviation Safety Engineer, Safety Management Group, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *matthew.fuller@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to participate in this rulemaking by submitting written comments, data, or views. We also invite comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

We will file in the docket all comments that we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, we will consider all comments we receive on or before the closing date for comments. We will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. We may change this proposal in light of the comments we receive.

Discussion

EASA, which is the Technical Agent for the Member States of the European Union, issued EASA AD No. 2013–0178, dated August 7, 2013, to correct an unsafe condition for the Eurocopter Deutschland GmbH (ECD) (now Airbus Helicopters) Model EC135P1, EC135P2, EC135P2+, EC135T1, EC135T2, EC135T2+, EC635T1, EC635P2+, and EC635T2+ helicopters. EASA advises that ECD has revised the airworthiness limitations for the EC135 and EC635

type design as published in the Master Servicing Manual (MSM) EC135 Chapter 04—Airworthiness Limitations Section (ALS) documents. Revision 14 of the MSM contains these new airworthiness limitations. EASA states that failure to comply with these limitations could result in an unsafe condition. For these reasons, EASA AD No. 2013–0178 requires revising the ALS to include the new life limits and replacing each part that has reached its life limit.

FAA's Determination

These helicopters have been approved by the aviation authority of Germany and are approved for operation in the United States. Pursuant to our bilateral agreement with Germany, the EASA, its technical representative, has notified us of the unsafe condition described in its AD. We are proposing this AD because we evaluated all known relevant information and determined that an unsafe condition is likely to exist or develop on other products of the same type design.

Related Service Information

The airworthiness limitations and maintenance procedures for certain parts are contained in the Airworthiness Limitations section, Chapter 4, of Eurocopter's MSM EC135, dated December 1, 2001. Revision 14 of the MSM, dated July 1, 2012, establishes a life limit for certain part-numbered main rotor blades and reduces the life limits for swashplate and mixing lever gear unit parts.

Proposed AD Requirements

This proposed AD would require, before further flight, revising the ALS of the applicable maintenance manual and the component history card or equivalent record by reducing the life limit for various parts and removing from service any part that has reached its life limit.

Differences Between This Proposed AD and the EASA AD

This proposed AD does not apply to Airbus Helicopters Model EC635T1, P2+, or EC635T2+ helicopters because those helicopters are not type certificated in the U.S.

Costs of Compliance

We estimate that this proposed AD would affect 267 helicopters of U.S. Registry.

We estimate that operators may incur the following costs in order to comply with this AD. Labor costs are estimated at $85 per hour. We estimate 2 work hours to update the maintenance manual for a total cost of $170 for each helicopter and $45,390 for the U.S. fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus Helicopters Deutschland GmbH (Previously Eurocopter Deutschland GmbH): Docket No. FAA–2014–0903; Directorate Identifier 2013–SW–043–AD.

(a) Applicability

This AD applies to Model EC135P1, EC135P2, EC135P2+, EC135T1, EC135T2, and EC135T2+ helicopters, certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as failure of a critical part, which could result in loss of control of the helicopter.

(c) Comments Due Date

We must receive comments by January 12, 2015.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

Before further flight:

(1) Revise the life limit of each part listed in paragraphs (e)(1)(i) through (ii) in the Airworthiness Limitations Section of the applicable maintenance manual and record the revised life limit on the component history card or equivalent record as follows:

(i) For swashplate parts:

(A) Ring (bearing ring), part number (P/N) L623M2001214, reduce the life limit from 8,300 hours time-in-service (TIS) to 8,000 hours TIS.

(B) Ring (control ring), P/N L623M2001213, reduce the life limit from 8,300 hours TIS to 8,000 hours TIS.

(C) Cardan ring (two-part), P/N L623M2005205, reduce the life limit from 14,400 hours TIS to 12,900 hours TIS.

(D) Bolt (control ring), P/N L671M7001215, reduce the life limit from 14,400 hours TIS to 12,900 hours TIS.

(E) Bolt (sliding sleeve), P/N L623M2006206 and P/N L623M2006213, reduce the life limit from 14,400 hours TIS to 12,900 hours TIS.

(ii) For mixing lever gear unit parts:

(A) Forked lever assembly, P/N L671M3012102, reduce the life limit from 9,000 hours TIS to 8,700 hours TIS.

(B) Hinged support, P/N L671M7003210, reduce the life limit from 8,700 hours TIS to 8,400 hours TIS.

(C) Bolt, P/N L671M7001220, reduce the life limit from 8,700 hours TIS to 8,400 hours TIS.

(2) Remove from service any part listed in paragraph (e)(1) of this AD that has reached or exceeded its newly revised life limit.

(f) Special Flight Permit

Special flight permits are limited to a one-time flight to a maintenance facility to replace a part that has reached its life limit.

(g) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Matt Fuller, Senior Aviation Safety Engineer, Safety Management Group, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *matthew.fuller@faa.gov.*

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(h) Additional Information

The subject of this AD is addressed in European Aviation Safety Agency (EASA) AD 2013–0178, dated August 7, 2013. You may view the EASA AD on the Internet at *http://www.regulations.gov* in Docket No. FAA–2014–0903.

(i) Subject

Joint Aircraft Service Component (JASC) Code: 6300, 2700 Swashplate Ring, Cardan Ring, Bolt, Mixing Lever Gear Unit (flight controls).

Issued in Fort Worth, Texas, on October 28, 2014.

Kim Smith,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1251

[Document Number NASA–2014–0011]

RIN 2700–AD85

Discrimination on the Basis of Disability in Federally Assisted Programs and Activities

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Aeronautics and Space Administration (NASA) is proposing to amend its rules implementing Section 504 of the Rehabilitation Act of 1973 (section 504), which prohibits discrimination on the basis of disability in programs, services, and activities by recipients of Federal financial assistance from NASA as well as those programs, services, and activities conducted by NASA. The revisions to this rule are part of NASA's retrospective plan under EO 13563 completed in August 2011.

DATES: Submit comments on or before December 15, 2014.

ADDRESSES: Comments must be identified with RIN 2700–AD85 and may be sent to NASA via the *Federal E-Rulemaking Portal: http://www.regulations.gov*. Follow the online instructions for submitting comments. Please note that NASA will post all comments on the internet with changes, including any personal information provided.

NASA's full plan can be accessed at: *http://www.nasa.gov/open/*.

FOR FURTHER INFORMATION CONTACT: Robert Cosgrove, (202) 358–0446.

SUPPLEMENTARY INFORMATION:

Background

In this rulemaking, NASA is proposing to amend its section 504 regulations to incorporate changes to the definition of disability required by the Americans with Disabilities Act (ADA) Amendments Act of 2008, include an affirmative statement of the longstanding requirement for reasonable accommodations in programs, services, and activities, include a definition of direct threat and a provision describing the parameters of the existing direct threat defense to a claim of discrimination, clarify the existing obligation to provide auxiliary aids and services to qualified individuals with disabilities, update the methods of communication that recipients may use to inform program beneficiaries of their obligation to comply with section 504 to reflect changes in technology, adopt updated accessibility standards applicable to the design, construction, and alteration of buildings and facilities, establish time periods for compliance with these updated accessibility standards, provide NASA with access to recipient data and records to determine compliance with section 504, and make administrative updates to correct titles.

NASA is also proposing to amend its regulation to incorporate changes required by the Rehabilitation Act Amendments of 1992 (1992 Amendments) by revising current sections 1251.2—Employment Practices (Federally Assisted Programs) and 1251.540—Employment (Federally Conducted Programs) and instead referencing the EEOC's ADA title I regulation. The proposed rule also updates outdated terminology and references that currently exist in Part 1251 and changes the word ''handicapped'' and similar variations of that word that appear throughout Part 1251, replacing it with ''people first'' language (e.g., ''individuals with disabilities'') consistent with the 1992 Amendments.

Section 504

NASA implements the requirements of Section 504 of the Rehabilitation Act of 1973 (section 504), which prohibits discrimination on the basis of disability in Federally conducted and assisted programs or activities, through its regulation in Part 1251. NASA's section 504 regulation applies to recipients to whom the Agency extends Federal financial assistance, such as research, education and training grants, and cooperative agreements, as well as programs, services, and activities conducted by NASA. NASA's section 504 regulation at § 1251.103 prohibits denial of the benefits of, exclusion from participation in, or other discrimination against qualified individuals with disabilities in programs or activities because a recipient's facilities are inaccessible to or unusable by persons with disabilities. Many of the entities that receive financial assistance from NASA are also covered by Title II of the ADA (title II), which prohibits discrimination on the basis of disability by public entities (i.e., state and local governments and their agencies) or Title III of the ADA (title III), which prohibits discrimination on the basis of disability by: (1) Public accommodations (i.e., private entities that own, operate, lease, or lease to places of public accommodation); (2) newly constructed and altered commercial facilities; and (3) private entities that offer certain examinations and courses related to educational and occupational certification.

Definition of Disability—ADA Amendments Act of 2008

The ADA Amendments Act of 2008 (the ADA Amendments Act) was signed into law in September 2008 and became effective on January 1, 2009. Congress enacted the ADA Amendments Act to revise the ADA definition of disability in order to ensure that this definition is broadly construed and applied without extensive analysis and to supersede Supreme Court decisions that had too narrowly interpreted the ADA's definition of a disability. The ADA Amendments Act not only amended the definition of disability applicable to the ADA but also amended the Rehabilitation Act of 1973 to conform the section 504 definition of disability at 29 U.S.C. 705(20)(B) to the revised ADA definition. In this rulemaking, NASA is proposing to amend its section 504

regulation to implement these revised requirements. NASA intends these proposed regulatory changes to be consistent with the Department of Justice's (DOJ's) proposed changes to its title II regulation to incorporate the requirements of the ADA Amendments Act published on January 30, 2014 [79 FR 4839].

Due to the changes that the ADA Amendments Act made to the application of the definition of disability, participants in recipients' programs, services, and activities who, in the past decade, may not have been determined to have a disability under section 504 and title II may now in fact be found to have a disability under those laws. Section 504 and the ADA define disability as (1) a physical or mental impairment that substantially limits a major life activity; (2) a record of such impairment; or (3) being regarded as having such an impairment [29 U.S.C. 705(9)(B); 42 U.S.C. 12102(1)]. The ADA Amendments Act does not alter these three elements of the definition of disability in the ADA and section 504, but it significantly changes how the term ''disability'' is to be interpreted and adds important rules of construction to inform that interpretation. Specifically, Congress directed that the definition of disability shall be construed broadly and that the determination of whether an individual has a disability should not demand extensive analysis [42 U.S.C. 12102].

NASA's proposed revisions to the definition of disability are all based on specific provisions in the ADA Amendments Act or specific language in the legislative history. Since the ADA Amendments Act does not change the meaning of the term ''physical or mental impairment,'' NASA is retaining the general regulatory definitions for this term with only minor modifications consistent with DOJ's proposed revisions to its Title II ADA regulations. First, NASA is proposing to add examples of two new body systems—the immune system and the circulatory system—that may be affected by a physical impairment. See 14 CFR 1251.102(h)(2)(A). In addition, ''dyslexia'' will be added to 14 CFR 1251.102(h)(2)(A) as one example of a specific learning disability that falls within the meaning of the phrase ''physical or mental impairment.''

The proposed revisions also expand the definition of ''major life activities'' by providing a non-exhaustive list of major life activities and specifically including the operation of major bodily functions. Prior to the ADA Amendments Act, section 504 did not define ''major life activities,'' leaving delineation of illustrative examples to agency regulations. The definition of ''disability'' in the NASA's current section 504 regulations states that ''[m]ajor life activities means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.'' See 14 CFR 1251.102(h)(2)(ii). The ADA, as amended, incorporates into the statutory language a non-exhaustive list of major life activities that includes, but is not limited to, ''caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working.'' See 42 U.S.C. 12102(2)(A). This list reflects Congress's concern that courts were interpreting the term ''major life activities'' more narrowly than Congress intended. See 42 U.S.C. 12101(b)(4). In §§ 1251.102(h) and 1251.503(h), NASA proposes to revise its section 504 regulatory definitions of disability to incorporate the statutory examples as well as to provide additional examples included in the EEOC title I final regulation—reaching, sitting, and interacting with others. See 29 CFR 1630.2(i)(1)(i).

These proposed revisions also add rules of construction that should be applied when determining whether an impairment substantially limits a major life activity. The rules of construction state the following:

—That the term ''substantially limits'' shall be construed broadly in favor of expansive coverage, to the maximum extent permitted by the terms of the ADA;
—that an impairment is a disability if it substantially limits the ability of an individual to perform a major life activity as compared to most people in the general population;
—that the primary issue in a case brought under the ADA should be whether the covered entity has complied with its obligations and whether discrimination has occurred, not the extent to which the individual's impairment substantially limits a major life activity;
—that in making the individualized assessment required by the ADA, the term ''substantially limits'' shall be interpreted and applied to require a degree of functional limitation that is lower than the standard for ''substantially limits'' applied prior to the ADA Amendments Act;
—that the comparison of an individual's performance of a major life activity to the performance of the same major life activity by most people in the general population usually will not require scientific, medical, or statistical evidence;
—that mitigating measures other than ''ordinary eyeglasses or contact lenses'' shall not be considered in assessing whether an individual has a ''disability'' (mitigating measures include medications, prosthetic devices, assistive devices, or learned behavioral or adaptive neurological modifications that an individual may use to eliminate or reduce the effects of an impairment);
—that an impairment that is episodic or in remission is a disability if it would substantially limit a major life activity when active; and
—that an impairment that substantially limits one major life activity need not substantially limit other major life activities in order to be considered a substantially limiting impairment.

In keeping with the ADA Amendments Act, the proposed rule provides that if a person seeks to establish coverage under section 504 using the ''regarded as'' prong of the disability definition, that individual need only establish that he or she has been subjected to an act prohibited by section 504 because of an actual or perceived physical or mental impairment. An individual will not be ''regarded as'' a person with a disability if the impairment is both transitory (meaning that it has an actual or expected duration of six months or less) and minor. ADA Amendments Act, section 4(a) (codified as amended at 42 U.S.C. 12102).

Definition of Auxiliary Aids and Services

Although NASA's existing section 504 Federally assisted regulation referenced the provision of auxiliary aids,[1] it did not include a definition. The proposed regulation includes a definition for auxiliary aids and services, which is consistent with the definition used in the ADA title II regulation at 28 CFR 35.104.

Employment

NASA proposes to revise Section 1251.2—Employment Practices (Federally Assisted Programs) and Section 1251.540—Employment (Federally Conducted Programs) to conform to the Rehabilitation Act Amendments of 1992 (Pub. L. 102–569, sec. 506) which amended title V to make

[1] Although the current regulation references ''auxiliary aids,'' the term has always been understood to mean ''auxiliary aids and services,'' and the revised regulation references them correctly.

the same employment standards set forth in title I of the ADA apply to employment discrimination apply under section 504. As such, the proposed rule deletes the existing requirements related to discriminatory employment practices and references the standards applied under Title I of the Americans with Disabilities Act of 1990 (42 U.S.C. 12111 *et seq.*) and to the extent such sections relate to employment, the provisions of sections 501 through 504 and 510 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12201–12204 and 12210), and the Equal Employment Opportunity Commission's ADA title I regulation at 29 CFR § 1630, as amended.

NASA is also proposing to clarify its role in the processing and coordination of complaints alleging discrimination by its recipients, Title I of the ADA (title I) prohibits discrimination against individuals with disabilities employed in a business that has fifteen or more employees. Title I is enforced by the United States Equal Employment Opportunity Commission (EEOC) and is the designated Federal agency for the processing and adjudication of all complaints filed under title I. Many of the Agency's recipients may fall under the jurisdiction of title I and may also file a complaint alleging discrimination under section 504. NASA has authority to receive complaints of discrimination and has developed procedures to identify when NASA has jurisdiction to process such complaints or when they must be referred to the EEOC or DOJ for processing. In order to avoid duplication of investigative and enforcement efforts, NASA will process and coordinate any complaints filed under this Part in accordance with the Equal Employment Opportunity Commission (EEOC) procedures set forth in 29 CFR part 1640 and the Department of Justice (DOJ) procedures set forth at 28 CFR part 37 (Procedures for Coordinating the Investigation of Complaints or Charges of Employment Discrimination Based on Disability Subject to the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973).

NASA is also proposing to clarify its role in the processing and adjudication of section 504 complaints in its Federally conducted programs.

Provision of Auxiliary Aids and Services

NASA's current section 504 Federally assisted regulation at § 1251.103(b)(3) provides that ''[r]ecipients shall take appropriate steps to ensure that no handicapped individual is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination in any program or activity receiving Federal financial assistance because of the absence of auxiliary aids for individuals with impaired sensory, manual, or speaking skills.''

This Notice of Proposed Rule Making (NPRM) proposes to clarify this existing obligation by providing affirmative language explaining this obligation. Similar language is already included in NASA's Federally conducted regulation at § 1251.560. (Communications)

Notice of Recipient Obligations To Comply With Section 504

NASA's section 504 regulations at § 1251.107(a) require a recipient that employs 15 or more persons to take appropriate initial and continuing steps to notify participants, beneficiaries, applicants, and employees, including those with or hearing and vision disabilities, and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of disability in violation of section 504 and this part. The notification shall state, where appropriate, that the recipient does not discriminate in admission or access to, or treatment or employment in, its programs or activities. The notification shall also include an identification of the responsible employee designated to coordinate the recipient's efforts to comply with section 504 pursuant to § 1251.106(a). The regulation requires the recipient to make the initial notification required by this paragraph within 90 days of the effective date of this part. This regulation also delineates the methods of initial and continuing notification to include ''the posting of notices, publication in newspapers and magazines, placement of notices in recipient's publication, and distribution of memoranda or other written communications.'' NASA recognizes that the methods by which a recipient communicates with interested persons has changed significantly since these regulations were promulgated and this regulation as currently written does not reflect the current and future state of information dissemination. With the advent of broad application of the Internet and the Web, as well as electronic publishing, electronic mail, text messaging, and social media platforms, NASA has determined that the regulation does not adequately include electronic methods of communication. Furthermore, NASA's grant recipients currently rely on their Web sites, email, text messaging, and social media to communicate with and provide information to the beneficiaries of its programs, services, and activities. Many of the publications that were available in print such as pamphlets, brochures, maps, course catalogs, policies, and procedures are now posted on the recipients' Web sites and can be printed or downloaded by the interested person viewing the Web site. In revising the regulation to include electronic communications, NASA is also providing its grant recipients the ability to provide this information in a more cost-effective and expeditious manner than by relying on printed media. Information or programs provided to the public on recipient's Web sites should be provided in an accessible format in order to ensure equal access to the recipient's programs, services, and activities.

Accessibility Standards for New Construction

NASA's section 504 regulations at § 1251.302(c) require that if construction of a recipient's facility commenced after the effective date of the regulations (January 18, 1991), the facility must be designed and constructed so that it is readily accessible to and usable by persons with disabilities. These regulations also require that facility alterations commenced after January 18, 1991, that affect or may affect the facility's usability must be accomplished so that, to the maximum extent feasible, the altered portion of the facility is readily accessible and usable by persons with disabilities.

For facilities subject to the new construction and alterations requirements, the NASA regulation at § 1251.302(c) has always incorporated by reference an accessibility design standard, such that construction or alterations in conformance with that standard would be deemed in compliance with NASA's section 504 regulation. Under the current regulation, new construction or alterations made in conformance with the Uniform Federal Accessibility Standards (UFAS) are deemed to be in compliance with NASA's section 504 regulation, although a recipient may depart from UFAS when other methods provide equivalent or greater access to and usability of the facility.

The adoption of UFAS as an accessibility design standard in NASA's section 504 regulation occurred in 1991 as part of a joint rulemaking with other Federal agencies, led by the DOJ pursuant to its coordinating authority for section 504 under Executive Order 12250. *[51 FR 26862 July 28, 1986, as amended and 55 FR 52138, 52140, December 19, 1990].* NASA and the

other participating agencies adopted UFAS (effective January 18, 1991) to diminish the possibility that some recipients of Federal financial assistance would face conflicting enforcement standards either between section 504 and the Architectural Barriers Act of 1968, or among the section 504 regulations of different Federal agencies. *[55 FR 52136–37 (1990)]*

Accessibility Standards in the ADA Regulations Issued by DOJ

DOJ's 1991 title II ADA regulation incorporated by reference two sets of standards for new construction and alterations: UFAS and the 1991 ADA Standards for Accessible Design (1991 Standards) except that the elevator exemption contained at sections 4.1.3(5) and 4.1.6(1)(k) of the 1991 Standards did not apply. The 1991 title II ADA regulations also permitted departures from the particular requirements of either standard by the use of other methods when it was clearly evident that equivalent access to the facility or part of the facility is thereby provided. UFAS was included as an option for title II entities because it was deemed the accessibility standard under existing section 504 accessibility regulations. UFAS was not an accessibility option under the ADA for title III entities, even if they were also subject to an agency section 504 regulation.

On September 15, 2010, DOJ published revised title II and title III ADA regulations that included the adoption of revised accessibility standards, the 2010 ADA Standards for Accessible Design (2010 Standards). *[75 FR 56164].* The 2010 Standards were based on the 2004 ADA Accessibility Guidelines adopted by the United States Access Board in 2004. (36 CFR parts 1190 and 1191). The 2010 Standards, which now supersede the 1991 Standards, were adopted by DOJ through formal rulemaking and were subject to substantial scrutiny and deliberation, including consideration of costs and benefits. Compliance with the 2010 Standards was required for all new construction and alterations that commenced on or after March 15, 2012. *[75 FR 56164, 56182 (Sept. 15, 2010)].* As of March 15, 2012, UFAS was no longer an option for compliance with title II.

NASA's Revisions to Its Section 504 Federally Assisted Regulations To Adopt the 2010 Standards

In the preamble to the final title II regulation, DOJ stated that Federal agencies that extend Federal financial assistance should revise their section 504 regulations to adopt the 2010 Standards as section 504 standards for new construction and alterations *[75 FR 56164, 56213 Sep. 15, 2010].* DOJ also stated its intent to work with Federal agencies ''to revise their section 504 regulations in the near future to adopt the 2010 Standards as the appropriate accessibility standard for their recipients.'' In coordination with DOJ, we are adopting the 2010 Standards as set forth in 28 CFR part 35, in lieu of UFAS, for new construction and alterations commencing on or after one year from the publication date of the final rule in the **Federal Register**. Therefore, as discussed below, the proposed rule specifies that all buildings and facilities newly constructed or altered by recipients shall comply with the requirements for a ''public building or facility'' as set forth in the 2010 Standards.

Under NASA's section 504 regulations, the same accessibility standards for new construction and alterations are applied to all recipients regardless of whether they are public or private entities that have an obligation to comply with title II or title III of the ADA, respectively. That is, both private and public recipients are subject to the same requirements for the purposes of compliance with NASA's section 504 regulations. The 2010 Standards impose several different requirements for buildings and facilities covered by title II as compared to buildings and facilities covered by title III. For example, Exception 1 of section 206.2.3 of the 2010 Standards exempts certain multistory buildings owned by private entities from the requirement to provide an elevator. This exemption does not apply to buildings owned by public entities. Similarly, the 2010 Standards specify TTY requirements for public buildings that are different than those required for private buildings. In order to maintain consistency in the requirements applicable to all its recipients, regardless of whether they are public or private entities, NASA is requiring all buildings and facilities covered by its section 504 Federally assisted rule to comply with the requirements for a ''public building or facility,'' which are the requirements for buildings subject to title II of the ADA.

The NPRM proposes that compliance with the 2010 Standards is required one year from the publication date of the final rule in the **Federal Register**. In the period between the effective date of the final rule and the compliance date for new construction and alterations announced in the final rule, the NPRM proposes that recipients shall be permitted to choose to use the 2010 Standards in lieu of UFAS.[2] However, regardless of which accessibility standard recipients choose to use during this time period, recipients may not designate one accessibility standard for part of a facility and the other accessibility standard for the remainder.

The NPRM also proposes to adopt the approach used in both title II at 28 CFR 35.151(c) and title III at 28 CFR 36.406(a) to determine the ''triggering event'' for applying the proposed standards to new construction and alterations under section 504. For NASA recipients that are public entities (i.e., state and local governments and their agencies and organizations) who would otherwise comply with title II, the triggering event will be the commence of physical construction or alterations. For private entities who would otherwise comply with title III (i.e., privately owned and operated organizations), the triggering event is the date of: a) The last application for a building permit or permit extension certified to be complete by a state, county, or local government; or b) in those jurisdictions where the government does not certify completion of applications, the date when the last application for a building permit or permit extension is received by the State, county, or local government; or c) if no permit is required, the start of physical construction or alterations. For both public and private entities, NASA proposes to adopt the language found at 28 CFR 35.151(c)(4) in title II and 28 CFR 36.406(a)(4) in title III to make it clear that the date of ceremonial groundbreaking or the date a structure is razed to make it possible for construction of a facility to take place does not qualify as the commencement of physical construction.

Reasonable Accommodation (Non-Employment)

In *Southeastern Community College* v. *Davis,* 442 U.S. 397, 99 S.Ct. 2361 (1979), the Supreme Court held that a person is not protected by section 504 if, in order for the person to meet reasonable eligibility standards, the person needs program or policy modifications that would fundamentally alter the nature of the provider's program or impose undue financial and

[2] This choice is in keeping with the Department of Justice March 2011 memorandum advising Federal agencies that until such time as they update their agency's regulation implementing the Federally assisted provisions of section 504 of the Rehabilitation Act of 1973 (section 504), they may notify covered entities that they may use the 2010 ADA Standards for Accessible Design (2010 Standards) as an acceptable alternative to the Uniform Federal Accessibility Standards (UFAS). (*www.ada.gov/504_memo_standards.htm*).

administrative burdens (applicant who was denied admission to college nursing program because of her hearing disability asked college to provide hearing supervisor to aid her in communicating with patients, to dispense with certain required courses, and to train her to hold some, but not all, positions available to a registered nurse). Although the Court also opined in *Davis* that there may be situations where a refusal to modify an existing program might be discriminatory, this issue was posed to, and analyzed by, the Court in terms of the proper interpretation of the statutory term ''otherwise qualified.'' As a result, agency Section 504 regulations [3] originally promulgated after the *Davis* decision addressed the obligation to provide reasonable accommodations/modifications in the definition section for ''qualified handicapped person'' (rather than in the nondiscrimination section).[4]

Subsequently, in *Alexander* v. *Choate,* 469 U.S. 287, 105 S.Ct. 712 (1985) (Medicaid recipients not entitled to relief under section 504 against state's reduction in the number of inpatient hospital days that state Medicaid would pay), the Court clarified its *Davis* analysis. In that case, the Court described *Davis* as striking a balance between the need to provide qualified individuals with disabilities with meaningful access to the benefit the grantee offers and the legitimate interests of Federal grantees in preserving the integrity of their programs (469 U.S. at 300–301). It further stated that, although its opinion in *Davis* ''addressed that portion of section 504 that requires that a handicapped individual be 'otherwise qualified' before the nondiscrimination principle of section 504 becomes relevant, . . . the question of who is 'otherwise qualified' and what actions constitute 'discrimination' under the section would seem to be two sides of a single coin; the ultimate question is the extent to which a grantee is required to make reasonable modifications [accommodations] in its programs for the needs of the handicapped.'' (469 U.S. at 300, note 19).

In addition, in keeping with these decisions of the Supreme Court over the past decades, Federal courts and Federal agencies have regularly acknowledged the affirmative obligation to provide qualified individuals with disabilities reasonable accommodations in programs, services, and activities.

Similarly, Congress, in the ADA at 42 U.S.C. 12182(b)(2)(A)(ii), and DOJ, in its ADA regulations at 28 CFR 35.130(b)(7) and 28 CFR 36.302, stated the obligation as a positive requirement to make reasonable changes in policies, practices, or procedures when necessary to avoid discrimination on the basis of disability. Accordingly, and with the approval of the DOJ pursuant to its section 504 coordination authority, we are proposing to add to the section 504 rule at §§ 1251.111 (Federally Assisted Programs) and 1251.581 (Federally Conducted Programs) a provision stating that a recipient must provide reasonable accommodations by making changes to policies, practices, or procedures when necessary to avoid discrimination on the basis of disability, unless the covered entity can show that the accommodations would result in a fundamental alteration in the nature of its service, program, or activity or impose undue financial and administrative burdens. The term ''reasonable accommodation'' is intended to have the same meaning as the term reasonable modifications under title II of the ADA (and the title II implementing regulation) and not the same meaning as ''reasonable accommodation'' in title I of the ADA (and the title I implementing regulation) covering employment. However, unlike reasonable modifications under title II, the obligation to provide reasonable accommodations under section 504 is limited by both the fundamental alteration and the undue financial and administrative burden defenses.

Qualified Individual With a Disability

NASA is proposing to revise § 1251.102(k) Qualified Individual with a Disability in order to streamline the language and update the references to employment to cite to the EEOC title I ADA regulation.

Direct Threat

In *School Bd. of Nassau County, Fla.* v. *Arline,* 480 U.S. 273,107 S.Ct. 1123 (1987) (school board dismissed teacher after a third relapse of tuberculosis within a two-year period), the Court held that (i) section 504 covers individuals with contagious diseases and (ii) the determination of whether a person with a contagious disease is otherwise qualified must be made on an individualized basis, taking into account the nature of the risk (how the disease is transmitted), duration of the risk (how long is the carrier infectious), severity of the risk (what is the potential harm to third parties), and probability the disease will be transmitted and will cause varying degrees of harm. The individualized inquiry must include appropriate findings of fact about these factors, based on reasonable medical judgments given the state of medical knowledge; based on these findings, a determination must be made as to whether the individual's disability could be reasonably accommodated.[5] This concept was incorporated by Congress into the ADA where it was termed a ''direct threat.'' The ADA regulations for titles II and III incorporate provisions allowing for determinations of ''direct threat'' in §§ 35.104 and 36.104 (definitions) and §§ 35.139 and 36.208. Accordingly, and with the approval of DOJ pursuant to its coordination authority under section 504, we are proposing to revise our section 504 regulation to include language addressing direct threat consistent with the language included in the ADA title II regulation. See proposed §§ 1251.110 (Federally Assisted Programs) and 1251.580 (Federally Conducted Programs).

Procedures for Compliance

Federal agencies that have the responsibility to ensure that their recipients comply with civil rights regulations that prohibit discrimination in programs, services, and activities that receive Federal financial assistance have provisions in their regulations that provide the authority for agencies to ensure compliance and conduct enforcement activities. NASA's section 504 regulation at § 1251.400 incorporates by reference several provisions of the Title VI of the Civil Rights Act of 1964 regulation that authorize NASA to conduct compliance activities to ensure that recipients do not discriminate on the basis of disability in their programs, services, and activities. These provisions of the title VI regulation require NASA to conduct periodic compliance reviews of recipient programs; receive, investigate and resolve complaints of

[3] See, *e.g.,* 14 CFR 1251.503 (NASA's section 504 Federally conducted regulation.)

[4] With respect to any agency program or activity under which a person is required to perform services or to achieve a level of accomplishment, the regulatory definition of a ''qualified handicapped person'' (revised to ''qualified individual with a disability'' in this part) is an individual who meets the essential eligibility requirements of the program and who can achieve the purpose of the program or activity without modifications in the program or activity that the agency can demonstrate would result in a fundamental alteration in its nature.

[5] While Arline speaks to ''direct threat'' in terms of allegations that an individual with a ''contagious disease'' may pose a danger to the health and safety of others, the individualized inquiry and the specific analysis required by Arline and this regulation applies to all allegations that a person with a disability poses a ''direct threat'' to the health or safety to others.

discrimination on the basis of disability alleged by recipient beneficiaries;[6] conduct hearings to determine whether Federal financial assistance is to be suspended, revoked, or withheld due to a recipient's failure to comply with any provisions of section 504;[7] and judicial review of NASA actions to enforce Section 504.[8] However, the section 504 regulation does not incorporate by reference three additional title VI regulatory provisions that are included in other Federal agency section 504 regulations that pertain to procedures for compliance and are critical to effective enforcement of section 504. In contrast, NASA's civil rights regulations that prohibit discrimination on the basis of sex (Title IX of the Education Amendments of 1972)[9] and age (Age Discrimination Act of 1975),[10] as well as title VI, do have these provisions.

NASA proposes to amend its section 504 regulation at § 1251.400 to incorporate by reference those title VI regulatory provisions omitted from this section 504 Federally assisted regulation that are necessary for NASA to ensure that recipients and subrecipients are complying with this part. Accordingly, NASA will incorporate by reference into § 1251.400, NASA's title VI regulation at § 1250.105 (Compliance Information), which requires NASA to seek the cooperation of recipients in obtaining compliance with this part; requires recipients and subrecipients to keep records and provide reports to NASA upon request to determine compliance with this part; requires recipients to permit NASA to have access to records and sources of information to determine compliance with this part; and requires recipients to make available information regarding provisions of this part in a manner deemed appropriate by NASA to apprise interested persons of the rights and protections afforded to them by this part. NASA will also incorporate by reference into § 1251.400, NASA's title VI regulation at § 1250.107 (Procedures for Effecting Compliance), which delineates the process by which NASA will effectuate compliance with this part through the termination, suspension, or refusal to grant or continue Federal financial assistance if a recipient's noncompliance with this part cannot be remedied through informal means. Lastly, NASA will incorporate by reference into § 1251.400, NASA's title VI regulation at § 1250.109 (decisions and notices) which delineates the process for rendering decisions and findings of the hearings conducted in accordance with § 1250.107.

NASA's Revisions to its Section 504 Regulation for Federally Conducted Programs

In addition to its proposed revisions to its section 504 Federally assisted regulation at § 1215.1, NASA is also proposing to revise its section 504 regulation that prohibits discrimination on the basis of disability in programs, services, and activities conducted by NASA at § 1251.5. In 1978, Congress extended application of section 504 to programs and activities conducted by Federal Executive agencies and the United States Postal Service. Pursuant to Executive Order 12250, the Department of Justice developed a prototype regulation to implement the 1978 amendment for Federally conducted programs and activities. More than 80 Federal agencies, including NASA, have now issued final regulations based on that prototype, prohibiting discrimination based on handicap in the programs and activities they conduct. Despite the large number of regulations implementing section 504 for Federally assisted and Federally conducted programs and activities, there is very little variation in their substantive requirements, or even in their language. The regulatory revisions in this rulemaking do not propose different requirements for NASA's Federally conducted programs, with the exception of the applicable accessibility standards for new and altered facilities.[11]

Specifically, NASA proposes to revise the definition of ''disability'' and ''individual with a disability'' at § 1251.503 by incorporating by reference the companion definitions in the revised Federally assisted programs regulation at § 1251.102(h) and (k). NASA also proposes to revise the definition of ''direct threat'' and revise the regulatory standards for direct threat, employment, and reasonable accommodation in the Federally conducted programs regulation to conform with the companion regulatory standards for direct threat found at § 1251.110, employment found at § 1251.2, and reasonable accommodation found at § 1251.111. Lastly, NASA proposes to revise its Federally conducted programs regulation at § 1251.551 to update the regulatory reference to the GSA standards applicable to Federal buildings subject to the Architectural Barriers Act for new construction and alterations, which is no longer at GSA Federal Management Regulation 41 CFR 101–19.600 to 101–19.607, but is now found at 41 CFR part 102–76, subpart C.

Statutory Authority

The National Aeronautics and Space Act (the Space Act), 51 U.S.C. 20113 (a), authorizes the Administrator of the National Aeronautics and Space Administration (NASA) to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of its operations and the exercise of the powers vested in it by law.

Regulatory Analysis

Executive Order 12866 and Executive Order 13563

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This proposed rule has been designated a ''significant regulatory action,'' although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, this rule has been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

It has been certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act Statement

This rule does not contain an information collection requirement subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and Tribal governments, in the aggregate, or by the

[6] 14 CFR 1250.106.

[7] 14 CFR 1250.108.

[8] 14 CFR 1250.110.

[9] 14 CFR 1253.605.

[10] 14 CFR subpart 1252.2.

[11] Facilities designed, built, or altered with Federal dollars or leased by Federal agencies are subject to the Architectural Barriers Act (ABA). The General Services Administration (GSA) is responsible for prescribing the accessibility standards for all of these facilities (other than residential structures and Department of Defense and U.S. Postal Service facilities). Thus, this rule will reference the updated ABA Accessibility Standards adopted by GSA in 2007. See 41 CFR part 102–76 Subpart C.

private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996 (as amended), 5 U.S.C. 804. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects in 14 CFR Part 1251

Administrative practice and procedure, civil rights, equal employment opportunity, Federal buildings and facilities, and individuals with disabilities.

For the reasons stated in the preamble, the National Aeronautics and Space Administration proposes to amend 14 CFR part 1251 as follows:

PART 1251—NONDISCRIMINATION ON BASIS OF DISABILITY

■ 1. The authority citation for part 1251 is revised to read as follows:

Authority: Sec. 504 (29 U.S.C. 794)

■ 2. Revise the heading of part 1251 to read as set forth above.

■ 3. Remove the following words wherever they appear in part 1251 and add in their place as indicated in the table below.

Remove	Add in its place
handicap	disability.
handicaps	disabilities.
handicapped person	individual with a disability.
handicapped persons	individuals with a disability.
handicapped individual	individual with a disability.
handicapped individuals	individuals with a disability.
individuals with handicaps	individuals with a disability.
qualified handicapped individual	qualified individual with a disability.
qualified handicapped individuals	qualified individuals with a disability.
qualified individuals with handicaps	qualified individuals with a disability.
qualified handicapped applicants or employees	qualified applicants or employees with a disability.
nonhandicapped persons	persons who do not have a disability.

Subpart 1251.1—General Provision

■ 4. Revise § 1251.100 to read as follows:

§ 1251.100 Purpose and broad coverage.

(a) *General.* This part effectuates Section 504 of the Rehabilitation Act of 1973, which is designed to eliminate discrimination on the basis of handicap in any program or activity receiving Federal financial assistance.

(b) *Broad coverage.* Consistent with the Americans with Disabilities Amendments Act of 2008 (ADAA) and its purpose of reinstating a broad scope of protection under the Americans with Disabilities Act and this part, the definition of disability in this chapter shall be construed in favor of broad coverage of individuals under this part, to the maximum extent permitted by the terms of this part.

■ 5. Amend § 1251.102 as follows:

■ a. In paragraph (c), remove the word ''Assistant'' and add in its place the word ''Associate'' wherever it occurs and add the words ''Diversity and'' after the word ''for'';

■ b. In paragraph (d), remove the word ''entry'' and add in its place the word ''entity'';

■ c. Revise paragraphs (h)(1)(iii) and (h)(2)(i) through (iv);

■ d. Add paragraphs (h)(2)(v) and (vi);

■ e. Revise paragraphs (i) and (j); and

■ f. Add paragraphs (l) through (m).

The revisions and additions read as follows:

§ 1251.102 Definitions.

* * * * *

(h) * * *

(1) * * *

(iii) Being regarded as having such an impairment as described in paragraph (h)(1)(v)(A) of this section. This means that the individual has been subjected to an action prohibited by this part because of an actual or perceived impairment that is not both ''transitory and minor.''

(A) *Rules of construction* (*1*) An individual may establish coverage under any one or more of the three prongs of the definition of disability in this paragraph (h)(1), the ''actual disability'' prong in paragraph (h)(1)(i) of this section, the ''record of'' prong in paragraph (h)(1)(ii) of this section, or the ''regarded as'' prong in paragraph (h)(1)(iii) of this section.

(*2*) Where an individual is not challenging a recipient's failure to provide reasonable accommodations under § 1251.111, it is generally unnecessary to proceed under the ''actual disability'' or ''record of'' prongs, which require a showing of an impairment that substantially limits a major life activity or a record of such an impairment. In these cases, the evaluation of coverage can be made solely under the ''regarded as'' prong of the definition of disability, which does not require a showing of an impairment that substantially limits a major life activity or a record of such an impairment. An individual may choose, however, to proceed under the ''actual disability'' or ''record of'' prong regardless of whether the individual is challenging a public entity's failure to provide reasonable accommodations.

(B) [Reserved]

(2) * * *

(i) *Physical or mental impairment* means:

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, immune, circulatory, hemic and lymphatic, skin, and endocrine; or

(B) Any mental or psychological disorder such as an intellectual disability, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The phrase ''physical or mental impairment''

includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, intellectual disability, emotional illness, specific learning disabilities (including but not limited to dyslexia), HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism.

(C) The phrase ''physical or mental impairment'' does not include homosexuality or bisexuality.

(ii) *Major life activities* include, but are not limited to:

(A) Caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, sitting, reaching, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, interacting with others, and working; and

(B) The operation of a major bodily function, including functions of the immune system, special sense organs and skin; normal cell growth; and digestive, genitourinary, bowel, bladder, neurological, brain, respiratory, circulatory, cardiovascular, endocrine, hemic, lymphatic, musculoskeletal, and reproductive functions. The operation of a major bodily function includes the operation of an individual organ within a body system.

(C) In determining other examples of major life activities, the term ''major'' shall not be interpreted strictly to create a demanding standard for disability. Whether an activity is a ''major life activity'' is not determined by reference to whether it is of ''central importance to daily life.''

(iii) *Substantially limits*—(A) *Rules of construction.* The following rules of construction apply when determining whether an impairment substantially limits an individual in a major life activity.

(*1*) The term ''substantially limits'' shall be construed broadly in favor of expansive coverage, to the maximum extent permitted by the terms of the ADA Amendments Act of 2008. ''Substantially limits'' is not meant to be a demanding standard.

(*2*) An impairment is a disability within the meaning of this part if it substantially limits the ability of an individual to perform a major life activity as compared to most people in the general population. An impairment need not prevent, or significantly or severely restrict, the individual from performing a major life activity in order to be considered substantially limiting.

(*3*) The primary object of attention in cases brought under section 504 should be whether recipients have complied with their obligations and whether discrimination has occurred, not the extent to which an individual's impairment substantially limits a major life activity. Accordingly, the threshold issue of whether an impairment substantially limits a major life activity should not demand extensive analysis.

(*4*) The determination of whether an impairment substantially limits a major life activity requires an individualized assessment. However, in making this assessment, the term ''substantially limits'' shall be interpreted and applied to require a degree of functional limitation that is lower than the standard for substantially limits applied prior to the ADA Amendments Act.

(*5*) The comparison of an individual's performance of a major life activity to the performance of the same major life activity by most people in the general population usually will not require scientific, medical, or statistical evidence. Nothing in this paragraph is intended, however, to prohibit or limit the use of scientific, medical, or statistical evidence in making such a comparison where appropriate.

(*6*) The determination of whether an impairment substantially limits a major life activity shall be made without regard to the ameliorative effects of mitigating measures. However, the ameliorative effects of ordinary eyeglasses or contact lenses shall be considered in determining whether an impairment substantially limits a major life activity. Ordinary eyeglasses or contact lenses are lenses that are intended to fully correct visual acuity or to eliminate refractive errors.

(*7*) An impairment that is episodic or in remission is a disability if it would substantially limit a major life activity when active.

(*8)* An impairment that substantially limits one major life activity need not substantially limit other major life activities in order to be considered a substantially limiting impairment.

(*9*) The six-month ''transitory'' part of the ''transitory and minor'' exception in paragraph (h)(3) of this section does not apply to the ''actual disability'' or ''record of'' prongs of the definition of disability. The effects of an impairment lasting or expected to last fewer than six months can be substantially limiting within the meaning of this section for establishing an actual disability or a record of a disability.

(B) *Predictable assessments.* (*1*) The principles set forth in § 1251.102(h)(2)(iii) are intended to provide for more generous coverage and application of section 504's prohibition on discrimination through a framework that is predictable, consistent, and workable for all individuals and entities with rights and responsibilities under section 504.

(*2*) Applying the principles set forth in § 1251.102(h)(2)(iii) the individualized assessment of some types of impairments will, in virtually all cases, result in a determination of coverage under § 1251.102(h)(1)(i) (the ''actual disability'' prong) or § 1251.102(h)(1)(ii) (the ''record of'' prong). Given their inherent nature, these types of impairments will, as a factual matter, virtually always be found to impose a substantial limitation of a major life activity. Therefore, with respect to these types of impairments, the necessary individualized assessment should be particularly simple and straightforward.

(*3*) For example, applying the principles set forth in § 1251.102(h)(2)(iii) it should easily be concluded that the following types of impairments will, at a minimum, substantially limit the major life activities indicated:

(*i*) Deafness substantially limits hearing and auditory function;

(*ii*) Blindness substantially limits visual function;

(*iii*) An intellectual disability substantially limits reading, learning, and problem solving;

(i*v*) Partially or completely missing limbs or mobility impairments requiring the use of a wheelchair substantially limit musculoskeletal function;

(*v*) Autism substantially limits learning, social interaction, and communication;

(*vi*) Cancer substantially limits normal cell growth;

(*vii*) Cerebral palsy substantially limits brain function;

(*viii*) Diabetes substantially limits endocrine function;

(*ix*) Epilepsy, muscular dystrophy, and multiple sclerosis substantially limit neurological function;

(*x*) Human Immunodeficiency Virus (HIV) infection substantially limits immune function; and

(*xi*) Major depressive disorder, bipolar disorder, post-traumatic stress disorder, traumatic brain injury, obsessive compulsive disorder, and schizophrenia substantially limit brain function. The types of impairments described in this paragraph may substantially limit additional major life activities not explicitly listed above.

(C) *Condition, manner or duration.* (*1*) At all times taking into account the principles in § 1251.102(h)(2)(iii), in determining whether an individual is

substantially limited in a major life activity, it may be useful in appropriate cases to consider, as compared to most people in the general population, the conditions under which the individual performs the major life activity; the manner in which the individual performs the major life activity; or the duration of time it takes the individual to perform the major life activity, or for which the individual can perform the major life activity.

(*2*) Consideration of facts such as condition, manner, or duration may include, among other things, consideration of the difficulty, effort or time required to perform a major life activity; pain experienced when performing a major life activity; the length of time a major life activity can be performed; or the way an impairment affects the operation of a major bodily function. In addition, the non-ameliorative effects of mitigating measures, such as negative side effects of medication or burdens associated with following a particular treatment regimen, may be considered when determining whether an individual's impairment substantially impairs a major life activity.

(*3*) In determining whether an individual has a disability under the ''actual disability'' or ''record of'' prongs of the definition of disability, the focus is on how a major life activity is substantially limited, not on what outcomes an individual can achieve. For example, someone with a learning disability may achieve a high level of academic success, but may nevertheless be substantially limited in one or more major life activities, including, but not limited to, reading, writing, speaking, or learning because of the additional time or effort he or she must spend to read, write, speak, or learn compared to most people in the general population.

(D) Mitigating measures include, but are not limited to:

(*1*) Medication, medical supplies, equipment, appliances, low-vision devices (defined as devices that magnify, enhance, or otherwise augment a visual image, but not including ordinary eyeglasses or contact lenses), prosthetics including limbs and devices, hearing aid(s) and cochlear implant(s) or other implantable hearing devices, mobility devices, and oxygen therapy equipment and supplies.

(*2*) Use of assistive technology;

(*3*) Reasonable accommodations or auxiliary aids or services as defined in this section;

(*4*) Learned behavioral or adaptive neurological modifications; or

(*5*) Psychotherapy, behavioral therapy, or physical therapy.

(iv) *Has a record of such an impairment* means:

(A) *Broad construction.* Whether an individual has a record of an impairment that substantially limited a major life activity shall be construed broadly to the maximum extent permitted by section 504 and should not demand extensive analysis. An individual will be considered to fall within this prong of the definition of disability if the individual has a history of an impairment that substantially limited one or more major life activities when compared to most people in the general population, or was misclassified as having had such an impairment. In determining whether an impairment substantially limited a major life activity, the principles articulated in § 1251.102(h)(2)(iii) apply.

(B) Reasonable accommodation. An individual with a record of a substantially limiting impairment may be entitled to a reasonable accommodation if needed and related to the past disability.

(v) *Regarded as having such an impairment* means:

(A) An individual is ''regarded as having such an impairment'' if the individual is subjected to an action prohibited by the ADA because of an actual or perceived physical or mental impairment, whether or not that impairment substantially limits, or is perceived to substantially limit, a major life activity, except for an impairment that is both transitory and minor. A transitory impairment is an impairment with an actual or expected duration of six months or less.

(B) An individual is ''regarded as having such an impairment'' any time a covered entity takes a prohibited action against the individual because of an actual or perceived impairment, even if the entity asserts, or may or does ultimately establish, a defense to such action.

(C) Establishing that an individual is ''regarded as having such an impairment'' does not, by itself, establish liability. Liability is established under section 504 only when an individual proves that a covered entity discriminated on the basis of disability within the meaning of section 504.

(vi) *Exclusions.* The term ''disability'' does not include:

(A) Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(B) Compulsive gambling, kleptomania, or pyromania; or

(C) Psychoactive substance use disorders resulting from current illegal use of drugs.

* * * * *

(i) *Qualified individual with a disability* means:

(1) With respect to any aid, benefit, or service, provided under a program or activity subject to this part, an individual with a disability who, with or without reasonable accommodations in rules policies, or procedures, the removal of architectural, communication, or transportation barriers, or the provision auxiliary aids or services, meets the essential eligibility requirements for participation in, or receipt from, that aid, benefit, or service, and

(2) With respect to employment, the definition given that term in the Equal Employment Opportunity Commission's regulation at 29 CFR part 1630, implementing Title I of the Americans with Disabilities Act of 1990, which regulation is made applicable to this part by § 1251.2.

(j) *Disability* means a physical or mental impairment which substantially limits one or more major life activities as defined in paragraph (h) of this section.

* * * * *

(l) *Direct threat* means a significant risk to the health or safety of others that cannot be eliminated by a change to policies, practices or procedures, or by the provision of auxiliary aids or services as provided in § 1251.110 of this part.

(m) *Auxiliary aids and services* means services or devices that enable persons with sensory, manual, or speech disabilities to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the recipient. Auxiliary aids and services include:

(1) Qualified interpreters onsite or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including realtime captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to

individuals who are deaf or hard of hearing;

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

§ 1251.104 [Amended]

■ 6. In § 1251.104, in paragraphs (a) and (c)(3), remove the word ''Assistant'' and add in its place the word ''Associate''.

§ 1251.105 [Amended]

■ 7. In paragraphs (a)(1) through (3) and (c)(2) introductory text, remove the word ''Assistant'' wherever it appears and add in its place the word ''Associate''.

■ 8. Amend § 1251.107 by revising paragraph (a) to read as follows:

§ 1251.107 Notice.

(a) A recipient that employs 15 or more persons shall take appropriate initial and continuing steps to notify participants, beneficiaries, applicants, and employees, including those with vision or hearing disabilities, and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of disability in violation of section 504 and this part. The notification shall state, where appropriate, that the recipient does not discriminate in admission or access to, or treatment or employment in, its programs or activities. The notification shall also include an identification of the responsible employee designated pursuant to § 1251.106(a). A recipient shall make the initial notification required by this paragraph within 90 days of the effective date of this part. Methods of initial and continuing notification may include the posting of notices, transmission via electronic mail or text message, publication on the recipient's internet Web site, or in newspapers and magazines, placement of notices in recipient's publication, and distribution of memoranda or other written communications.

* * * * *

§ 1251.108 [Amended]

■ 9. Amend § 1251.108 by removing the word ''Assistant'' wherever it appears and adding in its place the word ''Associate''.

■ 10. Add § 1251.110 to subpart 1251.1 to read as follows:

§ 1251.110 Direct threat.

(a) This part does not require a recipient to permit an individual to participate in or benefit from the services, programs, or activities of that recipient when that individual poses a direct threat to the health or safety of others.

(b) In determining whether an individual poses a direct threat to the health or safety of others, a recipient must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable accommodations in policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.

■ 11. Add § 1251.111 to subpart 1251.1 to read as follows:

§ 1251.111 Reasonable accommodation.

A recipient shall make reasonable accommodations in policies, practices, or procedures when such accommodations are necessary to avoid discrimination on the basis of disability, unless the recipient can demonstrate that making the accommodations would fundamentally alter the nature of the service, program, or activity or result in an undue financial and administrative burden. For the purposes of this section, the term reasonable accommodation shall be interpreted in a manner consistent with the term ''reasonable modifications'' as set forth in the Americans with Disabilities Act Title II regulation at 28 CFR 35.130(b)(7), and not as it is defined or interpreted for the purposes of employment discrimination under Title I of the ADA (42 U.S.C. 12111–12112) and its implementing regulation at 29 CFR Part 1630.

■ 12. Add § 1251.112 to subpart 1251.1 to read as follows:

§ 1231.112 Communications.

(a) A recipient shall take appropriate steps to ensure effective communication with applicants, participants, and members of the public.

(1) The recipient shall furnish appropriate auxiliary aids or services where necessary to afford an individual with a disability, including applicants, participants and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a program or activity of the recipient.

(i) In determining what type of auxiliary aid or service is necessary, the recipient shall give primary consideration to the requests of the individual with a disability.

(ii) The recipient need not provide individually prescribed devices, readers for personal use or study, or other devices of a personal nature.

(2) Where the recipient communicates with applicants and beneficiaries by telephone, telecommunication devices for deaf persons (TTY's) or equally effective telecommunication systems shall be used to communicate with persons with hearing disabilities.

(b) The recipient shall ensure that interested persons, including persons with vision or hearing disabilities, can obtain information as to the existence and location of accessible services, activities, and facilities.

(c) This section does not require the recipient to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where the recipient believes that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the recipient has the burden of proving that compliance with § 1251.112 would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the recipient agency head or his or her designee after considering all of the recipient's resources available for use in the funding and operation of the conducted program or activity and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with this section would result in such an alteration or such burdens, the recipient shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the benefits and services of the program or activity.

■ 13. Revise § 1251.200 to read as follows:

§ 1251.200 Discrimination prohibited.

(a) *General.* No qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any program or activity to which this part applies.

(b) *Employment discrimination standards.* The standards used to determine whether paragraph (a) of this section has been violated shall be the

standards applied under Title I of the Americans with Disabilities Act of 1990 (42 U.S.C. 12111 *et seq.*) and, as such sections relate to employment, the provisions of sections 501 through 504 and 510 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12201–12204 and 12210), as amended by the ADA Amendments Act of 2008 (Pub. L. 110–325), as such standards are implemented in the Equal Employment Opportunity Commission's regulation at 29 CFR part 1630, as amended. The procedures to be used to determine whether paragraph (a) of this section has been violated shall be the procedures set forth in § 1251.400 of this part.

§ 1251.202 [Amended]

■ 14. Amend § 1251.202 by removing the word ''Assistant'' in paragraph (a)(2) and adding in its place the word ''Associate''.

■ 15. Amend § 1251.302 as follows:

■ a. Revise paragraphs (a) and (c)(1); and

■ b. Redesignate paragraphs (c)(2) and (3) as paragraphs (c)(5) and (6) and add new paragraphs (c)(2) through (4).

■ The revisions and additions read as follows:

§ 1251.302 New construction and alterations.

(a) *Design and construction.* Each facility or part of a facility constructed by, on behalf of, or for the use of a recipient shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities.

* * * * *

(c) *Accessibility standards and compliance dates*—(1) *New Construction and alterations by recipients that are private entities.* (i) New construction and alterations in which the last application for a building permit or permit extension for such construction or alterations is certified to be complete by a state, county, or local government (or, in those jurisdictions where the government does not certify completion of applications, if the date when the last application for a building permit or permit extension is received by the state, county, or local government) is prior to [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], or if no permit is required, if the start of physical construction or alterations occurs prior to [DATE ONE YEAR FROM THE PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], then such new construction and alterations must comply with either the Uniform Federal Accessibility Standards (UFAS) or the ADA Standards for Accessible Design, (2010 Standards) as defined in 28 CFR 35.104. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(ii) New construction and alterations in which the last application for a building permit or permit extension for such construction or alterations is certified to be complete by a state, county, or local government (or, in those jurisdictions where the government does not certify completion of applications, if the date when the last application for a building permit or permit extension is received by the state, county, or local government) is on or after [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], or if no permit is required, if the start of physical construction or alterations occurs on or after [DATE ONE YEAR FROM THE PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], then such new construction and alterations shall comply with the 2010 Standards.

(2) *New construction and alterations by recipients that are public entities.* (i) If physical construction or alterations commence prior to [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], then such new construction and alterations must comply with either UFAS or the 2010 Standards as defined in 28 CFR 35.104. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(ii) If physical construction or alterations commence on or after [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**], then such new construction and alterations shall comply with the 2010 Standards.

(3) For the purposes of this section, ceremonial groundbreaking or razing of structures prior to site preparation will not be considered to commence or start physical construction or alterations.

(4) All newly constructed or altered buildings or facilities subject to this section shall comply with the requirements for a ''public building or facility'' as defined in section 106.5 of the 2010 Standards.

TABLE OF APPLICABLE STANDARDS FOR COMPLYING WITH 14 CFR 1251.302(c)

Compliance dates for new construction and alterations	Applicable standards for complying with 14 CFR 1251.302(c)
Prior to [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**].	UFAS or the requirements for a ''public building or facility'' as defined in section 106.5 of the 2010 Standards
On or after [DATE ONE YEAR AFTER PUBLICATION OF THE FINAL RULE IN THE **Federal Register**].	All buildings or facilities shall comply with the requirements for a ''public building or facility'' as defined in section 106.5 of the 2010 Standards.

* * * * *

■ 16. Section 1251.400 is revised to read as follows:

§ 1251.400 Procedures for compliance.

(a) The investigative, compliance, and enforcement procedural provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) are hereby adopted and apply to these section 504 regulations. These procedures are found at §§ 1250.105 through 1250.110 of this chapter.

(b) The agency shall ensure that complaints alleging violations of section 504 with respect to employment are processed according to the procedures established by the EEOC in 29 CFR part 1640 and the United States DOJ at 28 CFR part 37.

Subpart 1251.5—Enforcement of Nondiscrimination on the Basis of Disability in Programs or Activities Conducted by the National Aeronautics and Space Administration

■ 17. Section 1251.503 is revised to read as follows:

§ 1251.503 Definitions.

As used in this part, the term:

Assistant Attorney General means the Assistant Attorney General, Civil Rights

Division, United States Department of Justice.

Auxiliary aids and services means services or devices that enable persons with sensory, manual, or speech disabilities to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency. Auxiliary aids and services include:

(1) Qualified interpreters onsite or through VRI services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including realtime captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing;

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

Complete complaint means a written statement that contains the complainant's name and address and describes the agency's alleged discriminatory action in sufficient detail to inform the agency of the nature and date of the alleged violation of section 504. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name, if possible) the alleged victims of discrimination.

Direct threat means a significant risk to the health or safety of others that cannot be eliminated by a change to policies, practices or procedures, or by the provision of auxiliary aids or services as provided in § 1251.110 of this part.

Facility means all or any portion of buildings, structures, equipment, roads, walks, parking lots, rolling stock or other conveyances, or other real or personal property.

Historic preservation programs means programs conducted by the agency that have preservation of historic properties as a primary purpose.

Historic properties means those properties that are listed or eligible for listing in the National Register of Historic Places or properties designated as historic under a statute of the appropriate state or local government body.

Individual with a disability means any person who meets the definition of ''individual with a disability'' under § 1251.102(h) of this part.

Qualified individual with a disability means any person who meets the definition of ''qualified individual with a disability'' under § 1251.102(k) of this part.

Section 504 means section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–112, 87 Stat. 394 (29 U.S.C. 794)), as amended by the Rehabilitation Act Amendments of 1974 (Pub. L. 93–516, 88 Stat. 1617); the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95–602, 92 Stat. 2955); and the Rehabilitation Act Amendments of 1986 (Pub. L. 99–506, 100 Stat. 1810).

Substantial impairment means a significant loss of the integrity of finished materials, design quality, or special character resulting from a permanent alteration.

■ 18. Revise § 1251.540 to read as follows:

§ 1251.540 Employment.

(a) *General.* No qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any program or activity to which this part applies.

(b) *Employment discrimination standards.* The standards used to determine whether paragraph (a) of this section has been violated shall be the standards applied under Title I of the Americans with Disabilities Act of 1990 (42 U.S.C. 12,111 *et seq.*) and, as such sections relate to employment, the provisions of sections 501 through 504 and 510 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12201–12204 and 12210), as amended by the ADA Amendments Act of 2008 (Pub. L. 110–325), as such standards are implemented in the Equal Employment Opportunity Commission's regulation at 29 CFR part 1630, as amended.

■ 19. Revise § 1251.551 to read as follows:

§ 1251.551 Program accessibility: New construction and alterations.

Each building or part of a building that is constructed or altered by, on behalf of, or for the use of the agency shall be designed, constructed, or altered so as to be readily accessible to and usable by individuals with handicaps. The definitions, requirements, and standards of the Architectural Barriers Act (42 U.S.C. 4151–4157), as established in 41 CFR part 102–76, subpart C, apply to buildings covered by this section.

■ 20. In § 1251.570, revise paragraphs (b) and (c) to read as follows:

§ 1251.570 Compliance procedures.

* * * * *

(b) The agency shall process complaints alleging violations of section 504 with respect to employment according to the procedures established by the Equal Employment Opportunity Commission in 29 CFR part 1614.

(c) The Associate Administrator for Diversity and Equal Opportunity shall be responsible for coordinating implementation of this section. Complaints may be sent to the Office of Diversity and Equal Opportunity, NASA Headquarters, 300 E Street SW., Washington, DC 20546.

* * * * *

■ 21. Add § 1251.580 to subpart 1251.5 to read as follows:

§ 1251.580 Direct threat.

(a) This part does not require the Agency to permit an individual to participate in or benefit from the services, programs, or activities of that recipient when that individual poses a direct threat to the health or safety of others.

(b) In determining whether an individual poses a direct threat to the health or safety of others, a recipient must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable accommodations in policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.

■ 22. Add § 1251.581 to subpart 1251.5 to read as follows:

§ 1251.581 Reasonable accommodation.

The agency shall make reasonable accommodations in policies, practices, or procedures when such accommodations are necessary to avoid discrimination on the basis of disability,

unless the recipient can demonstrate that making the accommodations would fundamentally alter the nature of the service, program, or activity or result in an undue financial and administrative burden. For the purposes of this section, the term ''reasonable accommodation'' shall be interpreted in a manner consistent with the term ''reasonable modifications'' as set forth in the Americans with Disabilities Act Title II regulation at 28 CFR 35.130(b)(7), and not as it is defined or interpreted for the purposes of employment discrimination under Title I of the ADA (42 U.S.C. 12111–12112) and its implementing regulations at 29 CFR part 1630.

Cheryl E. Parker,

NASA Federal Register Liaison Officer.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 801

[REG–138605–13]

RIN 1545–BL88

Balanced System for Measuring Organizational and Employee Performance Within the Internal Revenue Service

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulation.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the IRS and the Treasury Department are issuing a temporary regulation modifying the regulations governing the IRS Balanced System for Measuring Organizational and Employee Performance. The section being modified, Employee satisfaction measures, collects information from employees to measure and report on employee satisfaction. The temporary regulation provides for the reporting of this information to a higher agency level, to be consistent with other government-wide employee satisfaction surveys. The text of the temporary regulation serves as the text of the proposed regulation.

DATES: Written or electronic comments and requests for a public hearing must be received by January 12, 2015.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–138605–13), Internal Revenue Service, Room 5203, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–138605–13), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224; or sent electronically via the Federal eRulemaking Portal at *http://www.regulations.gov* (IRS–REG–138605–13).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulation, Neil Worden, (202) 317–5775; concerning submissions of comments, Oluwafunmilayo (Funmi) Taylor, Publications and Regulations Branch, (202) 317–6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulation published in the Rules and Regulations section of this issue of the **Federal Register** amends 26 CFR part 801 to permit the reporting of information collected to measure employee satisfaction to a higher agency level than the regulation currently allows. The Explanation of Provisions section of the temporary regulation explains the purpose of the temporary regulation and this proposed regulation.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866, as supplemented by Executive Order 13563. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before this proposed regulation is adopted as a final regulation, consideration will be given to any written or electronic comments that are timely submitted to the IRS. The IRS and the Treasury Department request comments on all aspects of the proposed regulations. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested by any person who timely submits comments. If a public hearing is scheduled, notice of the date, time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Karen F. Keller, Office of Associate Chief Counsel (General Legal Services). However, other personnel from the IRS participated in their development.

Federal employees, Organization and functions (Government agencies).

Proposed Amendment to the Regulations

Accordingly, 26 CFR Part 801 is proposed to be amended as follows:

PART 801—BALANCED SYSTEM FOR MEASURING ORGANIZATIONAL AND EMPLOYEE PERFORMANCE WITHIN THE INTERNAL REVENUE SERVICE

■ **Paragraph** 1. The authority citation for part 801 continues to read in part as follows:

Authority: 5 U.S.C. 9501 * * *

■ **Par.** 2. Section 801.5 is amended to read as follows:

§ 801.5 [The text of the proposed amendment to § 801.5 is the same as the text of § 801.5T published elsewhere in this issue of the Federal Register].

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

[SATS No.: WV–122–FOR; Docket ID: OSMRE–2013–0011; S1D1SSS08011000 SX066A00067F144S180110; S2D2SSS08011000SX066A00033 F14XS501520]

West Virginia Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule; reopening of the comment period.

SUMMARY: We are reopening the public comment period on a proposed

amendment to the West Virginia permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). The proposed amendment consists of a Special Reclamation Tax Credit Rule that was submitted to OSMRE on August 7, 2014. The purpose of this document is to provide the public 15 additional days to comment on the proposed amendment.

DATES: The comment period for the proposed rule published on May 20, 2014, at 79 FR 28858–28860 is reopened. We will accept written comments on this amendment and the Special Reclamation Tax Credit Rule being announced today until 4:00 p.m. EDT, on November 28, 2014.

ADDRESSES: You may submit comments by any of the following two methods: Federal eRulemaking Portal: *http://www.regulations.gov*. The proposed rule has been assigned Docket ID OSM–2013–0011. If you would like to submit comments through the Federal eRulemaking Portal, go to *http://www.regulations.gov* and follow the instructions.

Mail/hand Delivery: Mr. Roger W. Calhoun, Director, Charleston Field Office, Office of Surface Mining Reclamation and Enforcement, 1027 Virginia Street, East, Charleston, West Virginia 25301.

Please include the rule identifier (WV–122–FOR) with your written comments.

Instructions: All submissions received must include the agency Docket ID (OSMRE–2013–0011) for this rulemaking. For detailed instructions on submitting comments and additional information on the rulemaking process, see ''IV. Public Comment Procedures'' in the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: The proposed rule and any comments that are submitted may be viewed over the internet at *http://www.regulations.gov*. Look for Docket ID OSMRE–2013–0011. In addition, you may review copies of the West Virginia program, this amendment, and all written comments received in response to this document at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. You may also receive one free copy of this amendment by contacting OSMRE's Charleston Field Office listed below.

Mr. Roger W. Calhoun, Director, Charleston Field Office, Office of Surface Mining Reclamation and Enforcement, 1027 Virginia Street, East, Charleston, West Virginia 25301, Telephone: (304) 347–7158, Email: *chfo@osmre.gov*.

In addition, you may review a copy of the amendment during regular business hours at the following locations:

Morgantown Area Office, Office of Surface Mining Reclamation and Enforcement, 604 Cheat Road, Suite 150, Morgantown, West Virginia 26508, Telephone: (304) 291–4004. (By Appointment Only)

Beckley Area Office, Office of Surface Mining Reclamation and Enforcement, 313 Harper Park Drive, Suite 3, Beckley, West Virginia 25801, Telephone: (304) 255–5265.

FOR FURTHER INFORMATION CONTACT: Mr. Roger W. Calhoun, Director, Charleston Field Office, Telephone: (304) 347–7158. Email: *chfo@osmre.gov*.

SUPPLEMENTARY INFORMATION:

I. Background on the West Virginia Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, ''. . . a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of the Act . . .; and rules and regulations consistent with regulations issued by the Secretary pursuant to the Act.'' See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the West Virginia program on January 21, 1981. You can find background information on the West Virginia program, including the Secretary's findings, the disposition of comments, and conditions of approval of the West Virginia program in the January 21, 1981, **Federal Register** (46 FR 5915). You can also find later actions concerning West Virginia's program and program amendments at 30 CFR 948.10, 948.12, 948.13, 948.15, and 948.16.

II. Description and Submission of the Proposed Amendment

On June 6, 2014, the West Virginia State Tax Department filed a Special Reclamation Tax Credit Rule with the Secretary of State to implement the special reclamation tax incentive revisions at West Virginia Code Section 22–3–11(g) and (h) for mine operators who reclaim bond forfeiture sites within the State. The statutory revisions, as set forth in Committee Substitute for House Bill 2352, were previously announced in the May 20, 2014, **Federal Register** (79 FR 28858–28860). On August 7, 2014, the West Virginia Department of Environmental Protection (WVDEP) submitted the proposed rule to OSMRE at a meeting of the Special Reclamation Fund Advisory Council (Administrative Record Number WV–1597). The purpose of this notice is to provide the public an additional 15 days to review and comment on the proposed amendment announced in the **Federal Register** on May 20, 2014, at 79 FR 28858–28860 and the Special Reclamation Tax Credit Rule being announced today.

III. Description of OSMRE's Proposed Action

1. CSR 110–29–1–6 Special Reclamation Tax Credit

This rule further clarifies and implements the proposed revisions to West Virginia Code 22–3–11(g and h) relating to special reclamation tax incentives for mine operators who reclaim bond forfeiture sites. The new Special Reclamation Tax Credit regulations are set forth at the Code of State Regulations (CSR) 110–29–1 through 6.

Non-substantive additions at CSR 110–29–2 include definitions of ''Act,'' ''Bond forfeited mine site,'' ''Secretary,'' and ''Tax Commissioner.''

CSR 110–29–1.5 clarifies that the special reclamation tax credit is only available to qualified operators for taxable years beginning on or after July 12, 2013.

Under the new tax credit rule at CSR 110–29–2.4, a qualified operator is any person that obtains a permit under the West Virginia Surface Coal Mining and Reclamation Act to mine coal and perform reclamation on a bond forfeited mine site and that qualifies for the special reclamation tax credit.

CSR 110–29–4 sets forth requirements governing the application for and the amount of the tax credit. Section 4 provides that a qualified operator may reclaim the bond forfeited mine site pursuant to either an Article 3 permit or a reclamation agreement. The amount of tax credit granted to the qualified operator is based on the amount of money that would have been spent from the Special Reclamation Fund and the Special Reclamation Water Trust Fund on the bond forfeited site as determined by the WVDEP Secretary.

CSR 110–29–5 specifies operator eligibility requirements for the tax credit and the limitation of the tax credit. A

qualified operator may use the tax credit to offset payment of or liability for the special reclamation tax for the tax year or carry it forward for use in future tax years until no credit is remaining.

CSR 110–29–6 contains general procedures to claim and administer the tax credit. The qualified operator must provide complete and accurate forms and other information to claim the tax credit. In addition, the qualified operator must maintain records to verify the validity of the tax credit and the amount of tax credit claimed. Finally, the Tax Commissioner has the authority to audit the qualified operator.

All of the proposed State tax credit requirements identified above are intended to conform to the Federal requirements of 30 CFR 800.50 and sections 509 and 519 of SMCRA.

IV. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking your comments on whether the amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the West Virginia program.

Written Comments

Send your written comments to OSMRE at one of the addresses given above. Your written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of your recommendations. We may not consider or respond to your comments when developing the final rule if they are received after the close of the comment period (see **DATES**) or sent to an address other than those listed above (see **ADDRESSES**).

Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

V. Procedural Determinations

Executive Order 12866—Regulatory Planning and Review

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866.

Other Laws and Executive Orders Affecting Rulemaking

When a State submits a program amendment to OSMRE for review, our regulations at 30 CFR 732.17(h) require us to publish a notice in the **Federal Register** indicating receipt of the proposed amendment, its text or a summary of its terms, and an opportunity for public comment. We conclude our review of the proposed amendment after the close of the public comment period and determine whether the amendment should be approved, approved in part, or not approved. At that time, we will also make the determinations and certifications required by the various laws and executive orders governing the rulemaking process and include them in the final rule.

List of Subjects in 30 CFR Part 948

Intergovernmental relations, Surface mining, Underground mining.

Dated: September 12, 2014.

Thomas D. Shope,

BILLING CODE 4310–05–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2014–0610; FRL–9919–08–Region 4]

Approval and Promulgation of Implementation Plans; Region 4 States; 2008 Lead, 2008 Ozone and 2010 Nitrogen Dioxide Prevention of Significant Deterioration Infrastructure Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve portions of submissions from Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee for inclusion into each State's implementation plan. This proposal pertains to the Clean Air Act (CAA or Act) infrastructure requirements for the 2008 Lead, 2008 Ozone and 2010 Nitrogen Dioxide (NO_2) National Ambient Air Quality Standards (NAAQS). The CAA requires that each state adopt and submit a state implementation plan (SIP) for the implementation, maintenance, and enforcement of each NAAQS promulgated by EPA. These plans are commonly referred to as ''infrastructure'' SIPs (hereafter referred to as ''infrastructure SIP submissions''). Specifically, EPA is proposing to approve the portions of the submissions from Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee that relate to the infrastructure SIP prevention of significant deterioration (PSD) requirements. All other applicable infrastructure requirements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS associated with these States are being addressed in separate rulemakings.

DATES: Written comments must be received on or before December 15, 2014.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2014–0610, by one of the following methods:

1. *www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. Email: *R4-RDS@epa.gov.*
3. Fax: (404) 562–9019.
4. Mail: ''EPA–R04–OAR–2014–0610,'' Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960.
5. Hand Delivery or Courier: Lynorae Benjamin, Chief, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R04–OAR–2014–0610. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *www.regulations.gov* or email, information that you consider to be CBI or otherwise protected. The *www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity

or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Sean Lakeman, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9043. Mr. Lakeman can be reached via electronic mail at *lakeman.sean@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

By statute, SIPs meeting the requirements of sections 110(a)(1) and (2) are to be submitted by states within three years after promulgation of a new or revised NAAQS to provide for the implementation, maintenance, and enforcement of the new or revised NAAQS. EPA has historically referred to these SIP submissions made for the purpose of satisfying the requirements of CAA sections 110(a)(1) and 110(a)(2) as ''infrastructure SIP'' submissions. Sections 110(a)(1) and (2) require states to address basic SIP elements such as for monitoring, basic program requirements and legal authority that are designed to assure attainment and maintenance of the newly established or revised NAAQS. More specifically, section 110(a)(1) provides the procedural and timing requirements for SIPs. Section 110(a)(2) lists specific elements that states must meet for the ''infrastructure'' SIP requirements related to a newly established or revised NAAQS. The contents of an infrastructure SIP submission may vary depending upon the data and analytical tools available to the state, as well as the provisions already contained in the state's implementation plan at the time in which the state develops and submits the submission for a new or revised NAAQS.

Through this action, EPA is proposing approval of the PSD requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) (hereafter ''PSD Elements'') for various infrastructure SIP submissions from the states of Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee. As described further below, for some of these states, EPA is proposing approval of the PSD Elements in the infrastructure SIP submissions for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS; whereas for other states, EPA is only proposing approval of the PSD Elements of the infrastructure SIP submissions for a subset of these NAAQS. All other applicable infrastructure requirements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS associated with these States are being addressed in separate rulemakings.

A brief background regarding the NAAQS relevant to today's proposal is provided below. For comprehensive information on these NAAQS, please refer to the **Federal Register** rulemakings cited below.

a. 2008 Lead NAAQS

On October 5, 1978, EPA promulgated a revised NAAQS for Lead under section 109 of the Act. *See* 43 FR 46246. The Lead standard was set at a level of 1.5 micrograms per cubic meter ($\mu g/m^3$), measured as Lead in total suspended particulate matter (Pb-TSP), not to be exceeded by the maximum arithmetic mean concentration averaged over a calendar quarter. This standard was based on the 1977 Air Quality Criteria for Lead. On November 12, 2008 (75 FR 81126), EPA issued a final rule to revise the Lead NAAQS. The Lead NAAQS was revised to 0.15 $\mu g/m^3$. States were required to submit infrastructure SIP submissions to EPA no later than October 15, 2011, for the 2008 Lead NAAQS.

For the 2008 Lead NAAQS, EPA is only addressing the PSD Elements of the infrastructure SIP submissions from Alabama (received November 4, 2011), Florida (received October 14, 2011), Georgia (received May 14, 2012), Kentucky (received July 17, 2012), Mississippi (received November 17, 2011), and South Carolina's (received September 20, 2011). EPA notes that the Agency approved the PSD Elements of Tennessee's 2008 Lead infrastructure SIP submission on August 12, 2013 (78 FR 48806).

b. 2008 Ozone NAAQS

On March 27, 2008, EPA promulgated a revised NAAQS for ozone based on 8-hour average concentrations. EPA revised the level of the 8-hour Ozone NAAQS to 0.075 parts per million. *See* 77 FR 16436. States were required to submit infrastructure SIP submissions for the 2008 8-hour Ozone NAAQS to EPA no later than March 2011.

For the 2008 Ozone NAAQS, EPA is only addressing the PSD Elements of the infrastructure SIP submissions from Alabama (received August 20, 2012), Georgia (received March 6, 2012), Mississippi (received May 29, 2012; and resubmitted July 26, 2012), and South Carolina (received on July 17, 2012). EPA notes that the Agency approved the PSD Elements of the Florida, Kentucky and Tennessee infrastructure SIP submissions for the 2008 Ozone NAAQS on May 19, 2014 (79 FR 28607),[1] March 7, 2013 (78 FR 14691), and March 6, 2013 (78 FR 14450), respectively.

c. 2010 NO_2 NAAQS

On February 9, 2010 (75 FR 6474), EPA established a new 1-hour primary NAAQS for NO_2 at a level of 100 parts per billion (ppb), based on a 3-year average of the 98th percentile of the yearly distribution of 1-hour daily maximum concentrations. States were required to submit infrastructure SIP

[1] On May 19, 2014, EPA took final action to approve Florida's December 19, 2013, SIP revision to adopt the Greenhouse Gas (GHG) Tailoring Rule into the Florida SIP. *See* 79 FR 28607. See Section V below for more detailed information.

submissions for the 2010 NO_2 NAAQS to EPA no later than January 2013.

For the 2010 NO_2 NAAQS, EPA is addressing the PSD Elements of the infrastructure SIP submissions from Alabama (received April 23, 2013), Florida (received January 22, 2013), Georgia (received March 25, 2013), Kentucky (received April 26, 2013), Mississippi (received February 28, 2013), South Carolina (received April 30, 2014), and Tennessee (received March 13, 2014).

II. What is EPA's approach to the review of infrastructure SIP submissions?

EPA is acting upon the PSD Elements portions of SIP submissions that address the infrastructure requirements of CAA sections 110(a)(1) and 110(a)(2) for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS for various states in Region 4. The requirement for states to make a SIP submission of this type arises out of CAA section 110(a)(1). Pursuant to section 110(a)(1), states must make SIP submissions ''within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),'' and these SIP submissions are to provide for the ''implementation, maintenance, and enforcement'' of such NAAQS. The statute directly imposes on states the duty to make these SIP submissions, and the requirement to make the submissions is not conditioned upon EPA's taking any action other than promulgating a new or revised NAAQS. Section 110(a)(2) includes a list of specific elements that ''[e]ach such plan'' submission must address.

EPA has historically referred to these SIP submissions made for the purpose of satisfying the requirements of CAA sections 110(a)(1) and 110(a)(2) as ''infrastructure SIP'' submissions. Although the term ''infrastructure SIP'' does not appear in the CAA, EPA uses the term to distinguish this particular type of SIP submission from submissions that are intended to satisfy other SIP requirements under the CAA, such as ''nonattainment SIP'' or ''attainment plan SIP'' submissions to address the nonattainment planning requirements of part D of title I of the CAA, ''regional haze SIP'' submissions required by EPA rule to address the visibility protection requirements of CAA section 169A, and nonattainment new source review permit program submissions to address the permit requirements of CAA, title I, part D. Section 110(a)(1) addresses the timing and general requirements for infrastructure SIP submissions, and section 110(a)(2) provides more details concerning the required contents of these submissions.

Historically, EPA has elected to use guidance documents to make recommendations to states for infrastructure SIPs, in some cases conveying needed interpretations on newly arising issues and in some cases conveying interpretations that have already been developed and applied to individual SIP submissions for particular elements.[2] EPA most recently issued guidance for infrastructure SIPs on September 13, 2013 (2013 Guidance).[3] EPA developed this document to provide states with up-to-date guidance for infrastructure SIPs for any new or revised NAAQS. Within this guidance, EPA describes the duty of states to make infrastructure SIP submissions to meet basic structural SIP requirements within three years of promulgation of a new or revised NAAQS. EPA also made recommendations about many specific subsections of section 110(a)(2) that are relevant in the context of infrastructure SIP submissions.[4] The guidance also discusses the substantively important issues that are germane to certain subsections of section 110(a)(2). Significantly, EPA interprets sections 110(a)(1) and 110(a)(2) such that infrastructure SIP submissions need to address certain issues and need not address others. Accordingly, EPA reviews each infrastructure SIP submission for compliance with the applicable statutory provisions of section 110(a)(2), as appropriate.

EPA's review of infrastructure SIP submissions with respect to the PSD program requirements in sections 110(a)(2)(C), (D)(i)(II), and (J) focuses upon the structural PSD program requirements contained in part C and EPA's PSD regulations. Structural PSD program requirements include provisions necessary for the PSD program to address all regulated sources and new source review (NSR) pollutants, including greenhouse gases (GHGs). By contrast, structural PSD program requirements do not include provisions that are not required under EPA's regulations at 40 CFR 51.166 but are merely available as an option for the state, such as the option to provide grandfathering of complete permit applications with respect to the 2012 $PM_{2.5}$ NAAQS. Accordingly, the latter optional provisions are types of provisions EPA considers irrelevant in the context of an infrastructure SIP action.

EPA's approach to review of infrastructure SIP submissions is to identify the CAA requirements that are logically applicable to that submission. EPA believes that this approach to the review of a particular infrastructure SIP submission is appropriate, because it would not be reasonable to read the general requirements of section 110(a)(1) and the list of elements in 110(a)(2) as requiring review of each and every provision of a state's existing SIP against all requirements in the CAA and EPA regulations merely for purposes of assuring that the state in question has the basic structural elements for a functioning SIP for a new or revised NAAQS. Because SIPs have grown by accretion over the decades as statutory and regulatory requirements under the CAA have evolved, they may include some outmoded provisions and historical artifacts. These provisions, while not fully up to date, nevertheless may not pose a significant problem for the purposes of ''implementation, maintenance, and enforcement'' of a new or revised NAAQS when EPA evaluates adequacy of the infrastructure SIP submission. EPA believes that a better approach is for states and EPA to focus attention on those elements of section 110(a)(2) of the CAA most likely to warrant a specific SIP revision due to the promulgation of a new or revised NAAQS or other factors.

EPA believes that its approach with respect to infrastructure SIP requirements is based on a reasonable reading of sections 110(a)(1) and 110(a)(2) because the CAA provides other avenues and mechanisms to address specific substantive deficiencies in existing SIPs. These other statutory

---

[2] EPA notes, however, that nothing in the CAA requires EPA to provide guidance or to promulgate regulations for infrastructure SIP submissions. The CAA directly applies to states and requires the submission of infrastructure SIP submissions, regardless of whether or not EPA provides guidance or regulations pertaining to such submissions. EPA elects to issue such guidance in order to assist states, as appropriate.

[3] ''Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and 110(a)(2),'' Memorandum from Stephen D. Page, September 13, 2013. EPA notes that this 2013 Infrastructure SIP Guidance document was not intended to apply to infrastructure SIP submissions for the 2008 Lead NAAQS.

[4] EPA's September 13, 2013, guidance did not make recommendations with respect to infrastructure SIP submissions to address section 110(a)(2)(D)(i)(I). EPA issued the guidance shortly after the U.S. Supreme Court agreed to review the D.C. Circuit decision in *EME Homer City,* 696 F.3d7 (D.C. Cir. 2012) which had interpreted the requirements of section 110(a)(2)(D)(i)(I). In light of the uncertainty created by ongoing litigation, EPA elected not to provide additional guidance on the requirements of section 110(a)(2)(D)(i)(I) at that time. As the guidance is neither binding nor required by statute, whether EPA elects to provide guidance on a particular section has no impact on a state's CAA obligations.

tools allow EPA to take appropriately tailored action, depending upon the nature and severity of the alleged SIP deficiency. Section 110(k)(5) authorizes EPA to issue a ''SIP call'' whenever the Agency determines that a state's implementation plan is substantially inadequate to attain or maintain the NAAQS, to mitigate interstate transport, or to otherwise comply with the CAA.[5] Section 110(k)(6) authorizes EPA to correct errors in past actions, such as past approvals of SIP submissions.[6] Significantly, EPA's determination that an action on a state's infrastructure SIP submission is not the appropriate time and place to address all potential existing SIP deficiencies does not preclude EPA's subsequent reliance on provisions in section 110(a)(2) as part of the basis for action to correct those deficiencies at a later time. For example, although it may not be appropriate to require a state to eliminate all existing inappropriate director's discretion provisions in the course of acting on an infrastructure SIP submission, EPA believes that section 110(a)(2)(A) may be among the statutory bases that EPA relies upon in the course of addressing such deficiency in a subsequent action.[7]

III. What are states required to address under Sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (Prong 3) and 110(a)(2)(J) related to PSD?

Section 110(a)(2)(C) has three components that must be addressed in infrastructure SIP submissions: Enforcement, state-wide regulation of new and modified minor sources and minor modifications of major sources; and PSD permitting of major sources and major modifications in areas designated attainment or unclassifiable for the subject NAAQS as required by CAA title I part C (*i.e.,* the major source PSD program).

Section 110(a)(2)(D)(i) has two components; 110(a)(2)(D)(i)(I) and 110(a)(2)(D)(i)(II). Each of these components have two subparts resulting in four distinct components, commonly referred to as ''prongs,'' that must be addressed in infrastructure SIP submissions. The first two prongs, which are codified in section 110(a)(2)(D)(i)(I), are provisions that prohibit any source or other type of emissions activity in one state from contributing significantly to nonattainment of the NAAQS in another state (''prong 1''), and interfering with maintenance of the NAAQS in another state (''prong 2''). The third and fourth prongs, which are codified in section 110(a)(2)(D)(i)(II), are provisions that prohibit emissions activity in one state interfering with measures required to prevent significant deterioration of air quality in another state (''prong 3''), or to protect visibility in another state (''prong 4'').

Section 110(a)(2)(J) has four components that must be addressed in infrastructure SIP submissions: (1) consultation with government officials, (2) public notification, (3) prevention of significant deterioration, and (4) visibility protection.

With respect to the PSD Elements of these sections, EPA interprets the CAA to require each state to make, for each new or revised NAAQS, an infrastructure SIP submission that demonstrates that the air agency has a complete PSD permitting program meeting the current requirements for all regulated NSR pollutants. The requirements of the PSD Elements may also be satisfied by demonstrating that the air agency has a complete PSD permitting program correctly addressing all regulated NSR pollutants.

IV. What are the PSD program requirements?

In addition to analyzing whether a state has adequate authority to regulate new and modified sources to assist in the protection of air quality, there are also four structural PSD program requirements that are relevant to EPA's review of the PSD Elements of the infrastructure SIP submissions for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS. The EPA regulations that require these SIP revisions are: (1) The Phase II Rule[8]; (2) the Greenhouse Gas (GHG) Tailoring Rule[9] as consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency;*[10] (3) the NSR Fine Particulate Matter ($PM_{2.5}$) Rule[11]; and, (4) the $PM_{2.5}$ PSD Increment-Significant Impact Levels (SILs)-Significant Monitoring Concentrations (SMC) Rule (only as it relates to $PM_{2.5}$ Increments).[12] Specific details on these PSD requirements can be found in the respective final rules cited above, however, a brief summary of each rule is provided below.

The Phase II rule established federal NSR permitting requirements for the implementation of the ozone NAAQS including recognizing nitrogen oxide as an ozone precursor. *See* 70 FR 71612.

The GHG Tailoring Rule established emission thresholds for determining which new stationary sources and modification projects become subject to PSD permitting requirements for their GHG emissions. *See* 75 FR 31514. EPA notes, that on June 23, 2014, the United States Supreme Court issued a decision addressing the application of PSD permitting requirements to GHG emissions. *See Utility Air Regulatory Group* v. *Environmental Protection Agency,* 134 S. Ct. 2427. In that decision, the Supreme Court held that the EPA may not treat GHGs as an air pollutant for purposes of determining whether a source is a major source required to obtain a PSD permit. The Court also determined that the EPA could continue to require that PSD permits, otherwise required based on emissions of pollutants other than GHGs, contain limitations on GHG emissions based on the application of Best Available Control Technology (BACT). In order to act consistently with its understanding of the Court's decision pending further judicial action to effectuate the decision, the EPA is not continuing to apply EPA regulations that would require that SIPs include

[5] For example, EPA issued a SIP call to Utah to address specific existing SIP deficiencies related to the treatment of excess emissions during SSM events. See ''Finding of Substantial Inadequacy of Implementation Plan; Call for Utah State Implementation Plan Revisions,'' 74 FR 21639 (April 18, 2011).

[6] EPA has used this authority to correct errors in past actions on SIP submissions related to PSD programs. See ''Limitation of Approval of Prevention of Significant Deterioration Provisions Concerning Greenhouse Gas Emitting-Sources in State Implementation Plans; Final Rule,'' 75 FR 82536 (December 30, 2010). EPA has previously used its authority under CAA section 110(k)(6) to remove numerous other SIP provisions that the Agency determined it had approved in error. See, e.g., 61 FR 38664 (July 25, 1996) and 62 FR 34641 (June 27, 1997) (corrections to American Samoa, Arizona, California, Hawaii, and Nevada SIPs); 69 FR 67062 (November 16, 2004) (corrections to California SIP); and 74 FR 57051 (November 3, 2009) (corrections to Arizona and Nevada SIPs).

[7] *See, e.g.,* EPA's disapproval of a SIP submission from Colorado on the grounds that it would have included a director's discretion provision inconsistent with CAA requirements, including section 110(a)(2)(A). *See, e.g.,* 75 FR 42342 at 42344 (July 21, 2010) (proposed disapproval of director's discretion provisions); 76 FR 4540 (Jan. 26, 2011) (final disapproval of such provisions).

[8] ''Final Rule To Implement the 8-Hour Ozone National Ambient Air Quality Standard—Phase 2; Final Rule'' (November 29, 2005, 70 FR 71612) (hereafter referred to as the ''Phase II Rule'').

[9] Prevention of Significant Deterioration and Title V Greenhouse Gas (GHG) Tailoring Rule; Final Rule'' (June 3, 2010, 75 FR 31514) (hereafter referred to as the ''GHG Tailoring Rule'').

[10] *Utility Air Regulatory Group* v. *Environmental Protection Agency,* 134 S. Ct. 2427 (2014).

[11] Implementation of the New Source Review Program for Particulate Matter Less Than 2.5 Micrometers; Final Rule'' (May 16, 2008, 73 FR 28321) (hereafter referred to as the ''NSR $PM_{2.5}$ Rule'').

[12] ''Final Rule on the Prevention of Significant Deterioration (PSD) for Particulate Matter Less Than 2.5 Micrometers ($PM_{2.5}$)—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC); Final Rule'' (October 20, 2010, 75 FR 64864) (hereafter referred to as the ''$PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments)'').

permitting requirements that the Supreme Court found impermissible. Specifically, EPA is not applying the requirement that a state's SIP-approved PSD program require that sources obtain PSD permits when GHGs are the only pollutant (i) that the source emits or has the potential to emit above the major source thresholds, or (ii) for which there is a significant emissions increase and a significant net emissions increase from a modification (*e.g.* 40 CFR 51.166(b)(48)(v)). EPA anticipates a need to revise federal PSD rules in light of the Supreme Court opinion. In addition, EPA anticipates that many states will revise their existing SIP-approved PSD programs in light of the Supreme Court's decision. The timing and content of subsequent EPA actions with respect to the EPA regulations and state PSD program approvals are expected to be informed by additional legal process before the United States District Court for the District of Columbia Circuit. At this juncture, EPA is not expecting states to have revised their PSD programs for purposes of infrastructure SIP submissions and is only evaluating such submissions to assure that the state's program correctly addresses GHGs consistent with the Supreme Court's decision.

The 2008 NSR $PM_{2.5}$ Rule [13] and 2010 $PM_{2.5}$ PSD Increment-SILs-SMC Rule (only as it relates to $PM_{2.5}$ Increments) established NSR permitting requirements for the implementation of the $PM_{2.5}$ NAAQS including increments pursuant to section 166(a) of the CAA to prevent significant deterioration of air quality in areas meeting the NAAQS. *See* 73 FR 28321 and 75 FR 64864. On January 22, 2013, the U.S. Court of Appeals for the District of Columbia, in *Sierra Club* v. *EPA,* 703 F.3d 458 (D.C. Cir. 2013), issued a judgment that, among other things, vacated the provisions adding the $PM_{2.5}$ SMC to the Federal regulations, at 40 CFR 51.166(i)(5)(i)(*c*) and 52.21(i)(5)(i)(*c*), that were promulgated as part of the 2010 $PM_{2.5}$ PSD Increment-SILs-SMC Rule.[14] *See* 75 FR 64864; *see also, Sierra Club* v. *EPA,* 703 F.3d 458 (D.C. Cir. 2013). In its decision, the court held that EPA did not have the authority to use SMCs to exempt permit applicants from the statutory requirement in section 165(e)(2) of the CAA that ambient monitoring data for $PM_{2.5}$ be included in all PSD permit applications. Thus, although the $PM_{2.5}$ SMC was not a required element of a State's PSD program and thus not a structural requirement for purposes of infrastructure SIPs, were a SIP-approved PSD program that contains such a provision to use that provision to issue new permits without requiring ambient $PM_{2.5}$ monitoring data, such application of the SIP would be inconsistent with the court's opinion and the requirements of section 165(e)(2) of the CAA. Of the States that are the subject of today's proposed rulemaking, EPA approved the SMC's into the Alabama, Florida and Mississippi SIP on September 26, 2012 (77 FR 59100), September 19, 2012 (77 FR 58027), and September 26, 2012 (77 FR 59095), respectively. However, given the clarity of the court's decision, it would now be inappropriate for these states to continue to allow applicants for any pending or future PSD permits to rely on the $PM_{2.5}$ SMC in order to avoid compiling ambient monitoring data for $PM_{2.5}$. Because of the vacatur of the EPA regulations, the SMC provisions, included in these States' SIP-approved PSD programs on the basis of EPA's regulations are unlawful and no longer enforceable by law. Permits issued on the basis of these provisions as they appear in approved SIPs would be inconsistent with the CAA and difficult to defend in administrative and judicial challenges. Thus, the SIP provisions may not be applied even prior to their removal from the SIPs. Alabama, Florida and Mississippi should instead require applicants requesting a PSD permit, including those having already been applied for but for which the permit has not yet been received, to submit ambient $PM_{2.5}$ monitoring data in accordance with the CAA requirements whenever either direct $PM_{2.5}$ or any $PM_{2.5}$ precursor is emitted in a significant amount.[15]

On December 9, 2013, EPA issued a final rulemaking to remove the vacated and remanded $PM_{2.5}$ SILs [16] and the vacated $PM_{2.5}$ SMC provisions from 40 CFR 51.166 and 52.21.[17] *See* 79 FR 73698. Because the Court vacated the $PM_{2.5}$ SMC provisions in 40 CFR 51.166(i)(5)(i)(*c*) and 52.21(i)(5)(i)(*c*), EPA revised the existing concentration for the $PM_{2.5}$ SMC listed in sections 51.166(i)(5)(i)(*c*) and 52.21(i)(5)(i)(*c*) to zero micrograms per cubic meter (0 mg/m^3). Were EPA to completely remove $PM_{2.5}$ from the list of pollutants in sections 51.166(i)(5)(i)(*c*) and 52.21(i)(5)(i)(*c*) of the PSD regulations, $PM_{2.5}$ would no longer be a listed pollutant.

EPA did not entirely remove $PM_{2.5}$ as a listed pollutant in the SMC provisions so as to avoid any potential that sections 51.166(i)(5)(iii) and 52.21(i)(5)(iii) could be interpreted as giving reviewing authorities the discretion to exempt permit applicants from the requirement to conduct monitoring for $PM_{2.5}$. Such a

[13] On January 4, 2013, the U.S. Court of Appeals, in *Natural Resources Defense Council* v. *EPA,* No. 08–1250, 2013 WL 45653 (D.C. Cir., filed July 15, 2008) (consolidated with 09–1102, 11–1430), issued a judgment that remanded EPA's 2007 and 2008 rules implementing the $PM_{2.5}$ NAAQS. The court concluded that since subpart 4 of the CAA generally applies to PM_{10}, EPA should have also followed the more prescriptive subpart 4 structure for the $PM_{2.5}$ implementation rules. The court ordered EPA to repromulgate the implementation rules pursuant to subpart 4. Subpart 4 of Part D, Title 1 of the CAA establishes additional provisions for particulate matter nonattainment areas.

The 2008 implementation rule addressed by the court decision, ''Implementation of New Source Review (NSR) Program for Particulate Matter Less Than 2.5 Micrometers ($PM_{2.5}$),'' 73 FR 28321 (May 16, 2008), promulgated NSR requirements for implementation of $PM_{2.5}$ in both nonattainment areas (nonattainment NSR) and attainment/unclassifiable areas (PSD). As the requirements of Subpart 4 only pertain to nonattainment areas, EPA does not consider the portions of the 2008 rule that address requirements for $PM_{2.5}$ attainment and unclassifiable areas to be affected by the court's opinion. Moreover, EPA does not anticipate the need to revise any PSD requirements promulgated in the 2008 rule in order to comply with the court's decision. Accordingly, EPA's approval of state's infrastructure SIP related to elements (C), (D)(i)(prong 3), or (J) with respect to the PSD requirements promulgated in the 2008 NSR $PM_{2.5}$ Rule does not conflict with the court's opinion.

The court's decision with respect to the nonattainment NSR requirements promulgated by the 2008 implementation rule also does not affect EPA's action on the present infrastructure actions. EPA interprets the Act to exclude nonattainment area requirements, including requirements associated with a nonattainment NSR program, from infrastructure SIP submissions due 3 years after adoption or revision of a NAAQS. Instead, these elements are typically referred to as nonattainment SIP or attainment plan elements, which would be due by the dates statutorily prescribed under subpart 2 through 5 under part D, extending as far as 10 years following designations for some elements.

[14] ''Prevention of Significant Deterioration (PSD) for Particulate Matter Less Than 2.5 Micrometers ($PM_{2.5}$)—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC); Final Rule, 75 FR 64864 (October 20, 2010).''

[15] In lieu of the applicants' need to set out $PM_{2.5}$ monitors to collect ambient data, applicants may submit $PM_{2.5}$ ambient data collected from existing monitoring networks when the permitting authority deems such data to be representative of the air quality in the area of concern for the year preceding receipt of the application. EPA believes that applicants will generally be able to rely on existing representative monitoring data to satisfy the monitoring data requirement.

[16] The court's January 22, 2013, decision also vacated and remanded back to EPA the $PM_{2.5}$ SILs. EPA's December 9, 2013 final rule also removed the $PM_{2.5}$ SILs from the CFR. The $PM_{2.5}$, SILs are not a required element of a State's PSD program and thus not a structural requirement for purposes of infrastructure SIPs. The $PM_{2.5}$ SILs are not approved into the SIPs that are the subject of this proposed rulemaking.

[17] Final Rule entitled ''Prevention of Significant Deterioration for Particulate Matter Less Than 2.5 Micrometers—Significant Impact Levels and Significant Monitoring Concentration: Removal of Vacated Elements;'' 79 FR 73698 (December 9, 2013).

conclusion would contravene the Court's decision and the CAA.

By continuing to include $PM_{2.5}$ as a pollutant in the list contained in sections 51.166(i)(5)(i) and 52.21(i)(5)(i), with the numerical value replaced with 0 mg/m^3, we avoid any concern that paragraph (iii) of the two affected sections could be applied to excuse permit applicants from adequately addressing the monitoring requirement for $PM_{2.5}$.

EPA also advises states to begin preparations to remove the $PM_{2.5}$ provisions from their state PSD regulations and SIPs. As the previously-approved $PM_{2.5}$ SMC provisions in the Alabama, Florida and Mississippi SIP are no longer enforceable, EPA does not believe the existence of these provisions in the States' implementation plans precludes today's proposed rulemaking to approve the infrastructure SIP submissions for Alabama, Florida and Mississippi as the submissions relate to the PSD elements of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS.

V. What is EPA's analysis of how Region 4 states addressed sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) related to PSD?

Described below is EPA's analysis of how the Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee infrastructure SIP submissions meet the requirements of the PSD Elements for the NAAQS for which they were submitted. This analysis includes review of the EPA's previous approval of the four structural PSD program requirements with respect to each of the states addressed in this action. Table 1 below summarizes EPA approvals of these structural PSD program requirements into the Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee SIPs. EPA's rationale for today's proposal with respect to each State is provided below. All other applicable infrastructure requirements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS associated with these States are being addressed in separate rulemakings.

TABLE 1—EPA APPROVED STRUCTURAL PSD PROGRAM REQUIREMENTS

State	Phase II rule	Greenhouse gas (GHG) tailoring rule	NSR $PM_{2.5}$ rule	$PM_{2.5}$ PSD increment-SILs-SMC rule
Alabama	May 1, 2008 (73 FR 23957)	December 29, 2010 (75 FR 81863).	September 26, 2012 (77 FR 59100).	September 26, 2012 (77 FR 59100).
Florida	June 15, 2012 (77 FR 35862)	May 19, 2014 (79 FR 28607)	September 19, 2012 (77 FR 58027).	September 19, 2012 (77 FR 58027).
Georgia	November 22, 2010 (75 FR 71018).	September 8, 2011 (76 FR 55572).	September 8, 2011 (76 FR 55572).	April 9, 2013 (78 FR 21065).
Kentucky	September 15, 2010 (75 FR 55988).	December 29, 2010 (75 FR 81868).	Refer to Footnote [18]	Refer to Footnote.[18]
Mississippi	December 20, 2010 (75 FR 79300).	December 29, 2010 (75 FR 81858).	September 26, 2012 (77 FR 59095).	September 26, 2012 (77 FR 59095).
South Carolina	June 23, 2011 (77 FR 36875)	Refer to Footnote [19]	June 23, 2011 (77 FR 36875)	April 3, 2013 (78 FR 19994).
Tennessee	February 7, 2012 (77 FR 6016).	February 28, 2012 (77 FR 11744).	July 30, 2012 (77 FR 44481)	January 9, 2014 (79 FR 1593).

a. Alabama

For the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS, Alabama's authority to regulate new and modified sources to assist in the protection of air quality in Alabama is established in the Alabama Administrative Code Chapters 335–3–14–.01 ''General Provisions,'' 335–3–14–.02 ''Permit Procedure,'' 334–3–14–.03 ''Standards for Granting Permits,'' 335–3–14–.04 ''Prevention of Significant Deterioration in Permitting,'' and 335–3–14–.05 ''Air Permits Authorizing Construction in or Near Nonattainment Areas.'' Alabama's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that Alabama's SIP and practices are adequate and comply with PSD Elements of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve Alabama's infrastructure SIP submissions as satisfying the infrastructure SIP PSD Elements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS.

b. Florida

For the 2008 Lead and 2010 NO_2 NAAQS, Florida's authority to regulate new and modified sources to assist in the protection of air quality in nonattainment, attainment or unclassifiable areas is established in Florida Administrative Code Chapters 62–210, *Stationary Sources—General Requirements, Section 200—Definitions;* and 62–212, and *Stationary Sources—*

[18] Through a final rule signed by the EPA Region 4 Administrator, on October 22, 2014, EPA is took final action in a separate rulemaking to approve Kentucky's January 13, 2013, SIP revision which addresses the NSR $PM_{2.5}$ Rule and the $PM_{2.5}$ PSD Increment-SILs-SMC Rule requirements. EPA proposed approval of Kentucky's January 13, 2013, SIP revision on July 23, 2014 (79 FR 42745).

[19] On June 11, 2010, the South Carolina Governor signed an Executive Order to confirm that the State had authority to implement appropriate emission thresholds for determining which new stationary sources and modification projects become subject to PSD permitting requirements for their GHG emissions at the state level. On December 30, 2010, EPA published a final rulemaking, ''Action To Ensure Authority To Implement Title V Permitting Programs Under the Greenhouse Gas Tailoring Rule'' (75 FR 82254) to narrow EPA's previous approval of State title V operating permit programs that apply (or may apply) to GHG-emitting sources; this rule hereafter is referred to as the ''Narrowing Rule.'' EPA narrowed its previous approval of certain State permitting thresholds, for GHG emissions so that only sources that equal or exceed the GHG thresholds, as established in the final Tailoring Rule, would be covered as major sources by the Federally-approved programs in the affected States. South Carolina was included in this rulemaking. On March 4, 2011, South Carolina submitted a letter withdrawing from EPA's consideration the portion of South Carolina's SIP for which EPA withdrew its previous approval in the Narrowing Rule. These provisions are no longer intended for inclusion in the SIP, and are no longer before EPA for its approval or disapproval. A copy of South Carolina's letter can be accessed at *www.regulations.gov* using Docket ID No. EPA–R04–OAR–2014–0610.

Preconstruction Review, Section 400—Prevention of Significant Deterioration, of the Florida SIP. Florida's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2008 Lead and 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that Florida's SIP and practices are adequate and comply with PSD Elements of the 2008 Lead and 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve, Florida's infrastructure SIP submissions as satisfying the infrastructure SIP PSD Elements for the 2008 Lead and the 2010 NO_2 NAAQS.

c. Georgia

For the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS, Georgia's authority to regulate new and modified sources to assist in the protection of air quality in Georgia is established in Georgia Regulation 391–3–1–.02(7), *Prevention of Significant Deterioration of Air Quality,* which pertains to the construction or modification of any major stationary source in areas designated as attainment or unclassifiable.

Georgia's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that Georgia's SIP and practices are adequate and comply with the PSD Elements of the 2008 Lead, 2008 Ozone, and 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve, Georgia's infrastructure SIP submissions as satisfying the infrastructure SIP PSD Elements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS.

d. Kentucky

For the 2008 Lead and 2010 NO_2 NAAQS, Kentucky's authority to regulate new and modified sources to assist in the protection of air quality in nonattainment, attainment or unclassifiable areas is established in Kentucky Administrative Regulation Chapter 51—*Attainment and Maintenance of the National Ambient Air Quality Standards,* which describes the permit requirements for new major sources or major modifications of existing sources in areas classified as attainment or unclassifiable under section 107(d)(1)(A)(ii) or (iii) of the CAA. These requirements are designed to ensure that sources in areas attaining the NAAQS at the time of designations prevent any significant deterioration in air quality. Chapter 51 also establishes the permitting requirements for areas in or around nonattainment areas and provides the Commonwealth's statutory authority to enforce regulations relating to attainment and maintenance of the NAAQS.

Kentucky's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2008 Lead and 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that Kentucky's SIP and practices are adequate and comply with the PSD Elements of the 2008 Lead and 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve Kentucky's infrastructure SIP submissions as satisfying the infrastructure SIP PSD Elements for the 2008 Lead and 2010 NO_2 NAAQS.

e. Mississippi

For the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS, Mississippi's authority to regulate new and modified sources to assist in the protection of air quality in Mississippi is established in Regulations APC–S–5—*Mississippi Regulations for the Prevention of Significant Deterioration of Air Quality* and APC–S–2—*Permit Regulation for the Construction and/or Operation of Air Emissions Equipment.* These SIP-approved regulations pertain to the construction of any new major stationary source or any project at an existing major stationary source in an area designated as nonattainment, attainment or unclassifiable. Mississippi's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS (See Table 1). As such, EPA has made the preliminary determination that Mississippi's SIP and practices are adequate and comply with the PSD Elements requirements of the 2008 Lead, 2008 Ozone, and 2010 NO_2 NAAQS. Accordingly, in this action, EPA is proposing to approve Mississippi's infrastructure SIP submissions as satisfying the infrastructure SIP PSD Elements requirements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS.

f. South Carolina

For the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS, South Carolina's authority to regulate new and modified sources to assist in the protection of air quality in South Carolina is established in Regulations 61–62.1, Section II, *Permit Requirements;* 61–62.5, Standard No. 7, *Prevention of Significant Deterioration;* and 61–62.5, Standard No. 7.1, *Nonattainment New Source Review* of South Carolina's SIP. These regulations pertain to the construction of any new major stationary source or any modification at an existing major stationary source in an area designated as nonattainment, attainment or unclassifiable. South Carolina's infrastructure SIP submissions demonstrate that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the specified NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in

Utility Air Regulatory Group v. *Environmental Protection Agency,* for purposes of the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that South Carolina's SIP and practices are adequate and comply with the PSD Elements requirements of the 2008 Lead, 2008 Ozone, and 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve South Carolina's infrastructure SIP submission as satisfying the infrastructure SIP PSD Elements for the 2008 Lead, 2008 Ozone and 2010 NO_2 NAAQS.

g. Tennessee

For the 2010 NO_2 NAAQS, Tennessee's authority to regulate new and modified sources to assist in the protection of air quality in Tennessee is established in Chapter 1200–3–9, *Construction and Operating Permits,* of the Tennessee SIP. This Chapter pertains to the construction of any new major stationary source or any project at an existing major stationary source in an area designated as nonattainment, attainment or unclassifiable. Tennessee's infrastructure SIP submission demonstrates that new major sources and major modifications in areas of the state designated attainment or unclassifiable for the NO_2 NAAQS are subject to a federally-approved PSD permitting program meeting all the current structural requirements of part C of title I of the CAA to satisfy the infrastructure SIP PSD Elements, including the authority to regulate GHG emitting sources consistent with the holding in *Utility Air Regulatory Group* v. *Environmental Protection Agency,* for purposes of the 2010 NO_2 NAAQS (See Table 1).

As such, EPA has made the preliminary determination that Tennessee's SIP and practices are adequate and comply with the PSD Elements requirements of the 2010 NO_2 NAAQS. Accordingly, in this action EPA is proposing to approve Tennessee's infrastructure SIP submission as satisfying the infrastructure SIP PSD Elements requirements for the 2010 NO_2 NAAQS.

VI. Proposed Action

As described above, EPA is proposing to approve the portions of the above-described infrastructure SIP submissions from Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee to address the PSD permitting requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) of the CAA. As described above, for some of these states, EPA is proposing approval of the PSD Elements of the infrastructure SIP submissions for the 2008 Lead, 2008 Ozone and 2010 Nitrogen NO_2 NAAQS; whereas for other states, EPA is only proposing approval of the PSD Elements of the infrastructure SIP submissions for a subset of these NAAQS. EPA is proposing approval of these portions of these submissions because they are consistent with section 110 of the CAA.

EPA also notes that, at present, the Agency has preliminarily determined that the Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee SIPs are sufficient to satisfy the PSD permitting requirements portion of section 110(a)(2)(C), 110(a)(2)(D)(i)(II), prong 3 and 110(a)(2)(J) with respect to GHGs because the PSD permitting program previously-approved by EPA into the SIP continues to require that PSD permits (otherwise required based on emissions of pollutants other than GHGs) contain limitations on GHG emissions based on the application of BACT. Although the approved Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee PSD permitting programs may currently contain provisions that are no longer necessary in light of the Supreme Court's *Utility Air Regulatory Group* v. *Environmental Protection Agency* decision, these previous approvals do not render the infrastructure SIP submission inadequate to satisfy sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J). The SIPs contain the necessary PSD requirements at this time, and the application of those requirements is not impeded by the presence of other previously-approved provisions regarding the permitting of sources of GHGs that EPA does not consider necessary at this time in light of the Supreme Court decision. Accordingly, the Supreme Court decision does not affect EPA's proposed approval of Alabama, Florida, Georgia, Kentucky, Mississippi, South Carolina and Tennessee's infrastructure SIPs as to the PSD permitting requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J).

VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

With the exception of South Carolina, the SIPs involved in this proposal are not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.'' With respect to today's proposed action as it relates to South Carolina, EPA notes that the Catawba Indian Nation Reservation is located within South Carolina and pursuant to the Catawba Indian Claims Settlement Act, S.C. Code Ann. 27–16–120, ''all state and local environmental laws and regulations apply to the Catawba Indian Nation and Reservation

and are fully enforceable by all relevant state and local agencies and authorities.'' Thus, the South Carolina SIP applies to the Catawba Reservation, however, because today's proposed action is not approving any specific rule into the South Carolina SIP, but rather proposing that the State's already approved SIP meets certain CAA requirements, EPA has preliminarily determined that there are no substantial direct effects on the Catawba Indian Nation. EPA has also preliminarily determined that these revisions will not impose any substantial direct costs on tribal governments or preempt tribal law.

Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units

AGENCY: Environmental Protection Agency.

ACTION: Notice; additional information regarding the translation of emission rate-based CO_2 goals to mass-based equivalents.

SUMMARY: The Environmental Protection Agency (EPA) is issuing this notice in support of the proposed rule, ''Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units,'' published on June 18, 2014 and the supplemental proposal, ''Carbon Pollution Emission Guidelines: Existing Stationary Sources in Indian Country and U.S. Territories; Multi-jurisdictional Partnerships,'' issued on October 28, 2014, to provide further discussion of potential approaches for translating the emission rate-based carbon dioxide (CO_2) goals that the EPA has proposed for each affected jurisdiction to an equivalent mass-based metric.

DATES: Comments on the proposed rule published on June 18, 2014, along with the additional information presented in this notice, must be received on or before December 1, 2014.

ADDRESSES: *Comments.* Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2013–0602, by one of the following methods:

Federal eRulemaking portal: http://www.regulations.gov. Follow the online instructions for submitting comments.

Email: A-and-R-Docket@epa.gov. Include Docket ID No. EPA–HQ–OAR–2013–0602 in the subject line of the message.

Facsimile: (202) 566–9744. Include Docket ID No. EPA–HQ–OAR–2013–0602 on the cover page.

Mail: Environmental Protection Agency, EPA Docket Center (EPA/DC), Mail code 28221T, Attn: Docket ID No. EPA–HQ–OAR–2013–0602, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

Hand/Courier Delivery: EPA Docket Center, Room 3334, EPA WJC West Building, 1301 Constitution Ave. NW., Washington, DC 20004, Attn: Docket ID No. EPA–HQ–OAR–2013–0602. Such deliveries are accepted only during the Docket Center's normal hours of operation (8:30 a.m. to 4:30 p.m., Monday through Friday, excluding federal holidays), and special arrangements should be made for deliveries of boxed information.

Instructions: All submissions must include the agency name and Docket ID No. (EPA–HQ–OAR–2013–0602). The EPA's policy is to include all comments received without change, including any personal information provided, in the public docket, available online at *http://www.regulations.gov,* unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. Send or deliver information identified as CBI only to the following address: Mr. Roberto Morales, OAQPS Document Control Officer (C404–02), Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2013–0602. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on a disk or CD–ROM that you mail to the EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information you claim as CBI. In addition to one complete version of the comment that includes information claimed as CBI, you must submit a copy of the comment that does not contain the information claimed as CBI for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

The EPA requests that you also submit a separate copy of your comments to the contact person identified below (see **FOR FURTHER INFORMATION CONTACT**). If the comment includes information you consider to be CBI or otherwise protected, you should send a copy of the comment that does not contain the information claimed as CBI or otherwise protected.

The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available (e.g., CBI or other information whose disclosure is restricted by statute). Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the EPA Docket Center, EPA WJC West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding federal holidays. The telephone number for the Public

Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742. Visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm* for additional information about the EPA's public docket.

In addition to being available in the docket, an electronic copy of this notice will be available on the World Wide Web (WWW). Following signature, a copy of this notice will be posted at the following address: *http://www2.epa.gov/cleanpowerplan/.*

FOR FURTHER INFORMATION CONTACT: Ms. Amy Vasu, Sector Policies and Programs Division (D205–01), U.S. EPA, Research Triangle Park, NC 27711; telephone number (919) 541–0107, facsimile number (919) 541–4991; email address: *vasu.amy@epa.gov* or Ms. Lisa Conner, Sector Policies and Programs Division (D205–01), U.S. EPA, Research Triangle Park, NC 27711; telephone number (919) 541–5060, facsimile number (919) 541–4991; email address: *conner.lisa@epa.gov.*

SUPPLEMENTARY INFORMATION:

Organization of This Document. The information presented in this notice is organized as follows:

I. Background

A. Proposed Rule

On June 18, 2014, under the authority of Clean Air Act (CAA) section 111(d), the EPA proposed emission guidelines for states to follow in developing plans to address greenhouse gas (GHG) emissions from existing fossil fuel-fired electric generating units (EGUs)(79 FR 34830). On October 28, 2014, the EPA also issued a supplemental proposal, ''Carbon Pollution Emission Guidelines: Existing Stationary Sources in Indian Country and U.S. Territories; Multi-jurisdictional Partnerships'' (79 FR 65481).

One of the main elements of the proposals is the establishment of emission rate-based CO_2 goals. To set these goals, the EPA analyzed practical and affordable strategies that states and utilities are already using to lower carbon pollution from the power sector. These strategies are incorporated into what the proposal describes as building blocks that comprise the best system of emission reduction (BSER).[1] These strategies, which are already being deployed by states and companies across the country, include improvements in efficiency at carbon-intensive power plants; programs that enhance generation from, and spur private investments in, low emitting and renewable power sources; as well as programs that help homes and businesses use electricity more efficiently. The EPA has proposed goals for each state, area of Indian country and U.S. territory with affected EGUs, as a carbon intensity rate, in terms of CO_2 per megawatt-hour generated. In calculating the emission rate-based goal, the EPA also took into consideration the area's fuel mix, electricity market and numerous other factors. Thus, each goal reflects the unique conditions of each state, area of Indian country and U.S. territory. The proposed rule also provides flexibility by authorizing each implementing authority to demonstrate achievement of the goal using a mass-based metric that is equivalent to its emission rate-based CO_2 goal. With the proposed rule issued on June 18, 2014, the EPA issued a TSD that demonstrates one potential way to translate the rate-based goal to a mass-based equivalent.

B. Purpose of the Notice

Upon issuance of the proposed rule, the EPA continued the extensive outreach effort to stakeholders and members of the public that the EPA had engaged in for many months preceding the proposal. This outreach has provided opportunities for all jurisdictions with affected entities—both individually and in regional groups—as well as numerous industry groups and non-governmental organizations, to meet with the EPA and ask clarifying questions about, and give initial reactions to, the proposed components, requirements and timing of the rulemaking. This outreach has included individual meetings; attendance at conferences; webinars; conference calls; and other communications, during which the EPA has responded to hundreds of clarifying questions about the proposal and received numerous initial reactions in both oral and written form. This engagement has been designed to facilitate a better understanding of the rule by stakeholders so that they could provide more informed substantive comments for the EPA to consider for the final rule, as well as allow the EPA to consider stakeholders' initial reactions.

During these discussions, many of the states, in particular, emphasized the importance of having more information and clarity on how the proposed rate-based goals could potentially be translated to a mass-based equivalent metric. Some states requested additional information about how they might calculate a mass-based equivalent metric, while other states requested that the EPA calculate and provide presumptive mass-based equivalent metrics.

The purpose of this notice is to share additional information regarding potential methods for determining the mass that is equivalent to the emission rate-based CO_2 goal that the EPA has proposed. With this notice, the EPA is also making available a TSD that provides detailed information to further inform and assist implementing authorities and stakeholders in understanding the proposal. This notice is consistent with the methodologies used to define BSER in the June 18, 2014, proposal and October 28, 2014 supplemental proposal and does not reflect any type of response to the comments that we have received to date. Readers should also note that the TSD, and the illustrative numbers presented therein, are based on the emission rate-based goals as proposed; any calculations of mass equivalents would naturally yield different results if the emission rate-based goals themselves were to change in the course of developing the final rule.

II. Additional Information on the Translation of Emission Rate-Based CO_2 Goals to Mass-Based Equivalents

In the proposed rule published on June 18, 2014, the EPA proposed a set of state-specific emission rate-based CO_2 goals (in pounds of CO_2 per megawatt-hour of electricity generated). In addition, the EPA issued emission rate-based CO_2 goals for areas of Indian country and U.S. territories with affected EGUs in a supplemental proposal on October 28, 2014. The proposals authorized each implementing authority to translate the form of the emission rate-based goal to a mass-based form (i.e., goals expressed in terms of total tons of CO_2 per year from affected sources), as long as the translated goal achieves the equivalent in stringency. Today's notice provides additional detail, and describes two potential methodologies for this translation. Today's notice is accompanied by a TSD titled ''Translation of the Clean Power Plan Emission Rate-Based CO_2 Goals to Mass-Based Equivalents,'' which has been placed in the docket for the rule (Docket ID No. EPA–HQ–OAR–2013–0602). For purposes of illustrating two methodologies for potential use in making rate-to-mass translations,

[1] CAA sections 111(d)(1) and (a)(1) direct the EPA to define BSER as the basis for state plans to reduce CO_2 from the affected sources.

today's notice and accompanying TSD identify two sets of mass-based values for each state, area of Indian country and U.S. territory with affected EGUs that could be considered equivalent to the proposed rate-based goals, as discussed below: One that is based on historical emissions from existing sources, and a second that is based on historical emissions from existing sources *and* projected emissions that would result from demand growth that is reflected in generation at both existing and new sources in the event that an implementing authority may want to include new sources of generation in its compliance approach. Illustrative values for each state, area of Indian country and U.S. territory with affected EGUs (along with the underlying data) for each method are also presented in the TSD.

In the proposed rule, the EPA intended to afford a considerable amount of flexibility in choosing the types of programs and measures needed to meet the goals established by the rulemaking. An important proposed element of this flexibility is allowing each implementing authority to demonstrate compliance with its interim and final rate-based goals established in the proposal, or to establish equivalent mass-based metrics for purposes of demonstrating compliance with the provisions of the rule. The agency recognizes that implementing authorities can use a mix of measures and programs to meet their goals regardless of which form of the standard they choose to use to demonstrate compliance in the state plan, including both programs that use mass-based metrics, as well as measures that use rate-based measures. State plans submitted to the EPA will be required either to (i) demonstrate that their programs and measures meet the rate-based goals established by the rulemaking, or (ii) if they choose to translate the rate-based goals into mass-based equivalents, demonstrate achievement of the goals using the mass-based metrics.[2]

In section VII of the preamble to the June 18, 2014 proposed rule, the EPA provides basic considerations necessary to translate the emission rate-based CO_2 goals into mass-based equivalents, for state plan purposes (79 FR 34897). The EPA also included in the docket for the rule a TSD titled ''Projecting EGU CO_2 Emission Performance in State Plans,'' that discusses the considerations, data and technical approaches that can be considered when converting the emission rate-based CO_2 goals into a mass-based equivalent metric, and focuses on one potential approach that implementing authorities could employ. The basic methodology presented in these documents is for the implementing authority to project for a given period the amount of generation by affected entities; to determine the amount of tons of CO_2 that would be emitted by affected EGUS; and to assure that the ratio of affected EGU emissions to affected entity generation is equivalent to the emissions performance of the rate-based goal.

The data, assumptions and methodological choices used for the estimation of generation by affected entities are of central importance for translation to a mass-based metric.[3] For instance, uncertainties about future demand, the future inventory of EGUs and the relative amounts of generation among EGUs in light of, for example, fuel costs can influence the translation to a mass-based equivalent.

In response to requests by states, we are issuing this notice and the TSD, ''Translation of the Clean Power Plan Emission Rate-Based CO_2 Goals to Mass-Based Equivalents,'' to present information about potential methods for translating the rate-based goals to mass-based equivalents. The TSD presents two additional possible methods for calculating mass-based equivalent metrics, the underlying data and shows the mass-based equivalent metric. The first method, based on historical data, produces mass-based equivalent metrics that apply to existing affected EGUs only. The second method, based on a combination of historical data and a projection of future electric demand, produces mass-based equivalent metrics that are inclusive of new fossil fuel-fired sources, in light of the fact that the rule takes comment on the inclusion of new, fossil fuel-fired sources as a component of state plans. As the starting point for these calculations, we use the proposed emission rate-based CO_2 goals set forth in the rulemaking. Also, to maintain consistency with the proposed rule, the calculations contain the same generation data used in setting the rate-based goals (i.e., 2012 eGRID data for historical generation, and Annual Energy Outlook 2013 for regional growth estimates) to project future levels of generation.[4]

The EPA is providing this additional information to states, U.S. territories, tribes, and other stakeholders to provide a better understanding of the proposed rule. It should be reiterated that the mass-based equivalent metrics presented in the TSD are not required mass-based emission limits that implementing authorities must meet; rather, they are illustrations of two potential options that implementing authorities may choose to adopt if they choose to use a mass-based form of the emission rate-based goal. The EPA presents them to provide stakeholders a better understanding of the methodology and mass outcomes associated with two possible ways of calculating mass-based equivalent metrics.

Dated: November 6, 2014.

Janet G. McCabe,

Acting Assistant Administrator, Office of Air and Radiation.

[FR Doc. 2014–26900 Filed 11–12–14; 8:45 am]

BILLING CODE 6560–50–P

[2] Note that the metric for compliance is independent from the approaches that implementing authorities may adopt to achieve them. For example, a state could potentially adopt a mass-based program that achieves a rate-based goal, or adopt rate-based standards and/or other measures and demonstrate that they have met the goal using a mass-based metric.

[3] Some stakeholders have observed that addressing potential translation to a mass equivalent could incorporate generation from ''affected entities'' that include generators beyond ''affected EGUs.'' The proposal invited comment on how generation across ''affected entities'' (including at ''affected EGUs'') should be considered when calculating mass equivalents.

[4] The Agency has received comments from some states about the accuracy of the 2012 data, as well as whether we should use more than a single year of data to determine the rate-based goals. We are reviewing all comments, information, and requests for data corrections received to date and will continue reviewing stakeholder input submitted to the docket by the close of the public comment period. Any changes to the emission rate-based goals and underlying data will be reflected in the final rule.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 141

[EPA–HQ–OW–2012–0155; FRL–9918–96–OW]

Notice of Public Meeting and Webinar: Preliminary Regulatory Determinations for the Third Contaminant Candidate List

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting on potential rulemaking.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing a public meeting and webinar to discuss the agency's preliminary determinations on whether or not to develop drinking water regulations for five unregulated contaminants listed on the third Contaminant Candidate List (CCL3). The EPA published and requested public

comment on its preliminary regulatory determinations of these five contaminants in the **Federal Register** (FR) on October 20, 2014. In that FR document, the agency announced its preliminary determinations to regulate one contaminant (i.e., strontium) and to not regulate four contaminants (i.e., 1,3-dinitrobenzene, dimethoate, terbufos and terbufos sulfone). On December 9, 2014, EPA will hold a public meeting and webinar to present and solicit public input on the process to identify, and the information used to evaluate, contaminants for the third Regulatory Determination effort; and the preliminary regulatory determinations for the aforementioned five unregulated contaminants listed on CCL3, including the supporting rationale for these determinations.

DATES: The public meeting and webinar will be held on Tuesday, December 9, 2014, from 1 p.m. to 5 p.m., eastern time. Persons wishing to attend the meeting in person or online via webinar must register by December 2, 2014, as described in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES: The public meeting will be held at The Cadmus Group, Inc., third floor conference room, located at 1555 Wilson Blvd., Suite 300, Arlington, VA 22209. All attendees must show government-issued photo identification (e.g., a driver's license) when signing in. This meeting will also be simultaneously broadcast as a webinar, available on the Internet.

FOR FURTHER INFORMATION CONTACT: Members of the public who wish to receive further information about the meeting and webinar or have questions about this notice should contact Ali Arvanaghi, Standards and Risk Management Division, Office of Ground Water and Drinking Water, Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Mail Code 4607M, Washington, DC 20460; telephone number: (202) 564–1260; email address: *arvanaghi.ali@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. How may I participate in this meeting?

Persons wishing to attend the meeting in person or online via the webinar must register in advance no later than 5 p.m., eastern time on December 2, 2014, by sending an email to *RD3Webinar@cadmusgroup.com.* Those who wish to attend should indicate in the email whether they intend to attend in person or via the webinar. The number of seats and webinar connections available for the meeting is limited and will be available on a first-come, first-served basis. The agenda for the public meeting and webinar will include time for public involvement and will allow for questions and answers or comments about the agency's third Regulatory Determination process and its preliminary regulatory determinations. If individuals or organizations are interested in making a more in-depth statement or presenting information, that interest should be mentioned when registering for the meeting. All statements or presentation materials should be emailed to *RD3Webinar@cadmusgroup.com* by December 2, 2014, so that the information can be incorporated into the webinar. We ask that only one person present the statement on behalf of a group or organization, and that the statement be limited to five minutes. Any additional comments, statements or information from attendees will be taken if time permits during the meeting or can be sent to *RD3Webinar@cadmusgroup.com* after the meeting, but before the close of the public comment period for the October 20, 2014, FR notice (79 FR 62716). It is important to remember that formal comments about the EPA's Preliminary Regulatory Determinations for Contaminants on the Third Drinking Water Contaminant Candidate List should be submitted to the docket (EPA–HQ–OW–2012–0155), as instructed in the October 20, 2014, FR notice, before the close of the public comment period on December 19, 2014.

B. How can I get a copy of the meeting and webinar materials?

The 508-compliant meeting materials will be sent by email to the registered attendees prior to the meeting. Information about registration and participation in the public meeting and webinar can be found on the EPA's Contaminant Candidate List 3 Web site: *http://water.epa.gov/scitech/drinkingwater/dws/ccl/ccl3.cfm.*

II. Background

The 1996 Safe Drinking Water Act Amendments require EPA to determine whether to regulate at least five unregulated contaminants from the current Contaminant Candidate List (CCL) with national primary drinking water regulations every five years. The process of making decisions about whether to regulate any of the CCL unregulated contaminants is called Regulatory Determination. On October 8, 2009 (74 FR 51850), EPA published the CCL3 containing 116 unregulated contaminants. On October 20, 2014 (79 FR 62716), EPA announced and solicited public comment on its preliminary determinations to regulate one contaminant (i.e., strontium) and to not regulate four contaminants (i.e., 1,3-dinitrobenzene, dimethoate, terbufos and terbufos sulfone). The public comment period for the October 20, 2014, FR announcement, Preliminary Regulatory Determinations for Contaminants on the Third Drinking Water Contaminant Candidate List, closes on December 19, 2014. After considering public comments and any additional information, EPA expects to publish the final, third Regulatory Determination in late 2015.

Dated: October 31, 2014.

Peter Grevatt,

Director, Office of Ground Water and Drinking Water.

[FR Doc. 2014–26573 Filed 11–12–14; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY REGION 8

[FRL–9919–11–Region–8]

40 CFR Part 503

Propose and Modify NPDES General Permits for Facilities That Generate, Treat, and/or Use/Dispose of Sewage Sludge by Land Application, Landfill and Surface Disposal in the EPA Region 8

AGENCY: The Environmental Protection Agency.

ACTION: Notice of proposed and final modification of the expiration date of the eleven (11) NPDES general permits for Sewage Sludge.

SUMMARY: The Environmental Protection Agency (EPA) is giving notice of modification of the expiration date of the National Pollutant Discharge Elimination System (NPDES) general permits for facilities or operations that generate, treat, and/or use/dispose of sewage sludge by means of land application, landfill and surface disposal in the states of Colorado, Montana, North Dakota, and Wyoming and in Indian country in the states of Colorado, Montana, North Dakota, South Dakota, Wyoming and Utah (except for the Goshute Indian Reservation and the Navajo Indian Reservation) from May 12, 2018, to January 15, 2015. The EPA will regulate sewage sludge (biosolids) through the direct enforceability provision of the regulation.

DATES: This comment period closes on December 15, 2014. *Comments may be directed to:* Bob Brobst (8P–W–WW),

EPA Region 8, 1595 Wynkoop Street, Denver, Colorado 80202–1129. All comments received prior to the end of the comment period will be considered in the formulation of the final permit decision.

After considering these comments, the EPA will issue the final permit decision together with written responses to any significant comments, in accordance with 40 CFR 124.15. If no comments are received, the modification of the 11 permits will be effective immediately upon issuance of the final permit decision.

ADDRESSES: The administrative record is available by appointment for review and copying at the EPA Region 8 offices during the hours of 8:00 a.m. to 4:00 p.m., Monday through Friday, Federal holidays excluded.

To make an appointment to look at or copy the documents call Bob Brobst at (303) 312–6129. The Region 8 offices are located at 1595 Wynkoop Street, Denver, Colorado 80202–1129. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Additional information concerning the final permits may be obtained from Bob Brobst, EPA Region 8, Wastewater Unit (8P–W–WW), 1595 Wynkoop Street, Denver, Colorado 80202–1129, telephone (303) 312–6129 or email at *brobst.bob@epa.gov.*

The final general permits, the fact sheet and additional information may be downloaded from the EPA Region 8 Web page at *http://www2.epa.gov/region8/biosolids.* Please allow one week after date of this publication for items to be uploaded to the Web page.

SUPPLEMENTARY INFORMATION: The EPA proposes to change the expiration date from May 12, 2018, to January 15, 2015. No other changes will occur in the general permits. The Federal Sewage Sludge Regulations gives the permitting authority, in this case the EPA Region 8, the choice of either issuing a permit or relying on direct enforceability of the regulation.

Direct enforceability means that no person shall use or dispose of sewage sludge through any practice for which requirements are established in the Federal Sewage Sludge Regulation, except in accordance with such requirements.

The EPA Region 8 has decided, for administrative reasons, to regulate sewage sludge (biosolids) through the direct enforceability provision of the regulation. In accordance with 40 CFR 503.3, the permitting authority, in this case the EPA Region 8, may either issue a permit or rely on direct enforceability of the 40 CFR 503. The EPA Region 8 has elected to administer the program under the direct enforceability provision.

The Federal Sewage Sludge Regulations referred to above in the summary section are located at 40 CFR 503 specifically at 40 CFR 503.3. (See *http://www.ecfr.gov/*) The NPDES permit numbers and the areas covered by this modification of the eleven (11) general permits are listed below.

State	Permit No.	Area covered by each general permit
Colorado	COG650000	State of Colorado, except for Federal Facilities and Indian country.
	COG651000	Indian country within the State of Colorado and the portions of the Ute Mountain Indian Reservation located in New Mexico and in Utah.
	COG652000	Federal Facilities in the State of Colorado, except those located in Indian country, which are covered under permit COG51000.
Montana	MTG650000	State of Montana, except for Indian country.
	MTG651000	Indian country in the State of Montana.
North Dakota	NDG650000	State of North Dakota, except for Indian country.
	NDG651000	Indian country within the State of North Dakota, except for Indian country located within the former boundaries of the Lake Traverse Indian Reservation, which are covered under permit SDG651000, and that portion of the Standing Rock Indian Reservation located in South Dakota.
South Dakota	SDG651000	Indian country within the State of South Dakota, except for the Standing Rock Indian Reservation, which is covered under permit NDG651000, and that portion of the Pine Ridge Indian Reservation located in Nebraska and Indian country located in North Dakota within the former boundaries of the Lake Traverse Indian Reservation.
Utah	UTG651000	Indian country within the State of Utah, except for the Goshute Indian Reservation, Navajo Indian Reservation and Ute Mountain Indian Reservation, which are covered under permit COG651000.
Wyoming	WYG650000	State of Wyoming, except for Indian country.
	WYG651000	Indian country within the State of Wyoming.

Other Legal Requirements

Section 401(a)(1) Certification: Since this modification does not involve discharges to waters of the United States, certification under § 401(a)(1) of the Clean Water Act is not necessary.

Economic Impact (Executive Order 12866): The EPA has determined that the modification of these general permits is not a ''significant regulatory action'' under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993).

Paperwork Reduction Act: The information collection requirements for this modification will not differ in the proposed permits.

Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.,* as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA): The RFA requires that the EPA prepare a regulatory flexibility analysis for rules subject to the requirements of 5 U.S.C. 553(b). The modification of the permits proposed today is not a ''rule'' subject to the requirements of 5 U.S.C. 553(b) and is therefore not subject to the RFA.

Unfunded Mandates Reform Act: The modification of the permits proposed today is not a ''rule'' subject to the RFA and is therefore not subject to the requirements of UMRA.

Authority: 33 U.S.C. 1251 *et seq.*

Dated: October 29, 2014.

Callie A. Videtich,

Acting Assistant Regional Administrator, Office of Partnerships and Regulatory Assistance, Region 8.

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 600 and 622

[Docket No. 080225276–4124–01]

RIN 0648–AS65

Fisheries of the Caribbean, Gulf, and South Atlantic; Aquaculture

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: NMFS reopens the comment period on the proposed rule to implement the Fishery Management Plan for Regulating Offshore Aquaculture in the Gulf of Mexico (FMP) that published on August 28, 2014. The original comment period closed on October 27, 2014. NMFS is reopening the comment period for an additional 15 days to provide the public additional time to comment on this proposed rule. If implemented, the proposed rule would establish a comprehensive regulatory program for managing the development of an environmentally sound and economically sustainable aquaculture industry in Federal waters of the Gulf of Mexico (Gulf). The purpose of the proposed rule is to increase the yield of Federal fisheries in the Gulf by supplementing the harvest of wild caught species with cultured product.

DATES: The comment period for the proposed rule that published on August 28, 2014 (79 FR 51424), and closed on October 27, 2014, will reopen on November 13, 2014 and remain open through November 28, 2014.

ADDRESSES: You may submit comments on the proposed rule, identified by ''NOAA–NMFS–2008–0233,'' by any of the following methods:

- Electronic Submissions: Submit electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2008-0233,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- Mail: Submit written comments to Jess Beck-Stimpert, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Electronic copies of the FMP, which includes a final programmatic environmental impact statement (FPEIS), an initial regulatory flexibility analysis (IRFA), and a regulatory impact review (RIR) may be obtained from the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov.*

Comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted in writing to Anik Clemens, Southeast Regional Office, NMFS, 263 13th Ave. South, St. Petersburg, FL 33701; and the Office of Management and Budget (OMB), by email at *OIRASubmission@omb.eop.gov,* or by fax to 202–395–7285.

FOR FURTHER INFORMATION CONTACT: Jess Beck-Stimpert, 727–824–5301.

SUPPLEMENTARY INFORMATION: Aquaculture in the Gulf will be managed under the FMP. The FMP was prepared by the Council and is being implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On August 28, 2014, NMFS published a proposed rule to implement the FMP to authorize the development of commercial aquaculture operations in Federal waters of the Gulf (79 FR 51424). The FMP provides a comprehensive framework for authorizing and regulating offshore aquaculture activities. The FMP also establishes a programmatic approach for evaluating the potential impacts of proposed aquaculture operations in the Gulf.

NMFS received several requests from the public to extend the comment period of the proposed rule. Due to the extensive nature of the FMP and the proposed rulemaking, NMFS is reopening the comment period on the proposed rule for an additional 15 days. Comments submitted during the prior comment period will be incorporated into the public record and will be fully considered during the preparation of the final rule.

Authority: 5 U.S.C. 561 and 16 U.S.C. 1801 *et seq.*

Dated: November 4, 2014.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

November 7, 2014.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 15, 2014 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20503. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agricultural Statistics Service

Title: Organic Survey.

OMB Control Number: 0535–0249.

Summary of Collection: The primary objective of the National Agricultural Statistics Services (NASS) is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices as well as the Census of Agriculture. General authority for these data collection activities is granted under 7 U.S.C. 2204. This census of organic farmers is required by law under the ''Census of Agriculture Act of 1997,'' Pubic Law 105–113, 7 U.S.C. 2204(g), as amended. Response to this survey will be mandatory.

Need and Use of the Information: The information is vital to RMA in determining insurance payments to organic farmers. The Organic Survey will provide acreage, production, and sales data for a variety of organic crop and livestock commodities as well as to gather information on organic marketing practices. These data will be provided by certified organic farms, organic farms exempt from certification, and transitional farms in all 50 States. National and State estimates (where publishable) will be set for all items that are collected on the survey. The collected data will be used to enhance programs like the Environmental Quality Incentives Program (EQIP) by providing accurate, detailed data for agricultural products produced using organic practices.

Description of Respondents: Farmers and Ranchers.

Number of Respondents: 17,500.

Frequency of Responses: Reporting: One time.

Total Burden Hours: 13,586.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2014–0083]

Notice of Request for Extension of Approval of an Information Collection; Importation of Mangoes From Australia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the importation of mangoes from Australia.

DATES: We will consider all comments that we receive on or before January 12, 2015.

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0083.*
- Postal Mail/Commercial Delivery: Send your comment to Docket No. APHIS–2014–0083, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0083* or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the importation of mangoes from Australia, contact Ms. Nicole Russo, Assistant Director, RCC, RPM, PHP, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 851–2159. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy,

APHIS' Information Collection Coordinator, at (301) 851–2727.

SUPPLEMENTARY INFORMATION:

Title: Importation of Mangoes From Australia.

OMB Control Number: 0579–0391.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in ''Subpart—Fruits and Vegetables'' (7 CFR 319.56–1 through 319.56–71).

In accordance with § 319.56–60, mangoes from Australia are subject to certain conditions before entering the United States to ensure that plant pests are not introduced into the United States. Among other things, the regulations require an information collection activity consisting of a phytosanitary certificate. Each shipment of mangoes must be accompanied by a phytosanitary certificate issued by the national plant protection organization of Australia with an additional declaration that the mangoes were inspected prior to export and found free of certain pests and treated in accordance with the regulations.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: National plant protection organization of Australia.

Estimated annual number of respondents: 20.

Estimated annual number of responses per respondent: 5.

Estimated annual number of responses: 100.

Estimated total annual burden on respondents: 50 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 6th day of November 2014.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–132–2014]

Foreign-Trade Zone 231—Stockton, California; Application for Subzone; 5.11, Inc.; Modesto and Lathrop, California

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Port of Stockton, grantee of FTZ 231, requesting subzone status for the facilities of 5.11, Inc., located in Modesto and Lathrop, California. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on November 6, 2014.

The proposed subzone would consist of the following sites: *Site 1* (5.22 acres) 4300 Spyres Way, Modesto; and *Site 2* (5 acres) 17610 Shideler Parkway, Lathrop. No authorization for production activity has been requested at this time. The proposed subzone would be subject to the existing activation limit of FTZ 231.

In accordance with the FTZ Board's regulations, Christopher Kemp of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is December 23, 2014. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 7, 2015.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Christopher Kemp at *christopher.kemp@trade.gov* or (202) 482–0862.

Dated: November 6, 2014.

Elizabeth Whiteman,

Acting Executive Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–119–2014]

Approval of Subzone Status; Kinder Morgan Operating L.P. ''C''; Hawesville, Kentucky

On September 10, 2014, the Executive Secretary of the Foreign-Trade Zones (FTZ) Board docketed an application submitted by the Louisville & Jefferson County Riverport Authority, grantee of FTZ 29, requesting subzone status subject to the existing activation limit of FTZ 29, on behalf of Kinder Morgan Operating L.P. ''C'', in Hawesville, Kentucky.

The application was processed in accordance with the FTZ Act and Regulations, including notice in the **Federal Register** inviting public comment (79 FR 56058, 9–18–2014). The FTZ staff examiner reviewed the application and determined that it meets the criteria for approval. Pursuant to the authority delegated to the FTZ Board Executive Secretary (15 CFR Sec. 400.36(f)), the application to establish Subzone 29M is approved, subject to the FTZ Act and the Board's regulations, including Section 400.13, and further subject to FTZ 29's 2,000-acre activation limit.

Dated: November 7, 2014.

Elizabeth Whiteman,

Acting Executive Secretary.

Foreign-Trade Zones Board

[B–80–2014]

Foreign-Trade Zone (FTZ) 127—West Columbia, South Carolina; Notification of Proposed Production Activity; Komatsu America Corporation (Material Handling, Construction and Forestry Machinery); Newberry, South Carolina

Komatsu America Corporation (Komatsu) submitted a notification of proposed production activity to the FTZ Board for its facility in Newberry, South Carolina, within FTZ 127. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on October 28, 2014.

The Komatsu facility is located within Site 3 of FTZ 127. The facility is used for the production of wheel loaders and forklift trucks, but may produce other material handling, construction and forestry machinery in the future, such as bulldozers, angledozers, hydraulic excavators, forestry harvesters, forestry feller bunchers, dump trucks (duty-free) and forestry forwarders. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Komatsu from customs duty payments on the foreign status components and materials used in export production. On its domestic sales, Komatsu would be able to choose the duty rates during customs entry procedures that apply to fork-lift trucks, wheel loaders, bulldozers, angledozers, hydraulic excavators, forestry harvesters, forestry feller bunchers, dump trucks (duty-free) and forestry forwarders (duty rate 25%) for the foreign status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components and materials sourced from abroad include: Paints; plastic hoses; hose joints; adhesive decals; plastic tags; plastic washers; plastic rings; plastic seals; plastic packings; plastic bands; PVC electric terminal caps; plastic clamps; plastic clips; rubber foam sheets; sponges; rubber pads w/adhesive; rubber weather strip; rubber weather strip seals; rubber hoses no fitting; rubber tubes; rubber hoses w/fittings not reinforced; rubber hoses w/fittings cover w/metal wire; rubber hoses reinforced w/textile; rubber hoses w/fittings reinforced; rubber hoses no fittings reinforced; rubber hoses for construction equipment; rubber hoses w/fittings cover w/metal wire & textile; molded rubber hoses; fan belts; alternators; v-belts reinforced w/textile; wheel loader tires; forklift tires; rubber floor mats; rubber grommets; rubber dust seals; rubber gaskets; rubber o-rings; rubber pads, no adhesive; rubber seals; rubber blocks; rubber caps; rubber clamps; rubber cushions; damper, operators compartment; rubber guards; cork plugs; glass wool; mirror for wheel loaders; sheet, fiber glass-heat resistant; elbows, alloy/cast/threaded; tees, alloy/cast/threaded; unions; flange hoses, alloy; elbows, tube non alloy; connectors, non-alloy steel fitting; quick couplers; steel wire ropes; chains for wheel loaders; screws for forklift; bolts, hex head, no nut; SEMS bolt and washer assemblies; screws, Phillip, no nut; nuts, hex head; bolts, hex head w/nut; screws w/nut; u-bolts w/nut; studs; nuts, steel for forklift; nuts, general application; washers, iron helical spring; washers, alloy; rivets; cotter pin clips; keys, steel; dowel pins not threaded; pins, metal, not threaded; helical springs; bands, hose/tube holders; metal clamps, hose holders; clips, hose/tube holder; plastic holders; elbows, brass, threaded; washers, brass; aluminum nuts; aluminum clamps, not threaded; steel clamps for forklift; keys, steel with padlock; lock assemblies; metal hinges for wheel loaders; handrails for wheel loaders; clips, alloy w/rubber coating; clips, electric wiring; springs, pneumatic cylinder; locks, metal latches; wheel loader consoles; name plates, vinyl; engines for wheel loaders; engines for forklifts; plugs, oil pan & suction tubes, steel; tilt cylinders for forklifts; cylinders for wheel loaders; motor assemblies for wheel loaders; shims, round, steel; fuel pumps; hydraulic pump assemblies; hydraulic gear pumps; couplings, hydraulic pump part; compressor assembly parts; air compressor collars; A/C receiver dryers; strainers, fuel filter; filter assemblies; air cleaner assemblies; diesel particle filter assemblies; cap, air cleaner, plastic; fire extinguisher assemblies; washer tank assemblies; axles for forklifts; bands, electric system; bars, for forklift counterweights; bonnets for forklifts; breathers, hydraulic system; clips for forklifts; collars for forklifts; control valves for forklifts; counterweights for forklifts; covers, electrical system, forklifts; damper stays, bonnet for forklifts; dashboard covers; dual tire spacers for forklifts; engine accessories for forklifts; fitting assemblies for forklifts; floors, steel plate; forklift main frames; forklift radiators; fuse holders; LPG fitting kits; ground straps; head guard assemblies for forklifts; hub & knuckle for forklifts; knob, operator compartment for forklifts; lever, steel for forklifts; light, LED w/switch; lights for forklifts; lock pin for forklifts; liquefied petroleum tanks for forklifts; metal bracket/block for forklifts; metal cap for forklifts; metal plug for forklifts; meter panels; mirrors for forklifts; mounts, engine mounting parts; mounting cushions for forklifts; mufflers; mufflers for forklifts; operator fans for forklifts; operator seats for forklifts; pedal assemblies; pins for forklifts; pipes for forklifts; radiators; reserve tank assemblies; rims for forklifts; shaft steering, steering columns for forklifts; shroud kits for forklifts; solenoid valves for forklifts; sponges, insulators for forklift frames; standard forks for forklifts; steel brackets for forklift lights; steel plates for forklifts; steel shims for forklifts; steering wheels for forklifts; sub-counterweights for forklifts; support brackets for forklift frames; tire spacers for forklifts; tire/rim assemblies for forklifts; tubes for forklifts; front buckets for wheel loaders; cylinders, bucket for wheel loaders; three valve lever consoles; adapters, hoses; additional counterweights for wheel loaders; air cleaners; axles for wheel loaders; bands, cab washer tanks; bands, threaded nuts; bar locks; battery cables; beacons; bellcranks for wheel loaders; machined metal blocks; blocks, hydraulic pumps; boom assemblies for wheel loaders; brackets, welded, steel; buckets for wheel loader; bushings, metal, multi application; cabs for wheel loaders; caps, radiator; caps, rubber, multiple purposes; catches; clamps; clamps, steel plate, multiple purposes; clips; collars, steel, for hinge pins; connectors; cool & heat boxes; counterweights; counterweights for wheel loaders; coupler assemblies for wheel loaders; couplings; covers, plastic for wheel loader; cushions, multiple application; cutting edges for buckets; cylinder assemblies; dashboards; decals; deflectors steel cover; doors for wheel loaders; elbows; elbows alloy/cast; elbows, main valves; elbows, steel, thread cast; fasteners; fenders, metal; finishers; flanges, hoses/metal/fittings; floors, metal sheets; foam sheets; frames,

steel parts for wheel loaders; front frame assemblies for wheel loaders; front frame subassemblies for wheel loaders; fuel tank assemblies; fuel tanks for wheel loaders; function kits; grilles, radiators; grips; guards, steel; guides, hydraulic tank for wheel loaders; hand rails, steel; hinge pins, steel, not threaded; holders, steel brackets; hood assemblies for wheel loaders; hood kits for wheel loaders; hoods, metal sheet parts for wheel loaders; hydraulic tanks for wheel loaders; joints, hoses, alloy/threaded; joystick steering kits; knobs, fuel container levers, plastic; ladders, steel for wheel loaders; levers for wheel loaders; link assemblies, steel for bellcranks; loader controls for wheel loaders; lock bars; marks, waste handlers; metal blocks, seats; metal ladders; metal rods; metal rods for wheel loaders; multifunction lever consoles; mufflers for wheel loaders; nipples alloy piping; nipples tubes; nipples, hoses, steel threaded; oil coolers; operator seats for wheel loaders; pads; side panels; welded metal pipe assemblies; steel plates for wheel loaders; plates, vinyl adhesive; cork plugs, multiple uses; plugs for hydraulic tanks; plugs, fender; plugs, for wheel loaders; plugs, hoses, multiple application; plugs, miscellaneous uses; pre separators; radiator and grille assemblies; radiator and grille kits; rear battery relays; rear console covers; rear frame assemblies; rear frame assemblies for wheel loaders; rear underguards; retainers; rim assemblies for wheel loaders; cabs for wheel loaders; rubber hydraulic piping; seals; seat belts; seats, steel block motor/vehicle; seats, steel, multiple uses for wheel loaders; shafts for wheel loaders; shims, for front feeder systems; shims, steel; slack adjusters; sleeve/heads, not fitting multiple application; solenoid valves; sound absorption sheets for wheel loaders; spacers for air cleaner connect; spacers for brake piping; spacers, multiple application, metal, alloy; spring bars; step assemblies for wheel loaders; stoppers, multiple application for wheel loaders; strikers, hood door for wheel loaders; metal supports; supports, axle for wheel loaders; swivels; tanks, radiator reservoirs; tees, hoses, alloy/cast/threaded; tees, no hose/tube alloy-cast; third function jumper kits; tool boxes for wheel loaders; tooth kits, castings for wheel loader buckets; trim; tubes, alloy w/fitting for wheel loader; underguards; unions, hose, multiple application; unions, no hose/tube steel; ventilators; viscous mounts for wheel loader cabs; washers/spacers for wheel loaders; wedges; accumulators for forklifts; accumulators for wheel loaders; valve assemblies, pressure reducers, hydraulic; valve assemblies, pressure reducers, pneumatic; valves, brake control; control valves for wheel loaders; valve, plastic; check valves; valve assemblies, safety relief; solenoid valves; valves, check steel gates; band, control bands for forklifts; collars, main valve no fitting; covers, control valve for forklifts; knobs, control valves; lever subassemblies; nipples, valve part; orifices; plugs, control valves; poppets; shafts, control valve for forklifts; tubes, control valve; unions, control valves; union, pump hoses; bearings, radial ball; bearings, thrust; bearings, taper roller; bearings, needle; propeller shaft, drive shaft; bearings, flange housed; bushings, plain shaft bearings; thrust washers, plastic plain shaft; rear axle assemblies; transfer case assemblies for wheel loaders; transmission assemblies for forklifts; transfer case assemblies for wheel loaders; transmission assemblies; pulleys for forklifts; coupling assemblies for wheel loaders; axle assemblies; drive axles; axle assemblies for wheel loaders; ring gears, damper; transmissions for wheel loaders; collars, transmission fitting for wheel loader; couplings, not fit, damper, wheel loaders; deflectors, drive shaft; elbows for torque/transmission; holders for drive shaft; shims for drive shaft; packing for forklifts; rubber seals reinforce w/metal; steel grease fittings; seals, rubber reinforced w/metal & plastic; seals, rubber reinforcers w/metal & textile; torque converters; wet batteries for wheel loaders; wet batteries for forklifts; batteries, lead acid; switch 3 pins; metal holders; rear view cameras; radio AM/FM for wheel loaders; travel alarms; blinker brackets; button horns; buzzers, electrical system; flashers and holders; front light assemblies; lamps, back up; strobe lights; resistor assemblies for wheel loaders; resistor assemblies for forklifts; fuses, plastic & copper; relays, electric system; battery disconnect switches; pressure switches; switches, rocker; connectors, electrical; covers, battery wiring; fuse holders; terminals, brass, battery; engine controllers; caps, rubber, wiring harness, battery; head lights; rear lead lamps; light fuse harnesses; light stay harnesses; working lamps; covers, head lamp parts; switch timers; cables, battery; wiring harnesses for wheel loaders; cables, electrical system; cables for harness/battery; light harnesses; engine harnesses; bands, cab washer tanks; welded machined metal block assemblies; seats, steel block motor/vehicle; caps, radiator; clamps, steel plates, multiple purposes; elbows alloy/cast; front frame subassemblies for wheel loaders; metal ladders; viscous mounts for wheel loader cabs; nipples, alloy piping; plugs, cork multiple uses; spacers for brake piping; sensor assemblies, engine wiring; sensors, temperature; gauges, dipstick; sensors for floor frame wheel loaders; oil level gauges; pressure airflow sensors; sensors, switch; sensors for torque converter/transmission; sensors for boom; dome lights; dome light brackets; and, dome light harnesses (duty rates range from free to 12.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is December 23, 2014.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz*.

For further information, contact *Diane.Finver@trade.gov* or (202) 482–1367.

Elizabeth Whiteman,

Acting Executive Secretary.

Certain Hot-Rolled Carbon Steel Flat Products From the People's Republic of China: Final No Shipments Determination of Antidumping Duty Administrative Review; 2012–2013

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 30, 2014, the Department of Commerce (the ''Department'') published the *Preliminary Results* of the 2012–2013 administrative review of the antidumping duty order on certain hot-rolled carbon steel flat products (''hot-rolled steel'') from the People's Republic of China (''PRC'').[1] The period of review (''POR'') is November 1, 2012, through October 31, 2013. We received no comments from interested parties.

[1] *See Certain Hot-Rolled Carbon Steel Flat Products From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2012–2013,* 79 FR 44155 (July 30, 2014) (''*Preliminary Results*'').

Therefore, the Department continues to find that Baosteel Group Corporation, Shanghai Baosteel International Economic & Trading Co., Ltd., and Baoshan Iron and Steel Co., Ltd. (collectively, ''Baosteel'') had no reviewable transactions of subject merchandise to the United States during the POR.

DATES: *Effective Date:* November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Steven Hampton, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0116.

SUPPLEMENTARY INFORMATION:

Background

On July 30, 2014, the Department published the *Preliminary Results* of the administrative review of the antidumping duty order on hot-rolled steel from the PRC.[2] We invited interested parties to comment on the *Preliminary Results.* No party provided comments. The Department has conducted this administrative review in accordance with section 751(a)(1) of the Tariff Act of 1930, as amended (''the Act'').

Scope of the Order

The products covered by the order are certain hot-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1,250 mm, and of a thickness of not less than 4.0 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of the order. Specifically included within the scope of the order are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (''IF'')) steels, high strength low alloy (''HSLA'') steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. Steel products included in the scope of the order, regardless of definitions in the Harmonized Tariff Schedule of the United States (''HTSUS''), are products in which: i) iron predominates, by weight, over each of the other contained elements; ii) the carbon content is two percent or less, by weight; and, iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of the order unless otherwise excluded. The following products, for example, are outside or specifically excluded from the scope of the order:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.,* American Society for Testing and Materials (''ASTM'') specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (''SAE'')/American Iron & Steel Institute (''AISI'') grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to the order is classified in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled carbon steel flat products covered by the order, including: vacuum degassed fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.

Final Determination of No Shipments

In the *Preliminary Results,* the Department preliminarily determined that Baosteel did not have any reviewable transactions of subject merchandise during the POR because there was no evidence on the record indicating that Baosteel had entries of subject merchandise during the POR.[3] We stated, consistent with the refinement to the Department's assessment practice in nonmarket economy (''NME'') cases, that we would not rescind the review in these circumstances but, rather, would complete the review with respect to Baosteel and issue appropriate instructions to U.S. Customs and Border Protection (''CBP'') based on the final results of the review.[4] As stated above,

[2] *Id.*

[3] *Id.,* 79 FR at 44156.

[4] *Id.*

we did not receive any comments on the *Preliminary Results.* Therefore, we continue to determine that Baosteel had no reviewable transactions of subject merchandise during the POR. Consistent with our ''automatic assessment'' clarification, the Department will issue appropriate instructions to CBP based on our final results.[5]

Assessment

Upon issuance of the final results, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries, in accordance with 19 CFR 351.212. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review. The Department announced a refinement to its assessment practice in NME cases.[6] Pursuant to this refinement in practice, for entries that were not reported in the U.S. sales databases submitted by companies individually examined during this review, the Department will instruct CBP to liquidate such entries at the NME-wide rate. In addition, if the Department determines that an exporter under review had no shipments of the subject merchandise, any suspended entries that entered under that exporter's case number (*i.e.,* at that exporter's rate) will be liquidated at the NME-wide rate.[7]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (2) for all PRC exporters of subject merchandise which have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 90.83 percent; and (3) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporters that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notifications

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

In accordance with 19 CFR 351.305(a)(3), this notice also serves as a reminder to parties subject to administrative protective order (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this administrative review and notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: November 4, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[C–570–966]

Drill Pipe From the People's Republic of China: Preliminary Results of Countervailing Duty Administrative Review; 2013

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review of the countervailing duty (CVD) order on drill pipe from the People's Republic of China (PRC). The period of review (POR) is January 1, 2013, through December 31, 2013. We preliminarily determine that Shanxi Yida Special Steel Imp. & Exp. Co., Ltd. and its cross-owned affiliates received countervailable subsidies during the POR.

DATES: *Effective Date:* November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Kristen Johnson, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–4793.

Scope of the Order

The scope of the order consists of steel drill pipe and steel drill collars, whether or not conforming to American Petroleum Institute (API) or non-API specifications. The merchandise subject to the order is currently classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) categories: 7304.22.0030, 7304.22.0045, 7304.22.0060, 7304.23.3000, 7304.23.6030, 7304.23.6045, 7304.23.6060, 8431.43.8040 and may also enter under 8431.43.8060, 8431.43.4000, 7304.39.0028, 7304.39.0032, 7304.39.0036, 7304.39.0040, 7304.39.0044, 7304.39.0048, 7304.39.0052, 7304.39.0056, 7304.49.0015, 7304.49.0060, 7304.59.8020, 7304.59.8025, 7304.59.8030, 7304.59.8035, 7304.59.8040, 7304.59.8045, 7304.59.8050, and 7304.59.8055. Although the HTSUS subheadings are provided for convenience and customs purposes, the written product description remains dispositive.

A full description of the scope of the order is contained in the memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, ''Decision Memorandum for Preliminary Results of Countervailing Duty Administrative Review: Drill Pipe from the People's Republic of China'' (Preliminary Decision Memorandum), dated concurrently with this notice, and hereby adopted by this notice.

The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (IA ACCESS). IA ACCESS is available to registered users at *http://iaaccess.trade.gov* and in the Central Records Unit, room 7046 of the main Department of Commerce

building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/index.html.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content. A list of topics discussed in the Preliminary Decision Memorandum is provided in the Appendix to this notice.

Methodology

The Department conducted this review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For the program found countervailable, we preliminarily determine that there is a subsidy, *i.e.,* a government-provided financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific. *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

In making the preliminary findings, we relied, in part, on facts available and, because the Government of the PRC did not act to the best of its ability to respond to the Department's requests for information, we applied an adverse inference in selecting from among the facts otherwise available. *See* sections 776(a) and (b) of the Act. For further information, see ''Use of Facts Otherwise Available and Adverse Inferences'' in the Preliminary Decision Memorandum.

For a full description of the methodology underlying the Department's conclusions, *see* Preliminary Decision Memorandum.

Preliminary Results of the Review

As a result of this review, we preliminarily determine a net countervailable subsidy rate of 3.57 percent *ad valorem* for Shanxi Yida Special Steel Imp. & Exp. Co., Ltd. and its cross-owned affiliates Shanxi Yida Special Steel Group Co., Ltd. and Shanxi Yida Petroleum Equipment Manufacturing Co., Ltd. (collectively, the Yida Group), for the period January 1, 2013, through December 31, 2013.

Disclosure and Public Comment

The Department intends to disclose to parties to this proceeding the calculations performed in reaching the preliminary results within five days of the date of publication of these preliminary results.[1] Interested parties may submit written arguments (case briefs) within 30 days of publication of the preliminary results and rebuttal comments (rebuttal briefs) within five days after the time limit for filing the case briefs.[2] Pursuant to 19 CFR 351.309(d)(2), rebuttal briefs must be limited to issues raised in the case briefs. Parties who submit arguments are requested to submit with the argument: (1) Statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Interested parties, who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce within 30 days after the date of publication of this notice.[3] Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, we will inform parties of the scheduled date for the hearing, which will be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, at a time and location to be determined.[4] Parties should confirm by telephone the date, time, and location of the hearing.

Parties are reminded that briefs and hearing requests are to be filed electronically using IA ACCESS and that electronically filed documents must be received successfully in their entirety by 5:00PM Eastern Time on the due date.

Unless the deadline is extended pursuant to section 751(a)(3)(A) of the Act, the Department will issue the final results of this administrative review, including the results of our analysis of the issues raised by parties in their comments, within 120 days after issuance of these preliminary results.

Assessment Rates

Consistent with section 751(a)(1) of the Act and 19 CFR 351.212(b)(2), upon issuance of the final results, the Department shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review. We intend to issue instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

Also in accordance with section 751(a)(1) of the Act, the Department intends to instruct CBP to collect cash deposits of estimated countervailing duties in the amount shown above for the reviewed company should the final results remain the same as these preliminary results. For all non-reviewed firms, we will instruct CBP to collect cash deposits of estimated countervailing duties at the most recent company-specific or all-others rate applicable to the company. These cash deposit requirements, when imposed, shall remain in effect until further notice.

These preliminary results of administrative review and notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213 and 351.221(b)(4).

Dated: November 4, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Welded Line Pipe From the Republic of Korea and the Republic of Turkey: Initiation of Countervailing Duty Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Rebecca Trainor at (202) 482–4007 or Reza Karamloo at (202) 482–4470 (Republic of Korea); Elizabeth Eastwood at (202) 482–3874 or Dennis McClure at (202) 482–5973 (Republic of Turkey), AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On October 16, 2014, the Department of Commerce (the Department) received countervailing duty (CVD) petitions concerning imports of welded line pipe from the Republic of Korea (Korea) and the Republic of Turkey (Turkey) filed in proper form on behalf of American Cast Iron Pipe Company, Energex (a division of JMC Steel Group), Maverick Tube Corporation, Northwest Pipe Company, Stupp Corporation (a division of Stupp Bros., Inc.), Tex-Tube Company, TMK IPSCO, and Welspun Tubular LLC USA (collectively, the petitioners). The CVD petitions were accompanied by two antidumping duty (AD) petitions.[1] The petitioners are domestic producers of welded line pipe.[2]

On October 21, 2014, the Department requested information and clarification for certain areas of the Petitions.[3] The petitioners filed responses to these requests on October 24, 2014, and October 29, 2014.[4] On October 27 and October 31, 2014, we received submissions from United States Steel Corporation (U.S. Steel), a domestic producer of welded line pipe, in support of the Petitions.

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioners allege that the Government of Korea (GOK) and the Government of Turkey (GOT) are providing countervailable subsidies (within the meaning of sections 701 and 771(5) of the Act) to imports of welded line pipe from Korea and Turkey, respectively, and that such imports are materially injuring, or threatening material injury to, an industry in the United States. Also, consistent with section 702(b)(1) of the Act, the Petitions are accompanied by information reasonably available to the petitioners supporting their allegations.

The Department finds that the petitioners filed the Petitions on behalf of the domestic industry because the petitioners are interested parties as defined in section 771(9)(C) of the Act. The Department also finds that the petitioners demonstrated sufficient industry support with respect to the initiation of the CVD investigations that the petitioners are requesting.[5]

Periods of Investigation

The period of the investigation for both Korea and Turkey is January 1, 2013, through December 31, 2013.

Scope of the Investigations

The product covered by these investigations is welded line pipe from Korea and Turkey. For a full description of the scope of these investigations, see the ''Scope of the Investigations'' in Appendix I of this notice.

Comments on Scope of the Investigations

During our review of the Petitions, the Department issued questions to, and received responses from, the petitioners pertaining to the proposed scope to ensure that the scope language in the Petitions would be an accurate reflection of the products for which the domestic industry is seeking relief.[6]

As discussed in the preamble to the Department's regulations,[7] we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The period for scope comments is intended to provide the Department with ample opportunity to consider all comments and to consult with parties prior to the issuance of the preliminary determination. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. All such comments must be filed by 5:00 p.m. Eastern

[7] *See Antidumping Duties; Countervailing Duties; Final rule,* 62 FR 27296, 27323 (May 19, 1997).

Standard Time (EST) on November 25, 2014, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. EST on December 5, 2014, which is 10 calendar days after the initial comments.

The Department requests that any factual information the parties consider relevant to the scope of the investigations be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigations may be relevant, the party may contact the Department and request permission to submit the additional information. All such comments must be filed on the records of the Korea and Turkey AD and CVD investigations.

Filing Requirements

All submissions to the Department must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (IA ACCESS).[8] An electronically-filed document must be received successfully in its entirety by the time and date it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 1870, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to section 702(b)(4)(A)(i) of the Act, the Department notified representatives of the GOK and the GOT of the receipt of the Petitions. Also, in accordance with section 702(b)(4)(A)(ii) of the Act, the Department provided representatives of the GOK and the GOT the opportunity for consultations with respect to the Petitions.[9] Consultations were held separately with the GOK and GOT on November 4, 2014.[10] All memoranda are on file electronically via IA ACCESS.[11]

Determination of Industry Support for the Petitions

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product, or those producers whose collective output of a domestic like product constitutes a major proportion of the total domestic production of the product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[12] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[13]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioners do not offer a definition of the domestic like product distinct from the scope of the investigations. Based on our analysis of the information submitted on the record, we have determined that welded line pipe, as defined in the scope of the investigations, constitutes a single domestic like product and we have analyzed industry support in terms of that domestic like product.[14]

In determining whether the petitioners have standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petitions with reference to the domestic like product as defined in the ''Scope of the Investigations,'' in Appendix I of this notice. To establish industry support, the petitioners provided their production of the domestic like product in 2013, as well as the production of a company that supports the Petitions, and compared this to the total production of the domestic like product for the entire domestic industry.[15]

On October 27, 2014, we received a submission from U.S. Steel, a domestic producer of welded line pipe. In the submission, U.S. Steel states that it supports the AD and CVD petitions on welded line pipe from Korea and

[14] For a discussion of the domestic like product analysis in this case, see Countervailing Duty Investigation Initiation Checklist: Welded Line Pipe from the Republic of Korea (Korea CVD Initiation Checklist) at Attachment II, Analysis of Industry Support for the Antidumping and Countervailing Duty Petitions Covering Welded Line Pipe from the Republic of Korea and the Republic of Turkey (Attachment II); and Countervailing Duty Investigation Initiation Checklist: Welded Line Pipe from the Republic of Turkey (Turkey CVD Initiation Checklist), at Attachment II. These checklists are dated concurrently with this notice and are on file electronically via IA ACCESS. Access to documents filed via IA ACCESS is also available in the Central Records Unit, Room 7046 of the main Department of Commerce building.

[15] *See* General Issues Supplement, at 3–5 and Exhibits 3 and 4; *see also* Second General Issues Supplement, at Attachment 1.

Turkey.[16] In an additional submission on October 31, 2014, U.S. Steel provided its 2013 production of the domestic like product.[17]

We have relied upon data that the petitioners and U.S. Steel provided for purposes of measuring industry support.[18]

Based on information provided in the Petitions, supplemental submissions, and other information readily available to the Department, we determine that the petitioners have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petitions account for at least 25 percent of the total production of the domestic like product.[19] Based on information provided in the Petitions, supplemental submissions, and submissions from U.S. Steel, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petitions account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petitions. Accordingly, the Department determines that the Petitions were filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.[20]

The Department finds that the petitioners filed the Petitions on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) of the Act and they have demonstrated sufficient industry support with respect to the CVD investigations that they are requesting the Department initiate.[21]

Injury Test

Because Korea and Turkey are ''Subsidies Agreement Countries'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to these investigations. Accordingly, the ITC must determine whether imports of the subject merchandise from Korea and Turkey materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioners allege that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, the petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[22]

The petitioners contend that the industry's injured condition is illustrated by reduced market share, underselling and price depression or suppression, lost sales and revenues, declining shipments, reduced production capacity, and a decline in financial performance.[23] We assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[24]

Initiation of Countervailing Duty Investigations

Section 702(b)(1) of the Act requires the Department to initiate a CVD investigation whenever an interested party files a CVD petition on behalf of an industry that: (1) Alleges the elements necessary for an imposition of a duty under section 701(a) of the Act; and (2) is accompanied by information reasonably available to the petitioner supporting the allegations.

In the Petitions, the petitioners allege that producers/exporters of welded line pipe in Korea and Turkey benefited from countervailable subsidies bestowed by the governments of these countries, respectively. The Department has examined the Petitions and finds that they comply with the requirements of section 702(b)(1) of the Act. Therefore, in accordance with section 702(b)(1) of the Act, we are initiating CVD investigations to determine whether manufacturers, producers, or exporters of welded line pipe from Korea and Turkey receive countervailable subsidies from the governments of these countries, respectively.

Korea

Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation of 22 of the 23 alleged programs. For a full discussion of the basis for our decision to initiate or not initiate on each program, see Korea CVD Initiation Checklist.

Turkey

Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation of 16 of the 18 alleged programs. For a full discussion of the basis for our decision to initiate or not initiate on each program, see Turkey CVD Initiation Checklist.

A public version of the initiation checklist for each investigation is available on IA ACCESS and at *http://trade.gov/enforcement/news.asp.*

In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 65 days after the date of this initiation.

Respondent Selection

The petitioners named 13 companies as producers/exporters of welded line pipe from Korea and 13 companies as producers/exporters of welded line pipe from Turkey.[25] Following standard practice in CVD investigations, the Department will, where appropriate, select respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports of welded line pipe during the period of investigation under the following Harmonized Tariff Schedule of the United States (HTSUS) numbers: 7305.11.10.30, 7305.11.50.00, 7305.12.10.30, 7305.12.50.00, 7305.19.10.30, 7306.19.10.10, 7306.19.10.50, 7306.19.51.10, and 7306.19.51.50. We intend to release CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO shortly after the announcement of these case initiations. The Department invites comments regarding CBP data and respondent selection within five calendar days of publication of this **Federal Register** notice. Comments must be filed electronically using IA ACCESS. An electronically-filed document must be received successfully in its entirety by the Department's electronic records system, IA ACCESS, by 5 p.m. Eastern time by the date noted

above. We intend to make our decision regarding respondent selection within 20 days of publication of this **Federal Register** notice. Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on the Department's Web site at *http://enforcement.trade.gov/apo.*

Distribution of Copies of the Petitions

In accordance with section 702(b)(4)(A)(i) of the Act and 19 CFR 351.202(f), copies of the public version of the Petitions have been provided to the GOK and GOT via IA ACCESS. Because of the particularly large number of producers/exporters identified in the Petitions, the Department considers the service of the public version of the Petitions to the foreign producers/exporters to be satisfied by the provision of the public version of the Petitions to the GOK and GOT, consistent with 19 CFR 351.203(c)(2).

ITC Notification

We have notified the ITC of our initiation, as required by section 702(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petitions were filed, whether there is a reasonable indication that imports of welded line pipe from Korea and/or Turkey are materially injuring, or threatening material injury to, a U.S. industry.[26] A negative ITC determination for either country will result in the investigation being terminated with respect to that country;[27] otherwise, these investigations will proceed according to statutory and regulatory time limits.

Submission of Factual Information

On April 10, 2013, the Department published *Definition of Factual Information and Time Limits for Submission of Factual Information: Final Rule,* 78 FR 21246 (April 10, 2013), which modified two regulations related to AD and CVD proceedings: the definition of factual information (19 CFR 351.102(b)(21)), and the time limits for the submission of factual information (19 CFR 351.301). The final rule identifies five categories of factual information in 19 CFR 351.102(b)(21), which are summarized as follows: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The final rule requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. The final rule also modified 19 CFR 351.301 so that, rather than providing general time limits, there are specific time limits based on the type of factual information being submitted. These modifications are effective for all proceeding segments initiated on or after May 10, 2013, and thus are applicable to these investigations. Interested parties should review the final rule, available at *http://enforcement.trade.gov/frn/2013/1304frn/2013-08227.txt,* prior to submitting factual information in these investigations.

Revised Extension of Time Limits Regulation

On September 20, 2013, the Department modified its regulation concerning the extension of time limits for submissions in AD and CVD proceedings.[28] The modification clarifies that parties may request an extension of time limits before a time limit established under Part 351 expires, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the time limit established under Part 351 expires. For submissions which are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Examples include, but are not limited to: (1) Case and rebuttal briefs, filed pursuant to 19 CFR 351.309; (2) factual information to value factors under 19 CFR 351.408(c), or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2), filed pursuant to 19 CFR 351.301(c)(3) and rebuttal, clarification and correction information filed pursuant to 19 CFR 351.301(c)(3)(iv); (3) comments concerning the selection of a surrogate country and surrogate values and rebuttal; (4) comments concerning CBP data; and (5) quantity and value questionnaires. Under certain circumstances, the Department may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, the Department will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. This modification also requires that an extension request must be made in a separate, stand-alone submission, and clarifies the circumstances under which the Department will grant untimely-filed requests for the extension of time limits. These modifications are effective for all segments initiated on or after October 21, 2013. Interested parties should review *Extension of Time Limits; Final Rule,* available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in these investigations.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[29] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule.*[30] The Department intends to reject factual submissions if the submitting party does not comply with the applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in these investigations should ensure that they meet the requirements of these

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigations

The merchandise covered by these investigations is circular welded carbon and alloy steel (other than stainless steel) pipe of a kind used for oil or gas pipelines (welded line pipe), not more than 24 inches in nominal outside diameter, regardless of wall thickness, length, surface finish, end finish, or stenciling. Welded line pipe is normally produced to the American Petroleum Institute (API) specification 5L, but can be produced to comparable foreign specifications, to proprietary grades, or can be non-graded material. All pipe meeting the physical description set forth above, including multiple-stenciled pipe with an API or comparable foreign specification line pipe stencil is covered by the scope of these investigations.

The welded line pipe that is subject to these investigations is currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings 7305.11.1030, 7305.11.5000, 7305.12.1030, 7305.12.5000, 7305.19.1030, 7305.19.5000, 7306.19.1010, 7306.19.1050, 7306.19.5110, and 7306.19.5150. The subject merchandise may also enter in HTSUS 7305.11.1060 and 7305.12.1060. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these investigations is dispositive.

International Trade Administration

[A–570–941]

Certain Kitchen Appliance Shelving and Racks From the People's Republic of China: Final Results of Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 1, 2014, the Department of Commerce (the ''Department'') published the notice of initiation of the first five-year (''sunset'') review of the antidumping duty order on certain kitchen appliance shelving and racks (''KASR'') from the People's Republic of China (''PRC'') pursuant to section 751(c) of the Tariff Act of 1930, as amended (the ''Act'').[1] As a result of this sunset review, the Department finds that revocation of the antidumping duty order on KASR from the PRC would be likely to lead to continuation or recurrence of dumping. The magnitude of the dumping margins likely to prevail is indicated in the ''Final Results of Review'' section of this notice.

DATES: *Effective Date:* November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Irene Gorelik, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–6905.

SUPPLEMENTARY INFORMATION:

Background

As noted above, on August 1, 2014, the Department published the initiation of the first sunset review of KASR from the PRC.[2] On August 18, 2014, Nashville Wire Products, Inc. (''Nashville Wire'') and SSW Holding Company, Inc. (''SSW'') (collectively, ''Petitioners'') timely notified the Department of their intent to participate within the deadline specified in 19 CFR 351.218(d)(1)(i), claiming domestic interested party status under section 771(9)(C) of the Act.[3] On September 2, 2014, the Department received an adequate substantive response from Petitioners within the deadline specified in 19 CFR 351.218(d)(3)(i).[4] We received no responses from respondent interested parties. As a result, the Department conducted an expedited (120-day) sunset review of the order, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2).

Scope of the Order

The scope of the order consists of shelving and racks for refrigerators, freezers, combined refrigerator-freezers, other refrigerating or freezing equipment, cooking stoves, ranges, and ovens (''certain kitchen appliance shelving and racks'' or ''the merchandise under order'').

The merchandise subject to the order is currently classifiable in the Harmonized Tariff Schedule of the United States (''HTSUS'') statistical reporting numbers 8418.99.8050, 8418.99.8060, 7321.90.5000, 7321.90.6090, 8516.90.8000 and 8419.90.9520. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.[5]

Analysis of Comments Received

All issues raised in this sunset review are addressed in the Issues and Decision Memorandum. The issues discussed in the Issues and Decision Memorandum include the likelihood of continuation or recurrence of dumping and the magnitude of the margins likely to prevail if the order were to be revoked. Parties may find a complete discussion of all issues raised in the review and the corresponding recommendations in this public memorandum which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''IA ACCESS''). IA ACCESS is available to registered users at *http://iaaccess.trade.gov,* and is available to all parties in the Central Records Unit, room 7046 of the main Department of Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/index.html.* The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Final Results of Review

Pursuant to section 752(c) of the Act, the Department determines that revocation of the order would be likely to lead to continuation or recurrence of dumping at weighted-average margins up to 95.99 percent.

Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return of destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an

[C–570–991]

Chlorinated Isocyanurates From the People's Republic of China: Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on affirmative final determinations by the Department of Commerce (''Department'') and the International Trade Commission (''ITC''), the Department is issuing a countervailing duty order on chlorinated isocyanurates (''Isos'') from the People's Republic of China (''PRC'').

DATES: *Effective Date:* November 13, 2014.

FOR FURTHER INFORMATION CONTACT: Paul Walker or Matthew Renkey, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0413 or (202) 482–2312, respectively.

Background

In accordance with section 705(d) of the Tariff Act of 1930, as amended (''Act''), on September 22, 2014, the Department published its final determination that countervailable subsidies are being provided to producers and exporters of Isos from the PRC. *See Chlorinated Isocyanurates from the People's Republic of China: Final Affirmative Countervailing Duty Determination; 2012*, 79 FR 56560 (September 22, 2014) (''*Final Determination*'').

On November 3, 2014, the ITC notified the Department of its final determination pursuant to section 705(d) of the Act that an industry in the United States is threatened with material injury within the meaning of section 705(b)(1)(A)(ii) of the Act by reason of subsidized imports of subject merchandise from the PRC. *See Chlorinated Isocyanurates from China and Japan*, USITC Investigation Nos. 701–TA–501 and 731–TA–1226 (Final), USITC Publication 4494 (November 2014).

Scope of the Order

The products covered by this order are chlorinated isocyanurates. Chlorinated isocyanurates are derivatives of cyanuric acid, described as chlorinated s-triazine triones. There are three primary chemical compositions of chlorinated isocyanurates: (1) Trichloroisocyanuric acid (''TCCA'') ($Cl_3(NCO)_3$), (2) sodium dichloroisocyanurate (dihydrate) ($NaCl_2(NCO)_3$ X $2H_2O$), and (3) sodium dichloroisocyanurate (anhydrous) ($NaCl_2(NCO)_3$). Chlorinated isocyanurates are available in powder, granular and solid *(e.g.*, tablet or stick) forms.

Chlorinated isocyanurates are currently classifiable under subheadings 2933.69.6015, 2933.69.6021, 2933.69.6050, 3808.50.4000, 3808.94.5000, and 3808.99.9500 of the Harmonized Tariff Schedule of the United States (''HTSUS''). The tariff classification 2933.69.6015 covers sodium dichloroisocyanurates (anhydrous and dihydrate forms) and trichloroisocyanuric acid. The tariff classifications 2933.69.6021 and 2933.69.6050 represent basket categories that include chlorinated isocyanurates and other compounds including an unfused triazine ring. The tariff classifications 3808.50.4000, 3808.94.5000 and 3808.99.9500 cover disinfectants that include chlorinated isocyanurates. The HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of this order is dispositive.

Countervailing Duty Order

In accordance with sections 705(b)(1)(A)(ii) and 705(d) of the Act, the ITC has notified the Department of its final determination that the industry in the United States producing Isos is threatened with material injury by reason of subsidized imports of drawn sinks from the PRC. Therefore, in accordance with section 705(c)(2) of the Act, we are publishing this countervailing duty order.

According to section 706(b)(2) of the Act, countervailing duties shall be assessed on subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the ITC's notice of final determination if that determination is based upon the threat of material injury. Section 706(b)(1) of the Act states, ''{i}f the Commission, in its final determination under section 705(b), finds material injury or threat of material injury which, but for the suspension of liquidation under section 703(d)(2), would have led to a finding of material injury, then entries of the merchandise subject to the countervailing duty order, the liquidation of which has been suspended under section 703(d)(2), shall be subject to the imposition of countervailing duties under section 701(a).'' In addition, section 706(b)(2) of the Act requires U.S. Customs and Border Protection (''CBP'') to refund any cash deposits or bonds of estimated countervailing duties posted before the date of publication of the ITC's final affirmative determination, if the ITC's final determination is based on threat other than the threat described in section 706(b)(1) of the Act. Because the ITC's final determination in this case is based on the threat of material injury and is not accompanied by a finding that injury would have resulted but for the imposition of suspension of liquidation of entries since the publication of the Department's *Preliminary Determination* in the **Federal Register**,[1] section 706(b)(2) of the Act applies.

Suspension of Liquidation

As a result of the ITC's determination and in accordance with section 706(a)(1) of the Act, the Department will direct CBP to assess, upon further instruction by the Department, countervailing duties equal to the amount of the net countervailable subsidy for all relevant entries of Isos from the PRC. The Department instructed CBP to discontinue the suspension of liquidation on June 24, 2014, in accordance with section 703(d) of the Act. Section 703(d) states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for more than four months. Entries of Isos from the PRC made on or after June 24, 2014, and prior to the date of publication of the ITC's final determination in the **Federal Register** are not liable for the assessment of countervailing duties because of the Department's discontinuation, effective June 24, 2014, of the suspension of liquidation.

In accordance with section 706 of the Act, the Department will direct CBP to reinstitute suspension of liquidation,

[1] *See Countervailing Duty Investigation of Chlorinated Isocyanurates from the People's Republic of China: Preliminary Determination and Alignment of Final Determination with Final Antidumping Determination*, 79 FR 10097 (February 24, 2014) (''*Preliminary Determination*'').

effective on the date of publication of the ITC's notice of final determination in the **Federal Register**, and to require a cash deposit for each entry of subject merchandise in an amount equal to the net countervailable subsidy rates listed below. The all others rate applies to all producers and exporters of subject merchandise not specifically listed.

Company	Subsidy rate
Hebei Jiheng Chemicals Co., Ltd	20.06
Juancheng Kangtai Chemical Co., Ltd	1.55
All Others	10.81

Termination of the Suspension of Liquidation

The Department will instruct CBP to terminate the suspension of liquidation for entries of Isos from the PRC, entered or withdrawn from warehouse, for consumption prior to the publication of the ITC's notice of final determination. The Department will also instruct CBP to refund any cash deposits made and release any bonds with respect to entries of Isos entered, or withdrawn from warehouse, for consumption on or after February 24, 2014 (*i.e.*, the date of publication of the *Preliminary Determination*), but before June 24, 2014 (*i.e.*, the date suspension of liquidation was discontinued in accordance with section 703(d) of the Act).

This notice constitutes the countervailing duty order with respect to Isos from the PRC, pursuant to section 706(a) of the Act. Interested parties may contact the Department's Central Records Unit, Room 7046 of the main Commerce Building, for copies of an updated list of countervailing duty orders currently in effect.

This order is issued and published in accordance with section 706(a) of the Act and 19 CFR 351.211(b).

Dated: November 5, 2014.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Renewable Energy and Energy Efficiency Advisory Committee

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an Open Meeting.

SUMMARY: The Renewable Energy and Energy Efficiency Advisory Committee (RE&EEAC) will hold a meeting on December 17, 2014. The meeting is open to the public and the room is disabled-accessible. Public seating is limited and available on a first-come, first-served basis.

DATES: December 17, 2014, from 9:00 a.m. to 4:00 p.m. Eastern Standard Time (EST). Members of the public wishing to attend the meeting must notify Andrew Bennett at the contact information below by 5:00 p.m. EST on Wednesday, December 10, in order to pre-register for clearance into the building. Please specify any requests for reasonable accommodation at least five business days in advance of the meeting. Last minute requests will be accepted, but may be impossible to fill.

ADDRESSES: The meeting will be held at the U.S. Department of Commerce, Room 6029, 1401 Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Andrew Bennett, Office of Energy and Environmental Industries (OEEI), International Trade Administration, U.S. Department of Commerce at (202) 482–5235; email: *Andrew.Bennett@trade.gov*. This meeting is physically accessible to people with disabilities. Requests for auxiliary aids should be directed to OEEI at (202) 482–5235.

SUPPLEMENTARY INFORMATION:

Background: The Secretary of Commerce established the RE&EEAC pursuant to his discretionary authority and in accordance with the Federal Advisory Committee Act (5 U.S.C. App.) on July 14, 2010. The RE&EEAC was re-chartered on June 12, 2014. The RE&EEAC provides the Secretary of Commerce with consensus advice from the private sector on the development and administration of programs and policies to enhance the international competitiveness of the U.S. renewable energy and energy efficiency industries.

During the December 17th meeting of the RE&EEAC, committee members will discuss key objectives and the types of issues they plan to address during the course of the Committee's two-year charter. Previous recommendations were developed by the previous Committee on finance, U.S. competitiveness, trade policy, and trade promotion.

A limited amount of time, from approximately 3:30 p.m. to 3:45 p.m., will be available for pertinent oral comments from members of the public attending the meeting. To accommodate as many speakers as possible, the time for public comments will be limited to five minutes per person. Individuals wishing to reserve additional speaking time during the meeting must contact Mr. Bennett and submit a brief statement of the general nature of the comments, as well as the name and address of the proposed participant by 5:00 p.m. EST on Wednesday, December 10, 2014. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to bring at least 20 copies of their oral comments for distribution to the participants and the public at the meeting.

Any member of the public may submit pertinent written comments concerning the RE&EEAC's affairs at any time before or after the meeting. Comments may be submitted to the Renewable Energy and Energy Efficiency Advisory Committee, c/o: Andrew Bennett, Office of Energy and Environmental Industries, U.S. Department of Commerce, Mail Stop: 4053, 1401 Constitution Avenue NW., Washington, DC 20230. To be considered during the meeting, written comments must be received no later than 5:00 p.m. EST on Wednesday, December 10, 2014, to ensure transmission to the Committee prior to the meeting. Comments received after that date will be distributed to the members but may not be considered at the meeting.

Copies of RE&EEAC meeting minutes will be available within 30 days following the meeting.

Dated: November 6, 2014.

Catherine Vial,

Team Leader, Environmental Industries.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; National Saltwater Angler Registry

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information

collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before January 12, 2015.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Gordon Colvin (240) 357–4524 or *Gordon.Colvin@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved collection.

The National Saltwater Angler Registry Program (Registry Program) was established to implement recommendations included in the review of national saltwater angling data collection programs conducted by the National Research Council (NRC) in 2005/2006, and the provisions of the Magnuson-Stevens Reauthorization Act, codified at Section 401(g) of the Magnuson-Stevens Fishery Conservation and Management Act (MSA), which require the Secretary of Commerce to commence improvements to recreational fisheries surveys, including establishing a national saltwater angler and for-hire vessel registry, by January 1, 2009. A final rule that includes regulatory measures to implement the Registry Program (RIN 0648–AW10) was adopted and codified in 50 CFR 600.1400–600.1417.

The Registry Program collects identification and contact information from those anglers and for-hire vessels who are involved in recreational fishing in the United States Exclusive Economic Zone or for anadromous fish in any waters, unless the anglers or vessels are exempted from the registration requirement. The data that is collected includes: For anglers: Name, address, date of birth, telephone contact information and region(s) of the country in which they fish; for for-hire vessels: Owner and operator name, address, date of birth, telephone contact information, vessel name and registration/documentation number and home port or primary operating area. This information is compiled into a national and/or series of regional registries that is being used to support surveys of recreational anglers and for-hire vessels to develop estimates of recreational angling effort.

II. Method of Collection

Persons may register in two ways: Via a toll-free telephone number or on line at a NOAA-maintained Web site. Registration cards, valid for one year from the date of issuance, are mailed to registrants.

III. Data

OMB Control Number: 0648–0578.

Form Number(s): None.

Type of Review: Regular submission (extension of a currently approved collection).

Affected Public: Individuals or households; business or other for-profit organizations.

Estimated Number of Respondents: 25,916.

Estimated Time per Response: 3 minutes.

Estimated Total Annual Burden Hours: 1296.

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 6, 2014.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510–22–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No: CFPB–2014–0030]

Agency Information Collection Activities: Comment Request

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Consumer Financial Protection Bureau (Bureau) is proposing to renew the approval for an existing information collection, titled, ''CFPB State Official Notification Rule.''

DATES: Written comments are encouraged and must be received on or before January 12, 2015 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- Electronic: *http://www.regulations.gov.* Follow the instructions for submitting comments.
- Mail: Consumer Financial Protection Bureau (Attention: PRA Office), 1700 G Street NW., Washington, DC 20552.
- Hand Delivery/Courier: Consumer Financial Protection Bureau (Attention: PRA Office), 1275 First Street NE., Washington, DC 20002.

Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or social security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Documentation prepared in support of this information collection request is available at *www.regulations.gov.* Requests for additional information should be directed to the Consumer Financial Protection Bureau, (Attention: PRA Office), 1700 G Street NW., Washington, DC 20552, (202) 435–9575, or email: *PRA@cfpb.gov. Please do not submit comments to this mailbox.*

SUPPLEMENTARY INFORMATION:

Title of Collection: CFPB State Official Notification Rule.

OMB Control Number: 3170–0019.

Type of Review: Extension without change of a currently approved collection.

Affected Public: State governments, District of Columbia, and U.S. Territories.

Estimated Number of Respondents: 56.

Estimated Total Annual Burden Hours: 2.

Abstract: Section 1042 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, 12 U.S.C. 5552 (''Act''), gave authority to certain State and U.S. territorial officials to enforce the Act

and regulations prescribed thereunder. Section 1042 also requires that the Bureau issue a rule establishing how states are to provide notice to the Bureau before taking action to enforce the Act (or, in emergency situations, immediately after taking such an action). In accordance with the requirements of the Act, the Bureau issued a final rule (12 CFR 1082.1) establishing that notice should be provided at least 10 days before the filing of an action, with certain exceptions, and setting forth a limited set of information which is to be provided with the notice.

OMB's approval for this collection of information is scheduled to expire on 04/30/2015. Pursuant to the requirements set forth in the PRA implementing regulations at 5 CFR 1320.12, *Clearance of collections of information in current rules,* this request is for OMB to extend (renew) its approval for this collection of information for an additional three years.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget (OMB) approval. All comments will become a matter of public record.

Dated: November 6, 2014.

Nellisha Ramdass,

Acting Chief Information Officer, Bureau of Consumer Financial Protection.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9919–19–OGC]

Proposed Settlement Agreement, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (''CAA'' or the ''Act''), notice is hereby given of a proposed settlement agreement to address a lawsuit filed by Environmental Integrity Project and Sierra Club in the United States District Court for the District of Columbia: *Environmental Integrity Project* v. *McCarthy,* Case No. 1:14-cv-01196 (D.D.C.). On July 16, 2014, Plaintiffs filed this complaint alleging that Gina McCarthy, in her official capacity as Administrator of the United States Environmental Protection Agency (''EPA''), failed to perform a non-discretionary duty to grant or deny within 60 days three petitions submitted by Environmental Integrity Project and Sierra Club requesting that EPA object to three CAA Title V permits issued by the Texas Commission on Environmental Quality to Luminant Generating Company to operate three power plants in Texas. The proposed settlement agreement would establish deadlines for EPA to take such action.

DATES: Written comments on the proposed settlement agreement must be received by December 15, 2014.

ADDRESSES: Submit your comments, identified by Docket ID number EPA–HQ–OGC–2014–0825, online at *www.regulations.gov* (EPA's preferred method); by email to *oei.docket@epa.gov;* by mail to EPA Docket Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. Comments on a disk or CD–ROM should be formatted in Word or ASCII file, avoiding the use of special characters and any form of encryption, and may be mailed to the mailing address above.

FOR FURTHER INFORMATION CONTACT: Karen Bianco, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone: (202) 564–3298; fax number (202) 564–5603; email address: *bianco.karen@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Additional information about the proposed settlement agreement

This proposed settlement agreement would resolve a lawsuit filed by Environmental Integrity Project and Sierra Club seeking to compel the Administrator to take actions under CAA section 505(b)(2). Under the terms of the proposed settlement agreement, EPA would agree to sign a response addressing the following issues from Environmental Integrity Project and Sierra Club's Title V petitions by no later than January 23, 2015:

a. Petition for Objection to Texas Title V Permit No. 065 for the Operation of the Big Brown Steam Electric Station, Freestone County, Texas (Mar. 3, 2014) (attached as Exhibit 1 to the proposed settlement agreement)(''Big Brown Petition''), Issue V.A (pp. 7–14);

b. Petition for Objection to Texas Title V Permit No. 064 for the Operation of the Monticello Steam Electric Station, Titus County, Texas (Mar. 3, 2014) (attached as Exhibit 2 to the proposed settlement agreement) (''Monticello Petition''), Issue V.A (pp. 5–11); and

c. Petition for Objection to Texas Title V Permit No. 053 for the Operation of the Martin Lake Steam Electric Station in Rusk County, Texas (Feb. 24, 2014) (attached as Exhibit 3 to the proposed settlement agreement) (''Martin Lake Petition''), Issue V.A (pp. 5–9).

EPA would also agree to sign a response addressing the following issues from Environmental Integrity Project and Sierra Club's Title V petitions by no later than May 15, 2015:

a. Big Brown Petition, Issue V.D (pp. 17–20);

b. Monticello Petition, Issue V.B (pp. 11–14); and

c. Martin Lake Petition, Issue V.B (pp. 9–14).

EPA would have no obligation to respond to any issue in the title V petitions except those specifically identified. Further, under the terms of the proposed agreement, Plaintiffs would send a letter to the EPA Administrator within 60 days of the execution of the settlement agreement withdrawing the remaining portions of their Big Brown petition, namely:

a. Big Brown Petition, Issue V.B (pp. 14–15); and

b. Big Brown Petition, Issue V.C (pp. 15–17).

Under the terms of the proposed settlement agreement, EPA will expeditiously deliver notice of EPA's responses to the Office of the Federal Register for review and publication following signature of such response. In addition, the proposed settlement agreement outlines the procedure for the Plaintiffs to request costs of litigation, including attorney fees.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the proposed settlement agreement from persons who are not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed

settlement agreement if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to this settlement agreement should be withdrawn, the terms of the settlement agreement will be affirmed.

II. Additional Information About Commenting on the Proposed Settlement Agreement

A. How can I get a copy of the proposed settlement agreement?

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2014–0825) contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

An electronic version of the public docket is available through *www.regulations.gov.* You may use the *www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search''.

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at *www.regulations.gov* without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD–ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *www.regulations.gov* Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an ''anonymous access'' system. If you send an email comment directly to the Docket without going through *www.regulations.gov,* your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: November 4, 2014.

Lorie J. Schmidt,

Associate General Counsel.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0761, 3060–0161 and 3060–0703]

Information Collections Being Submitted for Review and Approval to the Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before December 15, 2014. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, OMB, via email *Nicholas_A._Fraser@omb.eop.gov;* and to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page <*http://www.reginfo.gov/public/do/PRAMain*>, (2) look for the section of the Web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0761.

Title: Section 79.1, Closed Captioning of Video Programming, CG Docket No. 05–231.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; Individuals or households; and Not-for-profit entities.

Number of Respondents and Responses: 22,565 respondents; 1,149,437 responses.

Estimated Time per Response: 0.25 hours (15 minutes) to 120 hours.

Frequency of Response: Annual, one-time and on-occasion reporting requirements; Third party disclosure requirement; Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this obligation is found at section 713 of the Communications Act of 1934, as amended, 47 U.S.C. 613, and implemented at 47 CFR 79.1.

Total Annual Burden: 1,254,358 hours.

Total Annual Cost: $40,220,496.

Nature and Extent of Confidentiality: Confidentiality is an issue to the extent that individuals and households provide personally identifiable information, which is covered under the FCC's system of records notice (SORN), FCC/CGB–1, ''Informal Complaints and Inquiries.'' As required by the Privacy Act, 5 U.S.C. 552a, the Commission also published a SORN, FCC/CGB–1 ''Informal Complaints and Inquiries,'' in the **Federal Register** on December 15, 2009 (74 FR 66356) which became effective on January 25, 2010.

Nature and Extent of Confidentiality: Confidentiality is an issue to the extent that individuals and households provide personally identifiable information. As required by the Privacy Act, 5 U.S.C. 552a, the FCC published a system of records notice (SORN), FCC/CGB–1, ''Informal Complaints, Inquiries, and Requests for Dispute Assistance,'' in the **Federal Register** on August 15, 2014 (79 FR 48152), which became effective on September 24, 2014.

Privacy Act Impact Assessment: The Privacy Impact Assessment (PIA) for Informal Complaints and Inquiries was completed on June 28, 2007. It may be reviewed at: *http://www.fcc.gov/omd/privacyact/Privacy_Impact_Assessment.html.* The Commission is in the process of updating the PIA to incorporate various revisions to it as a result of revisions to the SORN.

Needs and Uses: The Commission seeks to extend existing information collection requirements in its closed captioning rules (47 CFR 79.1), which require that, with some exceptions, all new video programming, and 75 percent of ''pre-rule'' programming, be closed captioned. The existing collections include petitions by video programming providers, producers, and owners for exemptions from the closed captioning rules, responses by commenters, and replies; complaints by viewers alleging violations of the closed captioning rules, responses by video programming distributors, and recordkeeping in support of complaint responses; and making video programming distributor contact information available to viewers in phone directories, on the Commission's Web site and the Web sites of video programming distributors (if they have them), and in billing statements (to the extent video programming distributors issue them). In addition, the Commission seeks to extend proposed information collection requirements. Specifically, on February 20, 2014, the Commission adopted rules governing the quality of closed captioning on television. Closed Captioning of Video Programming; Telecommunications for the Deaf and Hard of Hearing, Inc. Petition for Rulemaking, CG Docket No. 05–231, Report and Order, Declaratory Ruling, and Further Notice of Proposed Rulemaking, 29 FCC Rcd 2221 (2014), published at 79 FR 17911 (March 31, 2014). The Commission took the following actions, among others:

(a) Required video programming distributors to make best efforts to obtain certification from video programmers that their programming (i) Complies with the captioning quality standards established in the Report and Order; (ii) adheres to the Best Practices for video programmers set out in the Report and Order; or (iii) is exempt from the closed captioning rules under one or more properly attained and specified exemptions.

(b) Adopted additional requirements and a ''compliance ladder'' for broadcasters that use electronic newsroom technique.

(c) Required video programming distributors to keep records of their activities related to the maintenance, monitoring, and technical checks of their captioning equipment.

(d) Required that petitions requesting an exemption based on the economically burdensome standard and all subsequent pleadings, as well as comments, oppositions, or replies to comments, be filed electronically in accordance with 47 CFR 0.401(a)(1)(iii) instead of as a paper filing. Comments, oppositions, or replies to comments must be served on the other party, by delivering or mailing a copy to the last known address in accordance with 47 CFR 1.47 or by sending a copy to the email address last provided by the party, its attorney, or other duly constituted agent, and must include a certification that the other party was served with a copy.

OMB Control Number: 3060–0161.

Title: Section 73.61, AM Directional Antenna Field Strength Measurements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents and Responses: 2,268 respondents and 2,268 responses.

Estimated Time per Response: 4–50 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 36,020 hours.

Total Annual Cost: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections 154(i) and 303 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 73.61 requires that each AM station using directional antennas to make field strength measurement as often as necessary to ensure proper directional antenna system operation. Stations not having approved sampling systems

make field strength measurements every three months. Stations with approved sampling systems must take field strength measurements as often as necessary. Also, all AM stations using directional signals must take partial proofs of performance as often as necessary. The FCC staff used the data in field inspections/investigations. AM licensees with directional antennas use the data to ensure that adequate interference protection is maintained between stations and to ensure proper operation of antennas.

OMB Control Number: 3060–0703.

Title: Determining Costs of Regulated Cable Equipment and Installation, FCC Form 1205.

Form Number: FCC Form 1205.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 4,000 respondents; 6,000 responses.

Estimated Time per Response: 4–12 hours.

Frequency of Response: Recordkeeping requirement, Annual reporting requirement, Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Section 301(j) of the Telecommunications Act of 1996 and 623(a)(7) of the Communications Act of 1934, as amended.

Total Annual Burden: 52,000 hours.

Total Annual Cost: $1,800,000.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: Information derived from FCC Form 1205 filings is used to facilitate the review of equipment and installation rates. This information is then reviewed by each cable system's respective local franchising authority. Section 76.923 records are kept by cable operators in order to demonstrate that charges for the sale and lease of equipment for installation have been developed in accordance with the Commission's rules.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary, Office of the Managing Director.

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, November 18, 2014, to consider the following matters:

SUMMARY AGENDA: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous Board of Directors' Meetings.

Memorandum and resolution re: Regulatory Capital Rules: Regulatory Capital, Proposed Revisions to the Advanced Approaches Risk-Based Capital Rule.

Memorandum and resolution re: Final Rule To Adjust the Timing of the Annual Stress Testing Cycle.

Memorandum and resolution re: Notice of Proposed Rulemaking: Filing Requirements and Processing Procedures for Changes in Control with Respect to State Nonmember Banks and State Savings Associations.

Summary reports, status reports, reports of the Office of Inspector General, and reports of actions taken pursuant to authority delegated by the Board of Directors.

DISCUSSION AGENDA:

Memorandum and resolution re: Final Rule on Revisions to the Deposit Insurance Assessment System.

The meeting will be held in the Board Room temporarily located on the fourth floor of the FDIC Building located at 550 17th Street NW., Washington, DC

This Board meeting will be Webcast live via the Internet and subsequently made available on-demand approximately one week after the event. Visit *https://fdic.primetime.mediaplatform.com/#/channel/1232003497484/Board+Meetings* to view the event. If you need any technical assistance, please visit our Video Help page at: *http://www.fdic.gov/video.html.*

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should call 703–562–2404 (Voice) or 703–649–4354 (Video Phone) to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at 202–898–7043.

Dated: November 10, 2014.

Federal Deposit Insurance Corporation

Ltd; Industrial Maritime Carriers, LLC; Kawasaki Kisen Kaisha, Ltd.; MISC Berhad; Mitsui O.S.K. lines Ltd.; Nippon Yusen Kaisha; Norasia Container Lines Limited; Safmarine MPV N.V.; Tasman Orient Line C.V.; U.S. Ocean, LLC; Yang Ming Marine Transport Corporation and Zim Integrated Shipping Services, Ltd. as non-shareholder parties.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Connor; 1627 I Street NW., Suite 1100; Washington, DC 20006.

Synopsis: The amendment corrects the address of APL Co. Pte Ltd.

Agreement No.: 012190–002.

Title: HSDG–GWF Space Charter Agreement.

Parties: Hamburg Sud and Great White Fleet Liner Services Ltd.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Connor; 1627 I Street NW., Suite 1100; Washington, DC 20006–4007.

Synopsis: The amendment extends the duration of the agreement and updates the title of the contact person for one of the parties.

Agreement No.: 012301.

Title: Siem Car Carrier Pacific AS/ Volkswagen Logistics GMBH & Co. Space Charter Agreement.

Parties: Siem Car Carrier Pacific AS and Volkswagen Logistics GMBH & Co.

Filing Party: Ashley W. Craig, Esq. and Elizabeth K. Lowe, Esq.; Venable LLP; 575 Seventh Street NW., Washington, DC 20004.

Synopsis: The agreement authorizes the parties to engage in a limited range of cooperative activities, including but not limited to, vessel space chartering in the trade between the U.S. West Coast and Mexico.

Agreement No.: 012302.

Title: UASC/HSDG Space Charter Agreement.

Parties: United Arab Shipping Company (S.A.G.); and Hamburg Sud KG.

Filing Party: Wayne Rohde, Esq.; Cozen O'Connor; 1627 I Street NW., Suite 1100; Washington, DC 20006.

Synopsis: The agreement authorizes UASC to charter space to HSDG in the trade between Asia and Egypt, on the one hand, and the U.S. East and West Coasts, on the other hand.

By Order of the Federal Maritime Commission.

Dated: November 7, 2014.

Rachel E. Dickon,

Assistant Secretary.

FEDERAL TRADE COMMISSION

[File No. 142 3003]

MPHJ Technology Investments, LLC, Jay Mac Rust, and Farney Daniels, P.C.; Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: The consent agreement in this matter settles alleged violations of federal law prohibiting unfair or deceptive acts or practices. The attached Analysis to Aid Public Comment describes both the allegations in the draft complaint and the terms of the consent order—embodied in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before December 8, 2014.

ADDRESSES: Interested parties may file a comment at *https://ftcpublic.commentworks.com/ftc/mphjtechconsent* online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''MPHJ Technology Investments, LLC, et al—Consent Agreement; File No. 142 3003'' on your comment and file your comment online at *https://ftcpublic.commentworks.com/ftc/mphjtechconsent* by following the instructions on the web-based form. If you prefer to file your comment on paper, write ''MPHJ Technology Investments, LLC, et al—Consent Agreement; File No. 142 3003'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex D), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex D), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Daniel O. Hanks (202–326–2472) or Michael Tankersley (202–326–2991), Bureau of Consumer Protection, 600 Pennsylvania Avenue NW., Washington, DC 20580.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46(f), and FTC Rule 2.34, 16 CFR 2.34, notice is hereby given that the above-captioned consent agreement containing consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of thirty (30) days. The following Analysis to Aid Public Comment describes the terms of the consent agreement, and the allegations in the complaint. An electronic copy of the full text of the consent agreement package can be obtained from the FTC Home Page (for November 6, 2014), on the World Wide Web, at *http://www.ftc.gov/os/actions.shtm.*

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 8, 2014. Write ''MPHJ Technology Investments, LLC, et al—Consent Agreement; File No. 142 3003'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm.* As a matter of discretion, the Commission tries to remove individuals' home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, like anyone's Social Security number, date of birth, driver's license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, like medical records or other individually identifiable health information. In addition, do not include any ''[t]rade secret or any commercial or financial information which . . . is privileged or confidential,'' as discussed in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices,

manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you have to follow the procedure explained in FTC Rule 4.9(c), 16 CFR 4.9(c).[1] Your comment will be kept confidential only if the FTC General Counsel, in his or her sole discretion, grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at *https://ftcpublic.commentworks.com/ftc/mphjtechconsent* by following the instructions on the web-based form. If this Notice appears at *http://www.regulations.gov/#!home,* you also may file a comment through that Web site.

If you file your comment on paper, write ''MPHJ Technology Investments, LLC, et al—Consent Agreement; File No. 142 3003'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex D), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex D), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

Visit the Commission Web site at *http://www.ftc.gov* to read this Notice and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 8, 2014. You can find more information, including routine uses permitted by the Privacy Act, in the Commission's privacy policy, at *http://www.ftc.gov/ftc/privacy.htm.*

[1] In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c), 16 CFR 4.9(c).

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission (the ''Commission'') has accepted, subject to approval, an agreement containing a consent order from MPHJ Technology Investments, LLC; Jay Mac Rust; and Farney Daniels, P.C. (the ''Respondents'').

The proposed consent order has been placed on the public record for thirty (30) days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After thirty days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement and take appropriate action or make final the agreement's proposed order.

This matter concerns allegedly deceptive representations that the Respondents made in a campaign of letters sent to thousands of small businesses across the United States in an attempt to sell licenses for certain U.S. patents. The complaint alleges that the Respondents made false or unsubstantiated representations in their letters that many small businesses had already agreed to pay thousands of dollars for such licenses. The complaint also alleges that the Respondents' letters falsely represented that a patent infringement lawsuit would be filed against the recipient if it did not respond to the letter, and that this suit would be filed imminently. The complaint alleges that these representations constitute deceptive acts or practices in violation of Section 5 of the Federal Trade Commission Act.

The proposed consent order contains provisions designed to prevent the Respondents from engaging in similar acts and practices in the future. Section I.A of the proposed order would prohibit false or unsubstantiated representations that a patent has been licensed in substantial numbers, at particular prices, or within particular price ranges. Section I.B of the proposed order would prohibit false or unsubstantiated representations about the licenses for a patent or the responses of recipients of patent assertion communications, or concerning the results of licensing, sales, settlement, or litigation of a patent. Section I.C would prohibit misrepresentations that the Respondents or an affiliate of the Respondents has initiated a lawsuit. And Section I.D would prohibit representations that the Respondents or an affiliate of the Respondents will initiate a lawsuit unless they have decided to take such action and they possess competent and reliable evidence sufficient to substantiate that they are prepared and able to do so. In determining whether such a representation was substantiated at the time that it was made, evidence that an action was not taken because of a change in circumstances or information obtained subsequent to making the representation shall be considered.

These prohibitions in the proposed consent order apply to communications (other than filings in a lawsuit or correspondence between counsel in a lawsuit) that state that the intended recipient or anyone affiliated with the intended recipient is or may be infringing rights arising from a patent, is or may be obligated to obtain a license because of a patent, or owes or may owe compensation to another because of a patent.

The proposed consent order also contains reporting and compliance provisions. Section II requires the Respondents to maintain and upon request make available certain compliance-related records. Sections III through VI requires the Respondents to deliver a copy of the order to officers, employees, and representatives having managerial responsibilities with respect to the order's subject matter, notify the Commission of changes in corporate structure that might affect compliance obligations, and file compliance reports with the Commission.

Section VII of the proposed order provides that, with certain exceptions, the order will terminate in twenty years.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the complaint or the proposed order, or to modify in any way the proposed order's terms.

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Intent To Award Ebola Response Outbreak Funding to the International Association of National Public Health Institutes (IANPHI)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice provides public announcement of CDC's intent to award Ebola appropriations to the International Association of National Public Health Institutes (IANPHI) for response to the Ebola outbreak funding. This award was proposed in Fiscal Year (FY) 2015 under funding opportunity announcement GH14–1419 ''Advancing National Public Health Institutes Globally''. IANPHI is uniquely positioned, in terms of authority, ability, track record, infrastructure, and credibility to engage its member institutes to respond to the Ebola outbreak in West Africa. Furthermore, these activities to increase eligible governments' capacity to respond to the Ebola outbreak are directly aligned with the current activities that IANPHI is conducting under this FOA to strengthen and expand national public health institute capabilities and support global health security.

Catalogue of Federal Domestic Assistance Number (CFDA): 93.318.

Authority: Sections 307 and 317(k)(2), Public Health Service Act 42 U.S.C. 242*l* and 247b(k)(2) as amended.

Single award may be awarded to grantee totaling $1,100,000 for Ebola response outbreak.

Funding is appropriated under the Continuing Appropriations Resolution, 2015, Public Law 113–164, 128 Stat. 1867 (2014).

DATES: Anticipated award date is 12/1/2014.

Application Due Date: 11/17/2014.

Project Number is CDC–RFA–GH14–1419.

ADDRESSES: CDC has waived the Grants.gov electronic submission process for this requirement. Recipients are hereby authorized to submit a paper copy application for (CDC–RFA–GH14–1419) via Express Mail (i.e. FedEx, UPS, or DHL) and send the application via email. Mailed applications must be address to Dionne Bounds, Centers for Disease Control and Prevention, 2920 Brandywine Road, Atlanta, GA 30341, telephone (770) 488–2082, or email her at *DBounds@cdc.gov.* The application must include a detailed line-item budget and justification to support the Ebola activities from December 1, 2014 to September 29, 2015.

Please download the following to complete the application package:

http://apply07.grants.gov/apply/forms/sample/SF424_2_1-V2.1.pdf—Application Package

http://www.cdc.gov/od/pgo/funding/docs/CertificationsForm.pdf—Certifications

http://www.cdc.gov/od/pgo/funding/grants/foamain.shtm—Assurances

http://www.cdc.gov/od/pgo/funding/grants/Budget_Preparation_Guidelines_8-2-12.docx—CDC–PGO Budget Guidelines

http://apply07.grants.gov/apply/forms/sample/SF424A-V1.0.pdf—SF–424A Budget Information

All applications must be submitted to and received by the Grants Management Officer (GMO) no later than 11:59 p.m. EST on November 17, 2014 and please provide the GMO a PDF version of the application by email to the following email address: *ogsghsebolaresponse@cdc.gov* subject line: CDC–RFA–GH14–1419.

Applicants will be provided with the Funding Opportunity Announcement (FOA) and additional application submission guidance via email notification. Applicants may contact the POCs listed with questions regarding the application process.

FOR FURTHER INFORMATION CONTACT:

For programmatic or technical assistance: Miranda Bodfish, Project Officer, Department of Health and Human Services, Centers for Disease Control and Prevention, 1600 Clifton Rd. MS E–93, Atlanta, GA 30333, Telephone: 404 719–0232, email: *WTI4@cdc.gov.*

For financial, awards management, or budget assistance: Dionne Bounds, Grants Management Officer, Centers for Disease Control and Prevention, 2920 Brandywine Road, Atlanta, GA 30341, Telephone (770) 488- 2082, email: *DBounds@cdc.gov.*

SUPPLEMENTARY INFORMATION: The purpose of this notice is to solicit an application from IANPHI to assist in the response to the Ebola virus in West Africa. The funding will support the impacted surrounding countries to combat this health crisis. This funding will target the following countries: Cameroon, Cote d'Ivoire, Guinea, and Guinea-Bissau to support the responses of the CDC to the outbreak of Ebola virus in West Africa. This funding will enable the U.S. to provide unified mobilization to address a crisis of this magnitude. CDC will continue to build partnerships and strengthen existing projects to respond to Ebola. CDC and its partners will help to address the need for surveillance, detection, coordination, response, and increase eligible governments' capacity to respond to the Ebola outbreak.

Award Information

Type of Award: Expansion Supplement.

Approximate Total Current Fiscal Year Funding*:* $1,100,000.

Anticipated Number of Awards: One.

Fiscal Year Funds: 2015.

Anticipated Award Date: December 1, 2014.

Application Selection Process: Funding will be awarded to applicant based on results from the technical review recommendation.

Dated: November 6, 2014.

Ron A. Otten,

Acting Deputy Associate Director for Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Objective Work Plan (OWP) and Objective Progress Report (OPR).

OMB No.: 0970–0429.

Description: Content and formatting changes are being made to the OPR and OWP. The information in OPR is currently collected on quarterly basis to monitor the performance of grantees and better gauge grantee progress. The OWP is used by applicants when they submit their proposals and then by grantees to monitor their projects once the award is made by ANA. ANA has determined that the requirement for ANA grantees to submit information about the project activities on quarterly basis creates undue burden for Grantees. Therefore, ANA has reformatted the OPR to require Grantees submit semi-annual reports instead of quarterly report. This will reduce the administrative burden on Grantees, especially the smaller organizations. The majority of content being requested from the grantees essentially remain same except for the frequency of reporting.

OPR: The following are proposed content changes to the document:

Grantee Information: Report Frequency—This section of OPR will be reformatted to request semi-annual or final project data instead of quarterly information. The other sections of the document with reference to ''quarterly'' information will be changed to reflect the shift from four-times a year reporting requirement to twice per year.

Objective Work Plan Update: Content remains the same. No changes are proposed for this section of the OPR.

Impact indicator: Current Status of Expected Results and Current Status of Expected Benefits which are reported separately on the OPR will be combined

to read ''Current Status of Expected Results and Benefits.'' The content requested in this section is similar to the previous OPR without the added burden of having the reporting organizations provide the analysis that distinguish between ''results and benefits''. Every section of the document will be rewritten to reflect this change.

OWP: ANA proposes to reformat the OWP (content is same) by swapping the Objective field with Problem Statement. In other words, this section will require respondents to begin with a concise statement about the problem the project is designed to address and will be followed by more details about the objectives of the project.

The two fields ''Results Expected and Benefits Expected'' will be combined into one field to read ''Results and benefits Expected''. This will reduce redundancy and help reduce the burden on Grantees.

Respondents: Tribal Government, Native non-profit organizations, Tribal Colleges & Universities.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
OWP	500	1	3	1,500
OPR	275	2	1	550

Estimated Total Annual Burden Hours: 2,050.

Additional Information: Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 370 L'Enfant Promenade SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: *infocollection@acf.hhs.gov.*

OMB Comment: OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendation for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, Fax: 202–395–7285, Email: *OIRA_SUBMISSION@OMB.EOP.GOV,* Attn: Desk Officer for the Administration for Children and families.

Robert Sargis,

Reports Clearance Officer.

Food and Drug Administration

[Docket No. FDA–2014–N–0001]

Science Board to the Food and Drug Administration Advisory Committee Meeting; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an amendment to the notice of meeting of the Science Board to the Food and Drug Administration. This meeting was announced in the **Federal Register** of October 8, 2014. The amendment is being made to reflect changes in URL for the Webcast. There are no other changes.

FOR FURTHER INFORMATION CONTACT: Martha Monser, Office of the Chief Scientist, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 3309, Silver Spring, MD 20993, 301–796–4627, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). Please call the Information Line for up-to-date information on this meeting.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 8, 2014 (79 FR 60856), FDA announced that a meeting of the Science Board to the Food and Drug Administration would be held on November 19 and 20, 2014. On page 60857, in the first column, the URL information is changed to read as follows:

The link for the Webcast on November 19, 2014, is available at: *https://collaboration.fda.gov/scienceboard111914/.* The link for the Webcast on November 20, 2014, is available at: *https://collaboration.fda.gov/scienceboard112014.*

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to the advisory committees.

Dated: November 5, 2014.

Jill Hartzler Warner,

Associate Commissioner for Special Medical Programs.

[Docket No. FDA–2014–N–1732]

Food Advisory Committee; Notice of Meeting; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an amendment to the notice of the meeting of the Food Advisory Committee. This meeting was announced in the **Federal Register** of August 19, 2014. The amendment is being made to add an **ADDRESSES** section and to reflect a change in the *Agenda.* There are no other changes.

FOR FURTHER INFORMATION CONTACT: Karen Strambler, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740, 240–402–2589, FAX: 301–436–2637, email: *FoodAdvisoryCommittee@fda.hhs.gov,* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area) and follow the prompts to the desired Center or product area. Please call the Information Line for up-to-date information on this meeting.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 19, 2014 (79 FR 49091), FDA announced that a meeting of the Food Advisory

Committee would be held on December 16–17, 2014. The **ADDRESSES** portion of the document is to read as follows:

ADDRESSES: FDA is opening a docket for public comment on this meeting. The docket will open for public comment on November 13, 2014. The docket will close on January 15, 2014. Interested persons may submit either electronic comments regarding this meeting to *http://www.regulations.gov* or written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.* All comments received will be posted without changes, including any personal information provided. Comments received on or before December 1, 2014, will be provided to the committee before the meeting.

On page 49091, in the second column, the *Agenda* portion of the document is changed to read as follows:

Agenda: The committee will discuss how risk assessments should account for the susceptibility to the effects of a particular chemical exposure because of factors such as genetics, age, sex, and health status and the circumstances under which FDA would decide to conduct a separate risk assessment for these groups.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to the advisory committees.

Dated: November 7, 2014.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects (Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this Information Collection Request must be received no later than January 12, 2015.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 10C–03, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Evaluation and Initial Assessment of the HRSA Teaching Health Centers Graduate Medical Education Program.

OMB No.: 0906–xxxx—New.

Abstract: Section 5508 of the Affordable Care Act of 2010 amended section 340H of the Public Health Service Act to establish the Teaching Health Center Graduate Medical Education (THCGME) program to provide funding support for new and the expansion of existing primary care residency training programs in community-based settings. The primary goals of this program is to increase the production of primary care providers who are better prepared to practice in community settings, particularly with underserved populations, and improve the geographic distribution of primary care providers.

Statute requires the Secretary to determine an appropriate THCGME program payment for indirect medical expenses (IME) as well as to update, as deemed appropriate, the per resident amount used to determine the Program's payment for direct medical expenses (DME). To inform these determinations and to increase understanding of this model of residency training, the George Washington University (GW) is conducting an evaluation of the costs associated with training residents in the Teaching Health Center (THC) model. GW has developed a standardized costing instrument to gather data from all THCGME programs. The information gathered in the standardized costing instrument includes, but is not limited to, resident and faculty full-time equivalents, salaries and benefits, residency administration costs, educational costs, residency clinical operations and administrative costs, and patient visits and clinical revenue generated by medical residents.

Need and Proposed Use of the Information: HRSA is collecting costing information related to both DME and IME in an effort to establish a THC's total cost of running a residency program, to assist the Secretary in determining an appropriate update to the per resident amount used to calculate the payment for DME and an appropriate IME payment. The described data collection activities will serve to inform these statutory requirements for the Secretary in a uniform and consistent manner.

Likely Respondents: THCGME grantees.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

The annual estimate of burden is as follows:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Teaching Health Center Costing Instrument	60	1	60	10	600
Total	60	1	60	10	600

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Dated: October 31, 2014.

Jackie Painter,

Acting Director, Division of Policy and Information Coordination.

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Health Resources and Services Administration (HRSA) has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than December 15, 2014.

ADDRESSES: Submit your comments, including the Information Collection Request Title, to the desk officer for HRSA, either by email to *OIRA_submission@omb.eop.gov* or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report OMB No. 0915–0172—Revision.

Abstract: The Health Resources and Services Administration (HRSA) is revising the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report.* The Guidance is used annually by the 50 states and nine jurisdictions in applying for Block Grants under Title V of the Social Security Act and in preparing the required Annual Report. In partnership with the leadership in State Title V Maternal and Child Health (MCH) programs as well as with other national MCH leaders and stakeholders, HRSA's Maternal and Child Health Bureau (MCHB) has been working over the past year to develop and refine a vision for transforming the MCH Block Grant to States program to better meet current and future challenges facing our nation's mothers and children, including children with special health care needs (CSHCN) and their families. The proposed revisions to the Application and Annual Reporting requirements and to the data forms that are contained in the revised guidance reflect this transformative vision.

Relative to the state's submission of a yearly Application, Annual Report and 5-year Needs Assessment, the aims of the MCH Block Grant to States program transformation are threefold: (1) Reduce burden to states, (2) maintain state flexibility, and (3) improve accountability. Revisions to this edition are intended to enable the state to tell a more cohesive and comprehensive Title V story and to better reflect on the program's leadership role and its contributions to the state's public health system in building improved and expanded systems of care for the MCH population. It is recognized that the full extent of the anticipated burden reduction will be realized over time as states become more familiar with the new instructions and reporting requirements. The burden estimates presented in the table below are based on previous burden estimates, consultations with a few states on the proposed changes, and comments received during the 60-day public comment period.

Specific changes to this edition of the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report* include the following:

(1) Narrative reporting will be organized by six population health domains (i.e., Women's/Maternal Health; Perinatal/Infant's Health; Child Health; CSHCN; Adolescent Health and Cross-cutting or Life Course); (2) Revised National Performance Measure (NPM) framework will be implemented with states selecting 8 of 15 NPMs for their programmatic focus; (3) state-level program data, such as breakdowns of MCH populations by race/ethnicity, health indicator data, and national performance and outcome measure data will be provided by MCHB, as available, from national data sources, thus, reducing the annual reporting burden for states; (4) Given that most MCH issues are multifactorial, the state will establish evidence based or evidence informed strategies to address each of the selected NPMs and will report on one or more of the Evidence-based or informed Strategy Measures (ESMs) developed for each NPM; (5) Revised instructions and the inclusion of a logic model for the State Title V MCH Block Grant Application/Annual Report process will provide greater emphasis on the need for the state priority needs and national MCH priority areas to drive the state's reporting on the 5-year (and ongoing) Needs Assessment findings, the selection of eight (8) NPMs which target the state-identified priority needs, the development of evidence based or informed strategies and related ESMs for addressing each of the selected NPMs, and the establishment of between three (3) and five (5) State Performance Measures (SPMs) which respond to the state's identified unique needs; (6) State Application/Annual Report will include a 5-year Action Plan for addressing the identified MCH priority areas; (7) An

Executive Summary (up to five pages in length) will be included with each submitted Application/Annual Report; (8) A 5-year Needs Assessment Summary (up to 20 pages in length) will be integrated into the state's MCH Block Grant Application/Annual Report and will replace the more comprehensive, stand-alone 5-year Needs Assessment document that the state previously submitted; (9) Health System Capacity Indicators will be eliminated; and (10) Federal and State Title V program budget and expenditures will be reported separately by the state.

Need and Proposed Use of the Information: Each year, all states and jurisdictions are required to submit an Application/Annual Report for federal funds for their Title V MCH Services Block Grant to States Program to the HRSA's MCHB [Section 505(a) of Title V of the Social Security Act.) In addition, the state/jurisdictional MCH Block Grant programs are required to conduct a statewide, comprehensive Needs Assessment every 5 years. The information and instructions for the preparation and submission of this Application/Annual Report are contained in the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report.*

Likely Respondents: By legislation [Section 505(a) of Title V of the Social Security Act], the MCH Block Grant Application/Annual Report must be developed by, or in consultation with, the state MCH Health agency.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Burden per response (in hours)	Total burden hours
Application and Annual Report without 5-Year Needs Assessment	59	1	59	123	7,257
Application and Annual Report with 5-Year Needs Assessment	59	1	59	189.3	11,169
Average Total Annual Burden	59	.....	59	.....	*8,561

*Reflects the average of one Application/Annual Report with Needs Assessment and two Application/Annual Reports without Needs Assessment

In fiscal year (FY) 2016, states and jurisdictions will be submitting an application and annual report with a 5-year Needs Assessment for a total estimated burden of 11,169 hours. In FY 2017 and FY 2018, states and jurisdictions will be submitting an Application and Annual Report without a 5-year needs assessment for a total estimated burden of 14,514.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Dated: October 31, 2014

Jackie Painter,

Acting Director, Division of Policy and Information Coordination.

Endangered Species; Recovery Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following application for a recovery permit to conduct activities with the purpose of enhancing the survival of an endangered species. The Endangered Species Act of 1973, as amended (Act), prohibits certain activities with endangered species unless a Federal permit allows such activity. The Act also requires that we invite public comment before issuing such permits.

DATES: To ensure consideration, please send your written comments by December 15, 2014.

ADDRESSES: Program Manager for Restoration and Endangered Species Classification, Ecological Services, U.S. Fish and Wildlife Service, Pacific Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4181. Please refer to the permit number for the application when submitting comments.

FOR FURTHER INFORMATION CONTACT: Colleen Henson, Fish and Wildlife Biologist, at the above address, or by telephone (503–231–6131) or fax (503–231–6243).

SUPPLEMENTARY INFORMATION:

Background

The Act (16 U.S.C. 1531 *et seq.*) prohibits certain activities with respect to endangered and threatened species unless a Federal permit allows such activity. Along with our implementing regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17, the Act provides for certain permits, and requires that we invite public comment before issuing these permits for endangered species.

A permit granted by us under section 10(a)(1)(A) of the Act authorizes the permittee to conduct activities (including take or interstate commerce) with respect to U.S. endangered or threatened species for scientific purposes or enhancement of propagation or survival. Our regulations implementing section 10(a)(1)(A) of the Act for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Application Available for Review and Comment

We invite local, State, and Federal agencies and the public to comment on the following application. Please refer to the permit number for the application when submitting comments.

Documents and other information submitted with this application are available for review by request from the Program Manager for Restoration and Endangered Species Classification at the address listed in the **ADDRESSES** section of this notice, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552).

Permit Number: TE–49208B

Applicant: Tammy Summers, Rainbow Connection Research, Saipan, Commonwealth of the Northern Marianas Islands.

The applicant requests a new permit to take (monitor and excavate nests, deploy nest temperature loggers, handle, measure, weigh, tag, attach transmitters, collect biological samples, salvage, photograph, and videograph) the hawksbill sea turtle (*Eretmochelys imbricata*) throughout the Commonwealth of the Northern Marianas Islands, in conjunction with research and educational activities, for the purpose of enhancing the species' survival.

Public Availability of Comments

All comments and materials we receive in response to this request will

be available for public inspection, by appointment, during normal business hours at the address listed in the **ADDRESSES** section.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 *et seq.*).

Dated: November 4, 2014.

Richard Hannan,

Regional Director, Pacific Region, U.S. Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX15EE000101100]

Agency Information Collection Activities: Request for Comments on the ISO Geospatial Metadata Editors Registry

AGENCY: U.S. Geological Survey (USGS), Interior.

ACTION: Notice of a new information collection, ISO Geospatial Metadata Editors Registry.

SUMMARY: We (the U.S. Geological Survey) are notifying the public that we have submitted to the Office of Management and Budget (OMB) the information collection request (ICR) described below. To comply with the Paperwork Reduction Act of 1995 (PRA) and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this ICR.

DATES: To ensure that your comments on this ICR are considered, OMB must receive them on or before December 15, 2014.

ADDRESSES: Please submit your written comments on this information collection directly to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for the Department of the Interior, via email: (*OIRA_SUBMISSION@omb.eop.gov*); or by fax (202) 395–5806; and identify your submission with 'OMB Control Number 1028–NEW ISO Geospatial Metadata Editors Registry'. Please also forward a copy of your comments to the Information Collection Clearance Officer, U.S. Geological Survey, 807 National Center, 12201 Sunrise Valley Drive, Reston, VA 20192 (mail); 703–648–7195 (fax); or *gs-info_collections@usgs.gov* (email). Please reference 'OMB Information Collection 1028—NEW ISO Geospatial Metadata Editors Registry' in all correspondence.

FOR FURTHER INFORMATION CONTACT: Jennifer Carlino, Federal Geographic Data Committee Office of the Secretariat, at (303) 202–4260 or *jcarlino@usgs.gov;* or by mail at U.S. Geological Survey, P.O. Box 25046, Mailstop 302, Denver, CO 80225. You may also find information about this ICR at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

As National Spatial Data Infrastructure (NSDI) stakeholders move forward with the implementation of the International Organization for Standardization's (ISO) 191xx series of geospatial metadata standards, there is increasing demand for information about applications/editors that can be used to create ISO compliant metadata records. The USGS, through the Federal Geographic Data Committee (FGDC) Office of the Secretariat (*www.fgdc.gov*), proposes development of an online registration system for developers of ISO Geospatial Metadata Editors to voluntarily describe their metadata tools. Developers will be asked to include information such as features of the editor, its functionality, supported standards, and point of contact information through a login-based, online form. The FGDC Metadata Working Group (MWG) (*www.fgdc.gov/participation/working-groupssubcommittees/mwg*), whose membership represents Federal, State, Local and Tribal governments and the Private Sector, has requested the development of the registry as a useful tool to learn about available ISO Geospatial Metadata Editors. Since the information about the editors may be of interest or utility to others implementing ISO geospatial metadata standards, the FGDC will make the information collected available on the Web in the form of a simple registry type database. FGDC MWG members as well as non FGDC MWG members including geospatial metadata implementers from private sector, academia, all forms of government, and the general public, will have read-only access to the editor information published in the registry.

II. Data

OMB Control Number: 1028—NEW.

Title: ISO Geospatial Metadata Editors Registry.

Type of Request: Approval of a new information collection.

Respondent Obligation: None. Participation is voluntary.

Frequency of Collection: Annually.

Description of Respondents: Federal, State, Local and Tribal governments, Private Sector, and others involved in the development of ISO geospatial metadata.

Estimated Total Number of Annual Responses: Approximately 10.

Estimated Time per Response: We estimate that it will take 1 hour per person to document a single editor for inclusion in the Registry.

Estimated Annual Burden Hours: 10 hours in year one and less than 5 in each subsequent year.

Estimated Reporting and Recordkeeping ''Non-Hour Cost'' Burden: There are no ''non-hour cost'' burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. Until the OMB approves a collection of information, you are not obliged to respond.

Comments: On May 15, 2014, we published a **Federal Register** notice (79 FR 11199) announcing that we would submit this ICR to OMB for approval and soliciting comments. The comment period closed on July 14, 2014. We received no comments.

III. Request for Comments

We again invite comments concerning this ICR as to: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) how to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this notice are a matter of public record. Before including your personal mailing address, phone

number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment, including your personally identifiable information, may be made publicly available at any time. While you can ask the OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Kenneth M. Shaffer,

Deputy Executive Director, Federal Geographic Data Committee, Office of the Secretariat, U.S. Geological Survey.

Announcement of National Geospatial Advisory Committee Meeting

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of meeting.

SUMMARY: The National Geospatial Advisory Committee (NGAC) will meet on December 3, 2014, from 1:00 p.m. to 4:00 p.m. EST. The meeting will be held via web conference and teleconference.

The NGAC, which is composed of representatives from governmental, private sector, non-profit, and academic organizations, has been established to advise the Chair of the Federal Geographic Data Committee on management of Federal geospatial programs, the development of the National Spatial Data Infrastructure, and the implementation of Office of Management and Budget (OMB) Circular A–16. Topics to be addressed at the meeting include:

—FGDC Update
— Address Data
—Landsat Advisory Group
—Geospatial Privacy
—2015 NGAC Activities

Members of the public who wish to attend the meeting must register in advance. Please register by contacting Lucia Foulkes at the Federal Geographic Data Committee (703–648–4142, *lfoulkes@usgs.gov*). Meeting registrations are due by November 28, 2014. Meeting information (web conference and teleconference instructions) will be provided to registrants prior to the meeting. While the meeting will be open to the public, attendance may be limited due to web conference and teleconference capacity.

The meeting will include an opportunity for public comment. Attendees wishing to provide public comment should register by November 28. Please register by contacting Lucia Foulkes at the Federal Geographic Data Committee (703–648–4142, *lfoulkes@usgs.gov*). Comments may also be submitted to the NGAC in writing.

DATES: The meeting will be held on December 3, 2014, from 1:00 p.m. to 4:00 p.m. EST.

FOR FURTHER INFORMATION CONTACT: John Mahoney, U.S. Geological Survey (206–220–4621).

SUPPLEMENTARY INFORMATION: Meetings of the National Geospatial Advisory Committee are open to the public. Additional information about the NGAC and the meeting are available at *www.fgdc.gov/ngac.*

Kenneth Shaffer,

Deputy Executive Director, Federal Geographic Data Committee.

Bureau of Land Management

[15X.LLID9570000. L14200000.BJ0000.241A. 4500074039]

Idaho: Filing of Plats of Survey

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of filing of plats of surveys.

SUMMARY: The Bureau of Land Management (BLM) has officially filed the plats of survey of the lands described below in the BLM Idaho State Office, Boise, Idaho, effective 9:00 a.m., on the dates specified.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 1387 South Vinnell Way, Boise, Idaho 83709–1657.

SUPPLEMENTARY INFORMATION: These surveys were executed at the request of the Bureau of Land Management to meet their administrative needs. The lands surveyed are:

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Little Jacks Creek Wilderness boundary in T. 8 S., R. 1 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Little Jacks Creek Wilderness boundary and Big Jacks Creek Wilderness Area 1 boundary in T. 8 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 1 boundary in T. 8 S., R. 4 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Little Jacks Creek Wilderness boundary in T. 9 S., R. 2 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Little Jacks Creek Wilderness boundary and Big Jacks Creek Wilderness Area 1 boundary in T. 9 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 1 boundary in T. 9 S., R. 4 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 1 boundary in T. 10 S., R. 2 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 1 boundary in T. 10 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The plat constituting the entire survey record of the dependent resurvey of a portion of the west boundary, T. 10 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was accepted July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 2 boundary in T. 11 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The plat constituting the entire survey record of the dependent resurvey of portions of the east boundary and

subdivisional lines, and the subdivision of sec. 24, T. 11 S., R. 3 E., Boise Meridian, Idaho, Group Number 1317, was accepted July 25, 2014.

The field notes representing the remonumentation of certain original corners and monumentation of certain angle points of the Big Jacks Creek Wilderness Area 2 boundary in T. 11 S., R. 4 E., Boise Meridian, Idaho, Group Number 1317, was approved July 25, 2014.

The supplemental plat showing new lots 1 and 2 in sec. 12, T. 8 N., R. 5 W., Boise Meridian, Idaho, Group Number 1424, was accepted September 5, 2014.

The supplemental plat portraying lot 7, T. 4 S., R. 36 E., Boise Meridian, Idaho, Group Number 1316, was accepted September 5, 2014.

These surveys were executed at the request of the U.S.D.A. Natural Resources Conservation Service to meet their administrative needs. The lands surveyed are:

The plat representing the dependent resurvey of portions of the First Standard Parallel North (north boundary) and subdivisional lines, and the subdivision of section 4, and a metes-and-bounds survey in section 4, T. 4 N., R. 24 E., of the Boise Meridian, Idaho, Group Number 1397, was accepted August 27, 2014.

The plat representing the dependent resurvey of portions of the north boundary and subdivisional lines, and the subdivision of sections 4, 9, 10, 13, 14, 15, and 23, T. 2 N., R. 24 E., of the Boise Meridian, Idaho, Group Number 1396, was accepted September 25, 2014.

The plat represents the dependent resurvey of portions of the First Standard Parallel North (south boundary), west boundary, and subdivisional lines, and the subdivision of sections 30 and 31, and a metes-and-bounds survey in sections 30 and 31, T. 5 N., R. 24 E., of the Boise Meridian, Idaho, Group Number 1398, was accepted September 25, 2014.

This survey was executed at the request of the U. S. Forest Service to meet certain administrative and management purposes.

The plat representing the dependent resurvey of a portion of Tract 39, and the survey of portions of the east boundary and subdivisional lines, T. 30 N., R. 7 E., of the Boise Meridian, Idaho, Group Number 1324, was accepted June 19, 2014.

Dated: October 30, 2014.

Stanley G. French,

Cadastral Surveyor for Idaho.

Final Environmental Impact Statement for Cottonwood Cove and Katherine Landing Development Concept Plans, Lake Mead National Recreation Area, Arizona and Nevada

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The National Park Service announces availability of the Final Environmental Impact Statement (EIS) for the Cottonwood Cove and Katherine Landing Development Concept Plans, Lake Mead National Recreation Area. The document describes and analyzes three alternatives. *Alternative 1* (no action alternative) reflects current management direction and serves as a baseline for comparison with the other alternatives. Existing facilities would be retained with minimal changes. *Alternative 2 Implement Previous Planning Proposals* would implement previous planning proposals that separate day use and marina facilities, maintain the type of overnight facilities, and provide flood mitigation. *Alternative 3 Enhance Visitor Experience and Park Operations* (agency-preferred alternative) would enhance day-use opportunities, upgrade and expand the type of overnight facilities, and provide flood mitigation. The Final EIS also analyzes the potential environmental impacts of the alternatives, including: Potential impacts to native plant communities and soils; wildlife; threatened, endangered, and special status species; floodplains; archeological resources; historic structures; cultural landscape; ethnographic resources; visitor use, experience, and safety; park operations; and socioeconomic environment.

DATES: The Record of Decision for the Cottonwood Cove and Katherine Landing Development Concept Plans will be executed not sooner than 30 days after the date of publication by the Environmental Protection Agency of its notice of filing of the Final EIS in the **Federal Register**.

ADDRESSES: The Final EIS is available for public inspection at *http://parkplanning.nps.gov.lake*, and in the office of the Superintendent, Lake Mead National Recreation Area, 601 Nevada Way, Boulder City, NV 89005, (702) 293–8920.

FOR FURTHER INFORMATION CONTACT: Mr. Jim Holland, Park Planner, Lake Mead National Recreation Area, 601 Nevada Highway, Boulder City, NV 89005, (702) 293–8986.

SUPPLEMENTARY INFORMATION: The purposes of the development concept plans are to reevaluate the implementation strategies for these two areas that were identified in the 1986 *Lake Mead National Recreation Area General Management Plan/Development Concept Plans/Final Environmental Impact Statement* (GMP), and to incorporate the concepts and carrying capacities that were approved in the 2003 *Lake Mead National Recreation Area Lake Management Plan/Final Environmental Impact Statement* (LMP). Each development concept plan provides an integrated plan for development with site-specific guidance for the extent, type, and location of facilities and services that is consistent with the management direction and intent established in the GMP and the LMP.

The GMP addressed the need to provide recreational opportunities while preserving and protecting natural and cultural resources. It established land-based management zones and included development concept plans for Cottonwood Cove and Katherine Landing that identified limits on the development, established the number and type of facilities, and addressed flood hazards. The GMP's vision for both areas was to accommodate increasing use, enhance the visitor experience, and mitigate flood hazards. The LMP established water-based management zones and provided further guidance for the long-term protection of park resources while allowing a range of recreational opportunities to support visitor needs. A number of the management actions identified in both approved plans require more site-specific development planning. There are also a number of management issues that have not been adequately addressed or resolved in the previous planning efforts and that require a more detailed examination of development and operational needs. The primary issues addressed in the Final EIS are as follows: (1) Water quality and flood control; (2) air quality; (3) socioeconomics guiding policies, regulations, and laws; and (4) Park operations methodologies and assumptions.

Decision Process: Not sooner than 30 days after the publication of the Environmental Protection Agency's notice of filing of the Final EIS in the **Federal Register**, a Record of Decision will be executed. As a delegated EIS, the official responsible for approval of the

Cottonwood Cove and Katherine Landing Development Concept Plans is the NPS Regional Director, Pacific West Region. Subsequently the official responsible for project implementation and for monitoring results is the Superintendent, Lake Mead National Recreation Area.

Dated: September 17, 2014.

Patricia L. Neubacher,

Acting Regional Director, Pacific West Region.

Notice of Meeting, Committee for the Preservation of the White House

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Committee Act (5 U.S.C. Appendix 1–16) that a meeting of the Committee for the Preservation of the White House will be held at the White House at 12:00 p.m. on Thursday, December 11, 2014.

DATES: Thursday, December 11, 2014 (Eastern).

ADDRESSES: The White House, 1600 Pennsylvania Avenue NW., Washington, DC 20500.

FOR FURTHER INFORMATION CONTACT: Comments may be provided to: John Stanwich, Executive Secretary, Committee for the Preservation of the White House, 1100 Ohio Drive SW., Washington, DC 20242, (202) 619–6344. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION: It is expected that the meeting agenda will include policies, goals, and long-range plans. The meeting will be open, but subject to appointment and security clearance requirements. Clearance information, which includes full name, date of birth, Social Security number, city and state of residence, and country of citizenship must be received by December 3, 2014. Due to the present mail delays being experienced, clearance information should be faxed to (202) 619–6353 in order to assure receipt by deadline. Inquiries may be made by calling the Committee for the Preservation of the White House between 9 a.m. and 4 p.m. weekdays at (202) 619–6344. Written comments may be sent to John Stanwich, Executive Secretary, Committee for the Preservation of the White House, 1100 Ohio Drive SW., Washington, DC 20242.

Dated: November 6, 2014 .

Alma Ripps,

Chief, Office of Policy.

Boston Harbor Islands National Recreation Area Advisory Council

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting of the Boston Harbor Islands National Recreation Area Advisory Council. The agenda includes a presentation by Cathy Stanton, anthropologist, lecturer, and writer who has been investigating the origins of the cottages located on Peddocks Island and is exploring whether this area can be classified as a ''community'' within the Boston Harbor Islands. There will also be a discussion about the Council's mission, goals, and community outreach initiative, and Superintendent Giles Parker will give updates about park operations and planning efforts.

DATES: December 10, 2014, 4:00 p.m. to 6:00 p.m. (EASTERN).

ADDRESSES: WilmerHale, 60 State Street, 26th Floor Conference Room, Boston, MA 02109.

FOR FURTHER INFORMATION CONTACT: Giles Parker, Superintendent and Designated Federal Officer (DFO), Boston Harbor Islands National Recreation Area, 15 State Street, Suite 1100, Boston, MA 02109, telephone (617) 223–8669, or email *giles_parker@nps.gov.*

SUPPLEMENTARY INFORMATION: This meeting open to the public. Those wishing to submit written comments may contact the DFO for the Boston Harbor Islands National Recreation Area Advisory Council, Giles Parker, by mail at National Park Service, Boston Harbor Islands, 15 State Street, Suite 1100, Boston, MA 02109, or via email *giles_parker@nps.gov.* Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The Council was appointed by the Director of the National Park Service pursuant to 16 U.S.C. 460kkk(g). The purpose of the Council is to advise and make recommendations to the Boston Harbor Islands Partnership with respect to the implementation of a management plan and park operations. Efforts have been made locally to ensure that the interested public is aware of the meeting dates.

Dated: November 7, 2014.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–888]

Certain Silicon Microphone Packages and Products Containing Same; Commission Determination To Review in Part a Final Initial Determination; Schedule for Filing Written Submissions on the Issues Under Review and on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review in part the final initial determination (''ID'') issued by the presiding administrative law judge (''ALJ'') finding a violation of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337) (''section 337''), in the above-referenced investigation on August 29, 2014.

FOR FURTHER INFORMATION CONTACT: Michael Liberman, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–3115. Copies of non-confidential documents filed in connection with this investigation are or will be available for

inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on July 26, 2013, based on a complaint filed by Knowles Electronics, LLC, of Itasca, Illinois. 78 FR 45272 (July 26, 2013). The notice of investigation named GoerTek, Inc. of Weifang, China and GoerTek Electronics, Inc. of Sunnyvale, California as respondents. The Commission's Office of Unfair Import Investigations is not a party to this investigation. The complaint alleged violations of section 337 in the importation into the United States, the sale for importation, and the sale within the United States after importation of silicon microphone packages and products containing the same, by reason of infringement of certain claims of U.S. Patent Nos. 7,439,616 (''the '616 patent''); 8,018,049 (''the '049 patent''); and 8,121,331 (''the '331 patent''). Subsequently, the investigation was terminated as to claims 13 and 14 of the '616 patent and claim 24 of the '049 patent based on the withdrawal of complainant's allegations as to those claims. *See* Notice (May 16, 2014) (determining not to review Order No. 37 issued on April 17, 2014).

The final ID on violation was issued on August 29, 2014. The ALJ issued his recommended determination (''RD'') on remedy, the public interest and bonding on the same day. The ALJ found that a violation of section 337 has occurred in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain silicon microphone packages and products containing same, by reason of infringement of one or more of claims 1, 2, 8, 11–12, 15–18, and 21 of the '616 patent; claims 1, 15, 16, 19, 21–23, and 25–26 of the '049 patent; and claims 1, 2, 4, 5, and 11–13 of the '331 patent. The ALJ recommended that the Commission issue a limited exclusion order directed to respondents' accused products that infringe the '616, '049, and '331 patents. The ALJ did not recommend issuance of a cease and desist order against respondents.

On October 2, 2014, complainant filed a post-RD statement on the public interest pursuant to Commission Rule 201.50(a)(4). No responses from the public were received in response to the post-RD Commission Notice issued on September 3, 2014. *See* Notice of Request for Statements on the Public Interest (Sep. 3, 2014).

Having examined the record in this investigation, including the ALJ's final ID, the petitions for review, and the responses thereto, the Commission has determined to review the ID in part. In particular, the Commission has determined to review the construction of the ''cover'' limitation with respect to the '616 and '049 patent as well as related anticipation, obviousness, infringement and technical prong analyses. In addition, the Commission has determined to review infringement with respect to claim 8 of the '616 patent.

The parties are requested to brief their positions on only the following issues, with reference to the applicable law and the evidentiary record:

(1) Please discuss whether the record supports or precludes the ALJ's interpretation of the claim limitations ''the at least one layer of conductive material in the cover'' and ''conductive layer formed in the cover'' in the '049 and '616 patents, respectively. As part of this discussion, please address:

(a) Whether the references to ''a shield to protect . . . against electromagnetic interference'' in claim 1 of the '049 patent and ''a shield against electromagnetic interference'' in claims 11 and 15 of the '616 patent provide context for interpreting the above-mentioned claim limitations; and

(b) Whether multiple layers in the cover are relevant in order to provide ''a shield to protect'' or ''a shield against'' electromagnetic interference.

(2) With respect to the '049 and '661 patents, please discuss, in light of your response to the Commission's question pertaining to construction of claim limitations ''the at least one layer of conductive material in the cover'' and ''conductive layer formed in the cover'' in the '049 and '616 patents, respectively, whether the record supports the ALJ's findings regarding these limitations with respect to infringement, technical prong, and non-obviousness, including the evidence of secondary considerations of non-obviousness.

(3) Assuming the asserted claims of the '049 patent require the presence of one or more additional layers in the cover besides ''at least one layer of conductive material,'' how does the presence of that additional material impact the respondents' allegation that the asserted claims are obvious in light of Halteren and Une under *KSR Int'l Co.* v. *Teleflex Inc.,* 550 U.S. 398 (2007)? Please provide support and citations to the evidentiary record.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue one or more cease and desist orders that could result in the respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or are likely to do so. For background, *see Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843 (Dec. 1994) (Commission Opinion).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury.

Written Submissions: The parties to the investigation are requested to file written submissions on the issues

identified in this notice. Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest and bonding. Such submissions should address the recommended determination on remedy, the public interest and bonding issued on August 29, 2014, by the ALJ. Complainant is also requested to submit proposed remedial orders for the Commission's consideration and to provide identification information for all importers of the subject articles. Complainant is further requested to provide the expiration dates of the '616, '049, and '331 patents and state the HTSUS numbers under which the accused articles are imported. The written submissions and proposed remedial orders must be filed no later than the close of business on November 20, 2014. Reply submissions must be filed no later than the close of business on December 1, 2014. No further submissions on these issues will be permitted unless otherwise ordered by the Commission. Party submissions should not exceed 50 pages for the main submissions and 25 pages for the reply submissions.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 337–TA–888'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. A redacted non-confidential version of the document must also be filed simultaneously with the confidential filing. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 06, 2014.

Lisa R. Barton,

Secretary for the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On November 6, 2014, the Department of Justice lodged a proposed consent decree with the United States District Court for the Middle District of Louisiana in the lawsuit entitled *United States and the Louisiana Department of Environmental Quality* v. *PCS Nitrogen Fertilizer, L.P., AA Sulfuric, Inc., and White Springs Agricultural Chemicals, Inc.,* Civil Action No. 3:14-cv-00707.

The United States and Louisiana Department of Environmental Quality filed this lawsuit under the Clean Air Act and Louisiana Environmental Quality Act. The complaint seeks injunctive relief and civil penalties for violations of the Clean Air Act's Prevention of Significant Deterioration requirements and related state requirements at sulfuric acid manufacturing plants owned and operated by the defendants, PCS Nitrogen Fertilizer, L.P., AA Sulfuric, Inc., and White Springs Agricultural Chemicals, Inc., in Geismar, Louisiana and White Springs, Florida. The consent decree requires the defendants to perform injunctive relief, pay a $ 1,300,000 civil penalty, and perform a Supplemental Environmental Project at a nitric acid manufacturing facility owned and operated by PCS Nitrogen Fertilizer, Inc. in Geismar, Louisiana. The consent decree also requires PCS Phosphate Company, Inc. to perform injunctive relief at the sulfuric acid manufacturing facility that it owns and operates in Aurora, North Carolina.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and the Louisiana Department of Environmental Quality* v. *PCS Nitrogen Fertilizer, L.P. et al.,* D.J. Ref. No. 90–7–1–08209/1. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By e-mail	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General U.S. DOJ—ENRD P.O. Box 7611 Washington, D.C. 20044–7611.

During the public comment period, the proposed consent decree may be examined and downloaded at this Justice Department Web site: *http://www.usdoj.gov/enrd/Consent_Decrees.html.* We will provide a paper copy of the proposed consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $43.50 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is $ 17.00.

Maureen M. Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Media General, Inc. and Lin Media LLC; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Asset Preservation Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States of America* v. *Media General, Inc. and LIN Media LLC,* Civil Action No. CV–14–01823. On October 30, 2014, the United States filed a Complaint alleging that the proposed acquisition by Media General, Inc. of LIN Media LLC would likely substantially lessen competition for broadcast television spot advertising in certain Designated Market Areas (DMAs) in the United States, in

violation of Section 7 of the Clayton Act, 15 U.S.C. 18. The proposed Final Judgment, filed on the same day as the Complaint, resolves the case by requiring Media General to divest WVTM–TV(NBC), located in the Birmingham, Alabama DMA; WJCL (ABC) and WTGS (FOX), both located in the Savannah, Georgia DMA; WALA–TV (FOX), located in the Mobile, Alabama/Pensacola, Florida DMA; WJAR (NBC), located in the Providence, Rhode Island/New Bedford, Massachusetts DMA; and WLUK–TV(FOX) and WCWF (CW), both located in the Green Bay/Appleton, Wisconsin DMA. A Competitive Impact Statement filed by the United States describes the Complaint, the proposed Final Judgment, and the industry.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection at the Department of Justice, Antitrust Division, Antitrust Documents Group, 450 Fifth Street NW., Suite 1010, Washington, DC 20530 (telephone: 202–514–2481), on the Department of Justice's Web site at *http://www.usdoj.gov/atr,* and at the Office of the Clerk of the United States District Court for the District of Columbia. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the U.S. Department of Justice, Antitrust Division's internet Web site, filed with the Court and, under certain circumstances, published in the **Federal Register** and filed with the Court. Comments should be directed to David Kully, Chief, Litigation III, Antitrust Division, Department of Justice, Washington, DC 20530, (telephone: 202–305–9969).

Patricia A. Brink,

Director of Civil Enforcement.

UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF COLUMBIA

United States of America, Department of Justice, Antitrust Division, 450 Fifth Street NW., Suite 4000, Washington, DC 20530, Plaintiff, v. *Media General, Inc., 333 E. Franklin Street, Richmond, VA 23219* and *LIN Media LLC, 701 Brazos Street, Suite 800, Austin, TX 78701,* Defendants.

Case No. 1:14–cv–01823

Judge: Hon. Emmet G. Sullivan

Filed: 10/30/2014

Complaint

The United States of America, acting under the direction of the Attorney General of the United States brings this civil action to enjoin the proposed acquisition by Media General, Inc. (''Media General'') of LIN Media LLC (''LIN'') (collectively, ''Defendants'') and to obtain other equitable relief. The proposed acquisition likely would substantially lessen competition in the sale of broadcast television spot advertising in the following Designated Market Areas (''DMAs''): Mobile, Alabama/Pensacola, Florida; Birmingham, Alabama; Savannah, Georgia; Providence, Rhode Island/New Bedford, Massachusetts; and Green Bay/Appleton, Wisconsin (collectively ''the DMA Markets''), in violation of Section 7 of the Clayton Act, 15 U.S.C. 18. Plaintiff alleges as follows:

I. Nature of the Action

1. Pursuant to a Purchase Agreement dated March 21, 2014, Media General agreed to purchase LIN whereby LIN shareholders would receive aggregate consideration valued at approximately $1.5 billion in a combination of stock and cash.

2. Media General and LIN both own and operate broadcast television stations in each of the DMA Markets. Media General's and LIN's broadcast television stations compete head-to-head for the business of local and national companies that advertise on broadcast television stations in each of the DMA Markets.

3. If consummated, the proposed acquisition would eliminate the head-to-head competition between Media General and LIN in each of the DMA Markets. Unless enjoined, the acquisition is likely to lead to higher prices and will substantially lessen competition for broadcast television spot advertising in each of the DMA Markets in violation of Section 7 of the Clayton Act, 15 U.S.C. 18.

II. Jurisdiction and Venue

4. The United States brings this action pursuant to Section 15 of the Clayton Act, as amended, 15 U.S.C. 25, to prevent and restrain Defendants from violating Section 7 of the Clayton Act, 15 U.S.C. 18.

5. Defendants sell broadcast television spot advertising, a commercial activity that substantially affects, and is in the flow of, interstate commerce. The Court has subject-matter jurisdiction over this action pursuant to Section 15 of the Clayton Act, 15 U.S.C. 25, and 28 U.S.C. 1331, 1337(a), and 1345.

6. Defendants transact business and are found in the District of Columbia, and are subject to the personal jurisdiction of this Court. Defendants have consented to venue and personal jurisdiction in this District. Therefore, venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and 28 U.S.C. 1391(c).

III. The Defendants

7. Media General is incorporated in the Commonwealth of Virginia, with its headquarters in Richmond, Virginia. Media General reported operating revenues of over $270 million in 2013. Media General owns and operates 31 broadcast television stations in 29 metropolitan areas. It owns and operates broadcast television stations in each of the DMA Markets.

8. LIN is a Delaware corporation, with its headquarters in Austin, Texas. LIN owns and operates, or provides programming, operating, or sales services to more than 50 stations in 23 metropolitan areas. It also owns and operates, or provides programming, operating, or sales services to broadcast television stations in each of the DMA Markets.

IV. Trade and Commerce

A. Broadcast Television Spot Advertising Is a Relevant Product Market

9. Broadcast television stations attract viewers through their programming, which is delivered for free over the air or retransmitted to viewers, mainly through wired cable or other terrestrial television systems and through satellite television systems. Broadcast television stations then sell advertising time to businesses that want to advertise their products to television viewers. Broadcast television ''spot'' advertising, which comprises the majority of a television station's revenues, is sold directly by the station itself or through its national representative on a localized basis and is purchased by advertisers who want to target potential customers in specific geographic areas. Spot advertising differs from network and syndicated television advertising, which are sold by television networks and producers of syndicated programs on a nationwide basis and broadcast in every market where the network or syndicated program is aired.

10. Broadcast television spot advertising possesses a unique combination of attributes that set it apart from advertising using other types of media. Television combines sight, sound, and motion, thereby creating a more memorable advertisement. Moreover, of all media, broadcast television spot advertising generally

reaches the largest percentage of all potential customers in a particular target geographic area and is therefore especially effective in introducing, establishing, and maintaining the image of a product. For a significant number of advertisers, broadcast television spot advertising, because of its unique combination of attributes, is an advertising medium for which there is no close substitute. Other media, such as radio, newspapers, or outdoor billboards, are not desirable substitutes for broadcast television advertising. None of these media can provide the important combination of sight, sound, and motion that makes television unique and impactful as a medium for advertising.

11. Like broadcast television, subscription television channels, such as those carried over cable or satellite television, combine elements of sight, sound, and motion, but they are not a desirable substitute for broadcast television spot advertising for two important reasons. First, satellite, cable, and other subscription content delivery systems do not have the ''reach'' of broadcast television. Typically, broadcast television can reach well-over 90% of homes in a DMA, while cable television often reaches many fewer homes. Even when several subscription television companies within a DMA jointly offer cable television spot advertising through a consortium called an interconnect, cable spot advertising does not match the reach of broadcast television spot advertising. As a result, an advertiser can achieve greater audience penetration through broadcast television spot advertising than through advertising on a subscription television channel. Second, because subscription services may offer more than 100 channels, they fragment the audience into small demographic segments. Because broadcast television programming typically has higher rating points than subscription television programming, broadcast television provides a much easier and more efficient means for an advertiser to reach a high proportion of its target demographic. Media buyers often buy time on subscription television channels not so much as a substitute for broadcast television, but rather to supplement a broadcast television message, to reach a narrow demographic (e.g., 18–24 year olds) with greater frequency, or to target narrow geographic areas within a DMA. A small but significant price increase by broadcast television spot advertising providers would not be made unprofitable by advertisers switching to advertising on subscription television channels.

12. Internet-based media is not currently a substitute for broadcast television spot advertising. Although Online Video Distributors (''OVDs'') such as Netflix and Hulu are important sources of video programming, as with cable television advertising, the local video advertising of OVDs lacks the reach of broadcast television spot advertising. Non-video internet advertising, e.g., Web site banner advertising, lacks the important combination of sight, sound, and motion that gives television its impact. Consequently, local media buyers currently purchase internet-based advertising primarily as a supplement to broadcast television spot advertising, and a small but significant price increase by broadcast television spot advertising providers would not be made unprofitable by advertisers switching to internet-based advertising.

13. Broadcast television stations generally can identify advertisers with strong preferences for using broadcast television advertising. Broadcast television stations negotiate prices individually with advertisers and consequently can charge different advertisers different prices. During the individualized negotiations on price and available advertising slots that commonly occur between advertisers and broadcast television stations, advertisers provide stations with information about their advertising needs, including their target audience. Broadcast television stations could profitably raise prices to those advertisers who view broadcast television as a necessary advertising medium, either as their sole means of advertising or as a necessary part of a total advertising plan.

14. Accordingly, the sale of broadcast television spot advertising is a line of commerce under Section 7 of the Clayton Act and a relevant product market for purposes of analyzing the proposed acquisition under Section 7 of the Clayton Act.

B. Each of the Divestiture Markets Is a Relevant Geographic Market

15. DMAs are geographic units defined by the A.C. Nielsen Company, a firm that surveys television viewers and furnishes broadcast television stations, advertisers, and advertising agencies in a particular area with data to aid in evaluating audience size and composition. DMAs are ranked according to the number of households they contain. Signals from broadcast television stations located in a DMA Market reach viewers located throughout the DMA, but signals from broadcast television stations located outside the DMA reach few viewers within the DMA. DMAs are used to analyze revenues and shares of broadcast television stations in the *Investing in Television BIA Market Report 2014* (1st edition), a standard industry reference.

16. Advertisers use broadcast television stations within each of the DMA Markets to reach the largest possible number of viewers across the DMA. Some of these advertisers are located in each of the DMA Markets and need to reach customers there; others are regional or national businesses that want to target consumers across each of the DMA Markets. Advertising on television stations outside each of the DMA Markets is not an alternative for these advertisers because such stations cannot be viewed by a significant number of potential customers within each of the DMAs. Thus, if there were a small but significant increase in broadcast television spot advertising prices within a specific DMA Market, an insufficient number of advertisers would switch advertising purchases to television stations outside that DMA to render the price increase unprofitable.

17. Accordingly, each of the DMA Markets is a section of the country under Section 7 of the Clayton Act and a relevant geographic market for the sale of broadcast television spot advertising for purposes of analyzing the proposed acquisition under Section 7 of the Clayton Act.

C. The Proposed Acquisition Would Harm Competition in Each of the DMA Markets

18. Broadcast television stations compete for advertisers through programming that attracts viewers to their stations. In developing their own programming and in considering the programming of the networks with which they may be affiliated, broadcast television stations try to select programs that appeal to the greatest number of viewers and to differentiate their stations from others in the same DMA by appealing to specific demographic groups. Advertisers, in turn, are interested in using broadcast television spot advertising to reach both a large audience and a high proportion of the type of viewers that are most likely to buy their products.

19. Broadcast station ownership in each of the DMA Markets is already significantly concentrated. In each of these markets, four stations, each affiliated with a major network, had more than 90 percent of gross advertising revenues in 2013. In the

Mobile, Alabama/Pensacola, Florida DMA, the three stations that Media General and LIN operate have approximately 54 percent of all television station gross advertising revenues in that DMA. In the Birmingham, Alabama DMA, the two stations that Media General and LIN operate have approximately 34 percent of all television station gross advertising revenues in that DMA. In the Savannah, Georgia DMA, the three stations that Media General and LIN operate have approximately 55 percent of all television station gross advertising revenues in that DMA. In the Providence, Rhode Island/New Bedford, Massachusetts DMA, the three stations that Media General and LIN operate have approximately 83 percent of all television station gross advertising revenues in that DMA. In the Green Bay/Appleton, Wisconsin DMA, the three stations that Media General and LIN operate have approximately 59 percent of all television station gross advertising revenues in that DMA.

20. Using the Herfindahl-Hirschman Index (''HHI''), a standard measure of market concentration (defined and explained in Appendix A), a combination of Media General's and LIN's broadcast television stations in each of the DMA markets would result in both a large change in concentration and a highly concentrated market. The post-acquisition HHI in each of the DMA Markets would be over 2500 with an increase in the HHI of more than 500 points. Under the Horizontal Merger Guidelines issued by the Department of Justice and the Federal Trade Commission, mergers resulting in highly concentrated markets (with an HHI in excess of 2500) and with an increase in the HHI of more than 200 points are presumed to be likely to enhance market power.

21. In addition to increasing concentration in the DMA Markets, the proposed transaction combines stations that are close substitutes and vigorous competitors in markets with limited alternatives. In each of the DMA Markets, Defendants have broadcast stations that are affiliated with the major national television networks, ABC, CBS, NBC, and FOX. Their respective affiliations with those networks, and their local news operations, provide Defendants' stations with a variety of competing programming options that are often each other's next-best or second-best substitutes for many viewers and advertisers.

22. Advertisers benefit from Defendants' head-to-head competition in the sale of broadcast television spot advertising in each of the DMA Markets. Advertisers purposefully spread their advertising dollars across numerous spot advertising suppliers to reach their marketing goals most efficiently. After the proposed acquisition, advertisers in each of the DMA Markets would likely find it more difficult to ''buy around'' the Defendants' combined stations in response to higher advertising rates, than to ''buy around'' Media General's stations or LIN's stations, as separate entities, as they could have done before the proposed acquisition. Because a significant number of advertisers would likely be unable to reach their desired audiences as effectively unless they advertise on at least one station that Media General would control after the proposed acquisition, those advertisers' bargaining positions would be weaker, and the advertising rates they pay would likely increase.

23. Accordingly, the proposed acquisition is likely to substantially reduce competition and will restrain trade in the sale of broadcast television spot advertising in each of the DMA Markets.

D. Lack of Countervailing Factors

1. Entry and Expansion Are Unlikely

24. De novo entry into each of the DMA Markets is unlikely. The FCC regulates entry through the issuance of broadcast television licenses, which are difficult to obtain because the availability of spectrum is limited and the regulatory process associated with obtaining a license is lengthy. Even if a new signal became available, commercial success would come, at best, over a period of many years. In each of the DMA Markets, all of the major broadcast networks (CBS, NBC, ABC, FOX) are already affiliated with a licensee, the contracts last for many years, and the broadcast networks rarely switch licensees when the contracts expire. Thus, entry into each DMA Market's broadcast television spot advertising market would not be timely, likely, or sufficient to deter Media General from engaging in anticompetitive price increases or other anticompetitive conduct after the proposed acquisition occurs.

25. Other broadcast television stations in each of the DMA Markets could not readily increase their advertising capacity or change their programming sufficiently in response to a price increase by Defendants. The number of 30-second spots in a DMA is largely fixed by programming and time constraints. This fact makes the pricing of spots very responsive to changes in demand. During so-called political years, for example, political advertisements crowd out commercial advertising and make the spots available for commercial advertisers more expensive than they would be in nonpolitical years. Adjusting programming in response to a pricing change is risky, difficult, and time-consuming. Network affiliates are often committed to the programming provided by the network with which they are affiliated, and it often takes years for a station to build its audience. Programming schedules are complex and carefully constructed, taking many factors into account, such as audience flow, station identity, and program popularity. In addition, stations typically have multi-year contractual commitments for individual shows. Accordingly, a television station is unlikely to change its programming sufficiently or with sufficient rapidity to overcome a small but significant price increase imposed by Defendants.

2. The Alleged Efficiencies Do Not Offset the Harm

26. Although Defendants assert that the proposed acquisition would produce efficiencies, they cannot demonstrate acquisition-specific and cognizable efficiencies that would be sufficient to offset the proposed acquisition's anticompetitive effects.

V. Violations Alleged

27. Plaintiff hereby repeats and realleges the allegations of paragraphs 1 through 26 as if fully set forth herein.

28. The proposed acquisition likely would lessen competition substantially in interstate trade and commerce, in violation of Section 7 of the Clayton Act, 15 U.S.C. 18. The proposed acquisition likely would have the following effects, among others:

a. Competition in the sale of broadcast television spot advertising in each of the DMA Markets would be lessened substantially;

b. competition among Media General and LIN in the sale of broadcast television spot advertising in each of the DMA Markets would be eliminated; and

c. the prices for spot advertising time on broadcast television stations in each of the DMA Markets would likely increase.

29. Unless restrained, the proposed acquisition would violate Section 7 of the Clayton Act, 15 U.S.C. 18.

VI. Request for Relief

30. Plaintiff requests:

d. That the Court adjudge the proposed merger to violate Section 7 of the Clayton Act, 15 U.S.C. 18;

e. that the Court permanently enjoin and restrain Defendants from carrying

out the transaction, or entering into any other agreement, understanding, or plan by which Media General would acquire LIN, unless Defendants divest the broadcast television stations in accordance with the proposed Final Judgment and Hold Separate Stipulation and Order filed concurrently with this Complaint;

f. that the proposed Final Judgment giving effect to the divestitures be entered by the Court after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16;

g. that the Court award Plaintiff the costs of this action; and

h. that the Court award such other relief to Plaintiff as the Court may deem just and proper.

Respectfully submitted,

For Plaintiff United States:

Appendix A—Herfindahl-Hirschman Index

The term ''HHI'' means the Herfindahl-Hirschman Index, a commonly accepted measure of market concentration. The HHI is calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. For example, for a market consisting of four firms with shares of 30, 30, 20, and 20 percent, the HHI is 2,600 ($30^2 + 30^2 + 20^2 + 20^2 = 2,600$). The HHI takes into account the relative size distribution of the firms in a market. It approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches its maximum of 10,000 points when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between those firms increases. Markets in which the HHI is between 1,500 and 2,500 points are considered to be moderately concentrated, and markets in which the HHI is in excess of 2,500 points are considered to be highly concentrated. *See* U.S. Department of Justice & FTC, *Horizontal Merger Guidelines* § 5.3 (2010). Transactions that increase the HHI by more than 200 points in highly concentrated markets presumptively raise antitrust concerns under the *Horizontal Merger Guidelines* issued by the Department of Justice and the Federal Trade Commission. *See id.*

UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF COLUMBIA

United States of America, Plaintiff, v. *Media General, Inc.,* and *LIN Media LLC, Defendants.*
Case No. 1:14–cv–01823
Judge: Hon. Emmet G. Sullivan
Filed: 10/30/2014

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act (''APPA'' or ''Tunney Act''), 15 U.S.C. 16(b)-(h), plaintiff United States of America (''United States'') files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

Defendants Media General, Inc. (''Media General'') and LIN Media LLC (''LIN'') entered into a Purchase Agreement, dated March 21, 2014, pursuant to which Media General would acquire LIN. Under the Purchase Agreement, LIN shareholders would receive approximately $1.5 billion in a combination of stock and cash. Defendants compete head-to-head in the sale of broadcast television spot advertising in the following Designated Market Areas (''DMAs''): Mobile, Alabama/Pensacola, Florida; Birmingham, Alabama; Savannah, Georgia; Providence, Rhode Island/New Bedford, Massachusetts; and Green Bay/Appleton, Wisconsin (collectively ''the DMA Markets'').

The United States filed a civil antitrust Complaint on October 30, 2014, seeking to enjoin the proposed acquisition. The Complaint alleges that the likely effect of the acquisition would be to lessen competition substantially and increase broadcast television spot advertising prices in each of the DMA Markets in violation of Section 7 of the Clayton Act, 15 U.S.C. 18.

At the same time the Complaint was filed, the United States also filed a Hold Separate Stipulation and Order (''Hold Separate'') and proposed Final Judgment, which are designed to eliminate the anticompetitive effects of the proposed acquisition. Under the proposed Final Judgment, which is explained more fully below, Defendants are required to divest the Divestiture Assets (collectively, the ''Divestiture Stations'') to Acquirers approved by the United States in a manner that preserves competition in each of the DMA Markets: WVTM–TV, located in the Birmingham, Alabama DMA; WJCL and WTGS, both located in the Savannah, Georgia DMA; WALA–TV, located in the Mobile, Alabama/Pensacola, Florida DMA; WJAR, located in the Providence, Rhode Island/New Bedford, Massachusetts DMA; and WLUK–TV and WCWF, both located in the Green Bay/Appleton, Wisconsin DMA. The Hold Separate requires Defendants to take certain steps to ensure that the Divestiture Stations are operated as competitively independent, economically viable, and ongoing businesses that will remain independent and uninfluenced by the consummation of the acquisition that competition is maintained during the pendency of the ordered divestitures.

The United States and Defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed Final Judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and to punish violations thereof.

II. Description of the Events Giving Rise to the Alleged Violation

A. The Defendants and the Proposed Acquisition

Media General is incorporated in the Commonwealth of Virginia, with its headquarters in Richmond, Virginia. Media General owns and operates 31 broadcast television stations in 29 metropolitan areas. It owns and operates broadcast television stations in each of the DMA Markets.

LIN is a Delaware corporation, with its headquarters in Austin, Texas. LIN owns and operates, or provides programming, operating, or sales services to more than 50 stations in 23 metropolitan areas. It also owns and operates, or provides programming, operating, or sales services to broadcast television stations in each of the DMA Markets.

The proposed acquisition would lessen competition substantially in the sale of broadcast television spot advertising in each of the DMA Markets. This acquisition is the subject of the Complaint and proposed Final Judgment filed by the United States on October 30, 2014.

B. Anticompetitive Consequences of the Transaction

1. The Relevant Product

The Complaint alleges that the sale of broadcast television spot advertising constitutes a relevant product market for analyzing this acquisition under Section 7 of the Clayton Act. Television stations attract viewers through their programming and then sell advertising time to businesses wanting to advertise their products to those television viewers. Advertisers purchase broadcast television spot advertising to target potential customers in specific DMAs. Spot advertising differs from network and syndicated television advertising, which are sold on a nationwide basis by major television networks and by producers of syndicated programs and are broadcast in every market area in which the network or syndicated program is aired.

Broadcast television spot advertising possesses a unique combination of attributes that sets it apart from advertising using other types of media. Television combines sight, sound, and motion, thereby creating a more memorable advertisement. Broadcast television spot advertising generally reaches the largest percentage of potential customers in a targeted geographic area and is therefore especially effective in introducing, establishing, and maintaining a product's image.

Because of this unique combination of attributes, broadcast television spot advertising has no close substitute for a significant number of advertisers. Spot advertising on subscription television channels and internet-based video advertising lack the same reach; radio spots lack the visual impact; and newspaper and billboard ads lack sound and motion, as do many internet search engine and Web site banner ads. Through information provided during individualized price negotiations, stations can readily identify advertisers with strong preferences for using broadcast television spot advertising and ultimately can charge different advertisers different prices. Consequently, a small but significant price increase in broadcast television spot advertising is unlikely to cause enough advertising customers to switch advertising purchases to other media to make the price increase unprofitable.

2. The Relevant Markets

The Complaint alleges that each of the DMA Markets constitutes a relevant geographic market for purposes of analyzing this acquisition under Section 7 of the Clayton Act. A.C. Nielsen Company defines DMAs as specific geographic units for advertising purposes. Signals from full-powered television stations in each of the DMA Markets reach viewers throughout that DMA, so advertisers can use television stations in each of the DMA Markets to target the largest possible number of viewers within each of those markets. Some of these advertisers are located in each of the DMA Markets and are trying to reach consumers that live in that specific market; others are regional or national businesses wanting to target consumers in a specific area. Advertising on television stations outside each of the DMA Markets is not an alternative for either local, regional, or national advertisers, because signals from television stations outside each of the DMA Markets reach relatively few viewers within each of those DMAs. Thus, advertising on those stations outside a DMA does not reach a significant number of potential customers within the DMA.

3. Harm to Competition in Each of the DMA Markets

The Complaint alleges that the proposed acquisition likely would lessen competition substantially in interstate trade and commerce, in violation of Section 7 of the Clayton Act, 15 U.S.C. 18, and likely would have the following effects, among others:

(a) Competition in the sale of broadcast television spot advertising in each of the DMA Markets would be lessened substantially;

(b) competition between Media General broadcast television stations and LIN broadcast television stations in the sale of broadcast television spot advertising in each of the DMA Markets would be eliminated; and

(c) the prices for spot advertising time on broadcast television stations in each of the DMA Markets likely would increase.

Both Defendants own and operate network-affiliated broadcast television stations in each of the DMA Markets. The acquisition, by eliminating LIN as a separate competitor and combining its operations with Media General, would allow the combined entity to increase its market share of the broadcast television spot advertising and revenues in each of the DMA Markets. In the Mobile, Alabama/Pensacola, Florida DMA, combining the three stations that Defendants operate would give Media General approximately 54 percent of all television station gross advertising revenues in that DMA. In the Birmingham, Alabama DMA, combining the two stations that Defendants operate would give Media General approximately 34 percent of all television station gross advertising revenues in that DMA. In the Savannah, Georgia DMA, combining the three stations that Defendants operate would give Media General approximately 55 percent of all television station gross advertising revenues in that DMA. In the Providence, Rhode Island/New Bedford, Massachusetts DMA, combining the three stations that Defendants operate would give Media General approximately 83 percent of all television station gross advertising revenues in that DMA. Finally, in the Green Bay/Appleton, Wisconsin DMA, combining the three stations that Defendants operate would give Media General approximately 59 percent of all television station gross advertising revenues in that DMA. In addition to increasing Media General's share of broadcast television spot advertising revenue in each of the DMA Markets, the proposed acquisition would increase substantially its concentration in each of the DMA Markets.

Using the Herfindahl-Hirschman Index (''HHI''), a standard measure of market concentration (defined and explained in Appendix A to the Complaint), the post-acquisition HHI in each of the DMA Markets would be over 2500 with an increase in the HHI of more than 500 points in each of those markets. Under the Horizontal Merger Guidelines issued by the Department of Justice and Federal Trade Commission, mergers resulting in highly concentrated markets (with an HHI in excess of 2500) with an increase in the HHI of more than 200 points are presumed to be likely to enhance market power.

The transaction also combines stations that are close substitutes and vigorous competitors in a product market with limited alternatives. In each of the DMA Markets, Defendants have broadcast stations that are affiliated with the major national television networks, ABC, CBS, NBC, and FOX. Their respective affiliations with those networks, and their local news operations, provide Defendants' stations with a variety of competing programming options that are often each other's next-best or second-best substitutes for viewers and advertisers.

Currently, Defendants' stations that overlap in the same DMA Market compete for the business of local, regional, and national firms seeking to advertise on broadcast television stations. Advertisers benefit from this competition. Thus, the proposed acquisition is likely to eliminate this head-to-head competition and therefore, could enable Defendants to raise prices for broadcast spot advertising.

4. Lack of Countervailing Factors

The Complaint alleges that entry or expansion in each of the DMA Markets' television spot advertising market would not be timely, likely, or sufficient to prevent any anticompetitive effects. New entry is unlikely since any new station would require an FCC license, which is difficult to obtain. Even if a new station became operational, commercial success would come over a period of many years. The number of 30-second spots available at a station is generally fixed, and additional slots cannot be created. Adjusting programming in response to a pricing change is difficult and time-consuming. Programming schedules are complex and carefully constructed, and television stations often have multi-year contractual commitments for individual shows or are otherwise committed to programming provided by their affiliated network. Accordingly, other television stations in each of the DMA Markets could not readily increase their advertising capacity or change their programming in response to a small but significant price increase by Media General.

III. Explanation of the Proposed Final Judgment

The divestiture requirement of the proposed Final Judgment will eliminate the anticompetitive effects of the transaction in each of the DMA Markets by maintaining the Divestiture Stations as independent, economically viable competitors.[1] The proposed Final Judgment requires Defendants to make the following divestitures: To Hearst Television: WVTM–TV, located in Birmingham, Alabama and WJCL, located in Savannah, Georgia; to Meredith Corporation: WALA–TV, located in Mobile, Alabama; and to Sinclair Broadcast Group: WJAR, located in Providence, Rhode Island, WLUK–TV and WCWF, both located in Green Bay, Wisconsin, and WTGS, located in Savannah, Georgia.[2] The United States has approved each of these divestitures in order to provide greater certainty and efficiency in the divestiture process. Defendants must take all reasonable steps necessary to accomplish the divestiture quickly. If Defendants do not sell the assets to the approved buyers, they shall cooperate with prospective purchasers to accomplish the divestiture expeditiously to other Acquirers in such a way as to satisfy the United States in its sole discretion that the Divestiture Stations can and will be operated by a purchaser as a viable, ongoing business that can compete effectively in the relevant market.

The ''Divestiture Assets'' are defined in Paragraph II.O of the proposed Final Judgment to include all assets principally devoted to and necessary for the operation of the Divestiture Stations. These Divestiture Assets are essentially the same assets that Defendants would have operated under the Asset Purchase Agreement. The assets include real property, equipment, FCC licenses, contracts, intellectual property rights, programming materials, and customer lists maintained by Media General or LIN in connection with each of the Divestiture Stations. These do not include assets that are not principally devoted to or necessary for the operation of each of the Divestiture Stations, but are used to support multiple stations. Thus, Media General will be able to retain back-office systems or other assets and contracts used to support multiple broadcast television stations, and which an Acquirer with experience operating broadcast television stations can supply for itself.

To ensure that each of the Divestiture Stations is operated as an independent, economically viable competitor after the divestitures, Section XI of the proposed Final Judgment prohibit Defendants from entering into any agreements during the term of the Final Judgment that create a long-term relationship with any of the Acquirers of the Divestiture Stations after the divestitures are completed. Examples of prohibited agreements include options to repurchase or assign interests in any of the Divestiture Stations; agreements to provide financing or guarantees for financing; local marketing agreements, joint sales agreements, or any other cooperative selling arrangements; shared services agreements; and agreements to jointly conduct any business negotiations with the Acquirers with respect to any of the Divestiture Stations. This shared services prohibition does not preclude agreements limited to helicopter sharing and stock video pooling in the forms that are customary in the industry. It also does not preclude other non-sales-related agreements approved in advance by the United States in its sole discretion. These limited exceptions do not permit Defendants to enter into broad news-sharing agreements with respect to any of the Divestiture Stations. The United States in its sole discretion may approve in writing of any transition services agreement that may be necessary to facilitate the continuous operations of the Divestiture Assets until the Acquirers can provide such capabilities independently. The terms and conditions of any such transition services agreement shall be subject to the approval of the United States, in its sole discretion. These transition services agreements will allow each of the Divestiture Stations to continue its operations as an independent, ongoing, economically viable, and active competitor in the broadcast television spot advertising business.

Defendants are required to take all steps reasonably necessary to accomplish the divestitures quickly and to cooperate with prospective purchasers. Because transferring the broadcast license for each of the Divestiture Stations requires FCC approval, Defendants are specifically required to use their best efforts to obtain all necessary FCC approvals as expeditiously as possible. The divestiture of each of the Divestiture Stations must occur within ninety (90) calendar days after the filing of the Hold Separate in this matter or five (5) calendar days after notice that the Court has entered the Final Judgment, whichever is later, subject to Defendants' receipt of any necessary FCC order pertaining to the divestiture. The United States, in its sole discretion, may agree to one or more extensions of this time period not to exceed sixty (60) calendar days in total, and shall notify the Court in such circumstances. If FCC applications to assign or transfer licenses to the Acquirers of the Divestiture Stations have been filed within the period permitted for divestiture, but an order or other

[1] The United States' evaluation of the merger of Media General and LIN concerned the likely competitive effects of the merger, and did not consider whether pre-existing agreements among participants in the DMA Markets might restrain competition. For instance, the United States is aware that, before Defendants entered their agreement to merge, LIN had a pre-existing local marketing agreement (LMA) in Providence with the owner of the Fox affiliate. Following the divestitures required under the proposed Final Judgment, Media General will replace LIN under the LMA. Because the United States has not investigated the competitive effects of these agreements as part of its evaluation of the merger, the proposed Final Judgment does not address them. We understand, however, that LMAs or other agreements in these markets may be subject to the requirements established in the Federal Communications Commission's Report and Order in its *2014 Quadrennial Regulatory Review—Review of the Commission's Broadcast Ownership Rules and Other Rules Adopted Pursuant to Section 202 of the Telecommunications Act of 1996,* MB Docket No. 14–50, FCC 14–28 (Apr. 15, 2014).

[2] Vaughan Acquisition LLC owns certain equity interests in WTGS, and Defendant LIN holds an option to purchase Vaughan's equity interests in WTGS. LIN and Vaughan have entered into an Option Exercise Agreement pursuant to which LIN will exercise its option for Sinclair's benefit upon consummation of Media General's merger with LIN.

dispositive action by FCC on such applications has not been issued before the end of the period permitted for divestiture, the period shall be extended with respect to divestiture of the Divestiture Stations for which no FCC order has issued until five (5) days after such order is issued.

If the divestitures do not occur within the prescribed timeframe in Section VI (A) of the proposed Final Judgment, the proposed Final Judgment provides that the Court, upon application of the United States, will appoint a Divestiture Trustee selected by the United States to sell any of the Divestiture Stations that have not been divested. The Defendants will pay all costs and expenses of the Divestiture Trustee. The Divestiture Trustee's commission will be structured to provide an incentive for the Divestiture Trustee based on the price obtained and the speed with which the divestiture is accomplished. The Divestiture Trustee would file monthly reports with the Court and the United States describing efforts to divest the remaining stations. If the divestiture has not been accomplished after six (6) months, the Divestiture Trustee and the United States will make recommendations to the Court, which shall enter such orders as appropriate, to carry out the purpose of the trust.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys' fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage action. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgment has no prima facie effect in any subsequent private lawsuit that may be brought against Defendants.

V. Procedures Available for Modification of the Proposed Final Judgment

The United States and Defendants have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry upon the Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**, or the last date of publication in a newspaper of the summary of this Competitive Impact Statement, whichever is later. All comments received during this period will be considered by the U.S. Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to the Court's entry of judgment. The comments and the response of the United States will be filed with the Court. In addition, comments will be posted on the United States Department of Justice, Antitrust Division's internet Web site and, under certain circumstances, published in the **Federal Register**.

Written comments should be submitted to: David C. Kully, Chief, Litigation III Section, Antitrust Division, United States Department of Justice, 450 5th Street NW., Suite 4000, Washington, DC 20530. The proposed Final Judgment provides that the Court retains jurisdiction over this action, and Defendants may apply to the Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. Alternatives to the Proposed Final Judgment

The United States considered, as an alternative to the proposed Final Judgment, a full trial on the merits against Defendants. The United States could have continued the litigation and sought preliminary and permanent injunctions against Media General's acquisition of LIN. The United States is satisfied, however, that the divestiture of assets described in the proposed Final Judgment will preserve competition for the sale of broadcast television spot advertising in each of the DMA Markets. Thus, the proposed Final Judgment would achieve all or substantially all of the relief the United States would have obtained through litigation, but avoids the time, expense, and uncertainty of a full trial on the merits of the Complaint.

VII. Standard of Review Under the APPA for the Proposed Final Judgment

The Clayton Act, as amended by the APPA, requires that proposed consent judgments in antitrust cases brought by the United States be subject to a sixty-day comment period, after which the court shall determine whether entry of the proposed Final Judgment ''is in the public interest.'' 15 U.S.C. 16(e)(1). In making that determination, the court, in accordance with the statute as amended in 2004, is required to consider:

> (A) The competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration of relief sought, anticipated effects of alternative remedies actually considered, whether its terms are ambiguous, and any other competitive considerations bearing upon the adequacy of such judgment that the court deems necessary to a determination of whether the consent judgment is in the public interest; and
>
> (B) the impact of entry of such judgment upon competition in the relevant market or markets, upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. 16(e)(1)(A) & (B). In considering these statutory factors, the court's inquiry is necessarily a limited one as the government is entitled to ''broad discretion to settle with the defendant within the reaches of the public interest.'' *United States* v. *Microsoft Corp.,* 56 F.3d 1448, 1461 (D.C. Cir. 1995); *see generally United States* v. *SBC Commc'ns, Inc.,* 489 F. Supp. 2d 1 (D.D.C. 2007) (assessing public interest standard under the Tunney Act); *United States* v. *InBev N.V./S.A.,* 2009–2 Trade Cas. (CCH) ¶ 76,736, 2009 U.S. Dist. LEXIS 84787, No. 08–1965 (JR), at *3, *InBev N.V./S.A.,* 2009–2 Trade Cas. (CCH) ¶ 76,736, 2009 U.S. Dist. LEXIS 84787, No. 08–1965 (JR), at *3, (D.D.C. Aug. 11, 2009) (noting that the court's review of a consent judgment is limited and only inquires ''into whether the government's determination that the proposed remedies will cure the antitrust violations alleged in the complaint was reasonable, and whether the mechanism to enforce the final judgment are clear and manageable.'').[3]

As the United States Court of Appeals for the District of Columbia Circuit has held, under the APPA a court considers, among other things, the relationship between the remedy secured and the specific allegations set forth in the government's complaint, whether the decree is sufficiently clear, whether enforcement mechanisms are sufficient,

[3] The 2004 amendments substituted ''shall'' for ''may'' in directing relevant factors for court to consider and amended the list of factors to focus on competitive considerations and to address potentially ambiguous judgment terms. *Compare* 15 U.S.C. 16(e) (2004) *with* 15 U.S.C. 16(e)(1) (2006); *see also SBC Commc'ns,* 489 F. Supp. 2d at 11 (concluding that the 2004 amendments ''effected minimal changes'' to Tunney Act review).

and whether the decree may positively harm third parties. *See Microsoft,* 56 F.3d at 1458–62. With respect to the adequacy of the relief secured by the decree, a court may not ''engage in an unrestricted evaluation of what relief would best serve the public.'' *United States* v. *BNS, Inc.,* 858 F.2d 456, 462 (9th Cir. 1988) (quoting *United States* v. *Bechtel Corp.,* 648 F.2d 660, 666 (9th Cir. 1981)); *see also Microsoft,* 56 F.3d at 1460–62; *United States* v. *Alcoa, Inc.,* 152 F. Supp. 2d 37, 40 (D.D.C. 2001); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *3. Courts have held that:

> [t]he balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is ''*within the reaches of the public interest.''* More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.

Bechtel, 648 F.2d at 666 (emphasis added) (citations omitted).[4] In determining whether a proposed settlement is in the public interest, a district court ''must accord deference to the government's predictions about the efficacy of its remedies, and may not require that the remedies perfectly match the alleged violations.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17; *see also U.S. Airways,* 2014 U.S. Dist. LEXIS 57801, at *16 (noting that a court should not reject the proposed remedies because it believes others are preferable); *Microsoft,* 56 F.3d at 1461 (noting the need for courts to be ''deferential to the government's predictions as to the effect of the proposed remedies''); *United States* v. *Archer-Daniels-Midland Co.,* 272 F. Supp. 2d 1, 6 (D.D.C. 2003) (noting that the court should grant due respect to the United States' prediction as to the effect of proposed remedies, its perception of the market structure, and its views of the nature of the case).

Courts have greater flexibility in approving proposed consent decrees than in crafting their own decrees following a finding of liability in a litigated matter. ''[A] proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is 'within the reaches of public interest.' '' *United States* v. *Am. Tel. & Tel. Co.,* 552 F. Supp. 131, 151 (D.D.C. 1982) (citations omitted) (quoting *United States* v. *Gillette Co.,* 406 F. Supp. 713, 716 (D. Mass. 1975)), *aff'd sub nom. Maryland* v. *United States,* 460 U.S. 1001 (1983); *see also U.S. Airways,* 2014 U.S. Dist. LEXIS 57801, at *8 (noting that room must be made for the government to grant concessions in the negotiation process for settlements (citing *Microsoft,* 56 F.3d at 1461); *United States* v. *Alcan Aluminum Ltd.,* 605 F. Supp. 619, 622 (W.D. Ky. 1985) (approving the consent decree even though the court would have imposed a greater remedy). To meet this standard, the United States ''need only provide a factual basis for concluding that the settlements are reasonably adequate remedies for the alleged harms.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17.

Moreover, the court's role under the APPA is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its Complaint, and does not authorize the court to ''construct [its] own hypothetical case and then evaluate the decree against that case.'' *Microsoft,* 56 F.3d at 1459; *see also U.S. Airways,* 2014 U.S. Dist. LEXIS 57801, at *9 (noting that the court must simply determine whether there is a factual foundation for the government's decisions such that its conclusions regarding the proposed settlements are reasonable; *InBev,* 2009 U.S. Dist. LEXIS 84787, at *20 (''the 'public interest' is not to be measured by comparing the violations alleged in the complaint against those the court believes could have, or even should have, been alleged''). Because the ''court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place,'' it follows that ''the court is only authorized to review the decree itself,'' and not to ''effectively redraft the complaint'' to inquire into other matters that the United States did not pursue. *Microsoft,* 56 F.3d at 1459–60. As this Court recently confirmed in *SBC Communications,* courts ''cannot look beyond the complaint in making the public interest determination unless the complaint is drafted so narrowly as to make a mockery of judicial power.'' *SBC Commc'ns,* 489 F. Supp. 2d at 15.

In its 2004 amendments, Congress made clear its intent to preserve the practical benefits of utilizing consent decrees in antitrust enforcement, adding the unambiguous instruction that ''[n]othing in this section shall be construed to require the court to conduct an evidentiary hearing or to require the court to permit anyone to intervene.'' 15 U.S.C. 16(e)(2); *see also U.S. Airways,* 2014 U.S. Dist. LEXIS 57801, at *9 (indicating that a court is not required to hold an evidentiary hearing or to permit intervenors as part of its review under the Tunney Act). The language wrote into the statute what Congress intended when it enacted the Tunney Act in 1974, as Senator Tunney explained: ''[t]he court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process.'' 119 Cong. Rec. 24,598 (1973) (statement of Sen. Tunney). Rather, the procedure for the public interest determination is left to the discretion of the court, with the recognition that the court's ''scope of review remains sharply proscribed by precedent and the nature of Tunney Act proceedings.'' *SBC Commc'ns,* 489 F. Supp. 2d at 11.[5] A court can make its public interest determination based on the competitive impact statement and response to public comments alone. *U.S. Airways,* 2014 U.S. Dist. LEXIS 57801, at *9.

VIII. Determinative Documents

There are no determinative materials or documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment.

* Attorney of Record

UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF COLUMBIA

United States of America, Plaintiff, v. *Media General, Inc.,* and *LIN Media LLC,* Defendants.

Case No. 1:14-cv-01823
Judge: Hon. Emmet G. Sullivan
Filed: 10/30/2014

Proposed Final Judgment

WHEREAS, plaintiff, the United States of America filed its Complaint on October 30, 2014, and Defendant Media General, Inc. (''Media General'') and Defendant LIN Media LLC (''LIN''), by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or admission by any party regarding any issue of fact;

AND WHEREAS, Defendants agree to be bound by the provisions of this Final Judgment pending its approval by the Court;

AND WHEREAS, the essence of this Final Judgment is the prompt and certain divestiture of certain rights or assets by the Defendants to assure that competition is not substantially lessened;

AND WHEREAS, the United States requires Defendants to make certain divestitures for the purpose of remedying the loss of competition alleged in the Complaint;

AND WHEREAS, Defendants have represented to the United States that the divestitures required below can and will be made and that Defendants will later raise no claim of hardship or difficulty as grounds for asking the Court to modify any of the divestiture provisions contained below;

NOW THEREFORE, before any testimony is taken, without trial or adjudication of any issue of fact or law, and upon consent of the parties, it is ORDERED, ADJUDGED, AND DECREED:

I. Jurisdiction

This Court has jurisdiction over each of the parties hereto and over the subject matter of this action. The Complaint states a claim upon which relief may be granted against Defendants under Section 7 of the Clayton Act, as amended, 15 U.S.C. 18.

II. Definitions

As used in this Final Judgment:

A. ''Media General'' means Defendant Media General, Inc., a Virginia corporation headquartered in Richmond, Virginia, its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.'

B. ''LIN'' means Defendant LIN Media LLC, a Delaware corporation headquartered in Austin, Texas, its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.

C. ''Acquirer'' means Hearst Television Inc., Meredith Corporation, Sinclair Broadcast Group, Inc., or another entity to whom Defendants divest any of the Divestiture Assets.

D. ''Hearst'' means Hearst Television Inc., a Delaware corporation headquartered in New York, NY, its successor and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.

E. ''Meredith'' means Meredith Corporation, an Iowa corporation headquartered in Des Moines, IA, its successor and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.

F. ''Sinclair'' means Sinclair Broadcast Group, Inc., a Maryland corporation headquartered in Hunt Valley, Maryland, its successor and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.

G. ''DMA'' means Designated Market Area as defined by A.C. Nielsen Company based upon viewing patterns and used by the *Investing in Television BIA Market Report 2014* (1st edition). DMAs are ranked according to the number of households therein and are used by broadcasters, advertisers, and advertising agencies to aid in evaluating television audience size and composition.

H. ''WVTM–TV'' means the NBC-affiliated broadcast television station located in the Birmingham, Alabama DMA owned by Defendant Media General.

I. ''WJCL'' means the ABC-affiliated broadcast television station located in the Savannah, Georgia DMA owned by Defendant LIN.

J. ''WALA–TV'' means the Fox-affiliated broadcast television station located in the Mobile, Alabama/Pensacola, Florida DMA owned by Defendant LIN.

K. ''WJAR'' means the NBC-affiliated broadcast television station located in the Providence, Rhode Island/New Bedford, Massachusetts DMA owned by Defendant Media General.

L. ''WLUK–TV'' means the Fox-affiliated broadcast television station located in the Green Bay/Appleton, Wisconsin DMA owned by Defendant LIN.

M. ''WCWF'' means the CW-affiliated broadcast television station located in the Green Bay/Appleton, Wisconsin DMA owned by Defendant LIN.

N. ''WTGS'' means the Fox-affiliated broadcast television station located in the Savannah, Georgia DMA.

O. ''Divestiture Assets'' means all assets, tangible or intangible, principally devoted to and necessary for the

operations of WVTM–TV, WJCL, WALA–TV, WJAR, WLUK–TV, WCWF, and WTGS as viable, ongoing commercial broadcast television stations, including, but not limited to, all real property (owned or leased) principally devoted to and necessary for the operation of the stations, all broadcast equipment, office equipment, office furniture, fixtures, materials, supplies, and other tangible property principally devoted to and necessary for the operation of the stations; all licenses, permits, authorizations, and applications therefore issued by the Federal Communications Commission (''FCC'') and other government agencies related to the stations; all contracts (including programming contracts and rights), agreements, network affiliation agreements, leases, and commitments and understandings of Defendants principally devoted to and necessary for the operation of the stations; all trademarks, service marks, trade names, copyrights, patents, slogans, programming materials, and promotional materials relating to the stations; all customer lists, contracts, accounts, and credit records; and all logs and other records maintained by Defendants in connection with the stations.

III. Applicability

A. This Final Judgment applies to Defendants, and all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

B. If, prior to complying with Sections IV and V of this Final Judgment, Defendants sell or otherwise dispose of all or substantially all of their assets or of lesser business units that include the Defendants' Divestiture Assets, they shall require the purchaser to be bound by the provisions of this Final Judgment. Defendants need not obtain such an agreement from the Acquirers of the assets divested pursuant to this Final Judgment.

IV. Divestitures

A. Defendants are ordered and directed, within ninety (90) calendar days after the filing of the Hold Separate Stipulation and Order in this matter or five (5) calendar days after notice of the entry of this Final Judgment by the Court, whichever is later, to divest the Divestiture Assets to one or more Acquirers acceptable to the United States, in its sole discretion. The United States, in its sole discretion, may agree to one or more extensions of this time period not to exceed sixty (60) calendar days in total, and shall notify the Court in such circumstances. With respect to divestiture of the Divestiture Assets by Defendants or a Divestiture Trustee appointed pursuant to Section V of this Final Judgment, if applications have been filed with the FCC within the period permitted for divestiture seeking approval to assign or transfer licenses to the Acquirers of the Divestiture Assets, but an order or other dispositive action by the FCC on such applications has not been issued before the end of the period permitted for divestiture, the period shall be extended with respect to divestiture of the Divestiture Assets for which no FCC order has issued until five (5) days after such order is issued. Defendants agree to use their best efforts to divest the Divestiture Assets as expeditiously as possible, including using their best efforts to obtain all necessary FCC approvals as expeditiously as possible. This Final Judgment does not limit the FCC's exercise of its regulatory powers and process with respect to the Divestiture Assets. Authorization by the FCC to conduct the divestiture of a Divestiture Asset in a particular manner will not modify any of the requirements of this Final Judgment.

B. The United States in its sole discretion may approve in writing of any transition services agreement that may be necessary to facilitate the continuous operations of the Divestiture Assets until the Acquirers can provide such capabilities independently. The terms and conditions of any such transition services agreement shall be subject to the approval of the United States, in its sole discretion.

C. In the event that Defendants are attempting to divest assets related to WVTM–TV and WJCL to an Acquirer other than Hearst, assets related to WALA–TV to an Acquirer other than Meredith, or assets related to WJAR, WLUK–TV, WCWF, and WTGS to an Acquirer other than Sinclair:

(1) Defendants, in accomplishing the divestitures ordered by this Final Judgment, promptly shall make known, by usual and customary means, the availability of the Divestiture Assets not yet divested;

(2) Defendants shall inform any person making inquiry regarding a possible purchase of the applicable Divestiture Assets that they are being divested pursuant to this Final Judgment and provide that person with a copy of this Final Judgment;

(3) Defendants shall offer to furnish to all prospective Acquirers, subject to customary confidentiality assurances, all information and documents relating to the applicable Divestiture Assets customarily provided in a due diligence process except such information or documents subject to the attorney-client privilege or work-product doctrine; and

(4) Defendants shall make available such information to the United States at the same time that such information is made available to any other person.

D. Defendants shall provide the Acquirers and the United States information relating to the personnel involved in the operation and management of the applicable Divestiture Assets to enable the Acquirers to make offers of employment. Defendants shall not interfere with any negotiations by the Acquirers to employ or contract with any employee of any Defendant whose primary responsibility relates to the operation or management of the applicable Divestiture Assets being sold by the Acquirers.

E. Defendants shall permit the Acquirers of the Divestiture Assets to have reasonable access to personnel and to make inspections of the physical facilities of the applicable stations; access to any and all environmental, zoning, and other permit documents and information; and access to any and all financial, operational, or other documents and information customarily provided as part of a due diligence process.

F. Defendants shall warrant to the Acquirers that each Divestiture Asset will be operational on the date of sale.

G. Defendants shall not take any action that will impede in any way the permitting, operation, or divestiture of the Divestiture Assets.

H. Defendants shall warrant to the Acquirers that there are no material defects in the environmental, zoning, or other permits pertaining to the operation of each asset, and that, following the sale of the Divestiture Assets, Defendants will not undertake, directly or indirectly, any challenges to the environmental, zoning, or other permits relating to the operation of the Divestiture Assets.

I. Unless the United States otherwise consents in writing, the divestitures pursuant to Section IV, or by trustee appointed pursuant to Section V of this Final Judgment, shall include the entire Divestiture Assets and be accomplished in such a way as to satisfy the United States, in its sole discretion, that the Divestiture Assets can and will be used by the Acquirers as part of a viable, ongoing commercial television broadcasting business. Divestiture of the Divestiture Assets may be made to one or more Acquirers, provided that in each instance it is demonstrated to the sole satisfaction of the United States that the Divestiture Assets will remain

viable, and the divestiture of such assets will achieve the purposes of this Final Judgment and remedy the competitive harm alleged in the Complaint. The divestitures, whether pursuant to Section IV or Section V of this Final Judgment:

(1) Shall be made to Acquirers that, in the United States' sole judgment, have the intent and capability (including the necessary managerial, operational, technical, and financial capability) of competing effectively in the commercial television broadcasting business; and

(2) shall be accomplished so as to satisfy the United States, in its sole discretion, that none of the terms of any agreement between Acquirers and Defendants gives Defendants the ability unreasonably to raise any of the Acquirers' costs, to lower any of the Acquirers' efficiency, or otherwise to interfere in the ability of any of the Acquirers to compete effectively.

V. Appointment of Trustee

A. If Defendants have not divested the Divestiture Assets within the time period specified in Section IV(A), Defendants shall notify the United States of that fact in writing, specifically identifying the Divestiture Assets that have not been divested. Upon application of the United States, the Court shall appoint a Divestiture Trustee selected by the United States and approved by the Court to effect the divestiture of the Divestiture Assets that have not yet been divested.

B. After the appointment of a Divestiture Trustee becomes effective, only the Divestiture Trustee shall have the right to sell the applicable Divestiture Assets. The Divestiture Trustee shall have the power and authority to accomplish the divestiture to an Acquirer acceptable to the United States at such price and on such terms as are then obtainable upon reasonable effort by the trustee, subject to the provisions of Sections IV, V, and VI of this Final Judgment, and shall have such other powers as this Court deems appropriate. Subject to Section V(D) of this Final Judgment, the Divestiture Trustee may hire at the cost and expense of Defendants any investment bankers, attorneys, or other agents, who shall be solely accountable to the trustee, reasonably necessary in the trustee's judgment to assist in the divestiture. Any such investment bankers, attorneys, or other agents shall serve on such terms and conditions as the United States approves, including confidentiality requirements and conflict of interest certifications.

C. Defendants shall not object to a sale by the trustee on any ground other than the trustee's malfeasance. Any such objections by Defendants must be conveyed in writing to the United States and the Divestiture Trustee within ten (10) calendar days after the trustee has provided the notice required under Section VI.

D. The Divestiture Trustee shall serve at the cost and expense of Defendants pursuant to a written agreement, on such terms and conditions as the United States approves, including confidentiality requirements and conflict of interest certifications. The trustee shall account for all monies derived from the sale of the applicable Divestiture Assets and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services yet unpaid and those of any professionals and agents retained by the trustee, all remaining money shall be paid to Defendants and the trust shall then be terminated. The compensation of the Divestiture Trustee and any professionals and agents retained by the trustee shall be reasonable in light of the value of the Divestiture Assets subject to sale by the Divestiture Trustee and based on a fee arrangement providing the trustee with an incentive based on the price and terms of the divestiture and the speed with which it is accomplished, but timeliness is paramount. If the Divestiture Trustee and Defendants are unable to reach agreement on the trustee's or any agents' or consultants' compensation or other terms and conditions of engagement within 14 calendar days of appointment of the trustee, the United States may, in its sole discretion, take appropriate action, including making a recommendation to the Court. The Divestiture Trustee shall, within three (3) business days of hiring any other professionals or agents, provide written notice of such hiring and the rate of compensation to Defendants and the United States.

E. Defendants shall use their best efforts to assist the Divestiture Trustee in accomplishing the required divestiture. The Divestiture Trustee and any consultants, accountants, attorneys, and other agents retained by the trustee shall have full and complete access to the personnel, books, records, and facilities of the business to be divested, and Defendants shall develop financial and other information relevant to such business as the trustee may reasonably request, subject to reasonable protection for trade secret or other confidential research, development, or commercial information or any applicable privileges. Defendants shall take no action to interfere with or to impede the Divestiture Trustee's accomplishment of the divestiture.

F. After its appointment, the Divestiture Trustee shall file monthly reports with the United States and, as appropriate, the Court setting forth the trustee's efforts to accomplish the applicable divestiture ordered under this Final Judgment. To the extent such reports contain information that the Divestiture Trustee deems confidential, such report shall not be filed in the public docket of the Court. Such report shall include the name, address, and telephone number of each person who, during the preceding month, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the Divestiture Assets, and shall describe in detail each contact with any such person. The Divestiture Trustee shall maintain full records of all efforts made to divest the applicable Divestiture Assets.

G. If the Divestiture Trustee has not accomplished any applicable divestiture ordered under this Final Judgment within six (6) months after its appointment, the trustee shall promptly file with the Court a report setting forth (1) the trustee's efforts to accomplish the required divestiture, (2) the reasons, in the trustee's judgment, why the required divestiture has not been accomplished, and (3) the trustee's recommendations. To the extent such report contains information that the Divestiture Trustee deems confidential, such report shall not be filed in the public docket of the Court. The Divestiture Trustee shall at the same time furnish such report to the United States which shall have the right to make additional recommendations consistent with the purpose of the trust. The Court thereafter shall enter such orders as it shall deem appropriate to carry out the purpose of the Final Judgment, which may, if necessary, include extending the trust and the term of the Divestiture Trustee's appointment by a period requested by the United States.

H. If the United States determines that the Divestiture Trustee has ceased to act or failed to act diligently or in a reasonably cost-effective manner, it may recommend the Court appoint a substitute Divestiture Trustee.

VI. Notice of Proposed Divestiture

A. Within two (2) business days following execution of a definitive divestiture agreement, Defendants or the Divestiture Trustee, whichever is then responsible for effecting the divestitures required herein, shall notify the United States of any proposed divestiture

required by Section IV or V of this Final Judgment. If the Divestiture Trustee is responsible, it shall similarly notify Defendants. The notice shall set forth the details of the proposed divestiture and list the name, address, and telephone number of each person not previously identified who offered or expressed an interest in or desire to acquire any ownership interest in the Divestiture Assets, together with full details of the same.

B. Within fifteen (15) calendar days of receipt by the United States of such notice, the United States may request from Defendants, the proposed Acquirer, any other third party, or the Divestiture Trustee, if applicable, additional information concerning the proposed divestiture, the proposed Acquirer, and any other potential Acquirers. Defendants and the Divestiture Trustee shall furnish any additional information requested within fifteen (15) calendar days of the receipt of the request, unless the parties shall otherwise agree.

C. Within thirty (30) calendar days after receipt of the notice or within twenty (20) calendar days after the United States has been provided the additional information requested from Defendants, the proposed Acquirer, any third party, and the Divestiture Trustee, whichever is later, the United States shall provide written notice to Defendants and the Divestiture Trustee, if there is one, stating whether or not it objects to the proposed divestiture. If the United States provides written notice that it does not object, the divestiture may be consummated, subject only to Defendants' limited right to object to the sale under Section V(C) of this Final Judgment. Absent written notice that the United States does not object to the proposed Acquirer or upon objection by the United States, a divestiture proposed under Section IV or Section V shall not be consummated. Upon objection by Defendants under Section V(C), a divestiture proposed under Section V shall not be consummated unless approved by the Court.

VII. Financing

Defendants shall not finance all or any part of any purchase made pursuant to Section IV or V of this Final Judgment.

VIII. Hold Separate

Until the divestitures required by this Final Judgment has been accomplished, Defendants shall take all steps necessary to comply with the Hold Separate Stipulation and Order entered by this Court. Defendants shall take no action that would jeopardize the divestiture ordered by this Court.

IX. Affidavits

A. Within twenty (20) calendar days of the filing of the Complaint in this matter, and every thirty (30) calendar days thereafter until the divestiture has been completed under Section IV or V of this Final Judgment, Defendants shall deliver to the United States an affidavit as to the fact and manner of their compliance with Section IV or V of this Final Judgment. Each such affidavit shall include the name, address, and telephone number of each person who, during the preceding thirty (30) calendar days, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the Divestiture Assets, and shall describe in detail each contact with any such person during that period. Each such affidavit shall also include a description of the efforts Defendants have taken to solicit buyers for and complete the sale of the Divestiture Assets, including efforts to secure FCC or other regulatory approvals, and to provide required information to prospective Acquirers, including the limitations, if any, on such information. Assuming the information set forth in the affidavit is true and complete, any objection by the United States to information provided by Defendants, including limitations on information, shall be made within fourteen (14) calendar days of receipt of such affidavit.

B. Within twenty (20) calendar days of the filing of the Complaint in this matter, Defendants shall deliver to the United States an affidavit that describes in reasonable detail all actions Defendants have taken and all steps Defendants have implemented on an ongoing basis to comply with Section VIII of this Final Judgment. Each such affidavit shall also include a description of the efforts Defendants have taken to complete the sale of the Divestiture Assets, including efforts to secure FCC or other regulatory approvals. Defendants shall deliver to the United States an affidavit describing any changes to the efforts and actions outlined in Defendants' earlier affidavits filed pursuant to this section within fifteen (15) calendar days after the change is implemented.

C. Defendants shall keep all records of all efforts made to preserve and divest the Divestiture Assets until one year after such divestiture has been completed.

X. Compliance Inspection

A. For the purposes of determining or securing compliance with this Final Judgment, or of any related orders such as any Hold Separate Stipulation and Order, or of determining whether the Final Judgment should be modified or vacated, and subject to any legally recognized privilege, from time to time authorized representatives of the United States Department of Justice, including consultants and other persons retained by the United States, shall, upon written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to Defendants, be permitted:

(1) Access during Defendants' office hours to inspect and copy, or at the option of the United States, to require Defendants to provide hard copies or electronic copy of, all books, ledgers, accounts, records, data, and documents in the possession, custody, or control of Defendants, relating to any matters contained in this Final Judgment; and

(2) to interview, either informally or on the record, Defendants' officers, employees, or agents, who may have their individual counsel present, regarding such matters. The interviews shall be subject to the reasonable convenience of the interviewee and without restraint or interference by Defendants.

B. Upon the written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division, Defendants shall submit written reports or responses to written interrogatories, under oath if requested, relating to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this section shall be divulged by the United States to any person other than an authorized representative of the executive branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by Defendants to the United States, Defendants represent and identify in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(1)(g) of the Federal Rules of Civil Procedure, and Defendants mark each pertinent page of such material, ''Subject to claim of protection under

Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure,'' then the United States shall give Defendants ten (10) calendar days notice prior to divulging such material in any legal proceeding (other than a grand jury proceeding).

XI. No Reacquisition or Other Prohibited Activities

Defendants may not (1) reacquire any part of the Divestiture Assets, (2) acquire any option to reacquire any part of the Divestiture Assets or to assign the Divestiture Assets to any other person, (3) enter into any local marketing agreement, joint sales agreement, other cooperative selling arrangement, or shared services agreement, or conduct other business negotiations jointly with the Acquirers with respect to the Divestiture Assets, or (4) provide financing or guarantees of financing with respect to the Divestiture Assets, during the term of this Final Judgment. The shared services prohibition does not preclude Defendants from continuing or entering into agreements in a form customarily used in the industry to (1) share news helicopters or (2) pool generic video footage that does not include recording a reporter or other on-air talent, and does not preclude Defendants from entering into any non-sales-related shared services agreement or transition services agreement that is approved in advance by the United States in its sole discretion.

XII. Retention of Jurisdiction

This Court retains jurisdiction to enable any party to this Final Judgment to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify any of its provisions, to enforce compliance, and to punish violations of its provisions.

XIII. Expiration of Final Judgment

Unless this Court grants an extension, this Final Judgment shall expire ten years from the date of its entry.

XIV. Public Interest Determination

Entry of this Final Judgment is in the public interest. The parties have complied with the requirements of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16, including making copies available to the public of this Final Judgment, the Competitive Impact Statement, and any comments thereon, and the United States' responses to comments. Based upon the record before the Court, which includes the Competitive Impact Statement and any comments and response to comments filed with the Court, entry of this Final Judgment is in the public interest.

Date:

Court approval subject to procedures of Antitrust Procedures and Penalties Act, 15 U.S.C. § 16

United States District Judge

BILLING CODE P

DEPARTMENT OF LABOR

Efforts by Certain Foreign Countries To Eliminate the Worst Forms of Child Labor

AGENCY: The Bureau of International Labor Affairs, United States Department of Labor.

ACTION: Notice: Request for information and invitation to comment.

SUMMARY: This notice is a request for information and/or comment on the 2013 Findings on the Worst Forms of Child Labor report (TDA report) issued by the Bureau of International Labor Affairs (ILAB) on October 7, 2014, regarding child labor in certain foreign countries. The recently published TDA report assessed efforts by more than 140 countries to reduce the worst forms of child labor and reported whether countries made significant, moderate, minimal, or no advancement. It also suggested actions foreign countries can take to eliminate the worst forms of child labor through legislation, enforcement, coordination, policies and social programs. This year's report introduced a new streamlined format for country profiles to make it more user-friendly and a better policy tool for engagement. Relevant information will be used by the Department of Labor (DOL) in preparation of its ongoing reporting mandated under the Trade and Development Act of 2000. In addition, ILAB will use relevant information to conduct assessments of each country's advancement toward eliminating the worst forms of child labor during the current calendar year compared to previous years.

DATES: Submitters of information are requested to provide their submission to the Office of Child Labor, Forced Labor, and Human Trafficking (OCFT) at the email or physical address below by 5 p.m. January 15, 2015.

To Submit Information: Information submitted to DOL should be submitted directly to OCFT, Bureau of International Labor Affairs, U.S. Department of Labor, at (202) 693–4843 (this is not a toll free number).

Comments, identified as ''Docket No. DOL–2014–0009'', may be submitted by any of the following methods:

Federal eRulemaking Portal: *http://www.regulations.gov.*

The portal includes instructions for submitting comments. Parties submitting responses electronically are encouraged not to submit paper copies.

Facsimile (fax): OCFT at 202–693–4830.

Mail, Express Delivery, Hand Delivery, and Messenger Service (1 copy): Chanda Uluca and Charita Castro at U.S. Department of Labor, OCFT, Bureau of International Labor Affairs, 200 Constitution Avenue NW., Room S–5317, Washington, DC 20210.

Email: Email submissions should be addressed to both Chanda Uluca (*Uluca.Chanda@dol.gov*) and Charita Castro (*Castro.Charita.L@dol.gov*).

FOR FURTHER INFORMATION CONTACT: Chanda Uluca and Charita Castro (see contact information above).

SUPPLEMENTARY INFORMATION:

The Trade and Development Act of 2000 (TDA), Public Law 106–200 (2000), established a new eligibility criterion for receipt of trade benefits under the Generalized System of Preferences (GSP), Caribbean Basin Trade and Partnership Act (CBTPA), and Africa Growth and Opportunity Act (AGOA) and the Andean Trade Preference Act/Andean Trade Promotion and Drug Eradication Act (ATPA/ATPDEA).

The TDA amended the GSP reporting requirements of Section 504 of the Trade Act of 1974, 19 U.S.C. 2464, to require that the President's annual report on the status of internationally recognized worker rights include ''findings by the Secretary of Labor with respect to the beneficiary country's implementation of its international commitments to eliminate the worst forms of child labor.'' Title II of the TDA and the TDA Conference Report, Joint Explanatory Statement of the Committee of Conference, 106th Cong.2d.Sess. (2000), indicate that the same criterion applies for the receipt of benefits under CBTPA and AGOA, respectively. In addition, the Andean Trade Preference Act, as amended and expanded by the Andean Trade Promotion and Drug Eradication Act, Public Law 107–210, Title XXXI (2002), includes as a criterion for receiving benefits ''[w]hether the country has implemented its commitments to eliminate the worst forms of child labor as defined in section 507(6) of the Trade Act of 1974.''

DOL fulfills these reporting mandates through annual publication of the U.S. Department of Labor's Findings on the

Worst Forms of Child Labor with respect to countries eligible for the aforementioned programs. The 2013 report and additional background information are available on the Internet at *http://www.dol.gov/ilab/reports/child-labor/findings/.*

Information Requested and Invitation to Comment: Interested parties are invited to comment and provide information regarding DOL's 2013 TDA Report which may be found on the Internet at *http://www.dol.gov/ilab/reports/child-labor/findings/* or obtained from OCFT. DOL requests comments or information to update the findings and suggestions for government action for countries reviewed in the TDA Report, as well as to assess each country's individual advancement toward eliminating the worst forms of child labor during the current reporting period compared to previous years. For more information on the types of issues covered in the TDA Report, please see Appendix II of the report. Materials submitted should be confined to the specific topics of the TDA report. DOL will generally consider sources with dates up to five years old (i.e., data not older than January 1, 2010). DOL appreciates the extent to which submissions clearly indicate the time period to which they apply. In the interest of transparency, classified information will not be accepted. Where applicable, information submitted should indicate its source or sources, and copies of the source material should be provided. If primary sources are utilized, such as research studies, interviews, direct observations, or other sources of quantitative or qualitative data, details on the research or data-gathering methodology should be provided. Please see the 2013 TDA Report for a complete explanation of relevant terms, definitions, and reporting guidelines employed by DOL.

This notice is a general solicitation of comments from the public.

Signed at Washington, DC, this 6th day of November 2014.

Carol Pier,

Deputy Undersecretary for International Affairs.

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2011–0194]

Cotton Dust Standard; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning its proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Cotton Dust Standard (29 CFR 1910.1043).

DATES: Comments must be submitted (postmarked, sent, or received) by January 12, 2015.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, OSHA Docket No. OSHA–2011–0194, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

Instructions: All submissions must include the Agency name and the OSHA docket number (OSHA–2011–0194) for the Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at *http://www.regulations.gov.* For further information on submitting comments see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3468, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Cotton Dust Standard protect workers from the adverse health effects that may result from their exposure to cotton dust. The major information collection requirements of the Cotton Dust Standard include: performing exposure monitoring, including initial, periodic,

and additional monitoring; notifying each worker of their exposure monitoring results either in writing or by posting; implementing a written compliance program; and establishing a respiratory protection program in accord with OSHA's Respiratory Protection Standard (29 CFR 1910.134).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting to increase its current burden hours from 20,558 to 22,381 hours, a total increase of 1,823 hours. Although the cost of exposure monitoring sampling increased slightly from $19 to $20, there was a $14,976 increase in the overall cost of sampling (from $79,344 to $94,320). Further, although the cost of a medical exam increased from $175 to $187, there was a $976,550 increase in the overall cost of medical exams (from $2,369,850 to $2,848,384), as a result of the increase in the number of medical exams.

Type of Review: Extension of a currently approved collection.

Title: Cotton Dust Standard (29 CFR 1910.1043).

OMB Control Number: 1218–0061.

Affected Public: Business or other for-profits.

Number of Respondents: 257.

Frequency of Responses: Annually; semi-annually; on occasion.

Total Responses: 59,718.

Average Time per Response: Varies from 5 minutes (.08 hour) for a secretary to maintain a record to 2 hours to conduct exposure monitoring.

Estimated Total Burden Hours: 22,381.

Estimated Cost (Operation and Maintenance): $2,942,704.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2011–0194). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627).

Comments and submissions are posted without change at *http://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site.

All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* Web site to submit comments and access the docket is available at the Web site's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available from the Web site and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice isthe Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor'sOrder No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on November 7, 2014.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

[Docket No. OSHA–2011–0195]

Acrylonitrile Standard; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning its proposal to extend OMB approval of the information collection requirements specified by the Acrylonitrile Standard (29 CFR 1910.1045).

DATES: Comments must be submitted (postmarked, sent, or received) by January 12, 2015.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2011–0195, U.S. Department of Labor, Occupational Safety and Health Administration, Room N–2625, 200 Constitution Avenue NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

Instructions: All submissions must include the Agency name and the OSHA docket number (OSHA–2011–0195) for the Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available

online at *http://www.regulations.gov*. For further information on submitting comments see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Acrylonitrile (AN) Standard protect workers from the adverse health effects that may result from their exposure to AN. The major information collection requirements of the AN Standard include notifying workers of their AN exposures, implementing a written compliance program, providing examining physicians with specific information, ensuring that workers receive a copy of their medical examination results, maintaining workers exposure monitoring and medical records for specific periods, and providing access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected workers, and designated representatives.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Acrylonitrile Standard (29 CFR 1910.1045).

OSHA is requesting an adjustment decrease in the burden hour total from 2,299 to 1,999 hours, a total decrease of 300 hours as a result of the decreased number of affected establishments based on updated data. There was a slight adjustment of the number of exposure monitoring samples from 864 to 814., but the number of medical exams slightly decreased from 630 to 594, which resulted in a slight cost decrease. The adjustment of the burden hours and costs are shown in detail by provision in the supporting statement.

Type of Review: Extension of a currently approved collection.

Title: Acrylonitrile Standard (29 CFR part 1910.1045).

OMB Control Number: 1218–0126.

Affected Public: Business or other for-profits.

Number of Respondents: 16.

Frequency of Responses: On occasion.

Total Responses: 4,516.

Average Time per Response: Varies from five minutes (.08 hour) to obtain a physician's certificate to 12 hours to develop a compliance program.

Estimated Total Burden Hours: 1,999.

Estimated Cost (Operation and Maintenance): $144,628.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number (Docket No. OSHA–2011–0195) for the ICR. You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627). Comments and submissions are posted without change at *http://www.regulations.gov*. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* Web site to submit comments and access the docket is available at the Web site's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor's Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on November 7, 2014.

David Michaels,

Assistant Secretary of Labor, for Occupational Safety and Health.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2011–0190]

Shipyard Employment Standards; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning its proposal to extend OMB approval of the information collection requirements contained in the Shipyard Employment Standards of Subpart G—Gear and Equipment for Rigging and Materials Handling (29 CFR 1915.112(a)(1), 29 CFR 1915.112(b)(1)(i), 29 CFR 1915.112(c)(1)(i), 29 CFR 1915.112(c)(2), 29 CFR 1915.113(a)(1), 29 CFR 1915.113(b)(1) and 29 CFR 1915.115(c)) and Subpart K—Portable, Unfired Pressure Vessels, Drums and Containers, Other than Ship's Equipment (29 CFR 1915.172(d)). The purpose of the collection of information (paperwork) provisions of the Standards is to reduce workers' risk of death or serious injury by ensuring that equipment has been tested and is in safe operating condition.

DATES: Comments must be submitted (postmarked, sent, or received) by January 12, 2015.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2011–0190, U.S. Department of Labor, Occupational Safety and Health Administration, Room N–2625, 200 Constitution Avenue NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

Instructions: All submissions must include the Agency name and the OSHA docket number (OSHA–2011–0190) for the Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change and may be made available online at *http://www.regulations.gov*. For further information on submitting comments, see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA 95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Manila rope and manila-rope slings (paragraph 1915.112(a)(1))—The employer must ensure that manila rope and manila-rope slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

Wire rope and wire-rope slings (paragraph 1915.112(b)(1)(i))—The employer must ensure that wire rope and wire-rope slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

Chain and chain slings (paragraph 1915.112(c)(1)(i))—The employer must ensure that chain and chain slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

Chain and chain slings (paragraph 1915.112(c)(2))—The employer shall visually inspect all sling chains, including end fastenings, before being used on the job, as well as every three months. The inspection shall include inspection for wear, defective welds, deformation and increase in length or stretch. Each chain shall bear an indication of the month in which it was thoroughly inspected.

Shackles (paragraph 1915.113(a)(1))—The employer must ensure that shackles have permanently

affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load.

Test Records for Hooks (paragraph 1915.113(b)(1))—This paragraph requires that the manufacturer's recommendations be followed in determining the safe working loads of the various sizes and types of hooks. If the manufacturer's recommendations are not available, the hook must be tested to twice the intended safe working load before it is initially put into use. The employer must maintain and keep readily available a certification record which includes the date of such test, the signature of the person who performed the test, and an identifier for the hook which was tested.

The records are used to assure that equipment has been properly tested. The records also provide the most efficient means for the compliance officers to determine that an employer is complying with the Standard.

Mobile Crawler or Truck Cranes Used on a Vessel (paragraph 1915.115(c))—This paragraph requires that the maximum manufacturer's rated safe working loads for the various working radii of the boom and the maximum and minimum radii at which the boom may be safely used with and without outriggers shall be conspicuously posted near the controls and shall be visible to the operator.

Examination and Test Records for Unfired Pressure Vessels (paragraph 1915.172(b)and(d))—This paragraph requires that portable, unfired pressure vessels not built to the requirements of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, Section VIII, Rules for Construction of Unfired Pressure Vessels, 1963 be examined *quarterly* by a competent person and subjected to a *yearly* hydrostatic pressure test. A certification record of such examinations and tests shall be maintained.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is proposing to increase the existing burden hour estimate for the collection of information requirements specified by the Standards from 3,162 hours to 9,773 hours, a total increase of 6,611 hours. In this ICR, the scope of the maritime standards in 29 CFR 1915 for slings, shackles, and hooks are based on the Final Economic Analysis for the Final Rule revising subpart F of 29 CFR part 1915 prepared by OSHA's Office of Regulatory Analysis. As a result of the Final Rule, the revision of the standard applies to all shipyard employment which is defined in § 1915.4(i) as ship repairing, shipbuilding, shipbreaking, and related employment. Also, upon further analysis, the Agency identified two new collections of information contained in the Standard under paragraphs §§ 1915.112(c)(2) and 1915.115(c)(1). The Agency will summarize any comments submitted in response to this notice and will include this summary in its request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Shipyard Employment Standards (29 CFR part 1915).

OMB Number: 1218–0220.

Affected Public: Business or other for-profits; Not-for-profit organizations; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 2,759.

Frequency of Response: On occasion.

Average Time per Response: Varies from 2 minutes (.03 hour) to maintain a certification record to 35 minutes (.58 hour) to obtain certain information from a manufacturer.

Estimated Total Burden Hours: 9,773.

Estimated Cost (Operation and Maintenance): $0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2011–0190). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number, so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627).

Comments and submissions are posted without change at *http://www.regulations.gov*. Therefore, OSHA cautions commenters about submitting personal information, such as social security numbers and date of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* Web site to submit comments and access the docket is available at the Web site's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on November 7, 2014.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2014–26870 Filed 11–12–14; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2014–0001]

National Advisory Committee on Occupational Safety and Health (NACOSH)

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Announcement of a meeting of NACOSH.

SUMMARY: NACOSH will meet December 10, 2014, in Washington, DC.

DATES: *NACOSH meeting:* NACOSH will meet from 9 a.m. to 5 p.m., Wednesday, December 10, 2014.

Comments, requests to speak, speaker presentations, and requests for special accommodations: You must submit (postmark, send, transmit) comments, requests to address NACOSH, speaker presentations (written or electronic), and requests for special accommodations for the NACOSH meeting by December 2, 2014.

ADDRESSES: *NACOSH meeting:* NACOSH will meet in Room N–4437 A/B/C, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Submission of comments and requests to speak: You may submit comments and requests to speak at the NACOSH meeting, identified by docket number for this **Federal Register** notice (Docket No. OSHA–2014–0001), by one of the following methods:

Electronically: You may submit materials, including attachments, electronically at *http://www.regulations.gov,* the Federal eRulemaking Portal. Follow the online instructions for making submissions.

Facsimile: If your submission, including attachments, does not exceed 10 pages, you may fax it to the OSHA Docket Office at (202) 693–1648.

Regular mail, express mail, hand delivery, or messenger/courier service (hard copy): You may submit your materials to the OSHA Docket Office, Docket No. OSHA–2014–0001, Room N–2625, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2350 (TTY (887) 889–5627). OSHA's Docket Office accepts deliveries (hand deliveries, express mail, and messenger/courier service) during normal business hours, 8:15 a.m. to 4:45 p.m. e.t., weekdays.

Requests for special accommodations: Please submit requests for special accommodations to attend the NACOSH meeting by email, telephone, or hard copy to Ms. Gretta Jameson, OSHA, Office of Communications, Room N–3647, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–1999 (TTY (887) 889–5627); email *jameson.gretta@dol.gov.*

Instructions: Your submissions must include the Agency name and docket number for this **Federal Register** notice (Docket No. OSHA–2014–0001). Due to security-related procedures, submissions by regular mail may experience significant delays. Please contact the OSHA Docket Office for information about security procedures for making submissions by hand delivery, express delivery, or messenger/courier service. For additional information about submitting comments and requests to speak, see the **SUPPLEMENTARY INFORMATION** section of this notice.

OSHA will post in the public docket, without change, any comments, requests to speak, and speaker presentations, including any personal information that you provide. Therefore, OSHA cautions interested parties about submitting personal information such as Social Security numbers and birthdates.

FOR FURTHER INFORMATION CONTACT:

For press inquiries: Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, Room N–3647, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–1999 (TTY (877) 889–5627); email *meilinger.francis2@dol.gov.*

For general information: Ms. Michelle Walker, Director, OSHA Technical Data Center, Directorate of Technical Support and Emergency Management, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2350 (TTY (877) 889–5627); email *walker.michelle@dol.gov.*

SUPPLEMENTARY INFORMATION: NACOSH will meet December 10, 2014, in Washington, DC. Some NACOSH members may attend electronically. NACOSH meetings are open to the public.

NACOSH was established by Section 7(a) of the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651, 656) to advise, consult with and make recommendations to the Secretary of Labor and the Secretary of Health and Human Services on matters relating to the administration of the OSH Act. NACOSH is a continuing advisory committee of indefinite duration.

NACOSH operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2), its implementing regulations (41 CFR part 102–3), and OSHA's regulations on NACOSH (29 CFR part 1912a).

The tentative agenda for the NACOSH meeting includes:

- Remarks from the Assistant Secretary of Labor for Occupational Safety and Health;
- Remarks from the Director of the National Institute for Occupational Safety and Health;
- Updates on Ebola activities;
- Request for information (RFI) on Chemical Management and Permissible Exposure Limits (PELs); and
- Protecting Temporary Workers: Recommended Practices.

OSHA transcribes and prepares detailed minutes of NACOSH meetings. OSHA posts the transcripts and minutes in the public docket along with written comments, speaker presentations, and other materials submitted to NACOSH or presented at NACOSH meetings.

Public Participation, Submissions and Access to Public Record

NACOSH meetings: NACOSH meetings are open to the public. Individuals attending NACOSH meetings at the U.S. Department of Labor must enter the building at the Visitors' Entrance at 3rd and C Streets NW., and pass through building security. Attendees must have valid government-issued photo identification (e.g., driver's license) to enter the building. For additional information about building security measures for attending NACOSH meetings, please contact Ms. Jameson (see **ADDRESSES** section).

Individuals requesting special accommodations to attend the NACOSH meeting should contact Ms. Jameson.

Submission of comments: You may submit comments using one of the methods listed in the **ADDRESSES** section. Your submission must include the Agency name and Docket number for this NACOSH meeting (Docket No. OSHA–2014–0001). OSHA will provide copies of your submissions to NACOSH members.

Because of security-related procedures, submissions by regular mail may experience significant delays. For information about security procedures for submitting materials by hand delivery, express mail, and messenger/courier service, please contact the OSHA Docket Office.

Requests to speak and speaker presentations: If you want to address NACOSH at the meeting you must submit a request to speak, as well as any written or electronic presentation, by December 2, 2014, using one of the

methods listed in the **ADDRESSES** section. Your request must state:

- The amount of time requested to speak;
- The interest you represent (e.g., business, organization, affiliation), if any; and
- A brief outline of the presentation.

PowerPoint presentations and other electronic materials must be compatible with PowerPoint 2010 and other Microsoft Office 2010 formats. The NACOSH Chair may grant requests to address NACOSH as time and circumstances permit.

Public docket of NACOSH meetings: OSHA places comments, requests to speak, and speaker presentations, including any personal information you provide, in the public docket, without change. Those documents also may be available online at *http://www.regulations.gov.* Therefore, OSHA cautions you about submitting certain personal information such as Social Security numbers and birthdates.

OSHA also places in the public docket meeting transcripts, meeting minutes, documents presented at the NACOSH meeting, and other documents pertaining to NACOSH meetings. These documents may be available online at *http://www.regulations.gov.*

Access to the public record of NACOSH meetings: To read or download documents in the public docket, go to Docket No. OSHA–2014–0001 at *http://www.regulations.gov.* The index of that Web page lists all of the documents in the public record for this meeting; however, some documents (e.g., copyrighted materials) are not publicly available through that Web page. All documents in the public record, including materials not available through *http://www.regulations.gov,* are available for inspection in the OSHA Docket Office. Please contact the OSHA Docket Office for assistance in making submissions to, or obtaining materials from, the public docket.

Electronic copies of this **Federal Register** notice are available at *http://www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available on OSHA's Web page at *http://www.osha.gov.*

Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice under the authority granted by 29 U.S.C. 656; 5 U.S.C. App. 2; 29 CFR part 1912a; 41 CFR part 102–3; and Secretary of Labor's Order No. 1–2012 (77 FR 3912 (January 25, 2012)).

Signed at Washington, DC, on November 6, 2014.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2014–26797 Filed 11–12–14; 8:45 am]

BILLING CODE 4510–26–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (14–113)]

NASA Advisory Council; Human Exploration and Operations Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the Human Exploration and Operations Committee of the NASA Advisory Council.

DATES: Tuesday, December 2, 2014, 10:00 a.m. to 6:00 p.m.; and Wednesday, December 3, 2014, 8:00 a.m. to 4:30 p.m., Local Time.

ADDRESSES: NASA Headquarters, 300 E Street SW., Room 9H40, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Bette Siegel, Human Exploration and Operations Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–2245, or *bette.siegel@nasa.gov*.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. This meeting is also available telephonically and by WebEx. Any interested person may call the USA toll free conference call number 1–888–469–0647 or toll number 1–203–827–7016, pass code 5106584, to participate in this meeting by telephone. The WebEx link is *https://nasa.webex.com/*, the meeting number is 993 284 327, and the password is December2-3!

The agenda for the meeting includes the following topics:

—Joint Session with Science Committee of the NASA Advisory Council
—Status of the International Space Station Focus on Utilization and International Cooperation
—Status of the NASA Human Exploration Operations Mission Directorate
—Radiation Environment and Countermeasures for Human Exploration to Mars
—NASA Human Exploration and Operations Mission Directorate/NASA Science Mission Directorate Joint Activities
—Evolvable Mars Campaign
—Asteroid Redirect Mission and Sustainable Human Exploration
—Lessons Learned from Commercial Orbital Transportation Services
—Research Subcommittee Briefing

Attendees will be requested to sign a register and to comply with NASA Headquarters security requirements, including the presentation of a valid picture ID before receiving access to NASA Headquarters. Foreign nationals attending this meeting will be required to provide a copy of their passport and visa in addition to providing the following information no less than 10 working days prior to the meeting: full name; gender; date/place of birth; citizenship; passport information (number, country, telephone); visa information (number, type, expiration date); employer/affiliation information (name of institution, address, country, telephone); title/position of attendee, to Dr. Bette Siegel via email at *bette.siegel@nasa.gov*. To expedite admittance, attendees with U.S. citizenship and Permanent Residents (green card holders) are requested to submit their name and affiliation 3 working days prior to the meeting to Dr. Bette Siegel. It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Patricia D. Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration .

[FR Doc. 2014–26775 Filed 11–12–14; 8:45 am]

BILLING CODE 7510–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (14–111)]

NASA Advisory Council; Technology, Innovation and Engineering Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the Technology, Innovation and Engineering Committee of the NASA Advisory Council. This meeting will be held for the purpose of soliciting, from

the scientific community and other persons, scientific and technical information relevant to program planning.

DATES: Thursday, December 4, 2014, 8:00 a.m. to 5:00 p.m.; Local Time.

ADDRESSES: NASA Headquarters, Room MIC 6A, 300 E Street SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Green, Space Technology Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–4710, or *g.m.green@nasa.gov.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. This meeting is also available telephonically and online via WebEx. Any interested person may call the USA toll free conference number 844–467–6272, passcode 102421, to participate in this meeting by telephone. The WebEx link is *https://nasa.webex.com/,* the meeting number is 999 401 003, and the password is ''Technology14$''.

The agenda for the meeting includes the following topics:

—NASA Office of the Chief Technologist Update
—Briefing and Update on the Technology Demonstration Missions Program
—NASA Space Technology Mission Directorate Update
—Briefing and Update of NASA's Advance Exploration Systems Program
—NASA Office of the Chief Engineer Update
—Update on NASA's Future Workforce Diversity Efforts
—Discussion of Committee Recommendation on Technology Infusion into Future Science Missions

Attendees will be requested to sign a register and to comply with NASA Headquarters security requirements, including the presentation of a valid picture ID, before receiving access to NASA Headquarters. Foreign nationals attending this meeting will be required to provide a copy of their passport and visa in addition to providing the following information no less than 10 working days prior to the meeting: full name; gender; date/place of birth; citizenship; passport information (number, country, expiration date); visa information (number, type, expiration date); employer/affiliation information (name of institution, address, country, telephone); title/position of attendee. To expedite admittance, attendees with U.S. citizenship and Permanent Residents (green card holders) can provide full name and citizenship status 3 working days in advance by contacting Ms. Anyah Dembling via email at *anyah.b.dembling@nasa.gov* or by telephone at (202) 358–5195. It is imperative that this meeting be held on this date to accommodate the scheduling priorities of the key participants.

Patricia D. Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (14–112)]

National Space-Based Positioning, Navigation, and Timing (PNT) Advisory Board; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, and the President's 2004 U.S. Space-Based Positioning, Navigation, and Timing (PNT) Policy, the National Aeronautics and Space Administration (NASA) announces a meeting of the National Space-Based Positioning, Navigation, and Timing (PNT) Advisory Board.

DATES: Wednesday, December 10, 2014, 9:00 a.m. to 5:00 p.m.; and Thursday, December 11, 2014, 9:00 a.m. to 12:00 p.m., Local Time.

ADDRESSES: The Omni Shoreham Hotel, Hampton Ballroom, 2500 Calvert Street NW., Washington, DC 20008.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Miller, Human Exploration and Operations Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–4417, fax (202) 358–4297, or *jj.miller@nasa.gov.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. Visitors will be requested to sign a visitor's register.

The agenda for the meeting includes the following topics:

- Examine emerging trends and requirements for PNT services in U.S. and international arenas through PNT Board technical assessments.
- Update on U.S. Space-Based Positioning, Navigation and Timing (PNT) Policy and Global Positioning System (GPS) modernization.
- Prioritize current and planned GPS capabilities and services while assessing future PNT architecture alternatives with a focus on affordability.
- Examine methods in which to Protect, Toughen, and Augment (PTA) access to GPS/Global Navigation Satellite System (GNSS) services in key domains for multiple user sectors.
- Assess economic impacts of GPS on the United States and in select international regions, with a consideration towards effects of potential PNT service disruptions if radio spectrum interference is introduced.
- Explore opportunities for enhancing the interoperability of GPS with other emerging international GNSS.

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Patricia D. Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

Dates: November 20, 2014. 2:00 p.m. to 4:00 p.m.

Local Arts Agencies (application review): This meeting will be closed.

Dates: November 20, 2014. 1:00 p.m. to 3:00 p.m.

Local Arts Agencies (application review): This meeting will be closed.

Dates: November 20, 2014. 3:30 p.m. to 5:30 p.m.

Theater & Musical Theater (application review): This meeting will be closed.

Dates: November 20, 2014. 12:00 p.m. to 2:00 p.m.

Theater & Musical Theater (application review): This meeting will be closed.

Dates: November 20, 2014. 3:00 p.m. to 5:00 p.m.

Folk & Traditional Arts (application review): This meeting will be closed.

Dates: November 21, 2014. 2:00 p.m. to 4:00 p.m.

Visual Arts (application review): This meeting will be closed.

Dates: November 24, 2014. 11:30 a.m. to 2:00 p.m.

Visual Arts (application review): This meeting will be closed.

Dates: November 24, 2014. 2:30 p.m. to 5:00 p.m.

Visual Arts (application review): This meeting will be closed.

Dates: November 25, 2014. 11:30 a.m. to 2:00 p.m.

Visual Arts (application review): This meeting will be closed.

Dates: November 25, 2014. 2:30 p.m. to 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Further information with reference to these meetings can be obtained from Ms. Kathy Plowitz-Worden, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC 20506; *plowitzk@arts.gov,* or call 202/682–5691.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of February 15, 2012, these sessions will be closed to the public pursuant to subsection (c)(6) of section 552b of Title 5, United States Code.

Dated: November 6, 2014.

Kathy Plowitz-Worden,

Panel Coordinator, National Endowment for the Arts.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Submission for OMB Review; Comment Request

The National Endowment for the Arts, on behalf of the Federal Council on the Arts and the Humanities, has submitted the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). Copies of this ICR, with applicable supporting documentation, may be obtained at reginfo.gov.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the National Endowment for the Arts, Office of Management and Budget, Room 10235, Washington, DC 20503 (202/395–4718), within thirty days of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

— Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

— Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;

— Enhance the quality, utility and clarity of the information to be collected; and

— Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: The Endowment requests the review of its application guidelines. This entry is issued by the Endowment and contains the following information: (1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. § 3504(h).

Agency: National Endowment for the Arts.

Title: Application for Indemnification.

OMB Number: 3135–0123.

Frequency: renewed every three years.

Affected Public: Non-profit, tax exempt organizations, and governmental units.

Number of Respondents: 19 per year.

Estimated Time per Respondent: 40 hours.

Estimate Cost per Respondent: $2,025.

Total Burden Hours: 760.

Total Annualized Capital/Startup Costs: 0.

Total Annual Costs (Operating/Maintaining Systems or Purchasing Services): $97,000.

Description: This application form is used by non-profit, tax-exempt organizations (primarily museums), and governmental units to apply to the Federal Council on the Arts and the Humanities (through the National Endowment for the Arts) for indemnification of eligible works of art and artifacts, borrowed from lenders in the United States for exhibition in the United States. The indemnity agreement is backed by the full faith and credit of the United States. In the event of loss or damage to an indemnified object, the Federal Council certifies the validity of the claim and requests payment from Congress. 20 U.S.C. 973 et seq. requires such an application and specifies

information which must be supplied. This statutory requirement is implemented by regulation at 45 CFR ll60.4.

Dated: November 7, 2014.

Kathy Plowitz-Worden,

Panel Coordinator, National Endowment for the Arts.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31333; 812–14139]

Eaton Vance Management, et al.; Notice of Application

November 6, 2014.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from sections 2(a)(32), 5(a)(1), 22(d) and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (a)(2) of the Act, and under section 12(d)(1)(J) of the Act for an exemption from sections 12(d)(1)(A) and (B) of the Act.

APPLICANTS: Eaton Vance Management (''Eaton Vance''), Eaton Vance ETMF Trust (''ETMF Trust'') and Eaton Vance ETMF Trust II (''ETMF Trust II'').

SUMMARY: Applicants request an order that permits: (a) Actively managed series of certain open-end management investment companies to issue shares (''Shares'') redeemable in large aggregations only (''Creation Units''); (b) secondary market transactions in Shares to occur at the next-determined net asset value (''NAV'') plus or minus a market-determined premium or discount (''premium/discount'') that may vary during the trading day (''NAV-based Trading''); (c) certain series to pay redemption proceeds, under certain circumstances, more than seven days from the tender of Shares for redemption; (d) certain affiliated persons of the series to deposit securities into, and receive securities from, the series in connection with the purchase and redemption of Creation Units; (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the series to acquire Shares; and (f) certain series to create and redeem Shares in kind in a master-feeder structure.

DATES: The application was filed on March 27, 2013 and amended on September 12, 2013, January 23, 2014, September 15, 2014, and September 25, 2014.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 1, 2014, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicants: Frederick S. Marius, Esq., Eaton Vance Management, Two International Place, Boston, MA 02110.

FOR FURTHER INFORMATION CONTACT: Jean E. Minarick, Senior Counsel, Daniele Marchesani, Branch Chief or Dalia Osman Blass, Assistant Chief Counsel, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants

1. ETMF Trust and ETMF Trust II (each, a ''Trust'' and, together the ''Trusts'') will be registered as open-end management investment companies under the Act and are business trusts organized under the laws of Massachusetts. ETMF Trust and ETMF Trust II will initially offer ten and eightseries, respectively (the ''Initial ETMFs''). Each ETMF (as defined below) will invest in securities and other assets selected to pursue the ETMF's investment objective (''Portfolio Positions'').[1]

2. Eaton Vance, a Massachusetts business trust, will serve as investment adviser to the Initial ETMFs. An Adviser (as defined below) will serve as investment adviser to each ETMF. Eaton Vance is, and any other Adviser will be, registered as an investment adviser under the Investment Advisers Act of 1940 (''Advisers Act''). The Adviser may retain one or more subadvisers (each a ''Subadviser'') to manage the portfolios of the ETMFs (as defined below). Any Subadviser will be registered, or not subject to registration, under the Advisers Act.

Applicants' Proposal

3. Applicants seek an exemptive order that would permit them to offer

[1] If an ETMF (or, in the case of an ETMF Feeder (as defined below), its Master Fund (as defined below)) invests in derivatives, then (a) the board of trustees (''Board'') of the ETMF will periodically review and approve the ETMF's (or, in the case of an ETMF Feeder, its Master Fund's) use of derivatives and how the ETMF's Adviser assesses and manages risk with respect to the ETMF's (or, in the case of an ETMF Feeder, its Master Fund's investment adviser's) use of derivatives and (b) the ETMF's disclosure of its (or in the case of an ETMF Feeder, its Master Fund's) use of derivatives in its offering documents and periodic reports will be consistent with relevant Commission and staff guidance.

exchange-traded managed funds, a new kind of registered investment company that is a hybrid between traditional mutual funds and exchange-traded funds (''exchange-traded managed funds'' or ETMFs, as defined below).[2] Like exchange-traded funds (''ETFs''), ETMFs would: List and trade on a national securities exchange, as defined in section 2(a)(26) of the Act (''Exchange''); directly issue and redeem Shares only in Creation Units; impose fees on Creation Units issued and redeemed to Authorized Participants (as defined below) to offset the related costs to the ETMFs; and primarily utilize in-kind transfers of Portfolio Positions in issuing and redeeming Creation Units. Like mutual funds, ETMFs would be bought and sold at prices linked to NAV and would seek to maintain the confidentiality of their current Portfolio Positions. Applicants have structured the product in this manner to provide certain cost and tax efficiencies of ETFs to investors, while maintaining the confidentiality of current Portfolio Positions.[3]

4. Applicants request that the order apply to the Initial ETMFs and any future series of the Trusts as well as any other open-end management investment companies or series thereof that: (a) Are advised by Eaton Vance or an entity controlling, controlled by, or under common control with Eaton Vance (Eaton Vance and each such other entity, and any successor thereto, included in the term ''Adviser'');[4] and (b) comply with the terms and conditions of the requested order (''Future ETMFs'').[5] An ETMF would offer its Shares in Creation Units only; individual Shares would trade on an Exchange using NAV-based Trading. The Initial ETMFs and the Future ETMFs together are the ''ETMFs.''[6]

A. Exchange Trading and NAV-Based Trading

5. Shares would be listed and traded on an Exchange (''Listing Exchange'').[7] Shares would trade throughout the day at NAV[8] plus or minus a premium/discount that may vary during the trading day.[9] This premium/discount (solely by way of example, +$0.20/Share, −$0.30/Share) would be quoted by Market Makers in Shares.[10] Although Share prices would be quoted throughout the trading day relative to NAV (solely by way of example, NAV+$0.20/share, NAV−$0.30/share), there would not be a fixed relationship between Share trading prices and their NAVs. For each trade, the premium/discount (which may be zero) would be locked in at trade execution and the final transaction price (*i.e.,* NAV plus or minus the premium/discount) would be determined at the end of the Business Day when the ETMF's NAV is calculated.[11]

6. Accordingly, unlike ETFs, NAV-based Trading would not offer investors the opportunity to transact intraday at prices based on current (versus end-of-day) determinations of the Shares' value. Instead, like intraday orders to buy or sell shares of mutual funds, an ETMF investor would not know the NAV at the time the order is placed, but the levels of premium/discount would be fully transparent allowing investors to see the execution costs of buying or selling Shares.[12] Market Makers and other dealers, in turn, would compete for transactions in Shares at a profitable premium/discount level.

B. Issuance and Redemption of Creation Units

7. Shares would not be individually redeemable and owners of Shares may acquire those Shares from an ETMF, or tender such shares for redemption to the ETMF, in Creation Units only.[13] Like ETFs, all orders to purchase Creation Units must be placed with a distributor (''Distributor'') that is a broker-dealer registered under the Securities Exchange Act of 1934 (''Exchange Act'') by or through a party (an ''Authorized Participant'') that has entered into a

[2] In accordance with the conditions to the requested relief, neither the Trusts nor any ETMF would be marketed or otherwise held out as an ''open-end investment company,'' a ''mutual fund'' or ''exchange-traded fund.'' Instead, each ETMF would be marketed as an ''exchange-traded managed fund'' or ''ETMF.''

[3] Through in-kind redemptions (as described below), ETMFs would seek to achieve tax efficiencies for its shareholders by avoiding the tax consequences of selling portfolio positions to meet redemption requests in cash. ETMFs could also limit the costs associated with managing inflows and outflows (*e.g.,* trading costs and ''cash drag''). By trading on an Exchange, ETMFs would greatly reduce their expenses for transfer agency services. (ETMF shareholders would still be able to receive comparable services through their brokers and would pay only for those services that they elect to receive.) Finally, applicants represent that ETMFs will not charge sales loads or pay any asset-based distribution or service fees.

[4] For the purposes of the requested order, a ''successor'' is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization.

[5] Eaton Vance has obtained patents with respect to certain aspects of ETMF's NAV-based Trading. Applicants anticipate that Eaton Vance or an affiliate thereof will license the patents to other registered investment advisers (each a ''Licensed Adviser'') advising a trust that intends to launch new series that will operate as exchange-traded managed funds (the Licensed Adviser and such trust together, the ''Future Applicants''). Future Applicants will apply for a separate exemptive order that incorporates by reference all the terms and conditions of this requested order and any amendments thereto. Therefore, any future amendments to the requested order would become part of any separate exemptive orders granted to Future Applicants. Any separate order granted to Future Applicants also would contain a condition that the Future Applicants must ensure that they comply with any terms and conditions of the requested order and any amendments thereto.

[6] All entities that currently intend to rely on the order are named as applicants. Any other entity that relies on the order in the future will comply with the terms and conditions of the requested order.

[7] Applicants currently expect that The NASDAQ Stock Market LLC (''Nasdaq'') will be the Listing Exchange for the Initial ETMFs. One or more member firms of the Listing Exchange will act as market maker (''Market Maker'') and maintain a market for Shares trading on the Listing Exchange.

[8] An ETMF's NAV will be determined at the end of each Business Day. A ''Business Day'' is any day the ETMF is open, including any day when it satisfies redemption requests as required by section 22(e) of the Act. ETMFs may compute their NAV more than once each Business Day or once daily at times other than 4:00 p.m. ET, consistent with rule 22c–1 under the Act.

[9] Unlike other exchange-traded securities, there would not be an absolute dollar amount per Share until the end of the day. Accordingly, prior to the initial operations of ETMFs, the Exchanges and brokers would install systems for the entry of orders to buy and sell shares using NAV-based Trading. Applicants have been working with intermediaries and Nasdaq to ensure they are implementing appropriate operational arrangements to accommodate the unique pricing mechanism of ETMFs (*e.g.,* the convention for reporting the intraday pricing of Shares on the consolidated tape). Applicants have also represented that they would establish and support a robust education program to ensure that investors and the marketplace understand, among other things, how to buy and sell Shares. Applicants would also provide related information in the ETMFs' registration statements, Web site and advertising and marketing materials.

[10] The amount of the premium/discount would depend on market factors, including the balance of supply and demand for Shares among investors, the Transaction Fees (as defined below) and other costs associated with creating and redeeming Creation Units, competition among Market Makers, Share inventory positions, inventory strategies of Market Makers, and the volume of Share trading. Premiums/discounts on market transactions in Shares are not sales charges, and therefore would not be subject to the limitation applicable to sales charges under NASD Conduct Rule 2830 or any other set limitation. Any reference to NASD Conduct Rule 2830 includes any successor or replacement rule that may be adopted by the Financial Industry Regulatory Authority.

[11] Transactions involving the purchases and sales of Shares on the Exchange would also be subject to customary brokerage commissions and charges.

[12] Trading prices of Shares would be available intraday through market data services and on the ETMFs' Web site. Quotations, however, would be expressed relative to NAV (solely by way of example, NAV+$0.20/Share, NAV−$0.20/Share) rather than as absolute dollar prices like ETF prices. Historical information regarding levels of premiums/discounts also would be available on the ETMFs' Web site.

[13] In any advertising material that describes the purchase or sale of Creation Units or refers to redeemability there would be an appropriate statement to the effect that Shares are not individually redeemable. The Adviser also would maintain a public Web site disclosing current ETMF information and containing links to the current prospectus and other ETMF documents. The Web site also would include the disclosure required by condition 3 under ETMF Relief.

participant agreement with the Distributor with respect to the creation and redemption of Creation Units.[14]

8. Like ETFs, and to keep trading costs low and permit each ETMF to be as fully invested as possible, Shares would be purchased and redeemed in Creation Units and primarily on an in-kind basis. Authorized Participants would be required to purchase Creation Units by making an in-kind deposit of specified instruments (these instruments are referred to, in the case of either a purchase or redemption, as the ''Basket Instruments,'' and, together as the ''Basket''), specified by the ETMF at the beginning of each Business Day and Authorized Participants redeeming their Shares would receive an in-kind transfer of Basket Instruments.[15] The Basket would not necessarily include all Portfolio Positions of the applicable ETMF in order to protect the confidentiality of current Portfolio Positions.

9. Each ETMF would process purchases and redemptions of Creation Units in a manner that would protect the ETMF from any investor who might seek advantageous treatment vis-à-vis other investors. Therefore, each Business Day, the Basket would be constructed in accordance with policies and procedures that: (a) Have been approved by the relevant ETMF's Board based on a determination that such policies and procedures are in the best interests of the ETMF; and (b) are administered in accordance with rule 38a–1 under the Act by the chief compliance officer designated by the ETMF under that rule. Moreover, the names and quantities of the instruments that constitute the Basket Instruments on a given Business Day would be identical for all purchasers and redeemers of an ETMF's Creation Units that day, except in certain limited circumstances.[16]

10. To preserve the confidentiality of an ETMF's trading activities, the Basket would normally not be a pro rata slice of the Portfolio Positions. Instruments being acquired by the ETMF would generally be excluded from the Basket until their purchase is completed and Basket Instruments being sold may not be removed from the Basket until the sale program is substantially completed. Further, when deemed by the Adviser to be in the best interests of an ETMF and its shareholders, other Portfolio Positions would be excluded from the Basket. Whenever Portfolio Positions are excluded from the Basket, the Basket may include proportionately more cash than is in the portfolio. Furthermore, if there is a difference between the NAV attributable to a Creation Unit and the aggregate market value of the Basket exchanged for the Creation Unit, the party conveying a Basket with the lower value would also pay to the other an amount in cash equal to that difference (the ''Balancing Amount'').

11. Each Business Day, before the open of trading on the Listing Exchange, the Adviser would cause to be published through the NSCC the names and quantities of the Basket Instruments, as well as the estimated Balancing Amount (if any), for that day. The published Basket would apply until a new Basket is announced on the following Business Day, and there would be no intraday changes to the Basket except to correct errors in the published Basket.[17]

12. Any purchasers or redeemers of Creation Units are expected to incur a transaction fee (''Transaction Fee'') to cover the estimated cost to the ETMF of processing the transaction, including the costs of clearance and settlement charged to it by NSCC or DTC, and the estimated trading costs incurred in converting the Basket to the desired Portfolio Positions. The Transaction Fee would be borne only by purchasers and redeemers of Creation Units and would be limited to amounts that have been authorized by the Board and determined appropriate by the Adviser to defray the transaction expenses that would be incurred by an ETMF when an investor purchases or redeems Creation Units.[18] With respect to ETMFs operating in a master-feeder structure (as discussed below), the Transaction Fee may be paid to the Master Fund as a Master Fund Transaction Fee.[19]

C. The Role of Market Intermediaries and Portfolio Transparency

13. Applicants assert that in light of NAV-based Trading, daily portfolio transparency is not necessary for ETMFs. Applicants recognize that contemporaneous portfolio holdings disclosure has been viewed as necessary for effective arbitrage and efficient secondary market trading of ETFs.[20] In particular, applicants note that in ETF trading, tight bid-ask spreads and narrow premiums/discounts cannot be assured unless Market Makers have

[14] An Authorized Participant would be either: (a) A Broker (as defined below) or other participant in the Continuous Net Settlement System of the National Securities Clearing Corporation (''NSCC''), a clearing agency registered with the Commission; or (b) a participant in The Depository Trust Company (''DTC'') (such participant, ''DTC Participant'').

[15] ETMFs must comply with the federal securities laws in accepting Basket Instruments and satisfying redemptions with Basket Instruments, including that the Basket Instruments would be sold in transactions that would be exempt from registration under the Securities Act of 1933 (''Securities Act''). In accepting Basket Instruments and satisfying redemptions with Basket Instruments that are restricted securities eligible for resale pursuant to Rule 144A under the Securities Act, ETMFs would comply with the conditions of Rule 144A.

[16] An ETMF's Basket could vary if the required policies and procedures of the ETMF allowed such differences by permitting an Authorized Participant to deposit cash in lieu of some or all of the Basket Instruments solely because: (a) Such Basket Instruments, in the case of a purchase of a Creation Unit, are not available in sufficient quantity; (b) such Basket Instruments are not eligible for trading by the Authorized Participant or the investor on whose behalf the Authorized Participant is acting; or (c) a holder of Shares of an ETMF investing in foreign instruments would be subject to unfavorable income tax treatment if the holder received redemption proceeds in kind. A ''custom order'' is any purchase or redemption of Shares made in whole or in part on a cash basis in reliance on clause (a) or (b). An ETMF may also determine, upon receiving a purchase or redemption order from an Authorized Participant, to require the purchase or redemption, as applicable, to be made entirely in cash.

[17] ETMFs would arrange for an independent third party to disseminate every 15 minutes an amount representing, on a per Share basis, the intraday indicative value (''IIV'') of the ETMFs' Shares throughout the regular trading session of the Listing Exchange each Business Day. An investor may use the IIV to estimate the number of Shares to buy or sell based on the dollar amount the investor wants to transact in. Applicants note that unlike for ETFs, IIVs for ETMFs would not provide pricing signals for market intermediaries or other buyers or sellers of Shares seeking to estimate the difference between the current value of the ETMF's portfolio and the price at which Shares are currently trading. With ETMF's NAV-based Trading, market intermediaries and other buyers or sellers of Shares assume no intraday market risk in their Share inventory positions and therefore would not need to estimate any such difference.

[18] Where an ETMF permits an in-kind purchaser to deposit cash in lieu of depositing one or more Basket Instruments, the purchaser may be assessed a higher Transaction Fee to offset the cost to the ETMF of buying those particular Basket Instruments. In all cases, the Transaction Fee and the Master Fund Transaction Fee (as defined below) will be limited in accordance with the requirements of the Commission applicable to open-end management investment companies offering redeemable securities.

[19] Applicants believe that, to treat investors fairly and consistently, a Master Fund with two or more Feeder Funds should transact with each Feeder Fund on a basis that protects the Master Fund (and, indirectly, other Feeder Funds) against the costs of accommodating the Feeder Fund's inflows and outflows. In the proposed structure, the Master Fund would accomplish this by imposing a fee (''Master Fund Transaction Fee'') on Feeder Fund inflows and outflows, sized to cover the estimated cost to the Master Fund of, in connection with a sale of its interests, converting the cash and/or other instruments it receives to the desired Portfolio Positions and, in connection with a redemption of its interests, converting Portfolio Positions to cash and/or other instruments to be distributed. The Master Fund Transaction Fee would be applied to all Feeder Funds in the same manner so as to avoid discrimination by the Master Fund among Feeder Funds.

[20] *See* Exchange-Traded Funds, Investment Company Act Release No. 28193 (Mar. 11, 2008) at text following note 29; ICI, 2014 INVESTMENT COMPANY FACT BOOK (2014) (''ICI Fact Book''), at 59, available at *www.ici.org/pdf/2014_factbook.pdf.*

sufficient knowledge of portfolio holdings to enable them to effectively arbitrage differences between an ETF's market price and its underlying portfolio value and to hedge the intraday market risk they assume as they take inventory positions in connection with their market-making activities. According to applicants, in NAV-based Trading, by contrast, Market Makers do not engage in arbitrage and assume no intraday market risk in their Share inventory positions because all trading prices are linked to NAV.[21] Applicants state that no intraday market risk means no need for Market Makers to engage in intraday hedging activity, and therefore no associated requirement for current portfolio holdings disclosure to maintain a tight relationship between Share trading prices and NAV.[22] Accordingly, applicants maintain that because Share transaction prices would be based on end-of-day NAV, ETMFs can be expected to trade at consistently narrow premiums/discounts to NAV and tight bid-ask spreads even in the absence of full portfolio holdings disclosure.

14. Applicants claim that ETMFs, not being required to provide daily portfolio transparency, have the potential for providing investors with access to a broad range of active strategies in a structure that provides the cost and tax efficiencies and shareholder protections of an ETF.

Requested Exemptive Relief

15. Applicants request an order under section 6(c) of the Act for an exemption from sections 2(a)(32), 5(a)(1), 22(d) and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(J) of the Act for an exemption from sections 12(d)(1)(A) and (B) of the Act.

16. Applicants' request for relief is novel only under section 22(d) and rule 22c–1 under the Act with respect to NAV-based Trading. In all other respects, applicants are seeking the same relief that the Commission has previously granted to permit the operation of ETFs. As discussed above, the requested relief would be available to any existing or future investment company that is an ETMF operating in compliance with the terms and conditions of the order and that is advised by an Adviser. In support of future ETMF relief, applicants assert that Future ETMFs raise no legal or policy questions different from those presented by the Initial ETMFs and that the arguments for exemptive relief are equally valid regardless of the type of assets or investment strategy utilized by a specific ETMF. The Commission preliminarily agrees with these assertions.

17. Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction, or any class of persons, securities or transactions, from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from section 17(a) of the Act if evidence establishes that the terms of the transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and the proposed transaction is consistent with the policies of the registered investment company and the general purposes of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors.

A. Novel Relief Under Section 22(d) and Rule 22c–1

18. Section 22(d) of the Act, among other things, prohibits a dealer from selling a redeemable security that is currently being offered to the public by or through a principal underwriter other than at a current public offering price described in the fund's prospectus. Rule 22c–1 under the Act requires open-end funds, their principal underwriters, and dealers in fund shares (and certain others) to sell and redeem fund shares at a price based on the current NAV next computed after receipt of an order to buy or redeem. Together, these provisions are designed to prevent dilution caused by riskless trading schemes, require that shareholders are treated equitably when buying and selling fund shares, and assure an orderly distribution system of investment company shares.

19. Applicants request relief from these provisions to permit NAV-based Trading of Shares. Because of ETMFs' NAV-based Trading, the need for exemptive relief from section 22(d) and rule 22c–1 for ETMFs arises due to the portion of the trading price that is the negotiated amount (*i.e.,* premium/discount).

20. Applicants assert that the concerns underlying section 22(d) of the Act and rule 22c–1 under the Act with respect to pricing are addressed by the NAV-based Trading of Shares. Applicants maintain that while there is little legislative history regarding section 22(d), its provisions, as well as those of rule 22c–1, appear to have been designed to (a) prevent dilution caused by certain riskless-trading schemes by principal underwriters and contract dealers, (b) prevent unjust discrimination or preferential treatment among buyers resulting from sales at different prices, and (c) assure an orderly distribution system of investment company shares by eliminating price competition from brokers offering shares at less than the published sales price and repurchasing shares at more than the published redemption price.

21. Applicants believe that none of these purposes would be thwarted by permitting NAV-based Trading of Shares. Applicants state that NAV-based Trading in Shares would not cause dilution of the shareholders' beneficial interests in ETMFs because secondary market trading in Shares would not involve the ETMF's portfolio. Applicants assert that NAV-Based Trading responds to concerns of unjust price discrimination among purchasers and preserving an orderly distribution of Shares. Shares would trade on an Exchange, a regulated venue, at market-determined premiums/discounts. The current and historical premiums/discounts also would be transparent to investors and intermediaries.

[21] Applicants state that Market Makers would realize a profit to the extent the premium/discount exceeded their cost in entering into these transactions. Applicants assert that these costs would include, indirectly if the Market Maker is not an Authorized Participant, the Transaction Fees paid to an ETMF and the cost of purchasing or selling the Basket Instruments exchanged with the ETMF. According to applicants, these costs would not include a cost of hedging an intraday position in Shares. Applicants assert that the cost of intermediation would be lower with respect to ETMFs than for ETFs and profits would be relatively more predictable, which should foster intermediary participation in the market for Shares and therefore the competition necessary to limit the levels of the premium/discount.

[22] Applicants believe that Market Makers will generally seek to minimize their exposure to price risk in Shares by holding little or no overnight inventory. ETMFs also will have smaller creation unit sizes than ETFs. Applicants also believe that these smaller creation unit sizes will support secondary market trading efficiency by facilitating tighter market maker inventory management because it facilitates closing out positions at the end of each trading day. To the extent that Market Makers hold small positions in Shares overnight, applicants expect them to aggregate such holdings with any other risk positions that they are holding and transact at or near the market close to buy or sell offsetting positions in appropriate, broad-based hedging instruments, such as S&P 500 and other index futures and ETFs.

Applicants assert that transparent pricing on an Exchange should foster competition among market intermediaries, which would create downward pressure on intermediaries' profits embedded in the premium/discount and therefore on the total amount of any such premium/discount. Accordingly, applicants contend that the mechanics of the distribution of Shares and competitive market forces on an Exchange would work to limit the premium/discount and allow contemporaneous investors to buy or sell Shares at approximately the same intraday price.

22. The relief from section 22(d) and rule 22c–1 requested by applicants is significantly different from the relief previously granted by the Commission to actively managed ETFs. ETFs require relief from these provisions because certain investors may purchase and sell individual ETF shares on the secondary market at current market prices; *i.e.,* at prices other than those described in the ETF's prospectus or based on the ETF's NAV. Among other things, the market prices are affected by changes in the value of the underlying portfolio positions of the ETF.

23. Historically, in making the findings necessary to grant exemptive relief from section 22(d) and rule 22c–1, the Commission has relied on representations by ETF sponsors that an arbitrage mechanism functions to keep the market price of the ETF's shares at or close to the NAV per share of the ETF. The close tie between the market price and the NAV per share of the ETF is the foundation for why the prices at which retail investors buy and sell shares are similar to the prices at which Authorized Participants are able to buy and redeem shares directly from the ETF at NAV.

24. ETMF trading prices, as discussed above, would be directly tied to NAV. Unlike ETFs, ETMFs' need for relief arises because their trading price deviate from NAV only with respect to the execution costs of buying and selling ETMF Shares (i.e., the premium/discount). In contrast, ETFs need relief because of differences related to the value of the underlying portfolio positions. Therefore, because ETMF Shares' trading prices are directly tied to NAV, an arbitrage mechanism that would keep market price close to or at NAV is not necessary.

25. Accordingly, the Commission preliminarily agrees that any amount of premium or discount will be limited in the manner explained by applicants and that the concerns underlying section 22(d) and rule 22c–1 thereunder are addressed by the NAV-based Trading of Shares proposed by the applicants. Any differences from the ETMF proposed model, however, would not necessarily address those concerns.

B. Other Relief [23]

Sections 5(a)(1) and 2(a)(32) of the Act

26. Section 5(a)(1) of the Act defines an ''open-end company'' as a management investment company that is offering for sale or has outstanding any redeemable security of which it is the issuer. Section 2(a)(32) of the Act defines a redeemable security as any security, other than short-term paper, under the terms of which the holder, upon its presentation to the issuer, is entitled to receive approximately a proportionate share of the issuer's current net assets, or the cash equivalent. Because Shares would not be individually redeemable, applicants request an order that would permit the Trusts to register as open-end investment companies and each ETMF to redeem Shares in Creation Units only.[24] Applicants state that investors may purchase Shares in Creation Units from each ETMF and redeem Creation Units from each ETMF. Applicants further state all investors would have the ability to buy and sell Shares throughout the day using NAV-based Trading at trading prices that are directly linked to NAV and that can be expected to reflect narrow premium/discounts to NAV.

Section 22(e) of the Act

27. Section 22(e) of the Act generally prohibits a registered investment company from suspending the right of redemption or postponing the date of payment of redemption proceeds for more than seven days after the tender of a security for redemption. Applicants observe that settlement of redemptions of Creation Units of ETMFs holding Portfolio Positions traded on global markets (''Global ETMFs'') is contingent not only on the settlement cycle of the U.S. securities markets but also on the delivery cycles present in foreign markets in which those ETMFs invest. Applicants represent that, under certain circumstances, the delivery cycles for transferring foreign-traded Basket Instruments to redeeming investors, coupled with local market holiday schedules, would require a delivery process of up to 14 calendar days. Applicants therefore request relief from section 22(e) in order to provide payment or satisfaction of redemptions within the maximum number of calendar days required for such payment or satisfaction in the principal local markets where transactions in the foreign-traded Basket Instruments of each Global ETMF customarily clear and settle, but in all cases no later than 14 calendar days following the tender of a Creation Unit.[25]

28. Applicants state that section 22(e) was designed to prevent unreasonable, undisclosed and unforeseen delays in the actual payment of redemption proceeds. Applicants state that allowing redemption payments in kind for Creation Units of a Global ETMF to be made within a maximum of 14 calendar days would not be inconsistent with the spirit and intent of section 22(e). Applicants state each ETMF's statement of additional information (''SAI'') would disclose those local holidays (over the period of at least one year following the date of the SAI), if any, that are expected to prevent the delivery of redemption proceeds in kind in seven calendar days and the maximum number of days (not to exceed 14 calendar days) needed to deliver the proceeds in kind for each affected ETMF. Applicants are not seeking relief from section 22(e) with respect to Global ETMFs that do not effect redemptions in kind.

Section 12(d)(1) of the Act

29. Section 12(d)(1)(A) of the Act prohibits a registered investment company from acquiring shares of an investment company if the securities represent more than 3% of the total outstanding voting stock of the acquired company, more than 5% of the total assets of the acquiring company, or, together with the securities of any other investment companies, more than 10% of the total assets of the acquiring company. Section 12(d)(1)(B) of the Act prohibits a registered open-end investment company, its principal underwriter, or any other broker or dealer from selling its shares to another investment company if the sale will cause the acquiring company to own more than 3% of the acquired company's voting stock, or if the sale

[23] This other relief is the same relief that the Commission has previously granted to permit the operation of ETFs, as stated above.

[24] The Master Funds will not require relief from sections 2(a)(32) and 5(a)(1) because the Master Funds will operate as traditional mutual funds and issue individually redeemable interests.

[25] Applicants acknowledge that no relief obtained from the requirements of section 22(e) would affect any obligations that applicants may otherwise have under rule 15c6–1 under the Exchange Act. Rule 15c6–1 requires that most securities transactions be settled within three business days of the trade date. Mutual Fund Feeders (as defined below) may need to separately seek relief from section 22(e) if they intend to permit or require their shareholders to redeem in kind. Mutual Fund Feeders are not seeking, and would not rely on, the section 22(e) relief requested herein.

will cause more than 10% of the acquired company's voting stock to be owned by investment companies generally.

30. Applicants are seeking relief so that an ETMF may be an acquired fund in a fund of funds structure. In particular, applicants request that pursuant to section 12(d)(1)(J) of the Act the order permit Acquiring Funds (as defined below) to acquire Shares of an ETMF beyond the limitations in section 12(d)(1)(A) and permit an ETMF, any principal underwriter for the ETMFs,[26] and any Brokers (as defined below) to sell Shares to Acquiring Funds beyond the limitations in section 12(d)(1)(B) (''Section 12(d)(1) Relief''). Applicants request that the Section 12(d)(1) Relief apply to each management investment company or unit investment trust registered under the Act that is not part of the same ''group of investment companies'' as an ETMF within the meaning of section 12(d)(1)(G)(ii) of the Act and that enters into an Acquiring Fund Agreement (as defined below) with an ETMF (such management investment companies, ''Acquiring Management Companies,'' such unit investment trusts, ''Acquiring Trusts,'' and Acquiring Management Companies and Acquiring Trusts together, ''Acquiring Funds'').[27] Acquiring Funds do not include the ETMFs.[28] Applicants submit that the proposed conditions to the requested relief address the concerns underlying the limits in section 12(d)(1), which include concerns about undue influence, excessive layering of fees and overly complex structures.

31. Applicants submit that their proposed conditions address any concerns regarding the potential for undue influence. To limit the control that an Acquiring Fund may have over an ETMF, applicants propose a condition prohibiting the adviser of an Investing Management Company (''Acquiring Fund Adviser''), sponsor of an Acquiring Trust (''Sponsor''), any person controlling, controlled by, or under common control with the Acquiring Fund Adviser or Sponsor, and any investment company or issuer that would be an investment company but for sections 3(c)(1) or 3(c)(7) of the Act that is advised or sponsored by the Acquiring Fund Adviser, the Sponsor, or any person controlling, controlled by, or under common control with the Acquiring Fund Adviser or Sponsor (''Acquiring Fund's Advisory Group'') from controlling (individually or in the aggregate) an ETMF within the meaning of section 2(a)(9) of the Act. The same prohibition would apply to any sub-adviser to an Acquiring Management Company (''Acquiring Fund Sub-Adviser''), any person controlling, controlled by or under common control with the Acquiring Fund Sub-Adviser, and any investment company or issuer that would be an investment company but for sections 3(c)(1) or 3(c)(7) of the Act (or portion of such investment company or issuer) advised or sponsored by the Acquiring Fund Sub-Adviser or any person controlling, controlled by or under common control with the Acquiring Fund Sub-Adviser (''Acquiring Fund's Sub-Advisory Group'').

32. To limit undue influence, applicants propose a condition to ensure that no Acquiring Fund or Acquiring Fund Affiliate [29] (except to the extent it is acting in its capacity as an investment adviser to an ETMF) will cause an ETMF (or, in the case of an ETMF Feeder, its Master Fund) to purchase a security in an offering of securities during the existence of an underwriting or selling syndicate of which a principal underwriter is an Underwriting Affiliate (''Affiliated Underwriting''). An ''Underwriting Affiliate'' is a principal underwriter in any underwriting or selling syndicate that is an officer, director, member of an advisory board, Acquiring Fund Adviser, Acquiring Fund Sub-Adviser, Sponsor, or employee of the Acquiring Fund, or a person of which any such officer, director, member of an advisory board, Acquiring Fund Adviser, Acquiring Fund Sub-Adviser, Sponsor, or employee is an affiliated person (except any person whose relationship to the ETMF is covered by section 10(f) of the Act is not an Underwriting Affiliate).

33. Applicants propose several conditions to address the potential for layering of fees. Applicants note that the board of directors or trustees of any Acquiring Management Company, including a majority of the directors or trustees who are not ''interested persons'' within the meaning of section 2(a)(19) of the Act (''disinterested directors or trustees''), would be required to find that the advisory fees charged under the Acquiring Management Company's advisory contract are based on services provided that would be in addition to, rather than duplicative of, services provided under the advisory contract of any ETMF (or, in the case of an ETMF Feeder, its Master Fund) in which the Acquiring Management Company may invest. Applicants also state that any sales charges and/or service fees charged with respect to shares of an Acquiring Fund will not exceed the limits applicable to a fund of funds as set forth in NASD Conduct Rule 2830.

34. Applicants submit that the proposed arrangement would not create an overly complex fund structure. Applicants note that an ETMF (and, in the case of an ETMF Feeder, the Master Fund) would be prohibited from acquiring securities of any investment company or company relying on section 3(c)(1) or 3(c)(7) of the Act in excess of the limits contained in section 12(d)(1)(A) of the Act, except to the extent that the ETMF acquires such securities in compliance with section 12(d)(1)(E) of the Act or this order or the ETMF (or, in the case of an ETMF Feeder, the Master Fund): (a) Receives securities of another investment company as a dividend or as a result of a plan of reorganization of a company (other than a plan devised for the purpose of evading section 12(d)(1) of the Act); or (b) acquires (or is deemed to have acquired) securities of another investment company pursuant to exemptive relief from the Commission permitting the ETMF (or in the case of a ETMF Feeder, the Master Fund) to (i) acquire securities of one or more investment companies for short-term cash management purposes or (ii) engage in interfund borrowing and lending transactions.

35. To ensure that an Acquiring Fund is aware of the terms and conditions of the requested order, the Acquiring Fund must enter into an agreement with the respective ETMFs (''Acquiring Fund Agreement''). The Acquiring Fund Agreement will include an acknowledgement from the Acquiring Fund that it may rely on the order only

[26] Applicants further request that the order apply to any future distributor and principal underwriter of the ETMFs (included in the term ''Distributor''), which would be a registered broker-dealer under the Exchange Act (any registered broker-dealers, ''Brokers'') and would comply with the terms and conditions of the requested order. The Distributor of any ETMF may be an affiliated person of the Adviser.

[27] Under condition 11, the Section 12(d)(1) Relief would generally not apply to any ETMF that is, either directly or through a master-feeder structure, acquiring securities of any investment company or company relying on section 3(c)(1) or 3(c)(7) of the Act in excess of the limits in section 12(d)(1)(A) of the Act.

[28] An Acquiring Fund may rely on the order only to invest in ETMFs and not in any other registered investment companies.

[29] An ''Acquiring Fund Affiliate'' is any Acquiring Fund Adviser, Acquiring Fund Sub-Adviser, Sponsor, promoter and principal underwriter of an Acquiring Fund, and any person controlling, controlled by or under common control with any of these entities. ''ETMF Affiliate'' is an investment adviser, promoter, or principal underwriter of an ETMF (or, in the case of an ETMF Feeder, its Master Fund) and any person controlling, controlled by or under common control with any of these entities.

to invest in an ETMF and not in any other investment company.

36. Applicants further request relief to permit an ETMF to be a feeder (an ''ETMF Feeder'') in a master-feeder structure alongside one or more other registered open-end investment companies advised by the same Adviser (each such other open-end investment company, a ''Mutual Fund Feeder,'' and together with any ETMF Feeder, the ''Feeder Funds''). The requested relief would permit the ETMF Feeder to acquire shares of another registered investment company in the same group of investment companies having substantially the same investment objectives as the ETMF Feeder (a ''Master Fund'') beyond the limitations in section 12(d)(1)(A) of the Act and permit the Master Fund, and any principal underwriter for the Master Fund, to sell shares of the Master Fund to the ETMF Feeder beyond the limitations in section 12(d)(1)(B) of the Act (''Master-Feeder Relief'').[30] There would be no ability by shareholders to exchange Shares of ETMF Feeders for shares of another Feeder Fund of the Master Fund or vice versa.

37. Applicants are seeking the Master-Feeder Relief to permit ETMF Feeders to create and redeem in kind Shares with their Master Funds. Applicants assert that this structure is substantially identical to traditional master-feeder structures permitted pursuant to the exception provided in section 12(d)(1)(E) of the Act. Section 12(d)(1)(E) provides that the percentage limitations of sections 12(d)(1)(A) and (B) will not apply to a security issued by an investment company (in this case, the shares of the applicable Master Fund) if, among other things, that security is the only investment security held in the investing fund's portfolio (in this case, the ETMF Feeder's portfolio). Applicants believe the proposed master-feeder structure complies with section 12(d)(1)(E) because each ETMF Feeder would hold only investment securities issued by its corresponding Master Fund; however, the ETMF Feeders may receive securities other than securities of its corresponding Master Fund if an ETMF Feeder accepts an in-kind creation. To the extent that an ETMF Feeder may be deemed to be holding both shares of the Master Fund and other securities, applicants request relief from sections 12(d)(1)(A) and (B). The ETMF Feeders would operate in compliance with all other provisions of section 12(d)(1)(E).

Sections 17(a)(1) and (2) of the Act

38. Section 17(a) of the Act generally prohibits an affiliated person of a registered investment company, or an affiliated person of such a person (''second-tier affiliate''), from selling any security to or purchasing any security from the company. Section 2(a)(3) of the Act defines ''affiliated person'' to include any person directly or indirectly owning, controlling, or holding with power to vote, 5% or more of the outstanding voting securities of the other person and any person directly or indirectly controlling, controlled by, or under common control with, the other person. Section 2(a)(9) of the Act defines ''control'' as the power to exercise a controlling influence over the management or policies of a company and provides that a control relationship will be presumed where one person owns more than 25% of another person's voting securities. Each ETMF may be deemed to be controlled by an Adviser and hence affiliated persons of each other. In addition, the ETMFs may be deemed to be under common control with any other registered investment company (or series thereof) advised by an Adviser (an ''Affiliated Fund'').

39. Applicants request an exemption under sections 6(c) and 17(b) of the Act from sections 17(a)(1) and 17(a)(2) of the Act to permit in-kind purchases and redemptions of Creation Units by persons that are affiliated persons or second-tier affiliates of the ETMFs solely by virtue of one or more of the following: (a) Holding 5% or more, or in excess of 25% of the outstanding Shares of one or more ETMFs; (b) having an affiliation with a person with an ownership interest described in (a); or (c) holding 5% or more, or more than 25% of the Shares of one or more Affiliated Funds.[31] Applicants also request an exemption in order to permit an ETMF to sell its Shares to and redeem its Shares from, and engage in the in-kind transactions that would accompany such sales and redemptions with, an Acquiring Fund of which the ETMF is an affiliated person or a second-tier affiliate.[32]

40. Applicants assert that no useful purpose would be served by prohibiting such affiliated persons from making in-kind purchases or in-kind redemptions of Shares of an ETMF in Creation Units. Absent the limited circumstances discussed in the application, the Basket Instruments available for an ETMF would be the same for all purchasers and redeemers, respectively. The deposit procedures for in-kind purchases of Creation Units and the redemption procedures for in-kind redemptions would be the same for all purchases and redemptions. All Basket Instruments would be valued in the same manner as they are valued for purposes of calculating the ETMF's NAV, and such valuation would be made in the same manner regardless of the identity of the purchaser or redeemer. Applicants do not believe that in-kind purchases and redemptions would result in abusive self-dealing or overreaching of the ETMF.

41. Applicants also submit that the sale of Shares to and redemption of Shares from an Acquiring Fund meets the standards for relief under sections 17(b) and 6(c) of the Act. Applicants note that any consideration paid for the purchase or redemption of Shares directly from an ETMF would be based on the NAV of the ETMF in accordance with policies and procedures set forth in the ETMF's registration statement.[33] The Acquiring Fund Agreement will require any Acquiring Fund that purchases Creation Units directly from an ETMF to represent that the purchase of Creation Units from an ETMF by an Acquiring Fund will be accomplished in compliance with the investment restrictions of the Acquiring Fund and will be consistent with the investment policies set forth in the Acquiring Fund's registration statement. Applicants also state that the proposed transactions are consistent with the general purposes of the Act and appropriate in the public interest.

42. To the extent that an ETMF operates in a master-feeder structure,

[30] Applicants may structure certain ETMFs as ETMF Feeders to generate economies of scale for shareholders of all Feeder Funds of the Master Fund that could not be otherwise realized. Operating in a master-feeder structure could also impose costs on an ETMF Feeder and reduce its tax efficiency. In determining whether an ETMF would operate in a master-feeder structure, the Board would weigh the potential advantages and disadvantages of such a structure for the ETMF. In a master-feeder structure, the Master Fund—rather than the ETMF Feeder—would invest the portfolio in compliance with the order.

[31] Applicants are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where an ETMF could be deemed an affiliated person, or an affiliated person of an affiliated person, of an Acquiring Fund because the Adviser to the ETMF is also an investment adviser to an Acquiring Fund.

[32] To the extent that purchases and sales of Shares occur in the secondary market and not through principal transactions directly between an Acquiring Fund and an ETMF, relief from section 17(a) would not be necessary. The requested relief is intended to cover, however, transactions directly between an Acquiring Fund and an ETMF.

[33] Applicants acknowledge that the receipt of compensation by (a) an affiliated person of an Acquiring Fund, or a second-tier affiliate, for the purchase by the Acquiring Fund of Shares of the ETMF or (b) an affiliated person of an ETMF, or a second-tier affiliate, for the sale by the ETMF of its Shares to an Acquiring ETMF, may be prohibited by section 17(e)(1) of the Act. The Acquiring Fund Agreement also will include this acknowledgment.

applicants also request relief permitting the ETMF Feeders to engage in in-kind creations and redemptions with the applicable Master Fund. Applicants state that the customary section 17(a)(1) and 17(a)(2) relief would not be sufficient to permit such transactions because the ETMF Feeders and the applicable Master Fund could also be affiliated by virtue of having the same investment adviser.

However, applicants believe that in-kind creations and redemptions between an ETMF Feeder and a Master Fund advised by the same investment adviser do not involve ''overreaching'' by an affiliated person. Such transactions would occur only at the ETMF Feeder's proportionate share of the Master Fund's net assets, and the Basket Instruments would be valued in the same manner as they are valued for the purposes of calculating the applicable Master Fund's NAV. Further, all such transactions would be effected with respect to the Basket and on the same terms with respect to all investors. Finally, such transactions would only occur as a result of, and to effectuate, a creation or redemption transaction between the ETMF Feeder and a third party investor. Applicants believe that the terms of the proposed transactions are reasonable and fair and do not involve overreaching on the part of any person concerned and that the transactions are consistent with the general purposes of the Act.

Applicants' Conditions

Applicants agree that any order of the Commission granting the requested relief will be subject to the following conditions:

A. ETMF Relief

1. As long as an ETMF operates in reliance on the requested order, its Shares will be listed on an Exchange.

2. Neither the Trusts nor any ETMF will be advertised or marketed as an open-end investment company, a mutual fund or an ETF. Any advertising material that describes the purchase or sale of Creation Units or refers to redeemability will prominently disclose that Shares are not individually redeemable and that owners of Shares may acquire those Shares from an ETMF and tender those Shares for redemption to the ETMF in Creation Units only.

3. The Web site for the ETMFs, which will be publicly accessible at no charge, will contain, on a per Share basis, for each ETMF, the prior Business Day's NAV; intraday high, low, average and closing trading prices (expressed as premiums/discounts to NAV); the midpoint of the highest bid and lowest offer prices as of the close of Exchange trading (''Closing Bid/Ask Midpoint'') (expressed as a premium/discount to NAV); and the spread between the highest bid and lowest offer prices as of the close of Exchange trading (''Closing Bid/Ask Spread''). The Web site for the ETMFs also will contain charts showing the frequency distribution and range of values of trading prices, Closing Bid/Ask Midpoints and Closing Bid/Ask Spreads over time.

4. The Adviser or any Subadviser, directly or indirectly, will not cause any Authorized Participant (or any investor on whose behalf an Authorized Participant may transact with the ETMF) to acquire any Basket Instrument for the ETMF through a transaction in which the ETMF could not engage directly.

B. Section 12(d)(1) Relief

1. The members of an Acquiring Fund's Advisory Group will not control (individually or in the aggregate) an ETMF (or, in the case of an ETMF Feeder, its Master Fund) within the meaning of section 2(a)(9) of the Act. The members of an Acquiring Fund's Subadvisory Group will not control (individually or in the aggregate) an ETMF (or, in the case of an ETMF Feeder, its Master Fund) within the meaning of section 2(a)(9) of the Act. If, as a result of a decrease in the outstanding voting securities of the ETMF, the Acquiring Fund's Advisory Group or the Acquiring Fund's Subadvisory Group, each in the aggregate, becomes a holder of more than 25 percent of the outstanding voting securities of an ETMF, it will vote its Shares of the ETMF in the same proportion as the vote of all other holders of such Shares. This condition does not apply to the Acquiring Fund's Subadvisory Group with respect to an ETMF (or, in the case of an ETMF Feeder, its Master Fund) for which the Acquiring Fund Subadviser or a person controlling, controlled by or under common control with the Acquiring Fund Subadviser acts as the investment adviser within the meaning of section 2(a)(20)(A) of the Act.

2. No Acquiring Fund or Acquiring Fund Affiliate will cause any existing or potential investment by the Acquiring Fund in an ETMF to influence the terms of any services or transactions between the Acquiring Fund or an Acquiring Fund Affiliate and the ETMF (or, in the case of an ETMF Feeder, its Master Fund) or an ETMF Affiliate.

3. The board of directors or trustees of an Acquiring Management Company, including a majority of the disinterested directors or trustees, will adopt procedures reasonably designed to ensure that the Acquiring Fund Adviser and any Acquiring Fund Subadviser are conducting the investment program of the Acquiring Management Company without taking into account any consideration received by the Acquiring Management Company or an Acquiring Fund Affiliate from an ETMF (or, in the case of an ETMF Feeder, its Master Fund) or an ETMF Affiliate in connection with any services or transactions.

4. Once an investment by an Acquiring Fund in the Shares of an ETMF exceeds the limit in section 12(d)(1)(A)(i) of the Act, the Board of the ETMF, including a majority of the disinterested directors or trustees, will determine that any consideration paid by the ETMF (or, in the case of an ETMF Feeder, its Master Fund) to an Acquiring Fund or an Acquiring Fund Affiliate in connection with any services or transactions: (i) Is fair and reasonable in relation to the nature and quality of the services and benefits received by the ETMF (or, in the case of an ETMF Feeder, its Master Fund); (ii) is within the range of consideration that the ETMF (or, in the case of an ETMF Feeder, its Master Fund) would be required to pay to another unaffiliated entity in connection with the same services or transactions; and (iii) does not involve overreaching on the part of any person concerned. This condition does not apply to any services or transactions between an ETMF (or, in the case of an ETMF Feeder, its Master Fund) and its investment adviser(s), or any person controlling, controlled by or under common control with such investment adviser(s).

5. No Acquiring Fund or Acquiring Fund Affiliate (except to the extent it is acting in its capacity as an investment adviser to an ETMF (or, in the case of an ETMF Feeder, its Master Fund)) will cause an ETMF (or, in the case of an ETMF Feeder, its Master Fund) to purchase a security in an Affiliated Underwriting.

6. The Board of an ETMF (or, in the case of an ETMF Feeder, its Master Fund), including a majority of the disinterested directors or trustees, will adopt procedures reasonably designed to monitor any purchases of securities by the ETMF (or, in the case of an ETMF Feeder, its Master Fund) in an Affiliated Underwriting, once an investment by an Acquiring Fund in the securities of the ETMF exceeds the limit of section 12(d)(1)(A)(i) of the Act, including any purchases made directly from an Underwriting Affiliate. The Board will review these purchases periodically, but no less frequently than annually, to

determine whether the purchases were influenced by the investment by the Acquiring Fund in the ETMF. The Board will consider, among other things: (i) Whether the purchases were consistent with the investment objectives and policies of the ETMF (or, in the case of an ETMF Feeder, its Master Fund); (ii) how the performance of securities purchased in an Affiliated Underwriting compares to the performance of comparable securities purchased during a comparable period of time in underwritings other than Affiliated Underwritings or to a benchmark such as a comparable market index; and (iii) whether the amount of securities purchased by the ETMF (or, in the case of an ETMF Feeder, its Master Fund) in Affiliated Underwritings and the amount purchased directly from an Underwriting Affiliate have changed significantly from prior years. The Board will take any appropriate actions based on its review, including, if appropriate, the institution of procedures designed to assure that purchases of securities in Affiliated Underwritings are in the best interest of shareholders of the ETMF.

7. Each ETMF (or, in the case of an ETMF Feeder, its Master Fund) will maintain and preserve permanently in an easily accessible place a written copy of the procedures described in the preceding condition, and any modifications to such procedures, and will maintain and preserve for a period of not less than six years from the end of the fiscal year in which any purchase in an Affiliated Underwriting occurred, the first two years in an easily accessible place, a written record of each purchase of securities in Affiliated Underwritings, once an investment by an Acquiring Fund in the securities of the ETMF exceeds the limit of section 12(d)(1)(A)(i) of the Act, setting forth from whom the securities were acquired, the identity of the underwriting syndicate's members, the terms of the purchase, and the information or materials upon which the determinations of the Board were made.

8. Before investing in an ETMF in excess of the limits in section 12(d)(1)(A), an Acquiring Fund and the ETMF will execute an Acquiring Fund Agreement stating that their boards of directors or trustees and their investment advisers, or Trustee and Sponsor, as applicable, understand the terms and conditions of the order, and agree to fulfill their responsibilities under the order. At the time of its investment in Shares of an ETMF in excess of the limit in section 12(d)(1)(A)(i), an Acquiring Fund will notify the ETMF of the investment. At such time, the Acquiring Fund will also transmit to the ETMF a list of the names of each Acquiring Fund Affiliate and Underwriting Affiliate. The Acquiring Fund will notify the ETMF of any changes to the list of the names as soon as reasonably practicable after a change occurs. The ETMF and the Acquiring Fund will maintain and preserve a copy of the order, the Acquiring Fund Agreement, and the list with any updated information for the duration of the investment and for a period of not less than six years thereafter, the first two years in an easily accessible place.

9. The Acquiring Fund Adviser, or Trustee or Sponsor, as applicable, will waive fees otherwise payable to it by the Acquiring Fund in an amount at least equal to any compensation received from an ETMF (or, in the case of an ETMF Feeder, its Master Fund) by the Acquiring Fund Adviser, or Trustee, or Sponsor, or an affiliated person of the Acquiring Fund Adviser, or Trustee, or Sponsor, other than any advisory fees paid to the Acquiring Fund Adviser, or Trustee, or Sponsor, or its affiliated person by the ETMF (or, in the case of an ETMF Feeder, its Master Fund), in connection with the investment by the Acquiring Fund in the ETMF. Any Acquiring Fund Subadviser will waive fees otherwise payable to the Acquiring Fund Subadviser, directly or indirectly, by the Acquiring Management Company in an amount at least equal to any compensation received from an ETMF (or, in the case of an ETMF Feeder, its Master Fund) by the Acquiring Fund Subadviser, or an affiliated person of the Acquiring Fund Subadviser, other than any advisory fees paid to the Acquiring Fund Subadviser or its affiliated person by the ETMF (or, in the case of an ETMF Feeder, its Master Fund), in connection with any investment by the Acquiring Management Company in the ETMF made at the direction of the Acquiring Fund Subadviser. In the event that the Acquiring Fund Subadviser waives fees, the benefit of the waiver will be passed through to the Acquiring Management Company.

10. Any sales charges and/or service fees charged with respect to shares of an Acquiring Fund will not exceed the limits applicable to a fund of funds as set forth in NASD Conduct Rule 2830.

11. No ETMF (or, in the case of an ETMF Feeder, its Master Fund) relying on the Section 12(d)(1) relief will acquire securities of any investment company or company relying on section 3(c)(1) or 3(c)(7) of the Act in excess of the limits contained in section 12(d)(1)(A) of the Act, except to the extent that the ETMF acquires such securities in compliance with section 12(d)(1)(E) of the Act or acquires shares of a Master Fund; or the ETMF (or, in the case of an ETMF Feeder, its Master Fund) (a) Receives securities of another investment company as a dividend or as a result of a plan of reorganization of a company (other than a plan devised for the purpose of evading section 12(d)(1) of the Act), or (b) acquires securities of another investment company pursuant to exemptive relief from the Commission permitting such ETMF (or, in the case of an ETMF Feeder, its Master Fund) to (i) Acquire securities of one or more investment companies for short-term cash management purposes or (ii) engage in interfund borrowing and lending transactions.

12. Before approving any advisory contract under section 15 of the Act, the board of each Acquiring Management Company, including a majority of the disinterested directors or trustees, will find that the advisory fees charged under such advisory contract are based on services provided that will be in addition to, rather than duplicative of, the services provided under the advisory contracts of any ETMF (or, in the case of an ETMF Feeder, its Master Fund) in which the Acquiring Management Company may invest. These findings and their basis will be recorded fully in the minute books of the appropriate Acquiring Management Company.

By the Commission.

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31332; 812–14236]

AllianceBernstein Cap Fund, Inc., et al.; Notice of Application

November 6, 2014.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 12(d)(1)(J) of the Investment Company Act of 1940 (the ''Act'') for exemptions from sections 12(d)(1)(A), (B), and (C) of the Act, under sections 6(c) and 17(b) of the Act for an exemption from section 17(a) of the Act, and under section 6(c) of the Act for an exemption from rule 12d1–2(a) under the Act.

SUMMARY OF THE APPLICATION: Applicants request an order that would (a) permit certain registered open-end management investment companies that operate as ''funds of funds'' to acquire shares of certain registered open-end management investment companies, registered closed-end management investment companies, business development companies as defined by section 2(a)(48) of the Act (''business development companies''), and registered unit investment trusts that are within or outside the same group of investment companies as the acquiring investment companies and (b) permit certain registered open-end management investment companies relying on rule 12d1–2 under the Act to invest in certain financial instruments.

APPLICANTS: AllianceBernstein Cap Fund, Inc. (the ''Company''), AllianceBernstein L.P. (the ''Adviser''), and AllianceBernstein Investments, Inc. (the ''Distributor'').

DATES: *Filing Dates:* The application was filed on November 14, 2013, and amended on June 10, 2014, August 22, 2014, and November 4, 2014.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 1, 2014, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing on the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicants: c/o Emilie D. Wrapp, 1345 Avenue of the Americas, New York, NY 10105.

FOR FURTHER INFORMATION CONTACT: Deepak T. Pai, Senior Counsel, at (202) 551–6876, or Mary Kay Frech, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the ''Company'' name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants' Representations

1. The Company is an open-end management investment company registered under the Act and organized as a Maryland corporation. The Company has multiple series, which pursue distinct investment objectives and strategies. Applicants request that the order apply not only to any existing series of the Company, but also to any future series of the Company, and any other existing or future registered open-end management investment companies and any series thereof that are part of the same group of investment companies, as defined in section 12(d)(1)(G)(ii) of the Act, as the Company and are, or may in the future be, advised by the Adviser or any other investment adviser controlling, controlled by, or under common control with the Adviser (together with the existing series of the Company, each series a ''Fund,'' and collectively, the ''Funds'').[1]

2. The Adviser, a Delaware limited partnership, is registered as an investment adviser under the Investment Advisers Act of 1940 (the ''Advisers Act''), and serves as the investment adviser to the existing Funds.[2] The Distributor is a Broker (as defined below) and serves as the existing Funds' principal underwriter and distributor.

3. Applicants request relief to the extent necessary to permit: (a) A Fund (each, a ''Fund of Funds,'' and collectively, the ''Funds of Funds'') to acquire shares of registered open-end management investment companies (each, an ''Unaffiliated Open-End Investment Company''), registered closed-end management investment companies, business development companies (each registered closed-end management investment company and each business development company, an ''Unaffiliated Closed-End Investment Company'' and, together with the Unaffiliated Open-End Investment Companies, the ''Unaffiliated Investment Companies''), and registered unit investment trusts (''UITs'') (the ''Unaffiliated Trusts,'' and together with the Unaffiliated Investment Companies, the ''Unaffiliated Funds''), in each case, that are not part of the same ''group of investment companies'' as the Funds of Funds;[3] (b) the Unaffiliated Open-End Investment Companies, their principal underwriters and any broker or dealer registered under the Securities Exchange Act of 1934 (the ''1934 Act'') (''Broker'') to sell shares of such Unaffiliated Open-End Investment Companies to the Funds of Funds; (c) the Funds of Funds to acquire shares of other registered investment companies, including open-end management investment companies and series thereof, closed-end management investment companies and UITs, as well as business development companies, in the same group of investment companies as the Funds of Funds (collectively, the ''Affiliated Funds,'' and, together with the Unaffiliated Funds, the ''Underlying Funds'');[4] and (d) the Affiliated Funds that are registered open-end management investment companies, their principal underwriters and any Broker to sell shares of the Affiliated Funds to the Funds of Funds. Applicants also request an order under sections 6(c) and 17(b) of the Act to exempt applicants from section 17(a) to the extent necessary to permit certain Underlying Funds to sell their shares to Funds of Funds and redeem their shares from Funds of Funds.

4. Applicants also request an exemption under section 6(c) from rule 12d1–2 under the Act to permit any existing or future Fund that relies on

[1] All entities that currently intend to rely on the requested order are named as applicants. Any other entity that relies on the order in the future will comply with the terms and conditions of the application.

[2] All references to the term ''Adviser'' include any successors in interest to the Adviser. A successor is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization.

[3] For purposes of the request for relief from sections 12(d)(1)(A), (B), and (C) of the Act, the term ''group of investment companies'' means any two or more registered investment companies (including closed-end investment companies) or business development companies that hold themselves out to investors as related companies for purposes of investment and investor services.

[4] Certain of the Underlying Funds may be registered under the Act as either UITs or open-end management investment companies and have obtained exemptions from the Commission necessary to permit their shares to be listed and traded on a national securities exchange at negotiated prices and, accordingly, to operate as exchange-traded funds (collectively, ''ETFs'' and each, an ''ETF''). In addition, certain of the Underlying Funds may now or in the future pursue their investment objectives through a master-feeder arrangement in reliance on section 12(d)(1)(E) of the Act. In accordance with condition 12, a Fund of Funds may not invest in an Underlying Fund that operates as a feeder fund unless the feeder fund is part of the same ''group of investment companies'' as its corresponding master fund or the Fund of Funds. If a Fund of Funds invests in an Affiliated Fund that operates as a feeder fund and the corresponding master fund is not within the same ''group of investment companies'' as the Fund of Funds and Affiliated Fund, the master fund would be an Unaffiliated Fund for purposes of the application and its conditions.

section 12(d)(1)(G) of the Act (''Section 12(d)(1)(G) Fund'') and that otherwise complies with rule 12d1–2 under the Act, to also invest, to the extent consistent with its investment objective(s), policies, strategies and limitations, in other financial instruments that may not be securities within the meaning of section 2(a)(36) of the Act (''Other Investments'').

Applicants' Legal Analysis

A. Section 12(d)(1)

1. Section 12(d)(1)(A) of the Act, in relevant part, prohibits a registered investment company from acquiring shares of an investment company if the securities represent more than 3% of the total outstanding voting stock of the acquired company, more than 5% of the total assets of the acquiring company, or, together with the securities of any other investment companies, more than 10% of the total assets of the acquiring company. Section 12(d)(1)(B) of the Act prohibits a registered open-end investment company, its principal underwriter, and any broker or dealer from selling the investment company's shares to another investment company if the sale will cause the acquiring company to own more than 3% of the acquired company's voting stock, or if the sale will cause more than 10% of the acquired company's voting stock to be owned by investment companies generally. Section 12(d)(1)(C) prohibits an investment company from acquiring any security issued by a registered closed-end investment company if such acquisition would result in the acquiring company, any other investment companies having the same investment adviser, and companies controlled by such investment companies, collectively, owning more than 10% of the outstanding voting stock of the registered closed-end investment company.

2. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Applicants request an exemption under section 12(d)(1)(J) of the Act from the limitations of sections 12(d)(1)(A), (B) and (C) of the Act to the extent necessary to permit: (i) The Funds of Funds to acquire shares of Underlying Funds in excess of the limits set forth in section 12(d)(1)(A) and (C) of the Act; and (ii) the Underlying Funds that are registered open-end management investment companies, their principal underwriters and any Broker to sell shares of the Underlying Funds to the Funds of Funds in excess of the limits set forth in section 12(d)(1)(B) of the Act.

3. Applicants state that the proposed arrangement will not give rise to the policy concerns underlying sections 12(d)(1)(A), (B), and (C), which include concerns about undue influence by a fund of funds over underlying funds, excessive layering of fees, and overly complex fund structures. Accordingly, applicants believe that the requested exemption is consistent with the public interest and the protection of investors.

4. Applicants submit that the proposed structure will not result in the exercise of undue influence by a Fund of Funds or its affiliated persons over the Underlying Funds. Applicants assert that the concern about undue influence does not arise in connection with a Fund of Funds' investment in the Affiliated Funds because they are part of the same group of investment companies. To limit the control a Fund of Funds or Fund of Funds Affiliate [5] may have over an Unaffiliated Fund, applicants propose a condition prohibiting the Adviser and any person controlling, controlled by or under common control with the Adviser, and any investment company and any issuer that would be an investment company but for section 3(c)(1) or section 3(c)(7) of the Act advised or sponsored by the Adviser or any person controlling, controlled by or under common control with the Adviser (collectively, the ''Group'') from controlling (individually or in the aggregate) an Unaffiliated Fund within the meaning of section 2(a)(9) of the Act. The same prohibition would apply to any other investment adviser within the meaning of section 2(a)(20)(B) of the Act (''Sub-Adviser'') and any person controlling, controlled by or under common control with the Sub-Adviser, and any investment company or issuer that would be an investment company but for section 3(c)(1) or 3(c)(7) of the Act (or portion of such investment company or issuer) advised or sponsored by the Sub-Adviser or any person controlling, controlled by or under common control with the Sub-Adviser (collectively, the ''Sub-Adviser Group'').

5. With respect to closed-end Underlying Funds, applicants note that although closed-end funds may not be unduly influenced by a holder's right of redemption, closed-end Underlying Funds may be unduly influenced by a holder's ability to vote a large block of stock. To address this concern, applicants submit that, with respect to a Fund's investment in an Unaffiliated Closed-End Investment Company, (i) each member of the Group or Sub-Adviser Group that is an investment company or an issuer that would be an investment company but for section 3(c)(1) or 3(c)(7) of the Act will vote its shares of the Unaffiliated Closed-End Investment Company in the manner prescribed by section 12(d)(1)(E) of the Act and (ii) each other member of the Group or Sub-Adviser Group will vote its shares of the Unaffiliated Closed-End Investment Company in the same proportion as the vote of all other holders of the same type of such Unaffiliated Closed-End Investment Company's shares. Applicants state that, in this way, an Unaffiliated Closed-End Investment Company will be protected from undue influence by a Fund of Funds through the voting of the Unaffiliated Closed-End Investment Company's shares.

6. Applicants propose other conditions to limit the potential for undue influence over the Unaffiliated Funds, including that no Fund of Funds or Fund of Funds Affiliate (except to the extent it is acting in its capacity as an investment adviser to an Unaffiliated Investment Company or sponsor to an Unaffiliated Trust) will cause an Unaffiliated Fund to purchase a security in an offering of securities during the existence of any underwriting or selling syndicate of which a principal underwriter is an Underwriting Affiliate (''Affiliated Underwriting'').[6]

7. To further ensure that an Unaffiliated Investment Company understands the implications of a Fund of Funds' investment under the requested exemptive relief, prior to its investment in the shares of an Unaffiliated Investment Company in excess of the limit of section 12(d)(1)(A)(i) of the Act, a Fund of Funds and the Unaffiliated Investment Company will execute an agreement

[5] A ''Fund of Funds Affiliate'' is the Adviser, any Sub-Adviser, promoter or principal underwriter of a Fund of Funds, as well as any person controlling, controlled by or under common control with any of those entities. An ''Unaffiliated Fund Affiliate'' is an investment adviser(s), sponsor, promoter or principal underwriter of any Unaffiliated Fund or any person controlling, controlled by or under common control with any of those entities.

[6] An ''Underwriting Affiliate'' is a principal underwriter in any underwriting or selling syndicate that is an officer, director, trustee, advisory board member, investment adviser, sub-adviser or employee of the Fund of Funds, or a person of which any such officer, director, trustee, investment adviser, sub-adviser, member of an advisory board or employee is an affiliated person. An Underwriting Affiliate does not include any person whose relationship to an Unaffiliated Fund is covered by section 10(f) of the Act.

stating, without limitation, that each of their boards of directors or trustees (for any entity, the ''Board'') and their investment advisers understand the terms and conditions of the order and agree to fulfill their responsibilities under the order (the ''Participation Agreement''). Applicants note that an Unaffiliated Investment Company (including an ETF or an Unaffiliated Closed-End Investment Company) would also retain its right to reject any initial investment by a Fund of Funds in excess of the limits in section 12(d)(1)(A)(i) of the Act by declining to execute the Participation Agreement with the Fund of Funds. In addition, an Unaffiliated Investment Company (other than an ETF or closed-end fund whose shares are purchased by a Fund of Funds in the secondary market) will retain its right at all times to reject any investment by a Fund of Funds. Finally, subject solely to the giving of notice to a Fund of Funds and the passage of a reasonable notice period, an Unaffiliated Fund (including an ETF or an Unaffiliated Closed-End Investment Company) could terminate a Participation Agreement with the Fund of Funds.

8. Applicants state that they do not believe that the proposed arrangement will result in excessive layering of fees. The Board of each Fund of Funds, including a majority of the directors who are not ''interested persons'' within the meaning of section 2(a)(19) of the Act (the ''Independent Directors''), will find that the management or advisory fees charged under a Fund of Funds' advisory contract are based on services provided that are in addition to, rather than duplicative of, services provided under the advisory contract(s) of any Underlying Fund in which the Fund of Funds may invest. In addition, the Adviser will waive fees otherwise payable to it by a Fund of Funds in an amount at least equal to any compensation (including fees received pursuant to any plan adopted by an Unaffiliated Investment Company under rule 12b-1 under the Act) received from an Unaffiliated Fund by the Adviser, or an affiliated person of the Adviser, other than any advisory fees paid to the Adviser or an affiliated person of the Adviser by the Unaffiliated Investment Company, in connection with the investment by the Fund of Funds in the Unaffiliated Fund.

9. Applicants further state that any sales charges and/or service fees charged with respect to shares of a Fund of Funds will not exceed the limits applicable to funds of funds set forth in rule 2830 of the Conduct Rules of the NASD (''NASD Conduct Rule 2830'').[7]

10. Applicants submit that the proposed arrangement will not create an overly complex fund structure. Applicants note that no Underlying Fund (or, if applicable, its respective master fund) will acquire securities of any other investment company or company relying on section 3(c)(1) or 3(c)(7) of the Act in excess of the limits contained in section 12(d)(1)(A) of the Act, except in certain circumstances identified in condition 12 below.

B. Section 17(a)

1. Section 17(a) of the Act generally prohibits sales or purchases of securities between a registered investment company and any affiliated person, or affiliated person of an affiliated person, of the company. Section 2(a)(3) of the Act defines an ''affiliated person'' of another person to include (a) any person directly or indirectly owning, controlling, or holding with power to vote, 5% or more of the outstanding voting securities of the other person; (b) any person 5% or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote by the other person; and (c) any person directly or indirectly controlling, controlled by, or under common control with the other person.

2. Applicants state that the Funds of Funds and the Affiliated Funds may be deemed to be under the common control of the Adviser and, therefore, affiliated persons of one another. Applicants also state that the Funds of Funds and the Underlying Funds organized as open-end investment companies (''Underlying Open-End Funds'') or UITs (''Underlying UITs'') may also be deemed to be affiliated persons of one another if a Fund of Funds owns 5% or more of the outstanding voting securities of one or more of such Underlying Open-End Funds and/or Underlying UITs. Applicants state that the sale of shares by the Underlying Open-End Funds or Underlying UITs to the Funds of Funds and the purchase of those shares from the Funds of Funds by the Underlying Open-End Funds and/or Underlying UITs (through redemptions) could be deemed to violate section 17(a).[8]

3. Section 17(b) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (i) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (ii) the proposed transaction is consistent with the policies of each registered investment company concerned; and (iii) the proposed transaction is consistent with the general purposes of the Act. Section 6(c) of the Act permits the Commission to exempt any person or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicants submit that the proposed transactions satisfy the standards for relief under sections 17(b) and 6(c) of the Act. Applicants state that the terms of the transactions are reasonable and fair and do not involve overreaching. Applicants state that the terms upon which an Underlying Open-End Fund or Underlying UIT will sell its shares to or purchase its shares from a Fund of Funds will be based on the net asset value of each Underlying Open-End Fund or Underlying UIT.[9] Applicants also state that the proposed transactions will be consistent with the policies of each Fund of Funds, Underlying Open-End Fund, and

[7] Any references to NASD Conduct Rule 2830 include any successor or replacement FINRA rule to NASD Conduct Rule 2830.

[8] Applicants acknowledge that receipt of any compensation by (a) an affiliated person of a Fund of Funds, or an affiliated person of such person, for the purchase by the Fund of Funds of shares of an Underlying Fund or (b) an affiliated person of an Underlying Fund, or an affiliated person of such person, for the sale by the Underlying Fund of its shares to a Fund of Funds may be prohibited by section 17(e)(1) of the Act. The Participation Agreement also will include this acknowledgement.

[9] Applicants note that a Fund of Funds generally would purchase and sell shares of an Underlying Fund that operates as an ETF through secondary market transactions rather than through principal transactions with the Underlying Fund. Applicants nevertheless request relief from sections 17(a)(1) and (2) to permit each Fund of Funds that is an affiliated person, or an affiliated person of an affiliated person, as defined in section 2(a)(3) of the Act, of an ETF to purchase or redeem shares from the ETF. Applicants are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where an ETF could be deemed an affiliated person, or an affiliated person of an affiliated person, of a Fund of Funds because an investment adviser to the ETF or an entity controlling, controlled by or under common control with the investment adviser to the ETF is also an investment adviser to the Fund of Funds. Applicants further note that a Fund of Funds will purchase and sell shares of an Underlying Fund that is a closed-end fund (including business development companies) through secondary market transactions at market prices rather than through principal transactions with the closed-end fund (or business development company). Accordingly, applicants are not requesting section 17(a) relief with respect to principal transactions with closed-end funds (including business development companies).

Underlying UIT and with the general purposes of the Act.

C. Other Investments by Section 12(d)(1)(G) Funds

1. Section 12(d)(1)(G) of the Act provides that section 12(d)(1) will not apply to securities of an acquired company purchased by an acquiring company if: (i) The acquiring company and acquired company are part of the same ''group of investment companies,'' as defined in section 12(d)(1)(G)(ii) of the Act; (ii) the acquiring company holds only securities of acquired companies that are part of the same ''group of investment companies,'' as defined in section 12(d)(1)(G)(ii) of the Act, government securities, and short-term paper; (iii) the aggregate sales loads and distribution-related fees of the acquiring company and the acquired company are not excessive under rules adopted pursuant to section 22(b) or section 22(c) of the Act by a securities association registered under section 15A of the 1934 Act or by the Commission; and (iv) the acquired company has a policy that prohibits it from acquiring securities of registered open-end management investment companies or registered UITs in reliance on section 12(d)(1)(F) or (G) of the Act.

2. Rule 12d1–2 under the Act permits a registered open-end investment company or a registered UIT that relies on section 12(d)(1)(G) of the Act to acquire, in addition to securities issued by another registered investment company in the same group of investment companies, government securities, and short-term paper: (1) Securities issued by an investment company that is not in the same group of investment companies, when the acquisition is in reliance on section 12(d)(1)(A) or 12(d)(1)(F) of the Act; (2) securities (other than securities issued by an investment company); and (3) securities issued by a money market fund, when the investment is in reliance on rule 12d1–1 under the Act. For the purposes of rule 12d1–2, ''securities'' means any security as defined in section 2(a)(36) of the Act.

3. Applicants state that the proposed arrangement would comply with rule 12d1–2 under the Act, but for the fact that the Section 12(d)(1)(G) Funds may invest a portion of their assets in Other Investments. Applicants request an order under section 6(c) of the Act for an exemption from rule 12d1–2(a) to allow the Section 12(d)(1)(G) Funds to invest in Other Investments. Applicants assert that permitting a Section 12(d)(1)(G) Fund to invest in Other Investments as described in the application would not raise any of the concerns that section 12(d)(1) of the Act was intended to address.

4. Consistent with its fiduciary obligations under the Act, a Section 12(d)(1)(G) Fund's Board will review the advisory fees charged by the Section 12(d)(1)(G) Fund's investment adviser(s) to ensure that the fees are based on services provided that are in addition to, rather than duplicative of, services provided pursuant to the advisory agreement of any investment company in which the Section 12(d)(1)(G) Fund may invest.

Applicants' Conditions

A. Investments by Funds of Funds in Underlying Funds

Applicants agree that the order granting the requested relief to permit Funds of Funds to invest in Underlying Funds shall be subject to the following conditions:

1. The members of the Group will not control (individually or in the aggregate) an Unaffiliated Fund within the meaning of section 2(a)(9) of the Act. The members of a Sub-Adviser Group will not control (individually or in the aggregate) an Unaffiliated Fund within the meaning of section 2(a)(9) of the Act. With respect to a Fund's investment in an Unaffiliated Closed-End Investment Company, (i) each member of the Group or Sub-Adviser Group that is an investment company or an issuer that would be an investment company but for section 3(c)(1) or 3(c)(7) of the Act will vote its shares of the Unaffiliated Closed-End Investment Company in the manner prescribed by section 12(d)(1)(E) of the Act and (ii) each other member of the Group or Sub-Adviser Group will vote its shares of the Unaffiliated Closed-End Investment Company in the same proportion as the vote of all other holders of the same type of such Unaffiliated Closed-End Investment Company's shares. If, as a result of a decrease in the outstanding voting securities of any other Unaffiliated Fund, the Group or a Sub-Adviser Group, each in the aggregate, becomes a holder of more than 25% of the outstanding voting securities of such Unaffiliated Fund, then the Group or the Sub-Adviser Group will vote its shares of the Unaffiliated Fund in the same proportion as the vote of all other holders of the Unaffiliated Fund's shares. This condition will not apply to a Sub-Adviser Group with respect to an Unaffiliated Fund for which the Sub-Adviser or a person controlling, controlled by or under common control with the Sub-Adviser acts as the investment adviser within the meaning of section 2(a)(20)(A) of the Act (in the case of an Unaffiliated Investment Company) or as the sponsor (in the case of an Unaffiliated Trust).

2. No Fund of Funds or Fund of Funds Affiliate will cause any existing or potential investment by the Fund of Funds in an Unaffiliated Fund to influence the terms of any services or transactions between the Fund of Funds or a Fund of Funds Affiliate and the Unaffiliated Fund or an Unaffiliated Fund Affiliate.

3. The Board of each Fund of Funds, including a majority of the Independent Directors, will adopt procedures reasonably designed to ensure that its Adviser and any Sub-Adviser to the Fund of Funds are conducting the investment program of the Fund of Funds without taking into account any consideration received by the Fund of Funds or Fund of Funds Affiliate from an Unaffiliated Investment Company or Unaffiliated Trust or any Unaffiliated Fund Affiliate of such Unaffiliated Investment Company or Unaffiliated Trust in connection with any services or transactions.

4. Once an investment by a Fund of Funds in the securities of an Unaffiliated Investment Company exceeds the limit of section 12(d)(1)(A)(i) of the Act, the Board of the Unaffiliated Investment Company, including a majority of the Independent Directors, will determine that any consideration paid by the Unaffiliated Investment Company to a Fund of Funds or a Fund of Funds Affiliate in connection with any services or transactions: (a) Is fair and reasonable in relation to the nature and quality of the services and benefits received by the Unaffiliated Investment Company; (b) is within the range of consideration that the Unaffiliated Investment Company would be required to pay to another unaffiliated entity in connection with the same services or transactions; and (c) does not involve overreaching on the part of any person concerned. This condition does not apply with respect to any services or transactions between an Unaffiliated Investment Company and its investment adviser(s), or any person controlling, controlled by, or under common control with such investment adviser(s).

5. No Fund of Funds or Fund of Funds Affiliate (except to the extent it is acting in its capacity as an investment adviser to an Unaffiliated Investment Company or sponsor to an Unaffiliated Trust) will cause an Unaffiliated Fund to purchase a security in any Affiliated Underwriting.

6. The Board of an Unaffiliated Investment Company, including a majority of the Independent Directors,

will adopt procedures reasonably designed to monitor any purchases of securities by the Unaffiliated Investment Company in an Affiliated Underwriting once an investment by a Fund of Funds in the securities of the Unaffiliated Investment Company exceeds the limit of section 12(d)(1)(A)(i) of the Act, including any purchases made directly from an Underwriting Affiliate. The Board of the Unaffiliated Investment Company will review these purchases periodically, but no less frequently than annually, to determine whether the purchases were influenced by the investment by the Fund of Funds in the Unaffiliated Investment Company. The Board of the Unaffiliated Investment Company will consider, among other things: (a) Whether the purchases were consistent with the investment objectives and policies of the Unaffiliated Investment Company; (b) how the performance of securities purchased in an Affiliated Underwriting compares to the performance of comparable securities purchased during a comparable period of time in underwritings other than Affiliated Underwritings or to a benchmark such as a comparable market index; and (c) whether the amount of securities purchased by the Unaffiliated Investment Company in Affiliated Underwritings and the amount purchased directly from an Underwriting Affiliate have changed significantly from prior years. The Board of the Unaffiliated Investment Company will take any appropriate actions based on its review, including, if appropriate, the institution of procedures designed to assure that purchases of securities in Affiliated Underwritings are in the best interests of shareholders.

7. Each Unaffiliated Investment Company will maintain and preserve permanently, in an easily accessible place, a written copy of the procedures described in the preceding condition, and any modifications to such procedures, and will maintain and preserve for a period of not less than six years from the end of the fiscal year in which any purchase in an Affiliated Underwriting occurred, the first two years in an easily accessible place, a written record of each purchase of securities in an Affiliated Underwriting once an investment by a Fund of Funds in the securities of an Unaffiliated Investment Company exceeds the limit of section 12(d)(1)(A)(i) of the Act, setting forth (1) the party from whom the securities were acquired, (2) the identity of the underwriting syndicate's members, (3) the terms of the purchase, and (4) the information or materials upon which the determinations of the Board of the Unaffiliated Investment Company were made.

8. Prior to its investment in shares of an Unaffiliated Investment Company in excess of the limit set forth in section 12(d)(1)(A)(i) of the Act, the Fund of Funds and the Unaffiliated Investment Company will execute a Participation Agreement stating, without limitation, that their Boards and their investment advisers understand the terms and conditions of the order and agree to fulfill their responsibilities under the order. At the time of its investment in shares of an Unaffiliated Investment Company in excess of the limit set forth in section 12(d)(1)(A)(i), a Fund of Funds will notify the Unaffiliated Investment Company of the investment. At such time, the Fund of Funds will also transmit to the Unaffiliated Investment Company a list of the names of each Fund of Funds Affiliate and Underwriting Affiliate. The Fund of Funds will notify the Unaffiliated Investment Company of any changes to the list as soon as reasonably practicable after a change occurs. The Unaffiliated Investment Company and the Fund of Funds will maintain and preserve a copy of the order, the Participation Agreement, and the list with any updated information for the duration of the investment and for a period of not less than six years thereafter, the first two years in an easily accessible place.

9. Before approving any advisory contract under section 15 of the Act, the Board of each Fund of Funds, including a majority of the Independent Directors, shall find that the advisory fees charged under the advisory contract are based on services provided that are in addition to, rather than duplicative of, services provided under the advisory contract(s) of any Underlying Fund in which the Fund of Funds may invest. Such finding, and the basis upon which the finding was made, will be recorded fully in the minute books of the appropriate Fund of Funds.

10. The Adviser will waive fees otherwise payable to it by a Fund of Funds in an amount at least equal to any compensation (including fees received pursuant to any plan adopted by an Unaffiliated Investment Company pursuant to rule 12b–1 under the Act) received from an Unaffiliated Fund by the Adviser, or an affiliated person of the Adviser, other than any advisory fees paid to the Adviser or its affiliated person by the Unaffiliated Investment Company, in connection with the investment by the Fund of Funds in the Unaffiliated Fund. Any Sub-Adviser will waive fees otherwise payable to the Sub-Adviser, directly or indirectly, by the Fund of Funds in an amount at least equal to any compensation received by the Sub-Adviser, or an affiliated person of the Sub-Adviser, from an Unaffiliated Fund, other than any advisory fees paid to the Sub-Adviser or its affiliated person by the Unaffiliated Investment Company, in connection with the investment by the Fund of Funds in the Unaffiliated Fund made at the direction of the Sub-Adviser. In the event that the Sub-Adviser waives fees, the benefit of the waiver will be passed through to the Fund of Funds.

11. Any sales charges and/or service fees charged with respect to shares of a Fund of Funds will not exceed the limits applicable to funds of funds set forth in NASD Conduct Rule 2830.

12. No Underlying Fund will acquire securities of any other investment company or company relying on section 3(c)(1) or 3(c)(7) of the Act, in excess of the limits contained in section 12(d)(1)(A) of the Act, except to the extent that such Underlying Fund: (a) Acquires such securities in compliance with section 12(d)(1)(E) of the Act and either is an Affiliated Fund or is in the same ''group of investment companies'' as its corresponding master fund; (b) receives securities of another investment company as a dividend or as a result of a plan of reorganization of a company (other than a plan devised for the purpose of evading section 12(d)(1) of the Act); or (c) acquires (or is deemed to have acquired) securities of another investment company pursuant to exemptive relief from the Commission permitting such Underlying Fund to: (i) Acquire securities of one or more investment companies for short-term cash management purposes or (ii) engage in inter-fund borrowing and lending transactions.

B. Other Investments by Section 12(d)(1)(G) Funds

Applicants agree that the order granting the requested relief to permit Section 12(d)(1)(G) Funds to invest in Other Investments shall be subject to the following condition:

1. Applicants will comply with all provisions of rule 12d1–2 under the Act, except for paragraph (a)(2) to the extent that it restricts any Section 12(d)(1)(G) Fund from investing in Other Investments as described in the application.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73544; File No. SR–NYSEMKT–2014–14]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending Rule 967NY To Enhance the Functionality of the Trade Collar Protection Mechanism

November 6, 2014.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 24, 2014, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 967NY to enhance the functionality of the trade collar protection mechanism. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Rule 967NY(a) to clarify and conform with the functionality of the trade collar protection mechanism in use on the Exchange. The Exchange's amendment is to specify (a) how marketable Limit Orders behave when received in a wide market, (b) how subsequently-arriving Market Orders effect collared orders, and (c) the values associated with a Trading Collar. The Exchange also seeks to make non-substantive wording changes to Rule 967NY(a).

Background

Pursuant to Rule 967NY(a), the Exchange applies a ''Trade Collar Protection'' mechanism that prevents the immediate execution of certain orders at prices outside of a specified parameter (referred to as a ''Trading Collar'').[4] Pursuant to Rule 967NY(a)(3), the Trade Collar Protection mechanism is not available for quotes or for orders with execution conditions IOC, AON, FOK and NOW.

Trading Collars are determined by the Exchange on a class-by-class basis and, unless announced otherwise via Trader Update, are the same value as the bid-ask differential guidelines established pursuant to Rule 925NY(b)(4), as set forth in Rule 967NY(a)(2). For example, Rule 925NY(b)(4) sets the bid-ask differential for an option priced less than $2.00 at $0.25. For any option that has a bid less than $2.00, the Trading Collar will be $0.25. Accordingly, if the National Best Bid and Offer (''NBBO'') for XYZ is $0.75 bid and $1.75 offer, certain orders the Exchange receives will be subject to a $0.25 Trading Collar.[5] If necessary to preserve a fair and orderly market, the Exchange may, with the approval of two Trading Officials,[6] widen or narrow the Trading Collar for one or more option series.

Trade Collar Protection applies to two scenarios. First, pursuant to Rule 967NY(a)(1)(i), Trade Collar Protection prevents executions of certain orders when the difference between the National Best Offer (''NBO'') and the National Best Bid (''NBB'') is greater than one Trading Collar. Second, pursuant to Rule 967NY(a)(1)(ii), Trade Collar Protection prevents the execution of the balance of an eligible buy order if it were to execute at a price that is the NBO plus a Trading Collar (or a price that is the NBB minus a Trading Collar for an eligible sell order).

Pursuant to Rule 967NY(a)(1)(i), if the difference between the NBO and the NBB is greater than one Trading Collar, the Exchange will prevent execution or routing of certain orders. Instead, pursuant to Rule 967NY(a)(4)(A), the Exchange will display the order at a price equal to the NBO minus one Trading Collar for sell orders or the NBB plus one Trading Collar for buy orders (the ''collared order''). The Exchange will then attempt to execute or route the collared order to buy (sell) against any contra interest priced within one Trading Collar above (below) the displayed price of the collared order.[7] As set forth in Rule 967NY(a)(4)(C)(iii), should market conditions prevent the order from trading or recalculating for a period of one second, the order will improve its displayed price by an amount equal to an additional Trading Collar.

The collared order will re-price before the expiration of one second as a result of certain changes in the market. Pursuant to Rule 967NY(a)(4)(C)(i), an update to the NBBO (based on another market center or a quote or order on the Exchange) that improves the same side of the market as the collared order will cause the collared order to be redisplayed at the same price as the updated NBBO. In accordance with Rule 967NY(a)(4)(C)(ii), a Limit Order (which is not an IOC Order, AON Order, FOK Order or NOW Order) on the same side of the market priced better than one Trading Collar from the collared order will also become subject to Trade Collar Protection and will cause the collared order to improve by one Trading Collar (which will redisplay at the new price and additional size of the new Limit Order).[8]

---

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange adopted Rule 967NY governing Trade Collar Protection in 2013. *See,* Exchange Rule 967NY (Securities Exchange Act Release No. 70037) (July 25, 2013), 78 FR 46399 (July 31, 2013) (NYSEMKT–2013–62).

[5] The bid-ask differential changes as the price increases. Rule 925NY(b)(4) sets the bid-ask differential at no more than $0.40 where the bid is $2.00 or more but does not exceed $5.00. Accordingly, if the NBBO for XYZ is $3.00 bid and $3.50 offer, certain orders the Exchange receives will be subject to a $0.40 Trading Collar Protection.

[6] A Trading Official, as defined by Rule 900.2NY(82) is an officer or employee of the Exchange. Trading Officials are not affiliated with ATP Holders.

[7] *See,* Rule 967NY(a)(4)(B).

[8] Rule 967NY(a)(4)(C)(iv) states that a new Market Order on the same side as a collared order will not cause the order subject to Trade Collar Protection to be recalculated (but will redisplay with the additional size of the new Market Order).

As set forth in Rule 967NY(a)(1)(ii), when the difference between the NBB and NBO is within the bid-ask differential guidelines, orders execute against the NBB or NBO, but Trade Collar Protection prevents execution of the balance of certain order at prices that are a Trading Collar above the NBO for buy orders (or at prices that are a Trading Collar below the NBB for sell orders). Essentially, the Exchange will permit the immediate execution of a Market Order or a marketable Limit Order (together a ''marketable order'') up to a Trading Collar away from the NBBO. Pursuant to Rule 967NY(a)(5), the balance of the partially executed order will be subject to Trade Collar Protection and will display at the last sale price. However, if there is an opportunity for trading within one Trading Collar of the last sale price, the order will continue to be displayed at the NBB (NBO) established at the time of the initial execution. Once subject to Trade Collar Protection, the order will follow the re-pricing mechanism described above.

Proposed Change

The Exchange seeks to clarify and correct Rule 967NY so as to conform to current functionality. Pursuant to the language of Rule 967NY(a)(1)(i), the Exchange will prevent the immediately [sic] execution of ''Market Orders or marketable Limit Orders'' if the width of the bid-ask differential of the NBBO is greater than one Trading Collar. However, during wide market conditions, the Exchange only prevents the immediate execution of Market Orders. Orders with limit prices that are executable against the NBB or NBO, regardless of the width of the bid-ask differential of the NBBO, immediately execute.[9] The Exchange believes that Market Orders need this additional level of protection as such orders do not suggest that the submitting market participant is aware of the market (or the dislocation associated therewith). Conversely, the Exchange believes that an order with a limit price evidences specific interest at which the submitting market participant is willing to trade. While marketable Limit Orders are immediately executable in situations where the bid-ask differential of the NBBO is greater than one Trading Collar, they nonetheless remain subject to the protections of the Limit Order Filter of 967NY(b).

[9] Rule 967NY(a)(4)(C)(ii) and 967NY(b) explain two scenarios where marketable Limit Orders might not immediately execute: (1) When there is already a collared order or (2) when the Limit Order is priced significantly through the contra-side BBO.

The Exchange also seeks to delete 967NY(a)(4)(C)(iv), which states that a Market Order that arrives while another order is being displayed due to Trade Collar Protection will join the collared order and display at the same price. While the Exchange believes this behavior beneficial to the market, it has not yet deployed the functionality. While it intends to incorporate such an enhancement in the near future, the Exchange is deleting (a)(4)(C)(iv) in order for its rules to comply with current functionality. Market Orders that arrive while another order is displayed due to Trade Collar Protection will behave in the same manner as later-arriving marketable Limit Orders. Specifically, the later-arriving Market Order will join the already collared order and both will display at a price one Trading Collar above (below) the previous displayed price. The Exchange intends to make another filing to re-establishing the language of (a)(4)(C)(iv) once the functionality is available.

The Exchange also proposes to amend Rule 967NY(a) to add language that clarifies the current operation of the trading collar mechanism. In particular, the Exchange proposes to delete the reference to Rule 925NY(b)(4) and instead codify the values of the Trading Collar directly in Rule 967NY(a). Rule 925NY(b)(4) sets the bid-ask differentials based exclusively on the bid price. The trading collar mechanism employs the same values for determining the Trading Collar. However, while those values are based upon the NBB for buy orders, the value of the Trading Collar for sell orders is based upon the NBO. The Exchange uses the NBB for buy orders because it believes that a market participant who is looking to buy would derive its price off of what other market participants are willing to pay (i.e. the prevailing bid). Similarly, the Exchange uses the NBO for sell orders because it believes that a market participant who is looking to sell would derive its price off of what other market participants are willing to sell (i.e. the prevailing offer). Accordingly, the Exchange proposes new sections (a)(2)(A) and (a)(2)(B) to Rule 967NY, which specifies the values based upon whether the order subject to Trade Collar Protection is to buy or sell.

As an example, the NBBO for XYZ is $1.00 bid and $6.00 offer. Based upon Rule 967NY's reference to Rule 925NY(b)(4), it could be interpreted that the Trading Collar would be $0.25 regardless of whether the Exchange received an order to buy or sell (based upon the bid being less than $2.00). However, collared sell orders currently derive their Trading Collar and display price from the NBO. Accordingly, a Market Order to buy would display at $1.25 (i.e., the $1.00 NBB plus the $0.25 Trading Collar (based upon the NBB being less than $2.00)) and would attempt to execute against any contra interest (on any market) priced $1.50 or less (i.e., $1.25 bid plus the $0.25 Trading Collar). However, a Market Order to sell would display at $5.50 (i.e., the $6.00 NBO minus the $0.50 Trading Collar (based upon the NBO being more than $5.00 but does not exceed $10.00)) and would attempt to execute against any contra interest (on any market) priced $5.00 or greater (i.e., $5.50 offer minus the $0.50 Trading Collar).

As a further example, the NBBO for XYZ is $1.45 × 200 bid and $2.10 × 200 offer with a $0.05 MPV. If the Exchange receives a market order to buy 100 contracts, the Trading Collar would be $0.25 (pursuant to new section (a)(2)(B)(i)). Accordingly, the order will be displayed at $1.70 (i.e., $1.45 bid plus the $0.25 Trading Collar). For a period of one second, the Exchange will attempt to execute the buy order against any contra interest (on any market) priced $1.95 or less (i.e., $1.70 plus the $0.25 Trading Collar). Under Rule 967NY(a)(4)(C)(iii), at the expiration of one second, the Exchange will attempt to redisplay the market buy order subject to Trade Collar Protection at $1.95 (i.e., $1.70 plus the $0.25 Trading Collar). However, since the $2.10 NBO represents contra interest priced $2.20 or less (i.e. $1.95 plus the $0.25 Trading Collar), the market buy order would execute its 100 contracts against the NBO at $2.10. In comparison, in the same market for XYZ, if the Exchange receives a market order to sell 100 contracts, the Trading Collar would be $0.40 (pursuant to new section (a)(2)(B)(ii)). Accordingly, the Exchange will attempt to display the market sell order at $1.70 (i.e., $2.10 offer minus the $0.40 Trading Collar). However, since the $1.45 NBB represents contra interest priced $1.45 or greater, (i.e. $1.70 minus the $0.25 Trading Collar), the market sell order would execute its 100 contracts against the NBB at $1.45.

The Exchange also proposes to amend Rule 967NY(a) to strike the extraneous term ''inbound'' from the rule, which could cause confusion as to when Trade Collar Protection is available because the trade collar mechanism continues to apply to resting orders. In addition, the Exchange proposes to delete the reference in 967NY(a)(3) to the cancellation of IOC Orders, AON Orders, FOK Orders and NOW Orders if not immediately executed, as such is not the behavior of AON Orders. The

Exchange also proposes to capitalize the term ''limit order'' as used in Rule 967NY(a)(4)(D) to conform with its use in the rest of the rule. Finally, the Exchange proposes to make non-substantive changes to Rule 967NY(a)(4)(C)(i) and (ii) to better clarify behavior in situations where there already exists an already collared order.

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5) [10] which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1) [11] of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The Exchange believes that the proposed rule amendments relating to the behavior of Limit Orders in a wide market and the effect on Market Orders on already collared orders assist with the maintenance of fair and orderly markets and protects investors by correcting inaccurate language and clarifying existing functionality so that market participants better understand how the Exchange handles certain orders in times of market dislocation. The Exchange also believes that it promotes just and equitable principles of trade to allow marketable Limit Orders received in a wide market to immediately execute against contra-side interest before receiving Trade Collar Protection because Limit Orders provide evidence of prices for which market participants are willing to trade. Accordingly, to the extent contra-side interest exists at the NBBO, the Exchange believes it is appropriate to permit such executions before providing Trade Collar Protection for potential subsequent executions at inferior prices. Furthermore, the Exchange believes that it assists in the fair and orderly market to have Market Orders advance an already collared order in the same fashion as marketable Limit Orders as both are subsequent orders representing executable interest. The Exchange believes that its proposal to clarify that Trading Collar values are based upon the NBB for buy orders and the NBO for sell orders removes impediments to and perfects the mechanism of a free and open market by basing the Trading Collar upon the benchmark from which a market participant would most likely derive its price. The Exchange recognizes that there could be potential market conditions that result in different Trading Collar values depending on whether the order submitted is to buy or sell. However, the Exchange believes that any such differences are outweighed by meeting the expectations of market participants who submit buy orders based upon the price of the prevailing NBB and sell orders based upon the price of the prevailing NBO. Further, the Exchange believes that clearly setting forth these benchmarks removes impediments to and perfects the mechanism of a free and open market by ensuring that market participants better understand the functionality of the trade collar mechanism on the Exchange and the execution opportunities afforded their orders in certain market conditions. The Exchange also believes that making non-substantive wording changes enhances the description of Trade Collar Protection will add transparency and clarity to the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposal will provide market participants with clarity relating to how the Exchange systems provides protection from anomalous executions. Thus, the Exchange does not believe the proposal creates any significant impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2014–14 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2014–14. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2014–14, and should be submitted on or before December 4, 2014.

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78k–1(a)(1).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73543; File No. SR–NYSEArca-2014–14]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change Amending Rule 6.60 To Enhance the Functionality of the Trade Collar Protection Mechanism

November 6, 2014.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 24, 2014, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.60 to enhance the functionality of the trade collar protection mechanism. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Rule 6.60(a) to clarify and conform with the functionality of the trade collar protection mechanism in use on the Exchange. The Exchange's amendment is to specify (a) how marketable Limit Orders behave when received in a wide market, (b) how subsequently-arriving Market Orders effect collared orders, and (c) the values associated with a Trading Collar. The Exchange also seeks to make non-substantive wording changes to Rule 6.60(a) and fix a typographical error in Rule 6.37(b)(1)(E).

Background

Pursuant to Rule 6.60(a), the Exchange applies a ''Trade Collar Protection'' mechanism that prevents the immediate execution of certain orders at prices outside of a specified parameter (referred to as a ''Trading Collar'').[4] Pursuant to Rule 6.60(a)(3), the Trade Collar Protection mechanism is not available for quotes or for orders with execution conditions IOC, AON, FOK and NOW.

Trading Collars are determined by the Exchange on a class-by-class basis and, unless announced otherwise via Trader Update, are the same value as the bid-ask differential guidelines established pursuant to Rule 6.37(b)(1), as set forth in Rule 6.60(a)(2). For example, Rule 6.37(b)(1) sets the bid-ask differential for an option priced less than $2.00 at $0.25. For any option that has a bid less than $2.00, the Trading Collar will be $0.25. Accordingly, if the National Best Bid and Offer (''NBBO'') for XYZ is $0.75 bid and $1.75 offer, certain orders the Exchange receives will be subject to a $0.25 Trading Collar.[5] If necessary to preserve a fair and orderly market, the Exchange may, with the approval of two Trading Officials,[6] widen or narrow the Trading Collar for one or more option series.

Trade Collar Protection applies to two scenarios. First, pursuant to Rule 6.60(a)(1)(i), Trade Collar Protection prevents executions of certain orders when the difference between the National Best Offer (''NBO'') and the National Best Bid (''NBB'') is greater than one Trading Collar. Second, pursuant to Rule 6.60(a)(1)(ii), Trade Collar Protection prevents the execution of the balance of an eligible buy order if it were to execute at a price that is the NBO plus a Trading Collar (or a price that is the NBB minus a Trading Collar for an eligible sell orders).

Pursuant to Rule 6.60(a)(1)(i), if the difference between the NBO and the NBB is greater than one Trading Collar, the Exchange will prevent execution or routing of certain orders. Instead, pursuant to Rule 6.60(a)(4)(A), the Exchange will display the order at a price equal to the NBO minus one Trading Collar for sell orders or the NBB plus one Trading Collar for buy orders (the ''collared order''). The Exchange will then attempt to execute or route the collared order to buy (sell) against any contra interest priced within one Trading Collar above (below) the displayed price of the collared order.[7] As set forth in Rule 6.60(a)(4)(C)(iii), should market conditions prevent the order from trading or recalculating for a period of one second, the order will improve its displayed price by an amount equal to an additional Trading Collar.

The collared order will re-price before the expiration of one second as a result of certain changes in the market. Pursuant to Rule 6.60(a)(4)(C)(i), an update to the NBBO (based on another market center or a quote or order on the Exchange) that improves the same side of the market as the collared order will cause the collared order to be redisplayed at the same price as the updated NBBO. In accordance with Rule 6.60(a)(4)(C)(ii), a Limit Order (which is not an IOC Order, AON Order, FOK Order or NOW Order) on the same side of the market priced better than one Trading Collar from the collared order will also become subject to Trade Collar Protection and will cause the collared order to improve by one Trading Collar (which will redisplay at the new price and additional size of the new Limit Order).[8]

[12] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange adopted Rule 6.60 governing Trade Collar Protection in 2013. *See,* Exchange Rule 6.60 (Securities Exchange Act Release No. 70038) (July 25, 2013), 78 FR 46392 (July 31, 2013) (NYSEArca-2013–72).

[5] The bid-ask differential changes as the price increases. Rule 6.37(b)(1) sets the bid-ask differential at no more than $0.40 where the bid is $2.00 or more but does not exceed $5.00. Accordingly, if the NBBO for XYZ is $3.00 bid and $3.50 offer, certain orders the Exchange receives will be subject to a $0.40 Trading Collar Protection.

[6] A Trading Official, as defined by Rule 6.1(b)(34) is an officer or employee of the Exchange. Trading Officials are not affiliated with OTP Holders.

[7] *See,* Rule 6.60(a)(4)(B).

[8] Rule 6.60(a)(4)(C)(iv) states that a new Market Order on the same side as a collared order will not cause the order subject to Trade Collar Protection to be recalculated (but will redisplay with the additional size of the new Market Order).

As set forth in Rule 6.60(a)(1)(ii), when the difference between the NBB and NBO is within the bid-ask differential guidelines, orders execute against the NBB or NBO, but Trade Collar Protection prevents execution of the balance of certain order at prices that are a Trading Collar above the NBO for buy orders (or at prices that are a Trading Collar below the NBB for sell orders). Essentially, the Exchange will permit the immediate execution of a Market Order or a marketable Limit Order (together a ''marketable order'') up to a Trading Collar away from the NBBO. Pursuant to Rule 6.60(a)(5), the balance of the partially executed order will be subject to Trade Collar Protection and will display at the last sale price. However, if there is an opportunity for trading within one Trading Collar of the last sale price, the order will continue to be displayed at the NBB (NBO) established at the time of the initial execution. Once subject to Trade Collar Protection, the order will follow the re-pricing mechanism described above.

Proposed Change

The Exchange seeks to clarify and correct Rule 6.60 so as to conform to current functionality. Pursuant to the language of Rule 6.60(a)(1)(i), the Exchange will prevent the immediately [sic] execution of ''Market Orders or marketable Limit Orders'' if the width of the bid-ask differential of the NBBO is greater than one Trading Collar. However, during wide market conditions, the Exchange only prevents the immediate execution of Market Orders. Orders with limit prices that are executable against the NBB or NBO, regardless of the width of the bid-ask differential of the NBBO, immediately execute.[9] The Exchange believes that Market Orders need this additional level of protection as such orders do not suggest that the submitting market participant is aware of the market (or the dislocation associated therewith). Conversely, the Exchange believes that an order with a limit price evidences specific interest at which the submitting market participant is willing to trade. While marketable Limit Orders are immediately executable in situations where the bid-ask differential of the NBBO is greater than one Trading Collar, they nonetheless remain subject to the protections of the Limit Order Filter of 6.60(b).

[9] Rule 6.60(a)(4)(C)(ii) and 6.60(b) explain two scenarios where marketable Limit Orders might not immediately execute: (1) When there is already a collared order or (2) when the Limit Order is priced significantly through the contra-side BBO.

The Exchange also seeks to delete 6.60(a)(4)(C)(iv), which states that a Market Order that arrives while another order is being displayed due to Trade Collar Protection will join the collared order and display at the same price. While the Exchange believes this behavior beneficial to the market, it has not yet deployed the functionality. While it intends to incorporate such an enhancement in the near future, the Exchange is deleting (a)(4)(C)(iv) in order for its rules to comply with current functionality. Market Orders that arrive while another order is displayed due to Trade Collar Protection will behave in the same manner as later-arriving marketable Limit Orders. Specifically, the later-arriving Market Order will join the already collared order and both will display at a price one Trading Collar above (below) the previous displayed price. The Exchange intends to make another filing to re-establishing the language of (a)(4)(C)(iv) once the functionality is available.

The Exchange also proposes to amend Rule 6.60(a) to add language that clarifies the current operation of the trading collar mechanism. In particular, the Exchange proposes to delete the reference to Rule 6.37(b)(1) and instead codify the values of the Trading Collar directly in Rule 6.60(a). Rule 6.37(b)(1) sets the bid-ask differentials based exclusively on the bid price. The trading collar mechanism employs the same values for determining the Trading Collar. However, while those values are based upon the NBB for buy orders, the value of the Trading Collar for sell orders is based upon the NBO. The Exchange uses the NBB for buy orders because it believes that a market participant who is looking to buy would derive its price off of what other market participants are willing to pay (i.e. the prevailing bid). Similarly, the Exchange uses the NBO for sell orders because it believes that a market participant who is looking to sell would derive its price off of what other market participants are willing to sell (i.e. the prevailing offer). Accordingly, the Exchange proposes new sections (a)(2)(A) and (a)(2)(B) to Rule 6.60, which specifies the values based upon whether the order subject to Trade Collar Protection is to buy or sell.

As an example, the NBBO for XYZ is $1.00 bid and $6.00 offer. Based upon Rule 6.60's reference to Rule 6.37(b)(1), it could be interpreted that the Trading Collar would be $0.25 regardless of whether the Exchange received an order to buy or sell (based upon the bid being less than $2.00). However, collared sell orders currently derive their Trading Collar and display price from the NBO. Accordingly, a Market Order to buy would display at $1.25 (i.e., the $1.00 NBB plus the $0.25 Trading Collar (based upon the NBB being less than $2.00)) and would attempt to execute against any contra interest (on any market) priced $1.50 or less (i.e., $1.25 bid plus the $0.25 Trading Collar). However, a Market Order to sell would display at $5.50 (i.e., the $6.00 NBO minus the $0.50 Trading Collar (based upon the NBO being more than $5.00 but does not exceed $10.00)) and would attempt to execute against any contra interest (on any market) priced $5.00 or greater (i.e., $5.50 offer minus the $0.50 Trading Collar).

As a further example, the NBBO for XYZ is $1.45 × 200 bid and $2.10 × 200 offer with a $0.05 MPV. If the Exchange receives a market order to buy 100 contracts, the Trading Collar would be $0.25 (pursuant to new section (a)(2)(B)(i)). Accordingly, the order will be displayed at $1.70 (i.e., $1.45 bid plus the $0.25 Trading Collar). For a period of one second, the Exchange will attempt to execute the buy order against any contra interest (on any market) priced $1.95 or less (i.e., $1.70 plus the $0.25 Trading Collar). Under Rule 6.60(a)(4)(C)(iii), at the expiration of one second, the Exchange will attempt to redisplay the market buy order subject to Trade Collar Protection at $1.95 (i.e., $1.70 plus the $0.25 Trading Collar). However, since the $2.10 NBO represents contra interest priced $2.20 or less (i.e. $1.95 plus the $0.25 Trading Collar), the market buy order would execute its 100 contracts against the NBO at $2.10. In comparison, in the same market for XYZ, if the Exchange receives a market order to sell 100 contracts, the Trading Collar would be $0.40 (pursuant to new section (a)(2)(B)(ii)). Accordingly, the Exchange will attempt to display the market sell order at $1.70 (i.e., $2.10 offer minus the $0.40 Trading Collar). However, since the $1.45 NBB represents contra interest priced $1.45 or greater, (i.e. $1.70 minus the $0.25 Trading Collar), the market sell order would execute its 100 contracts against the NBB at $1.45.

The Exchange also proposes to amend Rule 6.60(a) to strike the extraneous term ''inbound'' from the rule, which could cause confusion as to when Trade Collar Protection is available because the trade collar mechanism continues to apply to resting orders. In addition, the Exchange proposes to delete the reference in 6.60(a)(3) to the cancellation of IOC Orders, AON Orders, FOK Orders and NOW Orders if not immediately executed, as such is not the behavior of AON Orders. The Exchange also proposes to capitalize the term ''limit order'' as used in Rule

6.60(a)(4)(D) to conform with its use in the rest of the rule. Further, the Exchange proposes to make non-substantive changes to Rule 6.60(a)(4)(C)(i) and (ii) to better clarify behavior in situations where there already exists an already collared order.

Finally, the Exchange seeks to amend Rule 6.37(b)(1)(E) to rectify a typographical error. Specifically, the rule currently states that the bid-ask differentials should be no more than $1 when the last bid is $20.10 or more. The rule should instead refer to the last bid being $20.01 or more.

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5) [10] which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1) [11] of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The Exchange believes that the proposed rule amendments relating to the behavior of Limit Orders in a wide market and the effect on Market Orders on already collared orders assist with the maintenance of fair and orderly markets and protects investors by correcting inaccurate language and clarifying existing functionality so that market participants better understand how the Exchange handles certain orders in times of market dislocation. The Exchange also believes that it promotes just and equitable principles of trade to allow marketable Limit Orders received in a wide market to immediately execute against contra-side interest before receiving Trade Collar Protection because Limit Orders provide evidence of prices for which market participants are willing to trade. Accordingly, to the extent contra-side interest exists at the NBBO, the Exchange believes it is appropriate to permit such executions before providing Trade Collar Protection for potential subsequent executions at inferior prices. Furthermore, the Exchange believes that it assists in the fair and orderly market to have Market Orders advance an already collared order in the same fashion as marketable Limit Orders as both are subsequent orders representing executable interest. The Exchange believes that its proposal to clarify that Trading Collar values are based upon the NBB for buy orders and the NBO for sell orders removes impediments to and perfects the mechanism of a free and open market by basing the Trading Collar upon the benchmark from which a market participant would most likely derive its price. The Exchange recognizes that there could be potential market conditions that result in different Trading Collar values depending on whether the order submitted is to buy or sell. However, the Exchange believes that any such differences are outweighed by meeting the expectations of market participants who submit buy orders based upon the price of the prevailing NBB and sell orders based upon the price of the prevailing NBO. Further, the Exchange believes that clearly setting forth these benchmarks removes impediments to and perfects the mechanism of a free and open market by ensuring that market participants better understand the functionality of the trade collar mechanism on the Exchange and the execution opportunities afforded their orders in certain market conditions. The Exchange also believes that making non-substantive wording changes enhances the description of Trade Collar Protection will add transparency and clarity to the Exchange's rules. Finally, the Exchange believes that fixing a typographical error found in Rule 6.37(b)(1)(E) will protect investors and the public interest by reducing confusion that the error would otherwise create.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposal will provide market participants with clarity relating to how the Exchange systems provides protection from anomalous executions. Thus, the Exchange does not believe the proposal creates any significant impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2014–14 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2014–14. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78k–1(a)(1).

filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2014–14, and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73553; File No. SR–NYSE–2014–40]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Amendment No. 1 and Order Granting Accelerated Approval to a Proposed Rule Change, as Modified by Amendment No. 1, To Establish the NYSE Best Quote & Trades Data Feed

November 6, 2014.

I. Introduction

On July 21, 2014, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish the NYSE Best Quote & Trades (''NYSE BQT'') data feed. The NYSE BQT data feed would provide a unified view of best bid and offer (''BBO'') and last sale information for the Exchange and its affiliates, NYSE Arca Equities, Inc. (''NYSE Arca'') and NYSE MKT LLC (''NYSE MKT''). The proposed rule change was published for comment in the **Federal Register** on August 8, 2014.[3] Two comment letters on the proposal have been received: One letter opposing the proposal,[4] and a letter from the Exchange responding to the opposing comment letter.[5] On September 18, 2014, the Commission extended the time to act on the proposal until November 6, 2014.[6] On October 31, 2014, the Exchange filed Amendment No. 1 to the proposed rule change.[7] The Commission is publishing this Notice and Order to solicit comment on Amendment No. 1 and to approve the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description of the Proposal

The Exchange proposes to establish the NYSE BQT data feed, a data feed consisting of certain data elements from six existing market data feeds: NYSE Trades, NYSE BBO, NYSE Arca Trades, NYSE Arca BBO, NYSE MKT Trades, and NYSE MKT BBO.[8] The NYSE BQT data feed would have three channels: One channel for the last sale data (the ''last sale channel''); another channel for the BBO data (the ''best quotes channel''); and a third channel for consolidated volume data (the ''consolidated volume channel'').

The last sale channel would provide an aggregation of the same data that is available through NYSE Trades, NYSE Arca Trades, and NYSE MKT Trades.

The best quotes channel would provide the ''NYSE BQT BBO,'' which would be the best quote from among the NYSE BBO, NYSE Arca BBO, and NYSE MKT BBO based on the following criteria, in order:

- Price—the exchange with the highest bid or the lowest offer would have overall priority;
- Size—the largest size would take precedence when multiple exchanges submit the same bid or offer price; and
- Time—the earliest time would take precedence when multiple exchanges submit the same bid or offer price with the same sizes.

For each security, the best quotes channel would only include one best bid and one best offer from among the three exchanges. The NYSE BQT BBO would be marked with a market center ID identifying the exchange from which the BBO originated. For example, if XYZ stock were traded on both NYSE and NYSE Arca, and the highest bid and lowest offer according to the NYSE BBO were 1,000 shares at $10.00 and 1,000 shares at $10.03, respectively, and the highest bid and lowest offer for XYZ stock according to the NYSE Arca BBO were 1,200 shares at $9.99 and 900 shares at $10.02, respectively, then the NYSE BQT data feed would generate the best bid for XYZ stock as 1,000 shares at $10.00 on NYSE and the best offer as 900 shares at $10.02 on NYSE Arca.

The consolidated volume channel would carry consolidated volume for all listed equities, which the Exchange would obtain from the securities information processors and then distribute in a manner consistent with the requirements for redistributing such data as set forth in the securities information processor plans.[9]

The NYSE BQT data feed would also provide related data elements, such as trade and security status updates (e.g., trade corrections and trading halts), that are contained in the NYSE Trades, NYSE Arca Trades, and NYSE MKT Trades feeds.

The Exchange proposes to offer the NYSE BQT data feed through the Exchange's Secure Financial Transaction Infrastructure (''SFTI'') network and market data vendors, as the Exchange does with its other proprietary market data products.

The Exchange has stated that it believes that the NYSE BQT data feed would provide high-quality, comprehensive last sale and BBO data for the Exchange, NYSE Arca, and NYSE MKT in a unified view and would respond to subscriber demand for such a product. The Exchange anticipates that an end user might use the NYSE

[12] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 72750 (August 4, 2014), 79 FR 46494.

[4] *See* Letter from Ira D. Hammerman, General Counsel, SIFMA, to Kevin M. O'Neill, Deputy Secretary, Commission, dated August 28, 2014 (''SIFMA Letter'').

[5] *See* Letter from Martha Redding, Chief Counsel, NYSE, dated October 31, 2014 (''NYSE Letter'').

[6] *See* Securities Exchange Act Release No. 73137, 79 FR 57160 (Nov. 24, 2014).

[7] In Amendment No. 1, the Exchange modified the proposal to (i) remove language proposing specific fee amounts for NYSE BQT, (ii) clarify that it intended to propose fees that would be no lower than the cost to a vendor of creating a comparable product, including the costs of the underlying feeds, and (iii) represent that it would not offer NYSE BQT until after the proposal has been approved by the Commission, the Exchange has filed fees for NYSE BQT with the Commission, and such fees have become effective. The Commission notes that the Exchange submitted a comment letter attaching Amendment No. 1 on October 31, 2013, and, consequently, Amendment No. 1 is available in the public comment file for SR–NYSE–2014–40 on the Commission's Web site.

The Exchange has represented that it does not currently offer the NYSE BQT data feed.

[8] NYSE BBO, NYSE Arca BBO, and NYSE MKT BBO are existing data feeds that distribute on a real-time basis the same BBO information that NYSE, NYSE Arca, and NYSE MKT, respectively, report under the Consolidated Quotation (''CQ'') Plan for inclusion in the CQ Plan's consolidated quotation information data stream. NYSE Trades, NYSE Arca Trades, and NYSE MKT Trades are existing data feeds that distribute on a real-time basis the same last sale information that NYSE, NYSE Arca, and NYSE MKT, respectively, report under the Consolidated Tape Association (''CTA'') Plan for inclusion in the CTA Plan's consolidated data streams.

[9] The ''securities information processor plans'' refer to the CTA Plan and Nasdaq UTP Plan. *See* Telephone conversations between Leah Mesfin, Special Counsel, Division of Trading and Markets, Commission, and Marija Willen, Chief Counsel of NYSE Group Inc., NYSE (July 30, 2014 and Nov. 6, 2014).

BQT data feed to identify indicative prices for Tape A, B, and C securities through leveraging the depth and breadth of NYSE, NYSE Arca, and NYSE MKT without having to purchase consolidated data, and thus the Exchange believes that the NYSE BQT data feed would not be a latency-sensitive product. The Exchange does not anticipate that an end user would, or could, use the NYSE BQT data feed for purposes of making order-routing or trading decisions. Rather, the Exchange has noted that, under Rule 603 of Regulation NMS, the NYSE BQT data feed could not be substituted for consolidated data in all instances in which consolidated data is used and that certain subscribers would still be required to purchase consolidated data for trading and order-routing purposes.[10]

While NYSE, NYSE Arca, and NYSE MKT are the exclusive distributors of the six BBO and Trades feeds from which certain data elements would be taken to create the NYSE BQT data feed, the Exchange has stated that NYSE would not be the exclusive distributor of the aggregated and consolidated information that would compose the proposed NYSE BQT data feed. The Exchange has represented that it would not have any unfair advantage over competing vendors with respect to obtaining data from NYSE, NYSE Arca, and NYSE MKT. In recognition that the Exchange is the source of its own market data and is affiliated with NYSE Arca and NYSE MKT, the Exchange has represented that it will continue to make available all of the individual underlying feeds [11] and that the source of the market data it would use to create the proposed NYSE BQT data feed is the same as the source available to other vendors. The Exchange has also represented that other vendors would be able to create a data feed with the same information as proposed for inclusion in the NYSE BQT data feed and to distribute it to clients with no greater latency than the Exchange would be able to distribute the NYSE BQT data feed. In addition, the Exchange has represented that the prices the Exchange would charge clients for the NYSE BQT data feed would not be lower than the cost to a vendor of creating a comparable product, including the cost of receiving the underlying data feeds. Thus, the Exchange has stated, the proposed NYSE BQT data feed would be a data product that a competing vendor could create and sell without being in a disadvantaged position relative to the Exchange.

With respect to latency, the Exchange, NYSE Arca, and NYSE MKT are located in the same data center in Mahwah, New Jersey. The system creating and supporting the proposed NYSE BQT data feed would need to obtain the six underlying data feeds from these three exchanges before it could aggregate and consolidate information to create the NYSE BQT data feed and then distribute it to end users. After creating the NYSE BQT data feed, the Exchange would distribute this data feed through SFTI and market data vendors. The Exchange also offers third parties access to its data center through co-location. Accordingly, a competing market data vendor wishing to offer a product similar to the NYSE BQT data feed would be able to co-locate at the Exchange's Mahwah, New Jersey facility and obtain the six underlying data feeds.

The Exchange has represented that it has designed the NYSE BQT data feed so that it would not have a competitive advantage over a competing vendor with respect to the speed of access to those six underlying data feeds. Likewise, the Exchange has represented that the NYSE BQT data feed would not have a speed advantage vis-à-vis competing vendors co-located in the data center with respect to access to end-user customers, whether those end users are also co-located or not. The Exchange also has represented that the path for distribution by the Exchange of the NYSE BQT data feed would not be faster than that for distribution by a vendor that independently created a product like the NYSE BQT data feed. The Exchange therefore believes that a market data vendor could perform the aggregation and consolidation function in the Mahwah facility and redistribute a competing product from that location to similarly situated customers on a level playing field with respect to the speed that the Exchange could create and redistribute the NYSE BQT data feed.

With respect to cost, the Exchange has stated that it will file a separate rule filing to establish the fees for the NYSE BQT data feed. To ensure that vendors could compete with the Exchange by creating a product with the same content as the NYSE BQT data feed and selling it to their clients, the Exchange has represented that it would charge its clients for the NYSE BQT data feed an amount at least equal to the cost to a market data vendor to subscribe to the six underlying data feeds, plus an additional amount (to be determined) that would reflect the value of the aggregation and consolidation function performed by the Exchange. The Exchange therefore believes that a competing vendor could create and offer a product similar to the proposed NYSE BQT data feed at no material cost disadvantage relative to the Exchange. For these reasons, the Exchange believes that vendors could readily offer a product similar to the NYSE BQT data feed on a competitive basis.

The Exchange has stated that it will announce the effective date of the proposed rule change in a notice to be published as soon as practicable following the approval of the proposed rule change by the Commission. The Exchange anticipates making available the NYSE BQT data feed as soon as practicable after approval of the proposed rule change by the Commission and the effectiveness of a rule filing to establish the fees for the NYSE BQT data feed.

III. Summary of Comments

As noted above, the Commission received one comment letter on the proposed rule change, and a letter from the Exchange responding to this commenter.[12] The commenter, SIFMA, generally raised three broad concerns regarding the proposal and urged the Commission to disapprove the filing.

First, SIFMA notes that the Exchange has argued that, because it intends to offer the NYSE BQT data feed in the capacity of a vendor, it does not believe that its proposed data feed is subject to review under the Act. This commenter cites the statement in the proposal that ''the Exchange reserves the right to argue, with respect to the NYSE BQT data feed or any other product, that there is no requirement for a filing under Section 19 of the Act to enable the Exchange to offer such products.'' The commenter disagrees with this view and has argued that selling a combination of data feeds for its various platforms does not make the Exchange a ''vendor'' in a way that negates its statutory obligations as an SRO. The commenter argues that the Exchange, by relying on a false vendor capacity argument, is attempting to trump its obligations as an SRO and make all of its market data distribution unreviewable. The commenter expresses the concern that this would rob the public of the opportunity to comment afforded under the Act and urges the Commission to ensure that such rule changes are in fact filed with the Commission and subject to public comment and Commission review.

[10] 17 CFR 242.603(c).

[11] *See* NYSE Letter at 2.

[12] *See* SIFMA Letter and NYSE Letter, *supra* notes 4 and 5.

In its response, NYSE states that although it has reserved the right to argue at another time that there is no requirement for a filing to offer this market data product, it has in fact filed the proposal with the Commission and has sought the Commission's approval to offer the NYSE BQT data feed.

Second, SIFMA argues that the Exchange has failed to file fees for the proposed NYSE BQT data feed that meet the requirements of the Act, including the requirement that such fees be ''fair and reasonable'' under Section 11A(c)(1)(C) of the Act. The commenter also states that the Exchange has circumvented the requirement to file these fees by marketing the NYSE BQT data feed product for the past 16 months with promotional materials that contain pricing information. SIFMA also argues that the Exchange's proposed markup for the consolidated feed would apply to any vendor that wanted to create a competing product.

In its response letter, NYSE notes that no data recipients are currently receiving the NYSE BQT data feed and that the Exchange has no plans to offer and charge for the NYSE BQT data feed until the appropriate regulatory process has been completed consistent with the Exchange's obligations under the Act. Furthermore, in Amendment No. 1, NYSE has represented that it would not offer the NYSE BQT data feed until after it has filed fees with the Commission for the NYSE BQT data feed and such fees have become effective. NYSE also states that a competing vendor seeking to create a similar unified feed would not need to pay for the NYSE BQT data feed, but would only need to pay for the six underlying feeds. The Exchange has also represented that it would continue to make available all of the individual underlying feeds.

Finally, SIFMA disputes the Exchange's assertion that it is not the exclusive distributor of the NYSE BQT data feed. The commenter argues that the Exchange's vendor contract appears to restrict competition by providing the Exchange with ''sole discretion'' over the data, particularly with respect to the indirect access service permission that would apply to a competing vendor. The commenter further notes that the contract explicitly prohibits any re-dissemination or other use of its market data. NYSE responds by asserting that the Exchange, NYSE MKT, and NYSE Arca do not contractually restrict vendors from using the underlying data feeds and notes that vendors currently consolidate data products offered by these exchanges, which is permitted under the vendor agreements related to the receipt of market data.

IV. Discussion and Commission Findings

After carefully considering the proposal and the comments submitted, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[13] In particular, the Commission finds that the proposed rule change is consistent with the requirements of Section 11A(c)(1)(C) of the Act [14] and with Rule 603(a)(2) of Regulation NMS thereunder,[15] which requires that any national securities exchange, national securities association, broker, or dealer that distributes information with respect to quotations for or transactions in an NMS stock to a securities information processor, broker, dealer, or other persons shall do so on terms that are not unreasonably discriminatory. The Commission also finds that the proposed rule change is consistent with Section 6(b)(5) of the Act, which requires that the rules of an exchange be designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest, and Section 6(b)(8) of the Act, which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.[16]

The Commission notes that, to create the NYSE BQT data feed, the Exchange would use underlying data feeds that belong to the Exchange (NYSE BBO and NYSE Trades) and underlying data feeds that belong to its affiliated exchanges, NYSE Arca and NYSE MKT (NYSE Arca BBO, NYSE Arca Trades, NYSE MKT BBO, and NYSE MKT Trades). Accordingly, the Commission's review of the Exchange's proposal has focused, in particular, on whether the proposal would result in affiliated exchanges—which are separate self-regulatory organizations under the Act—making their data products or services available to one another at terms (e.g., content, pricing, or latency) that are more favorable than those available to unaffiliated market participants.

The Exchange has represented that the NYSE BQT data feed would be created using underlying data feeds that are available for subscription by market participants. In addition, the Exchange has represented that, as the creator and distributor of the NYSE BQT data feed, it would receive the underlying data feeds from its own systems and from NYSE Arca and NYSE MKT with no latency advantage compared to a competing vendor that wishes to acquire the component feeds in order to offer a competing consolidated data feed. The Exchange, NYSE Arca, and NYSE MKT are located in the same data center in Mahwah, New Jersey, which would be the point at which the Exchange would receive the six underlying data feeds before then aggregating the data to create the NYSE BQT data feed. The Exchange has represented that it offers third parties access to this data center through co-location and that co-located vendors could obtain the same underlying feeds there.[17] The Exchange has also represented that it has designed the NYSE BQT data feed so that it would have no advantages over co-located vendors with respect to the speed of access to the underlying feeds.[18]

[13] In approving this proposed rule change, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[14] Section 11A(c)(1)(C) of the Act requires, among other things, that no self-regulatory organization, member thereof, securities information processor, broker or dealer make use of the mails or any means or instrumentality of interstate commerce to collect, process, distribute, publish or prepare for distribution or publication any information with respect to quotations for or transactions in any security other than an exempted security in contravention of such rules and regulations as the Commission shall prescribe as necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act to assure that all securities information processors may, for purposes of distribution and publication, obtain on fair and reasonable terms such information with respect to quotations for and transactions in such securities as is collected, processed, or prepared for distribution or publication by an exclusive processor of such information acting in such capacity. 15 U.S.C. 78k–1(c)(1)(C).

[15] 17 CFR 242.603(a)(2).

[16] 15 U.S.C. 78f(b)(5) and (b)(8).

[17] In recognition that the Exchange is the source of its own market data and is affiliated with NYSE Arca and NYSE MKT, the Exchange also has represented that it will continue to make available all of the individual underlying feeds and that the source of the market data it uses to create the proposed NYSE BQT is the same as the source available to other vendors.

[18] The Commission also notes that SIFMA has argued that NYSE is the exclusive processor for NYSE BQT because Exchange's vendor contract appears to restrict competition by asserting that it has ''sole discretion'' over the use of its data and by prohibiting re-dissemination or other use of its market data. The Commission notes, however, that NYSE has represented that the Exchange, NYSE MKT, and NYSE Arca do not contractually restrict vendors from using the underlying data feeds and that vendors currently consolidate data products offered by these exchanges, which is permitted under the vendor agreements related to the receipt of market data. Based on these representations by the Exchange, the Commission does not believe that

Continued

With respect to pricing, although specific fees to be charged for the NYSE BQT data feed are not part of the Exchange's proposal, the Exchange has represented that it will assess a fee that is at least equal to the aggregate cost of the underlying feeds (i.e., at least as much as the cost to a vendor of subscribing to each of the underlying data feeds), plus an additional amount (to be determined) that would reflect the value of the aggregation and consolidation function performed to create the NYSE BQT data feed.[19]

Based on the Exchange's representations with respect to the content, latency, and pricing of the NYSE BQT data feed—which are central to the Commission's analysis of the proposal—the Commission finds that the Exchange's proposal is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange. The Commission believes that these representations are designed to ensure that NYSE, NYSE Arca, and NYSE MKT, which are separate self-regulatory organizations, do not, because of their relationship as affiliates, offer one another products or services on a more favorable basis than that available to other competing market participants.

Finally, the Commission notes that SIFMA has objected to the Exchange's characterization of the NYSE BQT data feed as being part of the Exchange's vendor function and outside of the scope of the rule filing process of Section 19(b) of the Act. The Commission believes that a data feed offered by an exchange that contains that exchange's own market data (including a feed that also contains data from other exchanges) is a ''material aspect of the operation of the facilities of the self-regulatory organization,'' and that therefore, such a data product and any related fees are subject to the rule filing process of Section 19(b) of the Act.[20]

For the foregoing reasons, the Commission finds that the proposed rule change, as amended, is consistent with Section 11A(c)(1)(C) of the Act and Rule 603(a)(2) of Regulation NMS thereunder,[21] and Sections 6(b)(5) and (b)(8) of the Act.[22]

V. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1

Amendment No. 1 revised the proposal to (i) remove language proposing specific fee amounts for the NYSE BQT data feed, (ii) clarify that the Exchange intends to propose fees that would be no lower than the cost to a vendor of creating a comparable product, including the costs of the underlying feeds, and (ii) represent that the Exchange will not offer the NYSE BQT data feed until after the proposal has been approved by the Commission, the Exchange has filed fees for the NYSE BQT data feed with the Commission, and such fees have become effective. Accordingly, the Commission does not believe that Amendment No. 1 raises any novel regulatory issues and therefore finds that good cause exists to approve the proposal, as modified by Amendment No. 1, on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 1 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2014–40 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2014–40. This file number should be included on the subject line if email is used.

To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2014–40 and should be submitted on or before December 4, 2014.

VII. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[23] that the proposed rule change, as modified by Amendment No. 1, (SR–NYSE–2014–40) be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

NYSE is the exclusive processor of the data that composes the NYSE BQT feed.

[19] SIFMA has objected to the fact that the Exchange has not included fees in this filing. The Commission notes, however, that the Exchange has stated that it will not offer NYSE BQT until it has submitted the requisite fee filing under Section 19(b) of the Act. The Commission will review any such filing when it has been submitted.

SIFMA has also argued that the Exchange has been actively marketing NYSE BQT for months. The Commission notes, however, that the Exchange has represented that it has not been offering NYSE BQT and that it will not offer this product until fees for it have been filed with the Commission and have become effective.

[20] Rule 19b–4 provides that ''any material aspect of the operation of the facilities of the self-regulatory organization'' is a ''stated policy, practice, or interpretation,'' 17 CFR 240.19b–4(a)(6), and that a stated policy, practice of interpretation of a self-regulatory organization is deemed to be a ''proposed rule change'' unless (1) it is reasonably and fairly implied by an existing rule of the self-regulatory organization or (2) it is concerned solely with the administration of the self-regulatory organization and is not a stated policy, practice or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the self-regulatory organization. 17 CFR 240.19b–4(c).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73550; File No. SR–NASDAQ–2014–034]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Withdrawal of a Proposed Rule Change Relating to Proposed Changes To Remove From the Exchange Rules Fee Provisions Regarding Re-Transmission of ''Third-Party Data''

November 6, 2014.

On April 7, 2014, The NASDAQ Stock Market LLC (''Nasdaq'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] to remove, from the Exchange rules, fee provisions with respect to third-party data feeds that Nasdaq receives from multiple sources and then re-transmits to clients in connection with the Exchange's co-location services. The proposed rule change was published for comment in the **Federal Register** on April 28, 2014.[3] On June 5, 2014, the Commission extended the time to act on the proposal until July 25, 2014.[4] On July 22, 2014, the Commission instituted proceedings to determine whether to disapprove the proposed rule change in an order published in the **Federal Register**.[5] The Commission received no comment letters on the proposed rule change. On October 23, 2014, the Commission extended the time to act on the proposal until December 24, 2014.[6] On October 24, 2014, the Exchange withdrew the proposal (SR–NASDAQ–2014–034).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73546; File No. SR–Phlx–2014–67]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Correct Two Typographical Errors in Rule 3315

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 4, 2014, NASDAQ OMX PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposal to amend NASDAQ OMX PSX (''PSX'') [3] Rule 3315 to correct two typographical errors in which references were made to a NASDAQ Stock Market LLC (''NASDAQ'') rule rather than to the PSX rule itself.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqomxphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] PSX is a facility of Phlx.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to correct two typographical errors in PSX Rule 3315(d) in which references were made to a NASDAQ rule rather than the PSX rule itself, and thereby clarify and conform Exchange rules pertaining to error accounts in respect of order routing.

Order routing is currently discussed in PSX Rule 3315. Subsection (d)(2) deals with the maintenance and use of an error account when routing. PSX Rule 3315 was adopted [4] to fully spell out how routing will work on the Exchange and to generally track the language of NASDAQ Rule 4758. When PSX Rule 3315 was adopted, two references to NASDAQ Rule 4758 were inadvertently left in. In PSX Rule 3315(d)(2)(A) and 3315(d)(2)(B), the intent was and is to make reference to PSX Rule 3315 rather than NASDAQ Rule 4758.

The Exchange is now proposing to correct these two typographical errors. The Exchange is thus substituting the current references to NASDAQ Rule 4758 in subsections (d)(2)(A) and (d)(2)(B) of PSX Rule 3315 with the correct references to PSX Rule 3315. There are no other changes.

The proposed non-substantive change substituting an improper rule reference is done to clarify the order routing rules and eliminate potential confusion, to the benefit of market participants.

2. Statutory Basis

Phlx believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[5] in general, and with Sections 6(b)(5) of the Act [6] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. This is achieved by correcting two non-substantive typographical errors in PSX Rule 3315, thereby clarifying the order routing rules and eliminating the potential for confusion, to the benefit of

[4] *See* Securities Exchange Act Release No. 65469 (October 3, 2011), 76 FR 62486 (October 7, 2011) (SR–Phlx–2011–108) (notice of filing and immediate effectiveness). The goal of the filing was to offer routing strategies on the Exchange that were materially identical to several strategies offered by its affiliate, NASDAQ.

[5] 15 U.S.C. 78f.

[6] 15 U.S.C. 78f(b)(5).

market participants. The Exchange believes that ensuring the proper rule references in PSX Rule 3315 will promote market participants' understanding of the rule and its administration.

B. Self-Regulatory Organization's Statement on Burden on Competition

Phlx does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of purposes of the Act. The Exchange believes that while rule clarity is generally pro-competitive, the act of clarifying and conforming the two non-substantive typographical errors should have little, if any, impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)of the Act [7] and of Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed under Rule 19b–4(f)(6) [9] normally does not become operative prior to 30 days after the date of filing. However, pursuant to Rule 19b–4(f)(6)(iii),[10] the commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay could eliminate confusion that may exist if an operative delay was applied to the typographical errors, and believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest.[11] Therefore, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–PHLX–2014–67 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–PHLX–2014–67. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).*

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–PHLX–2014–67 and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73542; File No. SR–NYSEMKT–2014–87]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending the NYSE Amex Options Fee Schedule To Add a Service Fee for Certain Post Trade Adjustments Performed by the Exchange To Be Effective December 1, 2014

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 28, 2014, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') a proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Amex Options Fee Schedule (''Fee Schedule'') to add a service fee for certain post-trade adjustments performed by the Exchange. The Exchange proposes to implement the fee

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

change effective December 1, 2014. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to add a service fee for certain post-trade adjustments performed by the Exchange (the ''Service Fee''). The Exchange proposes to implement the Service Fee effective December 1, 2014. As described below, the proposed Service Fee would apply to certain post-trade adjustments performed by Exchange staff. The purpose of the proposed Service Fee is to ensure a fair and reasonable use of Exchange resources by allowing the Exchange to recoup for valuable employee time and resources expended on these post-trade adjustments that may also be self-executed by ATP Holders. In addition, the Exchange believes that the proposed Service Fee would incentivize ATP Holders to process their own post-trade adjustments going forward.

In an effort to conserve Exchange resources, the Exchange has provided ATP Holders with the functionality to perform certain of their own post-trade adjustments. Specifically, ATP Holders may perform post-trade adjustments on their side of the trade that do not affect the contractual terms of a transaction. For example, ATP Holders may currently make the following non-contractual post-trade adjustments without Exchange interaction: changing the position indicator (*e.g.,* from Open to Close or Close to Open); adding or removing Clearing Member Trade Agreement (''CMTA'') information; allocating trades (*e.g.,* adding multiple executing domains or ''give-ups''); changing the clearing account type (*e.g.,* Customer, Firm, Market Maker) and modifying the optional data field, which may be used by ATP Holders for their own internal back-office processing (collectively, the ''Post-Trade Adjustments'').

Notwithstanding the availability of functionality for ATP Holders to perform this function themselves, ATP Holders still send the Exchange a significant number of requests, on a daily basis, to perform these straightforward Post-Trade Adjustments on the ATP Holders' behalf. The Exchange uses its best efforts to respond to these requests by ATP Holders in a timely manner. While the Exchange is committed to delivering a certain level of customer service to its ATP Holders, it believes that performing the Post-Trade Adjustments free of charge results in the diversion of valuable Exchange time and resources in a manner that is not a [sic] fair and equitable to either the Exchange or, ultimately the ATP Holders.

Thus, to help offset the costs of having Exchange staff process Post-Trade Adjustments on behalf of ATP Holders, the Exchange is proposing a $5.00 Service Fee, per trade adjusted. The Post-Trade Adjustments that would be subject to the proposed Service Fee would be only those Post-Trade Adjustments that do not affect the contractual terms of a transaction and that are performed by the Exchange on behalf of ATP Holders when the ATP Holders could otherwise enter the Post-Trade Adjustments on their own behalf.[3] The Exchange notes that if an outage or malfunction of an Exchange system makes it infeasible for ATP Holders to enter Post-Trade Adjustments on their own behalf, the Exchange would not assess any Service Fees to process Post-Trade Adjustments on behalf of ATP Holders.

The $5.00 Service Fee would apply to each trade adjusted, not to each non-contractual change that the Exchange is requested to make to a given trade.[4] For example, if, for a given trade, an ATP Holder requested that the Exchange change both the position indicator from open to close and at the same time change the CMTA information, the Service Fee would still be $5.00, because the changes were for the same trade. The Exchange believes that the $5.00 Service Fee would reasonably compensate the Exchange for the resources diverted to the Post-Trade Adjustments (*i.e.,* cover employee and overhead expenses). The Exchange also believes that the $5.00 Service Fee may operate as an effective disincentive for ATP Holders that have relied on the Exchange to perform these services free of charge and believes these ATP Holders may take these tasks in-house given the newly introduced costs.

The Exchange is proposing to discount the $5.00 fee to $1.00 per trade adjusted for the first three months that the Service Fee is operative (*i.e.,* December 1, 2014—February 28, 2015). The Exchange believes this temporary discount is reasonable as it would provide ATP Holders time to adjust to the Exchange's new policy. To further provide ATP Holders notice of this proposed change, the Exchange previously announced by Trader Update the specific type of Post-Trade Adjustments that would be subject to the Service Fee.[5]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[7] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the Service Fee is reasonable, equitable and not unfairly discriminatory because it is designed to ensure a fair and reasonable use of Exchange resources by allowing the Exchange to recoup for valuable employee time and resources expended on the Post-Trade Adjustments. The Exchange believes that imposing this $5.00 fee per trade adjusted would reasonably compensate the Exchange for the resources diverted to the Post-Trade Adjustments (*i.e.,* cover employee and overhead expenses).[8]

Moreover, the Exchange believes that the Service Fee would promote a fair

[3] Should the Exchange propose to charge ATP Holders for any additional post-trade adjustments made on behalf of ATP Holders, other than non-contractual changes that ATP Holders may do on their own behalf, the Exchange would only do so pursuant to a separate fee filing.

[4] The Exchange proposes to add this Service Fee to the Fee Schedule immediately following ''Report Fees'' under a new section entitled ''NYSE AMEX OPTIONS: SERVICE FEES.''

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(4) and (5).

[8] As noted above, the Exchange would offer an introductory rate of $1.00 per trade adjusted for the first three months that the Service Fee is operational.

and orderly market and protect investors and the public interest because the Service Fee may result in a more efficient use of Exchange resources, which would benefit all market participants.

The Exchange believes that the Service Fee is reasonable, equitable and not unfairly discriminatory because ATP Holders would have the option, as they do today, to perform the Post-Trade Adjustments themselves and the Service Fee would only apply if ATP Holders elected to rely on the Exchange to perform these adjustments for them. Moreover, the Service Fee would apply equally to all market participants who opt to rely on the Exchange to perform the Post-Trade Adjustments. In fact, the Exchange believes that the proposed Service Fee would incentivize ATP Holders to process their own Post-Trade Adjustments going forward.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule Service Fee is not intended to address any competitive issues among exchanges or ATP Holders but rather to more efficiently use the Exchange's employee time and resources, which may ultimately benefit ATP Holders.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues, and imposing the Service Fee may enable the Exchange to improve efficiency and ensure the fair and reasonable use of Exchange resources. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed Service Fee reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[9] 15 U.S.C. 78f(b)(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [10] of the Act and subparagraph (f)(2) of Rule 19b–4 [11] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [12] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2014–87 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2014–87. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2014–87, and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Kevin M. O' Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73545; File No. SR–Phlx–2014–54]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, To Add a New Complex Order Process Called Legging Orders

November 6, 2014.

I. Introduction

On September 10, 2014, NASDAQ OMX PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend its rules governing the trading of complex orders on the Exchange to adopt ''legging orders.'' The proposed rule change was published for comment in the **Federal Register** on September 25, 2014.[3] The Commission received no

comment letters regarding the proposed rule change. On November 5, 2014, the Exchange filed Amendment No. 1 to the proposal.[4] The Commission is publishing this notice to solicit comments on Amendment No. 1 from interested persons and is approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description

A. Legging Orders

The Exchange proposes to adopt Phlx Rule 1080.08(f)(iii)(C) relating to the generation and execution of ''legging orders.'' Under the proposal, a legging order is a limit order on the regular order book in an individual series that represents one leg of a two-legged complex order (which improves the cPBBO) [5] to buy or sell an equal quantity of two option series resting on the Exchange's Complex Order Book (''CBOOK'').[6] Phlx proposes that legging orders are firm orders that are included in the Exchange's displayed best bid or offer.[7] According to the Exchange, legging orders are designed to increase the opportunity for complex orders to execute by ''legging'' into the market, whereby all of the legs of the complex order execute against the best bids or offers on the Exchange for the individual options series.[8]

B. Generation of Leg Orders

The Exchange proposes that legging orders may be automatically generated on behalf of Complex Orders resting on the top of the CBOOK so that they are represented at the best bid and/or offer on the Exchange for the individual legs.[9] Phlx proposes that a legging order may be automatically generated for one leg of a Complex Order at a price: (i) that matches or improves upon the best Phlx displayed bid or offer; and (ii) at which the net price can be achieved when the other leg is executed against the best displayed bid or offer (other than against a legging order).[10] The Exchange proposes not to generate legging orders when the Exchange or a particular option has not opened, is halted or is otherwise not available for trading.[11] The Exchange also proposes to not generate a legging order for complex order strategies that are not available for trading.[12]

To determine whether a Legging Order may be generated, the Exchange proposes to evaluate the CBOOK when a Complex Order enters the CBOOK and at a regular time interval to be determined by the Exchange (which interval shall not exceed 1 second) following a change in the National Best Bid/Offer (''NBBO'') or PBBO in any component of a complex order eligible to generate legging orders to determine whether legging orders may be generated.[13] Under the proposal, a legging order may be generated and executed in an increment other than the minimum increment for that series and will be ranked on the order book at its generated price and displayed at a price that is rounded, down for legging orders to buy and up for legging orders to sell, to the nearest minimum increment allowable for that series.[14]

The Exchange proposes to adopt Phlx Rule 1080.08(f)(iii)(C)(2) to provide that legging orders will not be generated if: (i) The price of the legging order would lock or cross the best bid or offer of another exchange; (ii) there is an auction on either side of the market in the series or a ''Posting Period'' under Phlx Rule 1080(p) regarding ''Acceptable Trade Range'' on the same side in progress in the series; (iii) the price of the complex order is outside of the Acceptable Complex Execution (''ACE'') Parameter under Phlx Rule 1080.08(i); (iv) there is already a legging order in that series on the same side of the market at the same price (unless it has priority based on the participant type, under existing Exchange rules); (v) the complex order is an all-or-none order; or (vi) the generated legging order for a complex order would immediately cause resting legging orders to be removed pursuant to section proposed Phlx Rule 1080.08(f)(iii)(C)(4)(ix).[15]

The Exchange proposes that it may limit the number of legging orders generated on an objective basis and may remove existing legging orders to maintain a fair and orderly market in time of extreme volatility or uncertainty.[16] The Exchange represents that it will determine the options for which, if any, legging orders will be available and will communicate this to its participants.[17] Phlx represents that it would not limit the generation of legging orders on the basis of the entering participant or the participant category of the order (*e.g.,* professional or public customer).[18]

C. Execution of Legging Orders

The Exchange proposes that legging orders would be executed only after all other executable orders (including any non-displayed size) and quotes at the same price are executed in full pursuant to the Phlx priority rules applicable to Phlx XL non-Complex Orders, rather than based on the time of receipt of the Complex Order.[19] As a result, the Exchange states the generation of legging orders will not affect the existing priority, or execution opportunities, currently provided to participants in the regular market in any way.[20] Under the proposal, when a legging order is executed, the other leg of the complex order will be automatically executed against the displayed best bid or offer on the Exchange and any other legging order based on that complex order will be removed.[21]

Phlx believes that legging orders will provide additional execution opportunities for complex orders without negatively impacting investors

[4] Amendment No. 1 revises the proposal to: (i) modify proposed Phlx Rule 1080.08(f)(iii)(C)(4)(vi) to provide that, in the event the Exchange receives a PIXL Order for the account of a public customer that is paired with another order for the account of a public customer pursuant to Phlx Rule 1080(n)(vi), the Exchange will remove any resting legging orders in those options series; (ii) add a proposed Phlx Rule 1080.08(f)(iii)(C)(4)(xii) to provide that a legging order will be removed when the legging order is on the Exchange's book at a price that is not at the minimum increment for that series and that is more aggressive than the same side Phlx Best Bid or Offer (''PBBO'') and an away market moves to lock the PBBO (which is also the NBBO); (iii) provide that the proposal will be implemented within 30 days of Commission approval and that the Exchange will notify members of implementation by issuing an Options Trader Alert; and (iv) the Exchange expects to implement the new functionality on a symbol by symbol bases over the course of a week to mitigate risks associated with the rollout of new technology; and (v) make certain non-substantive clarifications to the rule text.

[5] According to the Exchange, the term ''cPBBO'' means the best net debit or credit price for a Complex Order Strategy based on the PBBO for the individual options components of such Complex Order Strategy, and, where the underlying security is a component of the Complex Order, the National Best Bid and/or Offer for the underlying security. *See* Notice *supra,* note 3, at n.3 (citing Phlx Rule 1080.08(a)(iv)).

in the regular market.[22] Phlx also believes that legging orders may facilitate additional executions and enhance execution quality for investors in the regular market by improving the price and/or size of the PBBO and by providing additional execution opportunities for resting orders on the regular book.[23]

D. Removal of Legging Orders

The Exchange proposes to adopt Phlx Rule 1080.08(f)(iii)(C)(4) to provide that a legging order will be removed from the Exchange's regular limit order book automatically if: (i) The price of the legging order is no longer at the Exchange's displayed best bid or offer on the regular limit order book; (ii) execution of the legging order would no longer achieve the net price of the complex order when the other leg is executed against the Exchange's best displayed bid or offer on the regular limit order book (other than another legging order); (iii) the complex order is executed in full or in part; (iv) the complex order is cancelled or modified; (v) the price of the complex order is outside of the ACE Parameter of Phlx Rule 1080.08(i); (vi) the Exchange receives a Qualified Contingent Cross Order [24] which includes a component in which a legging order exists, an order that will trigger an auction under Phlx rules in a component in which there is a legging order (whether a buy order or a sell order), or a PIXL Order for the account of a public customer paired with an order for the account of a public customer pursuant to Phlx Rule 1080(n)(vi); (vii) a legging order is generated by a different complex order in the same leg at a better price or the same price for a participant with a higher priority; (viii) a complex order is marketable against the cPBBO where a legging order is present and has more than one leg in common with the existing complex order that generated the legging order; (ix) a complex order becomes marketable against multiple legging orders; (x) a complex order consisting of an unequal quantity of components is marketable against the cPBBO where a legging order is present but cannot be executed due to insufficient size in at least one of the components of the cPBBO; (xi) an incoming all-or-none order is entered onto the order book at a price which is equal to or crosses the price of a legging order; or (xii) when the legging order is on the book at a price which is not at the minimum price variation and which is more aggressive than the same side PBBO, and an away market moves to lock the PBBO (which is also the NBBO).[25]

Finally, the Exchange proposes to implement the proposed rule change within 30 days of approval by the Commission, and represents that it will notify Exchange members of implementation by issuing an Options Trader Alert.[26] The Exchange expects to implement the new functionality on a symbol by symbol basis over the course of a week in order to mitigate risks associated with the rollout of new technology.[27]

III. Discussion

After careful review, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[28] In particular, the Commission finds that the proposed rule change, as amended, is consistent with Section 6(b)(5) of the Act,[29] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission believes that legging orders could facilitate the execution of complex orders resting on the Exchange's CBOOK by increasing the opportunities for eligible complex orders to execute against interest in the regular market on the Exchange's regular order book, thereby benefitting investors seeking to execute complex orders. In addition, the Commission believes that legging orders could benefit participants in the regular market by providing additional liquidity, and potentially more favorable executions, for regular market interest. The Commission notes that it previously approved proposals by other options exchanges to implement legging orders.[30]

Under the proposal, legging orders will be firm orders that represent one leg of a two-legged complex order involving a one-to-one ratio resting on the top of the CBOOK.[31] The Commission notes that, on Phlx, legging orders may be generated and executed in an increment other than the minimum increment for that options series and will be ranked on the order book at its generated price and displayed at a price that is rounded, down for legging orders to buy and up for legging orders to sell, to the nearest minimum increment allowable for that series.[32] The Commission also notes that a legging order will be executed only after all other executable orders (including any non-displayed size) and quotes at the same price are executed in full pursuant to the Exchange's priority rules applicable to non-complex orders.[33] Accordingly, the Exchange represents that the generation of a legging order will not affect the existing priority, or execution opportunities, currently provided to market participants in the regular market in any way.[34]

As noted above, the Exchange represents that it will carefully manage and curtail the number of legging orders being generated so that they do not negatively impact system capacity and performance.[35] Phlx represents, further, that it may curtail the number of leg orders on an objective basis, such as by limiting the number of leg orders generated in a particular option, and that it will not limit the generation of leg orders on the basis of the entering participant or the participant category of the order (*i.e.,* professional or public customer).[36]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 1 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2014–54 on the subject line.

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2014–54. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549–1090 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2014–54, and should be submitted on or before December 4, 2014.

V. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1

The Commission finds good cause for approving the proposed rule change, as amended by Amendment No. 1, prior to the 30th day after the date of publication of notice in the **Federal Register**. Amendment No. 1 revises the proposal to, among other things, provide for two instances whereby the Exchange will remove legging orders to ensure that legging orders are removed when public customer orders are crossed through the Exchange's PIXL auction pursuant to Phlx Rule 1080(n)(vi) and to ensure that legging orders are removed consistent with Phlx Rule 1084 governing order protection.[37] The Commission notes that the revisions are designed to provide market participants with more specificity regarding the operation and implementation of the Exchange's legging order functionality. Accordingly, the Commission finds good cause for approving the proposed rule change, as amended, on an accelerated basis, pursuant to Section 19(b)(2) of the Act.[38]

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[39] that the proposed rule change (SR–Phlx–2014–54), as amended, be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[40]

Kevin M. O'Neill,

Deputy Secretary.

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Cancel-Replacement and Route Timer

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 28, 2014, The NASDAQ Stock Market LLC (''NASDAQ'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASDAQ. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASDAQ proposes to add specificity to the Exchange's options trading rules. The NASDAQ Options Market (''NOM'') is Nasdaq's facility for executing and routing standardized equity and index options. The Exchange proposes to define cancel-replacement orders and also describe a route timer in Chapter VI, entitled ''Trading Systems.''

The text of the proposed rule change is available on the Exchange's Web site at *http://www.nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Chapter VI to add additional specificity to its rules. The Exchange proposes to amend Section 1, Definitions, to define a cancel- replacement order. The Exchange proposes to amend Section 11, Order Routing, to add greater specificity to the Rulebook concerning a route timer.

Cancel-Replacement Orders

A market participant today has the option of either sending in a cancel order and then separately sending in a new order which serves as a replacement of the original order (two separate messages) or sending a single cancel-replacement order in one message.

If an order is submitted to the System and then subsequently a cancel order is sent to the System cancelling the original order, the original order will be cancelled by the System provided the original order was not already filled partially or in its entirety. A subsequent replacement order would be treated as a new order by the System and will not retain the priority of the cancelled order.

An order that is entered as one single message (''cancel-replacement order'')

---

[37] *See supra* note 4 for a description of Amendment No. 1.

[38] 15 U.S.C. 78s(b)(2).

[39] *Id.*

[40] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

containing two orders (versus two messages as described above) will also result in the original order being cancelled, provided the original order was not already filled partially or in its entirety.[3] The replacement order will be considered a new order by the System and will have time priority as of the time that order is entered into the System, except in the case that the replacement order only serves to reduce the size of the order. A cancel-replacement order which only reduces the size of the order will continue to retain the priority of the original order.[4] The replacement order will not retain the priority of the cancelled order except when the replacement *reduces* the size of the order and all other terms and conditions are retained. This is similar to the manner in which partially executed orders are prioritized in the System.

By way of example, if the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, presuming the original order was not filled in its entirety or partially, the entire original order would be cancelled. If the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, and 600 contracts were already filled, the cancel-replacement order would be returned to the market participant. If the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, and 300 contracts were already filled, the order would be modified to 300 contracts. Finally, if the original order is for 600 contracts and a market participant submits a cancel-replacement order solely reducing the size of the order by 300 contracts, the order would be modified to 300 contracts and the original order would retain its priority. In the previous examples provided, the orders would not retain the priority of the original orders.

The Exchange proposes to add the following definition in Chapter VI, Section 1, ''Cancel-replacement order shall mean a single message for the immediate cancellation of a previously received order and the replacement of that order with a new order with new terms and conditions. If the previously placed order is already filled partially or in its entirety, the replacement order is automatically canceled or reduced by the number of contracts that were executed. The replacement order will not retain the priority of the cancelled order except when the replacement order reduces the size of the order and all other terms and conditions are retained.'' This language is being added to Section 1(e)(1) to reflect the manner in which cancel-replacement orders function today. This filing does not reflect a change to the System; rather, the Exchange is memorializing in its rules the manner in which cancel-replacement orders are treated today.

Route Timer

Today, the System provides a number of routing options pursuant to which orders are sent to other available market centers for potential execution, per the entering market participant's instructions.[5] The System routing options are SEEK or SRCH. With SEEK and SRCH, an order will first check the System for available contracts for execution. After checking the System for available contracts, orders are sent to other available market centers for potential execution, per the entering firm's instructions.

The Exchange proposes to add language in a new Section 11(a)(1)(C) to specify that after an order is initially routed,[6] pursuant to either the SEEK or SRCH routing option, the order will post to the book and will be routed after a time period (''Route Timer'') not to exceed one second as specified by the Exchange on its Web site provided that the order's limit price would lock or cross other market center(s).[7] If, during the Route Timer, any new interest arrives opposite the order that is equal to or better than the away best bid or offer (''ABBO'') price, the order will trade against such new interest at the ABBO price. Eligible unexecuted orders will be routed at the end of the Route Timer provided the order was not filled and the order's limit price would continue to lock or cross the ABBO. If an order was routed with either the SEEK or SRCH routing option, and has size after such routing, it will execute against contra side interest in the book, post in the book, and route again pursuant to the process described above, if applicable, if the order's limit price would lock or cross another market center(s).

This language is being added to Section 11 to reflect the manner in which the Exchange imposes a Route Timer on routed orders today to permit quote updates to occur prior to subsequent routing. This filing does not reflect a change to the System, rather the Exchange is memorializing in its rules the manner in which orders are routed today.

The Exchange also proposes to amend rule text in Section 11(a)(1)(A) of Chapter VI concerning the SEEK routing option. The Exchange proposes to add language which clarifies the differences between SEEK and SRCH routing options with respect to contracts that remain un-executed after routing and are posted on the book. The Exchange proposes to state, ''Once on the book *at the limit price,* should the order subsequently be locked or crossed by another market center, the System will not route the order to the locking or crossing market center.'' The Exchange believes this language more clearly differentiates an order routed pursuant to SEEK as compared to the SRCH routing option. An order routed pursuant to the SEEK routing option is routable until it is posted at its limit price. Once posted at its limit price, an order routed pursuant to the SEEK routing option would not continue to route, as compared to an order routed pursuant to the SRCH routing option. An order routed pursuant to the SRCH routing option is routable for the life of the order. The routing functionality is similar to functionality currently on Phlx.[8]

The Exchange also proposes to correct a typographical error in Chapter VI, Section 11(a)(1).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act[9] in general, and furthers the objectives of Section 6(b)(5) of the Act[10] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and

[3] With cancel-replacement orders, the original order is automatically canceled or reduced by the number of contracts that were executed depending on the volume of the original order that was filled. The market participant is required to enter the original order reference number when a cancel-replacement order is sent to the System as one message.

[4] When a cancel-replacement order is sent to the System as one message the original order number reference is maintained by the System.

[5] Participants can designate orders as either available for routing or not available for routing. *See* Chapter VI, Sec. 11(a).

[6] If an order is only partially routed the portion that was not routed will be posted to the book.

[7] Pursuant to Section 11(c) of Chapter VI, orders sent by the System pursuant to the SEEK and SRCH routing options to other markets would not retain time priority with respect to other orders in the System. If an order routed pursuant to SEEK or SRCH is subsequently returned, in whole or in part, that order, or its remainder, will receive a new time stamp reflecting the time of its return to the System.

[8] *See* Phlx Rule 1080(m).

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to define cancel-replacement orders will add transparency to the rules. The Exchange is not amending the manner in which the System handles these orders. The Exchange is memorializing, in its rules, the method by which orders are handled by the System. The Exchange is defining cancel-replacement orders within Chapter VI, Section 1.

Specifically, with respect to cancel-replacement orders that reduce size, the Exchange believes that allowing cancel-replacement orders where only size is reduced to retain the priority of the original order is consistent with the manner in which the Exchange treats partially executed orders, which similarly apply the priority of the executed portion of the order to the remaining portion of the order. In addition, by permitting market participants' orders to remain on the book with the original priority and reduced size, the Exchange is providing market participants an ability to reduce exposure. The Exchange believes that adding transparency and specificity to the Rules protects investors and the public interest by reducing the potential for investor confusion.

The Exchange is also memorializing the manner in which the Exchange routes unexecuted portions of an order that will be subsequently routed to other markets when it comes back and subsequently locks and/or crosses the market. The Exchange will continue to re-route eligible unexecuted orders pursuant to a Route Timer. Contracts which remain unexecuted will be posted to the book provided the order's limit price would not lock or cross the ABBO. Specifically, the Exchange is describing the Route Timer that applies to eligible unexecuted portions of an order which will be subsequently routed. The timer protects investors and the public interest by providing a brief time period to allow the opportunity for markets to update quotes prior to subsequent routes.

The Exchange seeks to add language concerning the specific manner in which the Exchange will handle the routed order by specifying the routing methods in which SEEK or SRCH orders will route to the away market(s). The Exchange is adding clarifying language to make clear that after an order is initially routed, pursuant to either the SEEK or SRCH routing option, the order will post to the book and will be routed after a time period (''Route Timer'') not to exceed one second as specified by the Exchange on its Web site provided that the order would lock or cross other market center(s). If, during the Route Timer, any new interest arrives opposite the order that is equal to or better than the ABBO price, the order will trade against such new interest at the ABBO price. Eligible unexecuted orders will be routed at the end of the Route Timer provided the order was not filled and it would continue to lock or cross the ABBO. If an order was routed with either the SEEK or SRCH routing option, and has size after such routing, it will execute against contra side interest in the book, post in the book, and route again pursuant to the process described above, if applicable, if the order would lock or cross another market center(s).

Further, the proposal to amend rule text in Section 11(a)(1)(A) of Chapter VI concerning SEEK orders clarifies the differences between SEEK and SRCH routing options with respect to contracts that remain un-executed after routing and are posted on the book. The Exchange seeks to clearly note that once an order routed pursuant to the SEEK routing option is on the order book at the limit price, it will not route, despite the order locking or crossing another market center. The Exchange believes this language more clearly differentiates an order routed pursuant to the SEEK routing option as compared to SRCH routing option.

The Exchange believes this language adds specificity and detail to the rule text so that market participants may anticipate the manner in which orders are handled by the Exchange when routing. The Exchange believes that adding transparency and specificity to the Rules protects investors and the public interest by reducing the potential for investor confusion.

The Exchange's proposal is intended to provide additional specificity to the rules in the manner in which the System treats cancel-replacement orders and handles routing of eligible unexecuted portions of previously routed orders, which is designed to promote just and equitable principles of trade.

The Exchange is not proposing to amend the manner in which the System operates. Cancel-replacement orders have been treated in this fashion since NOM was first launched. Further, the Routing Timer for subsequent routes has also been in place on NOM since its launch. The Exchange is proposing these additions to the rules in order to provide greater specificity to the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange is seeking to provide greater transparency in its rules. The amendments are non-substantive and would apply to all market participants in the same manner. Permitting cancel-replacement orders to retain their original priority does not impose a burden on competition because the priority is retained only in the instance that size alone is changed and only if it is reduced. Permitting all market participants to reduce their exposure without penalty does not burden competition, rather it promotes competition by allowing participants the ability to change their orders in a changing market, provided the order was not already partially filled or filled in its entirety.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[11] and subparagraph (f)(6) of Rule 19b–4 thereunder.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved. The Exchange has provided the Commission

[11] 15 U.S.C. 78s(b)(3)(a)(ii).

[12] 17 CFR 240.19b–4(f)(6).

written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2014–099 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–NASDAQ–2014–099. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of NASDAQ. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2014–099 and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73548; File No. SR–Phlx–2014–68]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Routing Fees

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 30, 2014, NASDAQ OMX PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify Section V entitled ''Routing Fees'' of the NASDAQ OMX Phlx LLC Pricing Schedule (''Pricing Schedule''). Specifically, the Exchange proposes to modify Section V entitled ''Routing Fees'' of the Phlx Pricing Schedule (''Pricing Schedule''). Specifically, the Exchange proposes to amend its Routing Fees, and to allow aggregation of Customer[3] volume for calculating discount thresholds and receiving discounted routing fees.

While the changes proposed herein are effective upon filing, the Exchange has designated that the amendments be operative on November 3, 2014.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqomxphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend the Routing Fees in Section V of the Pricing Schedule in order to recoup costs incurred by the Exchange to route orders to away markets, and to allow members and member organizations to aggregate their Customer volume for calculating discount thresholds and receiving discounted routing fees.

Today, the Exchange assesses a Non-Customer a $0.97 per contract Routing Fee to any options exchange for routing an order. The Customer Routing Fee for option orders routed to The NASDAQ Options Market, LLC (''NOM'') is a $0.12 per contract Fixed Fee (''Fixed Fee'') in addition to the actual transaction fee assessed. The Customer Routing Fee for option orders routed to NASDAQ OMX BX, Inc. (''BX Options'') is $0.12 per contract. The Customer Routing Fee for option orders routed to all other options exchanges[4] (excluding NOM and BX Options) is a fixed fee of $0.22 per contract in addition to the actual transaction fee assessed. If the away market pays a rebate, the Routing Fee is $0.12 per contract.

With respect to the fixed costs, the Exchange incurs a fee when it utilizes

[13] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The term ''Customer'' applies to any transaction that is identified by a Participant for clearing in the Customer range at The Options Clearing Corporation (''OCC'') which is not for the account of broker or dealer or for the account of a ''Professional'' (as that term is defined in Rule 1000(b)(14)). Section V of Pricing Schedule.

[4] This includes BATS Exchange, Inc. (''BATS''), BOX Options Exchange LLC (''BOX''), the Chicago Board Options Exchange, Incorporated (''CBOE''), C2 Options Exchange, Incorporated (''C2''), International Securities Exchange, LLC (''ISE''), the Miami International Securities Exchange, LLC (''MIAX''), NYSE Arca, Inc. (''NYSE Arca''), NYSE MKT LLC (''NYSE Amex'') and ISE Gemini, LLC (''Gemini'').

NASDAQ Execution Services LLC (''NES''), a member of the Exchange and the Exchange's affiliated broker-dealer exclusive order router.[5] Each time NES routes an order to an away market, NES is charged a clearing fee[6] and, in the case of certain exchanges, a transaction fee is also charged in certain symbols, which fees are passed through to the Exchange. The Exchange currently recoups clearing and transaction charges incurred by the Exchange as well as certain other costs incurred by the Exchange when routing to away markets, such as administrative and technical costs associated with operating NES, membership fees at away markets, Options Regulatory Fees (''ORFs''), staffing and technical costs associated with routing options. The Exchange assesses the actual away market fee at the time that the order was entered into the Exchange's trading system. This transaction fee is calculated on an order-by-order basis since different away markets charge different amounts.

The Exchange is proposing to increase its Non-Customer Routing Fees from $0.97 to $0.99 per contract to any options exchange. The Exchange is proposing to increase its Customer Routing Fixed Fees to NOM from $0.12 to $0.13 per contract, in addition to the actual transaction fee assessed to recoup an additional portion of the costs incurred by the Exchange for routing these orders. The Exchange is proposing to increase its Customer Routing Fixed Fees to BX Options from $0.12 to $0.13 per contract. The Exchange is proposing to increase its Customer Routing Fixed Fees to all other options exchanges (excluding NOM and BX Options) from $0.22 to $0.23 per contract, in addition to actual transaction fees assessed. The Exchange would also increase the Customer Routing Fee to all other options exchanges if the away market pays a rebate from a fee of $0.12 to $0.13 per contract, because the Exchange would continue to retain the rebate to offset the cost to route orders to offset the cost to route orders to these away markets. The Exchange desires to recoup additional costs at this time.

Today, a member organization that: (1) Qualifies for a Tier 2, 3, 4 or 5 rebate in the Customer Rebate Program in Section B of the Pricing Schedule; and (2) routes away more than 5,000 Customer contracts per day in a given month to an away market (together the ''Customer Rebate requirements'')[7] is entitled to receive a credit equal to the applicable Fixed Fee plus $0.05 per contract, unless the away market transaction fee is $0.00 or the away market pays a rebate, in which case the member organization is entitled to receive a credit equal to the applicable Fixed Fee. Customer rebates are paid on Customer Rebate Tiers in Section B of the Pricing Schedule according to applicable categories (A or B). The Customer Rebate Tiers are calculated by totaling Customer volume in Multiply Listed Options (including SPY) that are electronically-delivered and executed, except volume associated with electronic Qualified Contingent Cross (''QCC'') Orders, as defined in Rule 1080(o), in a month.

The Exchange is proposing to add language to Section V stating that members and member organizations under Common Ownership[8] may aggregate their Customer volume routed away for purposes of calculating discount thresholds[9] and receiving discounted routing fees. The Customer Rebate requirements regarding Tier and volume remain in place. However, with the added language if members and member organizations are under Common Ownership they will be able to aggregate their Customer volume for the purpose of calculating discount thresholds and receiving discounted routing fees.

The proposal allows the Exchange to continue attracting liquidity to Phlx while recouping costs incurred by the Exchange to route orders to away markets.

2. Statutory Basis

The Exchange believes that its proposal to amend the Pricing Schedule is consistent with Section 6(b) of the Act[10] in general, and furthers the objectives of Section 6(b)(4) and (b)(5) of the Act[11] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which Phlx operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that amending the Non-Customer Routing Fee for orders routed to any options exchange from a fee of $0.97 to $0.99 per contract, is reasonable because the Exchange desires to recoup an additional portion of the cost it incurs when routing Non-Customer orders. The Exchange is proposing to increase the Fixed Fee to recoup additional costs that are incurred by the Exchange in connection with routing these orders on behalf of its members.

The Exchange believes that amending the Customer Routing Fee for orders routed to NOM from a Fixed Fee of $0.12 to $0.13 per contract, in addition to the actual transaction fee, is reasonable because the Exchange desires to recoup an additional portion of the cost it incurs when routing Customer orders to NOM. Today, the Exchange assesses orders routed to NOM a lower Fixed Fee for routing Customer orders as compared to the Fixed Fee assessed to other options exchanges. The Exchange is proposing to increase the Fixed Fee to recoup additional costs that are incurred by the Exchange in connection with routing these orders on behalf of its members.

The Exchange believes that amending the Customer Routing Fee for orders routed to BX Options from a Fixed Fee of $0.12 to $0.13 per contract is reasonable because the Exchange desires to recoup an additional portion of the cost it incurs when routing Customer orders to BX Options, similar to the amount of Fixed Fee it proposes to assess for orders routed to NOM. The Exchange is proposing to assess a Fixed Fee to recoup additional costs that are incurred by the Exchange in connection with routing these orders on behalf of its members. While the Exchange would continue to retain any rebate paid by BX Options,[12] the Exchange does not assess the actual transaction fee that is charged by BX Options for Customer orders.

The Exchange believes that continuing to assess lower Fixed Fees to route Customer orders to NOM and BX Options, as compared to other options exchanges, is reasonable as the Exchange is able to leverage certain infrastructure to offer those markets

[5] *See* Securities Exchange Act Release No. 71416 (January 28, 2014), 79 FR 6244 (February 3, 2014) (SR–Phlx–2014–05) (notice of filing and immediate effectiveness regarding utilization of NES for outbound order routing from Phlx).

[6] The Options Clearing Corporation (''OCC'') assesses $0.01 per contract side.

[7] When the Exchange recently added the 5,000 Customer contracts criterion, it did so to provide a credit to member organizations that qualify for a Customer rebate and route away a certain amount of volume. *See* Securities Exchange Act Release No. 71258 (January 8, 2014), 79 FR 2948 (January 14, 2014) (SR-Phlx-2013–125) (notice of filing and immediate effectiveness).

[8] The term ''Common Ownership'' shall mean members or member organizations under 75% common ownership or control. Section V of Pricing Schedule.

[9] A member or member organization may, for example, route away more than 5,000 Customer contracts per day in a given month to an away market.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(4), (5).

[12] BX Options pays a Customer Rebate to Remove Liquidity as follows: Customers are paid $0.35 per contract in All Other Penny Pilot Options (excluding BAC, IWM, QQQ, SPY and VXX) and $0.70 per contract in Non-Penny Pilot Options. *See* BX Options Rules at Chapter XV, Section 2(1).

lower fees as explained further below. Similarly, the Exchange believes that amending the Customer Routing Fee to other away markets, other than NOM and BX Options, in the instance the away market does not pay a rebate from a Fixed Fee of $0.22 to $0.23 per contract is reasonable because the Exchange desires to recoup an additional portion of the cost it incurs when routing orders to these away markets. While the Exchange would continue to retain any rebate paid by these [sic] away markets, the Exchange does not assess the actual transaction fee that is charged by the away market for Customer orders. The Fixed Fee for Customer orders is an approximation of the costs the Exchange will be charged for routing orders to away markets. As a general matter, the Exchange believes that the proposed fees for Customer orders routed to markets which pay a rebate, such as BX Options and other away markets, would allow it to recoup and cover a portion of the costs of providing optional routing services for Customer orders because it better approximates the costs incurred by the Exchange for routing such orders. While each destination market's transaction charge varies and there is a cost incurred by the Exchange when routing orders to away markets, including, OCC clearing costs, administrative and technical costs associated with operating NES, membership fees at away markets, ORFs and technical costs associated with routing options, the Exchange believes that the proposed Routing Fees will enable it to recover the costs it incurs to route Customer orders to away markets.

Moreover, the Exchange believes that amending the Customer Routing Fee to other away markets, other than NOM and BX Options, if the away market pays a rebate, from $0.12 to $0.13 per contract is reasonable because the Exchange desires to recoup an additional portion of the cost it incurs when routing Customer orders to away markets, similar to the amount of Fixed Fee it proposes to assess for orders routed to NOM and BX Options. The Exchange is proposing to assess a Fixed Fee to recoup additional costs that are incurred by the Exchange in connection with routing these orders on behalf of its members. While the Exchange would continue to retain any rebate paid by away markets, the Exchange does not assess the actual transaction fee that is charged by away markets for Customer orders.

The Exchange believes that amending the Non-Customer Routing Fee for orders routed to any options exchange from a fee of $0.97 to $0.99 per contract, is equitable and not unfairly discriminatory because the Exchange would assess the same $0.99 per contract fee to all market participants utilizing routing for Non-Customer orders.

The Exchange believes that amending the Customer Routing Fee for orders routed to NOM from a Fixed Fee of $0.12 to $0.13 per contract, in addition to the actual transaction fee, is equitable and not unfairly discriminatory because the Exchange would assess the same Fixed Fee to all orders routed to NOM in addition to the transaction fee assessed by that market.

The Exchange believes that increasing the Customer Routing Fee for orders routed to BX Options from a Fixed Fee from $0.12 to $0.13 per contract is equitable and not unfairly discriminatory because the Exchange would uniformly increase the Fixed Fee, similar to NOM, for all orders routed to BX Options and would continue to uniformly not assess the actual transaction fee, as is the case today.

The Exchange would uniformly assess a $0.13 per contract Fixed Fee to orders routed to NASDAQ OMX exchanges because the Exchange is passing along the saving realized by leveraging NASDAQ OMX's infrastructure and scale to market participants when those orders are routed to NOM or BX Options and is providing those saving to all market participants. Furthermore, it is important to note that when orders are routed to an away market they are routed based on price first.[13] The Exchange believes that it is equitable and not unfairly discriminatory to assess a fixed cost of $0.13 per contract to route orders to NOM and BX Options because the cost, in terms of actual cash outlays, to the Exchange to route to those markets is lower. For example, costs related to routing to NOM and BX Options are lower as compared to other away markets because NES is utilized by all three exchanges to route orders.[14] NES and the three NASDAQ OMX options markets have a common data center and staff that are responsible for the day-to-day operations of NES. Because the three exchanges are in a common data center, Routing Fees are reduced because costly expenses related to, for example, telecommunication lines to obtain connectivity are avoided when routing orders in this instance. The costs related to connectivity to route orders to other NASDAQ OMX exchanges are lower than the costs to route to a non-NASDAQ OMX exchange. When routing orders to non-NASDAQ OMX exchanges, the Exchange incurs costly connectivity charges related to telecommunication lines, membership and access fees, and other related costs when routing orders.

The Exchange believes that amending the Customer Routing Fee to other away markets, other than NOM and BX Options, in the instance the away market does not pay a rebate from a Fixed Fee of $0.22 to $0.23 per contract is equitable and not unfairly discriminatory because the Exchange would assess the same Fixed Fee to all orders routed to away markets other than NOM and BX Options in addition to the transaction fee. The Exchange's proposal to increase the Customer Routing Fee to all other options exchanges that pay a rebate, other than NOM and BX Options, from $0.12 to $0.13 per contract is equitable and not unfairly discriminatory because the Exchange would assess the same Fixed Fee that is proposed when routing Customer orders to a NASDAQ OMX exchange. All market participants that route an order to an away market, other than NOM or BX Options, would be assessed a uniform fee of $0.13 per contract if the away market (non-NASDAQ OMX exchange) pays a rebate. These proposals would apply uniformly to all market participants when routing to an away market that pays a rebate, other than NOM and BX Options.

In addition, market participants may submit orders to the Exchange as ineligible for routing or ''DNR'' to avoid Routing Fees.[15] Also, orders are routed to an away market based on price first.[16]

Finally, the Exchange believes that the added aggregation language regarding members and member organizations under Common Ownership is reasonable because the Exchange desires to attract liquidity. The added language is equitable and not unfairly discriminatory because it would apply to all members and member organizations uniformly. The Customer Rebate requirements regarding Tier and volume remain in place. However, all members and member organizations that are under Common Ownership will have the ability to aggregate their Customer volume for the purpose of calculating discount thresholds and receiving discounted routing fees. The Exchange will apply the aggregation language to all members and member organizations in a uniform manner.

[13] *See* Rule 1080(m).

[14] *See* Phlx Rule 1080(m)(iii)(A). *See also* Chapter VI, Section 11 of BX Options Rules and NOM Rules.

[15] *See* Rule 1080(m)(iv).

[16] *See* Rule 1080(m). *See also* Chapter VI, Section 11 of the BX Options Rules and NOM Rules.

The proposal allows the Exchange to continue attracting liquidity to Phlx while recouping costs incurred by the Exchange to route orders to away markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposal creates a burden on intra-market competition because the Exchange is applying the same Routing Fees to all market participants in the same manner dependent on the routing venue, with the exception of Customers. The Exchange will continue to assess separate Customer Routing Fees. Customers will continue to receive the lowest fees as compared to non-Customers when routing orders, as is the case today. Other options exchanges also assess lower Routing Fees for customer orders as compared to non-customer orders.[17]

The Exchange's proposal would allow the Exchange to continue to recoup its costs when routing Customer orders to NOM or BX Options as well as away markets that pay a rebate when such orders are designated as available for routing by the market participant. The Exchange continues to pass along savings realized by leveraging NASDAQ OMX's infrastructure and scale to market participants when Customer orders are routed to NOM and BX Options and is providing those savings to all market participants. Today, other options exchanges also assess fixed routing fees to recoup costs incurred by the exchange to route orders to away markets.[18] Market participants may submit orders to the Exchange as ineligible for routing or ''DNR'' to avoid Routing Fees. It is important to note that when orders are routed to an away market they are routed based on price first. Today, other options exchanges also assess similar fees to recoup costs incurred when routing orders to away markets.

The Exchange is seeking to encourage market participants to transact a greater number of Customer orders on Phlx, which liquidity benefits all market participants. Customer liquidity benefits all market participants by providing more trading opportunities, which attracts specialists and other market makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. In addition, the credit toward Customer Routing Fees is in addition to the Customer rebate received for the qualifying Customer Rebate Tier.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A)(ii) of the Act,[19] the Exchange has designated this proposal as establishing or changing a due, fee, or other charge imposed by the self-regulatory organization on any person, whether or not the person is a member of the self-regulatory organization, which renders the proposed rule change effective upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2014–68 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2014–68. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2014–68 and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73554; File No. SR–NYSE–2014–56]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending Its Rules Concerning Supervision To Harmonize the Rules With Certain Financial Industry Regulatory Authority, Inc. Rules and Making Other Conforming Changes

November 6, 2014.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'') and Rule 19b–4 thereunder,[2] notice is hereby given that on October 24, 2014, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons. The Exchange has designated the proposed rule change as constituting a ''non-controversial'' rule change under Rule 19b–4(f)(6) of the Act,[3] which renders the proposal effective upon receipt of this filing by the Commission.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE rules concerning supervision to harmonize the rules with certain Financial Industry Regulatory Authority, Inc. (''FINRA'') rules and make other conforming changes. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its rules concerning supervision to harmonize the rules with certain FINRA rules and make other conforming changes. Set forth below are descriptions of the harmonization process, the current NYSE rules, and the proposed NYSE rules. Specifically, the Exchange proposes to: (1) Adopt new rule text that is substantially similar to FINRA Rules 3110, 3120, 3150, and 3170; (2) delete Rule 342 and related Rule Interpretations (except for certain text in Rule 342.13 and related Rule Interpretation regarding qualifications and exam requirements for individuals with supervisory responsibilities), Rule 351(e) and related Rule Interpretations, Rule 354, Rule 401, and Rule 401A; and (3) make other conforming changes.[4]

Background

On July 30, 2007, FINRA's predecessor, the National Association of Securities Dealers, Inc. (''NASD''), and NYSE Regulation, Inc. (''NYSER'') consolidated their member firm regulation operations into a combined organization, FINRA. Pursuant to Rule 17d–2 under the Act,[5] the Exchange, NYSER, and FINRA entered into an agreement (''Agreement'') to reduce regulatory duplication for their members by allocating to FINRA certain regulatory responsibilities for NYSE rules and rule interpretations (''FINRA Incorporated NYSE Rules''). NYSE MKT LLC (''NYSE MKT'') became a party to the Agreement effective December 15, 2008.[6]

As part of its effort to reduce regulatory duplication and relieve firms that are members of FINRA, the Exchange, and NYSE MKT of conflicting or unnecessary regulatory burdens, FINRA is now engaged in the process of reviewing and amending the NASD and FINRA Incorporated NYSE Rules in order to create a consolidated FINRA rulebook.[7]

FINRA recently harmonized NASD and FINRA Incorporated NYSE Rules and interpretations concerning supervision. More particularly, FINRA: (1) Adopted FINRA Rules 3110 and 3120 to largely replace NASD Rules 3010 and 3012, respectively; (2) incorporated into FINRA Rule 3110 and its supplementary material the requirements of NASD IM–1000–4, NASD IM–3010–1, FINRA Incorporated NYSE Rule 401A, and FINRA Incorporated NYSE Rule 342.21; (3) replaced NASD Rule 3010(b)(2) with new FINRA Rule 3170; (4) replaced NASD Rule 3110(i) with new FINRA Rule 3150; and (5) deleted the following FINRA Incorporated NYSE Rules and NYSE Rule Interpretations: (i) NYSE Rule 342 and related NYSE Rule Interpretations; (ii) NYSE Rule 343 and related NYSE Rule Interpretations; (iii) NYSE Rule 351(e) and related NYSE Rule Interpretation; (iv) NYSE Rule 354; (v) NYSE Rule 401; and (vi) NYSE Rule 401A.[8]

FINRA has announced that the effective date for the rule change will be December 1, 2014. The Exchange proposes to make its proposed rule change effective on the same date as FINRA, and will announce the effective date via an Information Memo.[9]

Current Supervision Rules and Interpretations

Rule 342(a) requires each office, department or business activity of a member or member organization (including foreign incorporated branch offices) to be under the supervision and control of the member or member

[6] *See* Exchange Act Release Nos. 56148 (Jul. 26, 2007), 72 FR 42146 (Aug. 1, 2007) (order approving the Agreement); 56147 (Jul. 26, 2007), 72 FR 42166 (Aug. 1, 2007) (SR–NASD–2007–054) (order approving the incorporation of certain NYSE Rules as ''Common Rules''); 60409 (Jul. 30, 2009), 74 FR 39353 (Aug. 6, 2009) (order approving the amended and restated Agreement, adding NYSE MKT LLC as a party). Paragraph 2(b) of the Agreement sets forth procedures regarding proposed changes by FINRA, NYSE or NYSE MKT to the substance of any of the Common Rules.

[7] FINRA's rulebook currently has three sets of rules: (1) NASD Rules, (2) FINRA Incorporated NYSE Rules, and (3) consolidated FINRA Rules. The FINRA Incorporated NYSE Rules apply only to those members of FINRA that are also members of the NYSE (''Dual Members''), while the consolidated FINRA Rules apply to all FINRA members. For more information about the FINRA rulebook consolidation process, see FINRA Information Notice, dated March 12, 2008.

[9] There is one exception. Effective as of April 7, 2014, in order to coincide with related changes to Form BR, the Exchange deleted NYSE Rule 343 and the related interpretations and FINRA deleted the related FINRA Incorporated NYSE Rule and NYSE Rule Interpretations. *See* FINRA Regulatory Notices 14–10 and 14–11 and Exchange Act Release No. 71989 (Apr. 22, 2014), 79 FR 23391 (Apr. 28, 2014) (SR–NYSE–2014–21). *See also* Exchange Act Release No. 73325 (Oct. 9, 2014), 79 FR 61360 (Oct. 10, 2014) (SR–NYSE–2014–55) (conforming amendments related to the deletion of NYSE Rule 343).

organization establishing it and of the personnel delegated such authority and responsibility. The person in charge of a group of employees must reasonably discharge his duties and obligations in connection with supervision and control of the activities of those employees related to the business of their employer and compliance with securities laws and regulations.

Rule 342(b) provides that the general partners or directors of each member organization must provide for appropriate supervisory control and must designate a general partner or principal executive to assume overall authority and responsibility for internal supervision and control of the organization and compliance with securities' laws and regulations. This person must:

• Delegate to qualified principals or employees responsibility and authority for supervision and control of each office, department or business activity, and provide for appropriate procedures of supervision and control; and

• Establish a separate system of follow-up and review to determine that the delegated authority and responsibility is being properly exercised.

Rule 342(c) provides that a member organization must provide notice to the Exchange of each branch office established by such member organization.

Rule 342(d) provides that qualified persons acceptable to the Exchange must be in charge of:

• Any office of a member or member organization;

• Any regional or other group of offices; and

• Any sales department or activity.

Rule 342(e) provides that the amounts and types of credit extended by a member organization must be supervised by members or principal executives qualified by experience for such control in the types of business in which the member organization extends credit.

Supplementary Materials 342.10-.30 provide additional guidance relating to the definition of branch offices, annual fees, foreign branch offices, the acceptability of supervisors, the experience of senior management, small offices, the supervision of registered representatives, the review of communications with the public, bookkeeping, the supervision of producing managers, information requests, trade review and investigation, the definition of related financial instrument, internal controls, annual branch office inspection, risk-based surveillance and branch office identification, criteria for inspection programs, and annual reports and certifications. The related Rule 342 Interpretations provide further guidance relating to the foregoing.

Rule 351(e) provides that each member not associated with a member organization and a principal executive of each member organization must take one or both of the following two actions in relation to the trades that are subject to the review procedures required by Rule 342.21(a):

• Sign a written statement in the form specified in the rule and deliver it to the Exchange by the 15th day of the month following the calendar quarter in which the trade occurred.

• As to any such trade that is the subject of an internal investigation pursuant to Rule 342.21(b), but has not been both resolved and included in the written statement, report in writing to the Exchange:

• The commencement of the internal investigation, the identity of the trade, and the reason why the trade could not be the subject of the written statement (report by the 15th day of the month, following the calendar quarter in which the trade occurred);

• the quarterly progress of each open investigation (report by the 15th day of the month following the quarter); and

• the completion of the investigation, detailing the methodology and results of the investigation, any internal disciplinary action taken, and any referral of the matter to the Exchange, another self-regulatory organization (''SRO''), the Commission or another Federal agency, and including, where no internal disciplinary action has been taken and no such referral has been made, a written statement in relation to the trade in the form specified below (report within one week after completion of the investigation).

Rule 351(e) also provides that when a statement pertains to one or more trades that have been the subject of an internal investigation pursuant to Rule 342.21(b) but as to which no internal disciplinary action has been taken and no referral of the matter to the Exchange, another SRO, or a Federal agency has been made, the written statement must also refer to the particular trade(s) (rather than to the trades of a particular calendar quarter) and must omit the clause excepting trades reported as the subject of an investigation. The related Rule 351 Interpretations provide additional guidance relating to the foregoing.

Rule 354(a) provides that, by April 1 of each year, each member organization must submit a copy of its Rule 342.30 annual report on supervision and compliance to its control person(s) or, if the member organization has no control person, to the audit committee of its Board of Directors or its equivalent committee or group. In the case of a control person that is an organization (a ''controlling organization''), the member organization must submit the report to the general counsel of the controlling organization and to the audit committee of the controlling organization's Board of Directors or its equivalent committee or group.

Rule 354(b) provides that, for the purpose of Rule 354(a), ''control person'' means a person who controls the member organization within the meaning of Rule 2 otherwise than solely by virtue of being a director, general partner, or principal executive (or person occupying a similar status or performing similar functions) of the member organization.

Rule 401(b) provides that each member and member organization must maintain written policies and procedures, administered pursuant to the internal control requirements prescribed under Rule 342.23, specifically with respect to the following activities:

• Transmittals of funds (*e.g.,* wires, checks, etc.) or securities:

• From customer accounts to third party accounts (*i.e.,* a transmittal that would result in a change of beneficial ownership);

• from customer accounts to outside entities (*e.g.,* banks, investment companies, etc.);

• from customer accounts to locations other than a customer's primary residence (*e.g.,* post office box, ''in care of'' accounts, alternate address, etc.); and

• between customers and registered representatives (including the hand-delivery of checks).

• Customer changes of address.

• Customer changes of investment objectives.

The policies and procedures required under Rule 401(b)(1), (2), and (3) must include a means/method of customer confirmation, notification, or follow-up that can be documented.

Rule 401A(a) provides that, for every customer complaint they receive that is subject to the reporting requirements of Rule 4530(d), members and member organizations must:

• Acknowledge receipt of the complaint within 15 business days of receiving it; and

• Respond to the issues raised in the complaint within a reasonable period of time.

Rule 401A(b) provides that each acknowledgement and response

required by this rule must be conveyed to the complaining customer by an appropriate method. More specifically:

• Acknowledgements and responses to written complaints must be either:

• In writing, mailed to the complaining customer's last known address; or

• Electronically transmitted to the email address from which the complaint was sent (method only permissible for electronically transmitted complaints).

• Acknowledgements and responses to verbal complaints must be either:

• In writing, mailed to the complaining customer's last known address; or

• Made verbally to the complaining customer, and recorded in a log of verbal acknowledgements and responses to customer complaints.

Rule 401A(c) provides that written records of the acknowledgements, responses, and logs required by this rule must be retained in accordance with Rule 440.

Proposed Rule Change

The Exchange proposes to delete the foregoing rules and interpretations relating to supervision (except as noted below), which are, in main part, either duplicative of, or do not align with, the proposed supervision requirements discussed below, and adopt the text of FINRA Rules 3110, 3120, 3150, and 3170, subject to certain technical and conforming changes.[10] As noted in Rule 0, NYSE rules that refer to NYSER, NYSER staff or departments, Exchange staff, and Exchange departments should be understood as also referring to FINRA staff and FINRA departments acting on behalf of the Exchange pursuant to the Agreement, as applicable.

The Exchange proposes to retain the requirements contained in Rule 342.13(a) and (b) and related interpretations regarding qualifications and exam requirements for individuals with supervisory responsibilities. The proposed new version of Rule 342(a), corresponding to current Rule 342.13(a), would provide that any member or employee identified as in charge of (1) any office of a member or member organization, (2) any regional or other group of offices, or (3) any sales department or activity must have a creditable record and pass the General Securities Sales Supervisor Qualification Examination (Series 9/10) or another examination acceptable to the Exchange. The proposed new version of Rule 342(a) would retain the current requirement in the Interpretation to Rule 342 that every branch office or sales manager must have at least three years' experience as a registered representative or substantial experience in a related sales or managerial position and must pass the Series 9/10.

Further, the proposed new version of Rule 342(a) would retain the current examples of a related sales or managerial position in the Interpretation to Rule 342 and the requirement that in order to qualify as a supervisory person, a principal executive[11] should have at least three years' experience as a registered representative unless granted an exception. The proposed new version of Rule 342(a) would also retain from the related Interpretation that the General Securities Principal Examination (Series 24) is an acceptable alternative for persons whose duties do not include the supervision of options or municipal securities sales activity and that the examination requirement may be waived at the discretion of the Exchange. Finally, the proposed new version of Rule 342(a) would retain the requirement from the Interpretation that in the case of a firm applying for registered broker-dealer status, the supervisory candidates must have at least one year of direct experience or two years of related experience in the subject area to be supervised in addition to the requirements outlined above.

The proposed new version of Rule 342(b), corresponding to current Rule 342.13(b), would provide that the individuals designated as having day-to-day compliance responsibilities for their respective firms, or who supervise ten or more persons engaged in compliance activities, have the knowledge necessary to carry out their job responsibilities (*i.e.,* overall knowledge of the securities laws and Exchange rules) and pass the Compliance Official Examination (the ''Series 14'') or, in the case of compliance supervisors of member organizations that conduct a Designated Market Maker (''DMM'') business, the DMM Compliance Official Examination (the ''Series 14A''). The proposed new version of Rule 342(b) would also retain the current requirement in the Interpretation to Rule 342 that member organizations engaged in a public business in addition to a DMM business must have a qualified compliance supervisor who has passed both the Series 14 and Series 14A Examinations. Finally, the proposed new version of Rule 342(b) would incorporate the following exemptions from the Series 14 Examination requirement (currently contained in the Interpretation to Rule 342):

• Compliance supervisors at member organizations whose activities are solely related to execution of orders on the Exchange trading floor and who do not conduct any business with the public;

• Compliance supervisors at member organizations whose commissions and other fees from public business (retail and institutional) are under $500,000 in the preceding calendar year and who introduce to another broker-dealer; and

• Supervisors of ten or more persons whose compliance responsibilities are limited to the registration of member organization employees with the various regulators and SROs.

Proposed Rule 3110 (Supervision)

Proposed Rule 3110 is based primarily on requirements in the FINRA rulebook and current Rule 342 relating to, among other things, supervisory systems, written procedures, internal inspections, and review of correspondence.

Proposed Rule 3110(a)

Proposed Rule 3110(a) would cover supervisory systems and would require each member organization to establish and maintain a system to supervise the activities of each associated person that is reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable Exchange rules. Under the proposed rule, final responsibility for proper supervision would rest with the member organization. In addition, a member organization's supervisory system would be required to provide, at a minimum, for the following:

• The establishment and maintenance of written procedures as required by proposed Rule 3110.

• The designation, where applicable, of an appropriately registered principal with authority to carry out the supervisory responsibilities of the member organization for each type of business in which it engages for which registration as a broker-dealer is required.

• The registration and designation as a branch office or an office of supervisory jurisdiction (''OSJ'') of each location, including the main office, that

[10] The technical and conforming changes are that the Exchange would: (1) substitute the term ''member organization'' for ''member,'' (2) substitute the term ''Exchange'' for ''FINRA,'' (3) change certain cross-references to FINRA rules to cross-references to Exchange rules, and (4) add supplementary material to define the term ''associated person'' in proposed Rules 3110, 3120, and 3150.

[11] The Interpretation to Rule 342 refers to ''allied members,'' a category the Exchange eliminated and replaced with ''principal executive,'' which has substantially the same meaning. *See* Exchange Act Release No. 58549 (Sept. 15, 2008), 73 FR 54444 (Sept. 19, 2008) (SR–NYSE–2008–80).

meets the definitions contained in proposed Rule 3110(e).[12]

• The designation of one or more appropriately registered principals in each OSJ and one or more appropriately registered representatives or principals in each non-OSJ branch office with authority to carry out the supervisory responsibilities assigned to that office by the member organization.

• The assignment of each registered person to an appropriately registered representative or principal who would be responsible for supervising that person's activities.

• The use of reasonable efforts to determine that all supervisory personnel are qualified, either by virtue of experience or training, to carry out their assigned responsibilities.

• The participation of each registered representative and registered principal, either individually or collectively, no less than annually, in an interview or meeting conducted by persons designated by the member organization at which compliance matters relevant to the activities of the representative and principal are discussed, which may occur in conjunction with the discussion of other matters and may be conducted at a central or regional location or at the representative's or principal's place of business.

Proposed Rule 3110(b)

In proposed Rule 3110(b), the Exchange proposes to consolidate provisions from current Rule 401A relating to the review of customer complaints with various provisions and rules from the FINRA rulebook that currently require written procedures, including provisions relating to the supervision and review of registered representatives' transactions and correspondence. In addition, proposed supplementary material, which is discussed in detail below, would codify and expand guidance in these areas.

Proposed Rule 3110(b)(1) would address written procedures and would require each member organization to establish, maintain, and enforce written procedures to supervise the types of business in which it engages and the activities of its associated persons that are reasonably designed to achieve compliance with applicable securities laws and regulations and applicable Exchange rules.

Under proposed Rule 3110(b)(2), the supervisory procedures required by proposed Rule 3110(b) would include procedures for the review by a registered principal, evidenced in writing, of all transactions relating to the investment banking or securities business of the member organization.

Consistent with FINRA Rule 3110(b)(3), proposed Rule 3110(b)(3) would be marked ''Reserved.''

Under proposed Rule 3110(b)(4), the supervisory procedures required by proposed Rule 3110(b) would also include procedures for the review of incoming and outgoing written (including electronic) correspondence and internal communications relating to the member organization's investment banking or securities business and be appropriate for the member organization's business, size, structure, and customers. The supervisory procedures would require the member organization's review of:

• Incoming and outgoing written (including electronic) correspondence to properly identify and handle in accordance with firm procedures, customer complaints, instructions, funds and securities, and communications that are of a subject matter that require review under Exchange rules and federal securities laws; and

• Internal communications to properly identify those communications that are of a subject matter that require review under Exchange rules and federal securities laws.

Such reviews would be conducted by a registered principal and would be evidenced in writing, either electronically or on paper. Those communications subject to review would include (without limitation):

• Communications between non-research and research departments concerning a research report's contents (Rule 472(b)(3)).

• Certain communications with the public that require a principal's pre-approval (Rule 2210).

• The identification and reporting to the Exchange of customer complaints (Rule 4530).[13]

Current Rule 401A requires firms to acknowledge and respond to all customer complaints subject to the reporting requirements of current Rule 4530(d). Previously, this meant that firms had to acknowledge and respond to both written and oral customer complaints. However, as part of the effort to harmonize the NASD and NYSE rules in the interim period before completion of the Consolidated FINRA Rulebook, current Rule 4530(d) was amended to limit the definition of ''customer complaint'' to include only written complaints, thereby making the definition substantially similar to that in FINRA Rule 4530(d).[14]

Proposed Rule 3110(b)(5), which requires a member organization's supervisory procedures to include procedures to capture, acknowledge, and respond to all written (including electronic) customer complaints, essentially incorporates the customer complaint requirement in current Rule 401A, including the limitation on including only written (including electronic) customer complaints. The Exchange believes that oral complaints are difficult to capture and assess, and that they raise competing views as to the substance of the complaint being alleged. Consequently, the Exchange believes that oral complaints do not lend themselves as effectively to a review program as written complaints, which are more readily documented and retained. However, the Exchange reminds member organizations that the failure to address any customer complaint, written or oral, may be a violation of Rule 2010.

Under proposed Rule 3110(b)(6), the supervisory procedures required by proposed Rule 3110(b) must set forth the supervisory system established by the member organization pursuant to proposed Rule 3110(a), and would include:

• The titles, registration status, and locations of the required supervisory personnel and the responsibilities of each supervisory person as these relate to the types of business engaged in, applicable securities laws and regulations, and Exchange rules.

• A record, preserved by the member organization for a period of not less than three years, the first two years in an easily accessible place, of the names of all persons who are designated as supervisory personnel and the dates for which such designation is or was effective.

• Procedures prohibiting associated persons who perform a supervisory function from:

• Supervising their own activities; and

• Reporting to, or having their compensation or continued employment determined by, a person or persons they are supervising.

[12] Although to date the Exchange and FINRA have used the same definition for ''branch office,'' the Exchange has not previously designated OSJs. As such, the requirements relating to OSJs described hereinafter would be new for member organizations.

[13] With respect to customer complaints, proposed Rule 3110(b)(5) also would affirmatively require members to capture, acknowledge, and respond to all written (including electronic) customer complaints.

[14] The Exchange adopted the text of FINRA Rule 4530 to replace comparable provisions in Rule 351. *See* Exchange Act Release No. 64785 (Jun. 30, 2011), 76 FR 39946 (Jul. 7, 2011) (SR–NYSE–2011–27).

• If a member organization determines, with respect to any of its supervisory personnel, that compliance with the preceding two bullets is not possible because of the member organization's size or a supervisory personnel's position within the firm, the member organization would be required to document:

• The factors the member organization used to reach such determination; and

• How the supervisory arrangement with respect to such supervisory personnel otherwise complies with proposed Rule 3110(a).

• Procedures reasonably designed to prevent the supervisory system required pursuant to proposed Rule 3110(a) from being compromised due to the conflicts of interest that may be present with respect to the associated person being supervised, including the position of such person, the revenue such person generates for the firm, or any compensation that the associated person conducting the supervision may derive from the associated person being supervised.

Proposed Rule 3110(b)(7) would require a member organization to keep and maintain a copy of its written supervisory procedures, or such relevant portions, in each OSJ and at each location where supervisory activities are conducted on behalf of the member organization. Each member organization would be required to promptly amend its written supervisory procedures to reflect changes in applicable securities laws or regulations, including Exchange rules, and as changes occur in its supervisory system. Each member organization would be responsible for promptly communicating its written supervisory procedures and amendments to all associated persons to whom such written supervisory procedures and amendments are relevant based on their activities and responsibilities.

Proposed Rule 3110(c)

Proposed Rule 3110(c) would cover internal inspections. Proposed Rule 3110(c)(1) would require each member organization to conduct a review, at least annually (on a calendar-year basis), of the businesses in which it engages. The review must be reasonably designed to assist the member organization in detecting and preventing violations of, and achieving compliance with, applicable securities laws and regulations, and with applicable Exchange rules. Each member organization would be required to review the activities of each office, which would include the periodic examination of customer accounts to detect and prevent irregularities or abuses. Each member organization would also be required to retain a written record of the date upon which each review and inspection is conducted.

In addition, proposed Rule 3110(c)(1) would require each member organization to inspect at least annually (on a calendar-year basis) every OSJ and any branch office that supervises one or more non-branch locations. Each member organization would also be required to inspect at least every three years every branch office that does not supervise one or more non-branch locations. In establishing how often to inspect each non-supervisory branch office, the member organization would be required to consider whether the nature and complexity of the securities activities for which the location is responsible, the volume of business done at the location, and the number of associated persons assigned to the location require the non-supervisory branch office to be inspected more frequently than every three years. If a member organization establishes a more frequent inspection cycle, the member organization would be required to ensure that at least every three years, the inspection requirements enumerated in proposed Rule 3110(c)(2) have been met. The member organization's written supervisory and inspection procedures would have to set forth the non-supervisory branch office examination cycle, an explanation of the factors the member organization used in determining the frequency of the examinations in the cycle, and the manner in which a member organization would comply with proposed Rule 3110(c)(2) if using more frequent inspections than every three years.

Under proposed Rule 3110(c)(1), each member organization would also be required to inspect every non-branch location on a regular, periodic schedule. In establishing such a schedule, the member organization would be required to consider the nature and complexity of the securities activities for which the location is responsible and the nature and extent of contact with customers. The member organization's written supervisory and inspection procedures would have to set forth the schedule and an explanation regarding how the member organization determined the frequency of the examination.

Proposed Rule 3110(c)(2) would require that the inspection and review by a member organization pursuant to proposed Rule 3110(c)(1) be reduced to a written report and kept on file by the member organization for a minimum of three years, unless the inspection is being conducted pursuant to proposed Rule 3110(c)(1)(C) and the regular periodic schedule is longer than a three-year cycle, in which case the report would have to be kept on file at least until the next inspection report has been written. If applicable to the location being inspected, proposed Rule 3110(c)(2)(A) would require that location's written inspection report to include, without limitation, the testing and verification of the member organization's policies and procedures, including supervisory policies and procedures in the following areas:

• Safeguarding of customer funds and securities;

• Maintaining books and records;

• Supervision of supervisory personnel;

• Transmittals of funds (*e.g.,* wires or checks, etc.) or securities from customers to third party accounts; from customer accounts to outside entities (*e.g.,* banks, investment companies, etc.); from customer accounts to locations other than a customer's primary residence (*e.g.,* post office box, ''in care of'' accounts, alternate address, etc.); and between customers and registered representatives, including the hand-delivery of checks; and

• Changes of customer account information, including address and investment objectives changes and validation of such changes.

Under proposed Rules 3110(c)(2)(B) and 3110(c)(2)(C), a member organization's policies and procedures regarding transmittals of funds must include a means or method of customer confirmation, notification, or follow-up that can be documented. Member organizations could use reasonable risk-based criteria to determine the authenticity of the transmittal instructions. The policies and procedures regarding changes in customer account information would have to include, for each change processed, a means or method of customer confirmation, notification, or follow-up that can be documented and that complies with Rules 17a–3(a)(17)(i)(B)(2) and 17a–3(a)(17)(i)(B)(3) under the Act.[15]

Pursuant to proposed Rule 3110(c)(2)(D), if a member organization does not engage in all of the activities enumerated in the bullets immediately above at the location being inspected, the member organization would be required to identify those activities in the member organization's written supervisory procedures or the location's

[15] 17 CFR 240.17a–3(a)(17)(i)(B)(2) and 17 CFR 240.17a–3(a)(17)(i)(B)(3).

written inspection report and document in the member organization's written supervisory procedures or the location's written inspection report that supervisory policies and procedures for such activities must be in place at that location before the member organization can engage in them.

Under proposed Rule 3110(c)(3), for each inspection conducted pursuant to the proposed rule, a member organization would be required to:

• Have procedures reasonably designed to prevent the effectiveness of inspections from being compromised due to conflicts of interest that may be present with respect to the location being inspected, including but not limited to, economic, commercial, or financial interests in the associated persons and businesses being inspected; and

• Ensure that the person conducting an inspection is not an associated person assigned to the location or is not directly or indirectly supervised by, or otherwise reporting to, an associated person assigned to the location.

Under the proposed rule, if a member organization determines that compliance with these two bullets is not possible either because of a member organization's size or its business model, the member organization would be required to document in the inspection report both the factors the member organization used to make its determination and how the inspection otherwise complies with proposed Rule 3110(c)(1).

By way of comparison, under current Rules 342.24 and 342.25, each branch office must be inspected annually, unless the member organization obtained an exemption by submitting to the Exchange written policies and procedures for systematic risk-based surveillance of its branch offices, in which case each branch office must be inspected at least every three years. The proposed subject matter requirements for inspection reports are substantially the same as the current subject matter requirements.

Proposed Rule 3110(d)

Section 15(g) of the Act, adopted as part of the Insider Trading and Securities Fraud Enforcement Act of 1988,[16] requires every registered broker or dealer to establish, maintain, and enforce written policies and procedures reasonably designed to prevent the misuse of material, non-public information by the broker or dealer or any associated person of the broker or dealer.[17] Current Rule 342.21 sets forth specific supervisory procedures for compliance with Section 15(g) by requiring firms to review trades in Exchange-listed securities and related financial instruments that are effected for the member organization's account or for the accounts of the member organization's employees and family members. Current Rule 342.21 also requires member organizations to promptly conduct an internal investigation into any trade the firm identifies that may have violated insider trading laws or rules.

Proposed Rule 3110(d) incorporates provisions of current Rule 342.21, with some modifications, and extends the requirement beyond Exchange-listed securities and related financial instruments to cover all securities. Proposed Rule 3110(d) would cover transaction reviews and investigations. Proposed Rule 3110(d)(1) would require each member organization to include in its supervisory procedures a process for the review of securities transactions reasonably designed to identify trades that may violate the provisions of the Act, the rules thereunder, or Exchange rules prohibiting insider trading and manipulative and deceptive devices that are effected for the:

• Accounts of the member organization;

• Accounts introduced or carried by the member organization in which a person associated with the member organization has a beneficial interest or the authority to make investment decisions;

• Accounts of a person associated with the member organization that are disclosed to the member organization pursuant to Rule 407 or NASD Rule 3050, as applicable; and

• Covered accounts.

Under proposed Rule 3110(d)(2), each member organization would be required to promptly conduct an internal investigation into any such trade to determine whether a violation of those laws or rules has occurred. In addition, under proposed Rule 3110(d)(3), a member organization engaging in investment banking services would be required to file written reports with the Exchange, signed by a senior officer of the member organization, at such times and, without limitation, including such content, as follows:

• Within ten business days of the end of each calendar quarter, a written report describing each internal investigation initiated in the previous calendar quarter pursuant to proposed Rule 3110(d)(2), including the identity of the member organization, the date each internal investigation commenced, the status of each open internal investigation, the resolution of any internal investigation reached during the previous calendar quarter, and, with respect to each internal investigation, the identity of the security, trades, accounts, associated persons of the member organization, or associated person of the member organization's family members holding a covered account, under review, and that includes a copy of the member organization's policies and procedures required by proposed Rule 3110(d)(1).

• Within five business days of completion of an internal investigation pursuant to proposed Rule 3110(d)(2) in which it was determined that a violation of the provisions of the Act, the rules thereunder, or Exchange rules prohibiting insider trading and manipulative and deceptive devices had occurred, a written report detailing the completion of the investigation, including the results of the investigation, any internal disciplinary action taken, and any referral of the matter to the Exchange, another SRO, the SEC, or any other federal, state, or international regulatory authority.

For purposes of proposed Rule 3110(d)(4), the following definitions would apply:

• The term ''covered account'' would include any account introduced or carried by the member organization that is held by:

• The spouse of a person associated with the member organization;

• A child of the person associated with the member organization or such person's spouse, provided that the child resides in the same household as, or is financially dependent upon, the person associated with the member organization;

• Any other related individual over whose account the person associated with the member organization has control; or

• Any other individual over whose account the associated person of the member organization has control and to whose financial support such person materially contributes.

• The term ''investment banking services'' would include, without limitation, acting as an underwriter, participating in a selling group in an offering for the issuer, or otherwise acting in furtherance of a public offering of the issuer; acting as a financial adviser in a merger or acquisition; providing venture capital or equity lines of credit or serving as placement agent for the issuer or otherwise acting in

[16] *See* Insider Trading and Securities Fraud Enforcement Act of 1988, Public Law No. 100–704, 102 Stat. 4677.

[17] 15 U.S.C. 78o(g).

furtherance of a private offering of the issuer.

Proposed Rule 3110(e)

Proposed Rule 3110(e) would define ''OSJ'' and ''branch office.'' As noted above, ''OSJ'' would be a new designation for the Exchange and the definition of the term would substantially mirror FINRA's definition. The term ''OSJ'' would mean any office of a member organization at which any one or more of the following functions take place:

- Order execution or market making;
- Structuring of public offerings or private placements;
- Maintaining custody of customers' funds or securities;
- Final acceptance (approval) of new accounts on behalf of the member organization;
- Review and endorsement of customer orders;
- Final approval of retail communications for use by persons associated with the member organization, pursuant to Rule 2210(b)(1), except for an office that solely conducts final approval of research reports; or
- Responsibility for supervising the activities of persons associated with the member organization at one or more other branch offices of the member organization.

The definition of ''branch office'' would be substantially the same as current Rule 342.10. It would mean any location where one or more associated persons of a member organization regularly conducts the business of effecting any transactions in, or inducing or attempting to induce the purchase or sale of, any security, or is held out as such, excluding:

- Any location that is established solely for customer service or back office type functions where no sales activities are conducted and that is not held out to the public as a branch office;
- Any location that is the associated person's primary residence, provided that:
- Only one associated person, or multiple associated persons who reside at that location and are members of the same immediate family, conduct business at the location;
- The location is not held out to the public as an office and the associated person does not meet with customers at the location;
- Neither customer funds nor securities are handled at that location;
- The associated person is assigned to a designated branch office, and such designated branch office is reflected on all business cards, stationery, retail communications and other communications to the public by such associated person;
- The associated person's correspondence and communications with the public are subject to the firm's supervision in accordance with proposed Rule 3110;
- Electronic communications (*e.g.,* email) are made through the member organization's electronic system;
- All orders are entered through the designated branch office or an electronic system established by the member organization that is reviewable at the branch office;
- Written supervisory procedures pertaining to supervision of sales activities conducted at the residence are maintained by the member organization; and
- A list of the residence locations is maintained by the member organization.
- Any location, other than a primary residence, that is used for securities business for less than 30 business days [18] in any one calendar year, provided the member organization complies with the first eight of the nine immediately preceding bullet points;
- Any office of convenience, where associated persons occasionally and exclusively by appointment meet with customers, which is not held out to the public as an office; [19]
- Any location that is used primarily to engage in non-securities activities and from which the associated person(s) effects no more than 25 securities transactions in any one calendar year; provided that any retail communication identifying such location also sets forth the address and telephone number of the location from which the associated person(s) conducting business at the non-branch locations are directly supervised;
- The floor of a registered national securities exchange where a member organization conducts a direct access business with public customers; or
- A temporary location established in response to the implementation of a business continuity plan.

Notwithstanding the exclusions for branch offices described above, any location that is responsible for supervising the activities of persons associated with the member organization at one or more non-branch locations of the member organization would be considered a branch office.

Proposed Supplementary Materials to Proposed Rule 3110

Proposed Supplementary Material .01 to Rule 3110 would require a member organization's main office location to be registered and designated as a branch office or OSJ if it meets the definitions of a ''branch office'' or ''office of supervisory jurisdiction'' as set forth in proposed Rule 3110(e). In general, the nature of activities conducted at a main office will satisfy the requirements of such terms.

Proposed Supplementary Material .02 to Rule 3110 would provide that, in addition to the locations that meet the definition of OSJ in proposed Rule 3110(e), each member organization must also register and designate other offices as OSJs as is necessary to supervise its associated persons in accordance with the standards set forth in proposed Rule 3110. In making a determination as to whether to designate a location as an OSJ, the member organization should consider the following factors:

- Whether registered persons at the location engage in retail sales or other activities involving regular contact with public customers;
- Whether a substantial number of registered persons conduct securities activities at, or are otherwise supervised from, such location;
- Whether the location is geographically distant from another OSJ of the firm;
- Whether the member organization's registered persons are geographically dispersed; and
- Whether the securities activities at such location are diverse or complex.

Proposed Supplementary Material .03 to Rule 3110 would provide additional guidance relating to proposed Rule 3110(a)(4), which would require a member organization to designate one or more appropriately registered principals in each OSJ with the authority to carry out the supervisory responsibilities assigned to that office (''on-site principal''). The proposed Supplementary Material would provide that the designated on-site principal for each OSJ must have a physical presence, on a regular and routine basis, at each OSJ for which the principal has supervisory responsibilities. Consequently, there is a general presumption that a principal will not be designated and assigned to be the on-site principal pursuant to proposed Rule 3110(a)(4) to supervise more than one

[18] The term ''business day'' would not include any partial business day provided that the associated person spends at least four hours on such business day at his or her designated branch office during the hours that such office is normally open for business.

[19] Where such office of convenience is located on bank premises, signage necessary to comply with applicable federal and state laws, rules and regulations and applicable rules and regulations of other SROs, and securities and banking regulators could be displayed and would not be deemed ''holding out'' for purposes of this section.

OSJ. If a member organization determines it is necessary to designate and assign one appropriately registered principal to be the on-site principal pursuant to proposed Rule 3110(a)(4) to supervise two or more OSJs, the member organization must take into consideration, among others, the following factors:

- Whether the on-site principal is qualified by virtue of experience and training to supervise the activities and associated persons in each location;
- Whether the on-site principal has the capacity and time to supervise the activities and associated persons in each location;
- Whether the on-site principal is a producing registered representative;
- Whether the OSJ locations are in sufficiently close proximity to ensure that the on-site principal is physically present at each location on a regular and routine basis; and
- The nature of activities at each location, including size and number of associated persons, scope of business activities, nature and complexity of the products and services offered, volume of business done, the disciplinary history of persons assigned to such locations, and any other indicators of irregularities or misconduct.

The proposed Supplementary Material would provide that a member organization must establish, maintain, and enforce written supervisory procedures regarding the supervision of all OSJs. In all cases where a member organization designates and assigns one on-site principal to supervise more than one OSJ, the member organization must document in the member organization's written supervisory and inspection procedures the factors used to determine why the member organization considers such supervisory structure to be reasonable and the determination by the member organization will be subject to scrutiny.

Proposed Supplementary Material .04 to Rule 3110 would provide that a member organization is not required to conduct in-person meetings with each registered person or group of registered persons to comply with the annual compliance meeting (or interview) required by proposed Rule 3110(a)(7). A member organization that chooses to conduct compliance meetings using other methods (*e.g.,* on-demand webcast or course, video conference, interactive classroom setting, telephone, or other electronic means) must ensure, at a minimum, that each registered person attends the entire meeting (*e.g.,* an on-demand annual compliance webcast would require each registered person to use a unique user ID and password to gain access and use a technology platform to track the time spent on the webcast, provide click-as-you go confirmation, and have an attestation of completion at the end of a webcast) and is able to ask questions regarding the presentation and receive answers in a timely fashion (*e.g.,* an on-demand annual compliance webcast that allows registered persons to ask questions via an email to a presenter or a centralized address or via a telephone hotline and receive timely responses directly or view such responses on the member organization's intranet site).

Proposed Supplementary Material .05 to Rule 3110 would provide that a member organization may use a risk-based review system to comply with proposed Rule 3110(b)(2)'s requirement that a registered principal review all transactions relating to the investment banking or securities business of the member organization. A member organization would not be required to conduct detailed reviews of each transaction if it is using a reasonably designed risk-based review system that provides it with sufficient information to permit it to focus on the areas that pose the greatest numbers and risks of violation.

Proposed Supplementary Material .06 to Rule 3110 would provide that, by employing risk-based principles, a member organization must decide the extent to which additional policies and procedures for the review of:

- Incoming and outgoing written (including electronic) correspondence that fall outside of the subject matters listed in proposed Rule 3110(b)(4) are necessary for its business and structure. If a member organization's procedures do not require that all correspondence be reviewed before use or distribution, the procedures must provide for:
- The education and training of associated persons regarding the firm's procedures governing correspondence;
- The documentation of such education and training; and
- Surveillance and follow-up to ensure that such procedures are implemented and followed.
- Internal communications that are not of a subject matter that require review under Exchange rules and federal securities laws are necessary for its business and structure.

Proposed Supplementary Material .07 to Rule 3110 would provide that the evidence of review required in proposed Rule 3110(b)(4) must be chronicled either electronically or on paper and must clearly identify the reviewer, the internal communication or correspondence that was reviewed, the date of review, and the actions taken by the member organization as a result of any significant regulatory issues identified during the review. Merely opening a communication would not be sufficient review.

Proposed Supplementary Material .08 to Rule 3110 would provide that, in the course of the supervision and review of correspondence and internal communications required by proposed Rule 3110(b)(4), a supervisor/principal may delegate certain functions to persons who need not be registered. However, the supervisor/principal would remain ultimately responsible for the performance of all necessary supervisory reviews, irrespective of whether he or she delegates functions related to the review. Accordingly, supervisors/principals must take reasonable and appropriate action to ensure delegated functions are properly executed and should evidence performance of their procedures sufficiently to demonstrate overall supervisory control.

Proposed Supplementary Material .09 to Rule 3110 would provide that each member organization must retain the internal communications and correspondence of associated persons relating to the member organization's investment banking or securities business for the period of time and accessibility specified in Rule 17a–4(b) under the Act. The names of the persons who prepared outgoing correspondence and who reviewed the correspondence must be ascertainable from the retained records, and the retained records must be readily available to the Exchange, upon request.

Proposed Supplementary Material .10 to Rule 3110 would provide that a member organization's determination that it is not possible to comply with proposed Rules 3110(b)(6)(C)(i) or (b)(6)(C)(ii) prohibiting supervisory personnel from supervising their own activities and from reporting to, or otherwise having compensation or continued employment determined by, a person or persons they are supervising generally will arise in instances where:

- The member organization is a sole proprietor in a single-person firm;
- A registered person is the member organization's most senior executive officer (or similar position); or
- A registered person is one of several of the member organization's most senior executive officers (or similar positions).

Proposed Supplementary Material .11 to Rule 3110 would provide that a member organization may use electronic media to satisfy its obligation to communicate its written supervisory procedures, and any amendment

thereto, pursuant to proposed Rule 3110(b)(7), provided that:

• The written supervisory procedures have been promptly communicated to, and are readily accessible by, all associated persons to whom such supervisory procedures apply based on their activities and responsibilities through, for example, the member organization's intranet system;

• All amendments to the written supervisory procedures are promptly posted to the member organization's electronic media;

• Associated persons are notified that amendments relevant to their activities and responsibilities have been made to the written supervisory procedures;

• The member organization has reasonable procedures to monitor and maintain the security of the material posted to ensure that it cannot be altered by unauthorized persons; and

• The member organization retains current and prior versions of its written supervisory procedures in compliance with the applicable record retention requirements of Rule 17a–4(e)(7) under the Act.

Proposed Supplementary Material .12 to Rule 3110 would provide that, in fulfilling its obligations under proposed Rule 3110(c), each member organization must conduct a review, at least annually, of the businesses in which it engages. The review must be reasonably designed to assist in detecting and preventing violations of and achieving compliance with applicable securities laws and regulations and with Exchange rules. Each member organization must establish and maintain supervisory procedures that must take into consideration, among other things, the firm's size, organizational structure, scope of business activities, number and location of the firm's offices, the nature and complexity of the products and services offered by the firm, the volume of business done, the number of associated persons assigned to a location, the disciplinary history of registered representatives or associated persons, and any indicators of irregularities or misconduct (*i.e.,* ''red flags''), etc. The procedures established and reviews conducted must provide that the quality of supervision at remote locations is sufficient to ensure compliance with applicable securities laws and regulations and with Exchange rules. A member organization must be especially diligent in establishing procedures and conducting reasonable reviews with respect to a non-branch location where a registered representative engages in securities activities. Based on the factors outlined above, member organizations may need to impose reasonably designed supervisory procedures for certain locations or may need to provide for more frequent reviews of certain locations.

Proposed Supplementary Material .13 to Rule 3110 would provide additional guidance to proposed Rule 3110(c)(1)(C), which would require a member organization to inspect on a regular periodic schedule every non-branch location. In establishing a non-branch location inspection schedule, there is a general presumption that a non-branch location will be inspected at least every three years, even in the absence of any indicators of irregularities or misconduct (*i.e.,* ''red flags''). If a member organization establishes a longer periodic inspection schedule, the member organization must document in its written supervisory and inspection procedures the factors used in determining that a longer periodic inspection cycle is appropriate.

Proposed Supplementary Material .14 to Rule 3110 would provide that a member organization's determination that it is not possible to comply with proposed Rule 3110(c)(3)(B) with respect to who is not allowed to conduct a location's inspection will generally arise in instances where:

• The member organization has only one office; or

• The member organization has a business model where small or single-person offices report directly to an OSJ manager who is also considered the offices' branch office manager.

Proposed Supplementary Material .15 to Rule 3110 would provide a definition for ''associated person'' for the purposes of proposed Rule 3110.

Proposed Rule 3120 (Supervisory Control System)

Proposed Rule 3120(a), which is based on FINRA Rule 3120(a), would provide that each member organization must designate and specifically identify to the Exchange one or more principals who must establish, maintain, and enforce a system of supervisory control policies and procedures that:

• Test and verify that the member organization's supervisory procedures are reasonably designed with respect to the activities of the member organization and its associated persons, to achieve compliance with applicable securities laws and regulations, and with applicable Exchange rules; and

• Create additional or amend supervisory procedures where the need is identified by such testing and verification.

Similar to the requirements of current Rule 342.30, the designated principal or principals would be required to submit to the member organization's senior management no less than annually, a report detailing each member organization's system of supervisory controls, the summary of the test results and significant identified exceptions, and any additional or amended supervisory procedures created in response to the test results.

Proposed Rule 3120(b) would provide that each report provided to senior management pursuant to proposed Rule 3120(a) in the calendar year following a calendar year in which a member organization reported $200 million or more in gross revenue must include, to the extent applicable to the member organization's business:

• A tabulation of the reports pertaining to customer complaints and internal investigations made to the Exchange during the preceding year; and

• Discussion of the preceding year's compliance efforts, including procedures and educational programs, in each of the following areas:

• Trading and market activities;
• Investment banking activities;
• Antifraud and sales practices;
• Finance and operations;
• Supervision; and
• Anti-money laundering.

The categories listed above are incorporated from the annual report content requirements of current Rule 342.30, which apply to all member organizations regardless of revenue. The proposed rule change seeks to mitigate compliance costs and burdens with respect to proposed Rule 3120's annual reporting requirements by requiring that only member organizations reporting $200 million or more in gross revenues in the preceding year include in their annual reports supplemental information from current Rule 342.30's annual report content requirements. The Exchange also believes that the proposed threshold strikes the appropriate balance as it encompasses larger member organizations, member organizations engaged in significant underwriting activities and substantial trading activities or market making business, and member organizations with extensive sales platforms.

Proposed Rule 3120(c) would provide that, for purposes of proposed Rule 3120(b), ''gross revenue'' is defined as:

• Total revenue as reported on FOCUS Form Part II or IIA (line item 4030) less commodities revenue (line item 3990), if applicable; or

• Total revenue as reported on FOCUS Form Part II CSE (line item 4030) less, if applicable,

• Commissions on commodity transactions (line item 3991); and

• Commodities gains or losses (line items 3924 and 3904).

Proposed Supplementary Material .01 to Rule 3120 would provide a definition for ''associated person'' for the purposes of proposed Rule 3120.

Proposed Rule 3150 (Holding of Customer Mail)

Proposed Rule 3150(a) would provide that a member organization may hold mail for a customer who will not be receiving mail at his or her usual address, provided that:

• The member organization receives written instructions from the customer that include the time period during which the member organization is requested to hold the customer's mail. If the requested time period included in the instructions is longer than three consecutive months (including any aggregation of time periods from prior requests), the customer's instructions must include an acceptable reason for the request (*e.g.,* safety or security concerns). Convenience is not an acceptable reason for holding mail longer than three months;

• The member organization:

• Informs the customer in writing of any alternate methods, such as email or access through the member organization's Web site, that the customer may use to receive or monitor account activity and information; and

• Obtains the customer's confirmation of the receipt of such information; and

• The member organization verifies at reasonable intervals that the customer's instructions still apply.

Proposed Rule 3150(b) would provide that, during the time that a member organization is holding mail for a customer, the member organization must be able to communicate with the customer in a timely manner to provide important account information (*e.g.,* privacy notices and the Securities Investor Protection Corporation information disclosures required by Rule 2266), as necessary.

Proposed Rule 3150(c) would provide that a member organization holding a customer's mail pursuant to proposed Rule 3150 must take actions reasonably designed to ensure that the customer's mail is not tampered with, held without the customer's consent, or used by an associated person of the member organization in any manner that would violate Exchange rules or the federal securities laws.

The Exchange currently does not have a rule comparable to proposed Rule 3150. The Exchange believes that adding proposed Rule 3150 would help protect customers.

Proposed Supplementary Material .01 to Rule 3150 would provide a definition for ''associated person'' for the purposes of proposed Rule 3150.

Proposed Rule 3170 (Tape Recording of Registered Persons by Certain Firms)

Proposed Rule 3170(a) would provide the following definitions for purposes of proposed Rule 3170:

• The term ''registered person'' would mean any person registered with the Exchange.

• The term ''disciplined firm'' would mean:

• A member organization that, in connection with sales practices involving the offer, purchase, or sale of any security, has been expelled from membership or participation in any securities industry SRO or is subject to an order of the SEC revoking its registration as a broker-dealer;

• A futures commission merchant or introducing broker that has been formally charged by either the Commodity Futures Trading Commission or a registered futures association with deceptive telemarketing practices or promotional material relating to security futures, those charges have been resolved, and the futures commission merchant or introducing broker has been closed down and permanently barred from the futures industry as a result of those charges; or

• A futures commission merchant or introducing broker that, in connection with sales practices involving the offer, purchase, or sale of security futures is subject to an order of the SEC revoking its registration as a broker or dealer.

• The term ''disciplinary history'' would mean a finding of a violation by a registered person in the past five years by the SEC, an SRO, or a foreign financial regulatory authority of one or more of the following provisions (or comparable foreign provision) or rules or regulations thereunder:

• Violations of the types enumerated in Section 15(b)(4)(E) of the Act;

• Section 15(c) of the Act;

• Section 17(a) of the Securities Act of 1933;

• Rules 10b–5 and 15g–1 through 15g–9 under the Act;

• NASD Rule 2110 (Standards of Commercial Honor and Principles of Trade) or FINRA Rule 2010 (Standards of Commercial Honor and Principles of Trade) or NYSE Rule 2010 (Standards of Commercial Honor and Principles of Trade) or NYSE Rule 476(a)(6) (Failure to Observe High Standards of Commercial Honor and Just and Equitable Principles of Trade) (only if the finding of a violation of NASD Rule 2110, FINRA Rule 2010, NYSE Rule 2010 or NYSE Rule 476(a)(6) is for unauthorized trading, churning, conversion, material misrepresentations or omissions to a customer, front-running, trading ahead of research reports or excessive markups), FINRA Rule 5280 (Trading Ahead of Research Reports), NASD Rule 2120 (Use of Manipulative, Deceptive or Other Fraudulent Devices) or FINRA Rule 2020 (Use of Manipulative, Deceptive or Other Fraudulent Devices) or NYSE Rule 2020 (Use of Manipulative, Deceptive or Other Fraudulent Devices) or NYSE Rule 476(a)(5) (effecting any transaction in, or inducing the purchase or sale of, any security by means of any manipulative, deceptive or other fraudulent device or contrivance), NASD Rule 2310 (Recommendations to Customers (Suitability)) or FINRA Rule 2111 (Suitability) or NYSE Rule 405 (Diligence as to Accounts), NASD Rule 2330 (Customers' Securities or Funds) or FINRA Rule 2150 (Improper Use of Customers' Securities or Funds; Prohibition Against Guarantees and Sharing in Accounts) or NYSE Rule 2150 (Improper Use of Customers' Securities or Funds; Prohibition Against Guarantees and Sharing in Accounts), NASD Rule 2440 (Fair Prices and Commissions), NASD Rule 3010 (Supervision) or FINRA Rule 3110 (Supervision) or NYSE Rule 3110 (Supervision) or NYSE Rule 342 (Offices—Approval, Supervision and Control) (failure to supervise only for both NASD Rule 3010, FINRA Rule 3110, NYSE Rule 3110 or Rule 342), NASD Rule 3310 (Publication of Transactions and Quotations) or FINRA Rule 5210 (Publication of Transactions and Quotations) or NYSE Rule 5210 (Publication of Transactions and Quotations), and NASD Rule 3330 (Payment Designed to Influence Market Prices, Other than Paid Advertising) or FINRA Rule 5230 (Payments Involving Publications that Influence the Market Price of a Security); and MSRB Rules G–19, G–30, and G–37(b) & (c).

• The term ''tape recording'' would include without limitation, any electronic or digital recording that meets the requirements of proposed Rule 3170.

• The term ''taping firm'' would mean:

• A member organization with at least five but fewer than ten registered persons, where 40% or more of its registered persons have been associated with one or more disciplined firms in a registered capacity within the last three years;

• A member organization with at least ten but fewer than twenty registered persons, where four or more of its registered persons have been associated with one or more disciplined firms in a registered capacity within the last three years;

• A member organization with at least twenty registered persons where 20% or more of its registered persons have been associated with one or more disciplined firms in a registered capacity within the last three years.

• For purposes of calculating the number of registered persons who have been associated with one or more disciplined firms in a registered capacity within the last three years pursuant to proposed Rule 3170(a)(5), member organizations should not include registered persons who:

• Have been registered for an aggregate total of 90 days or less with one or more disciplined firms within the past three years; and

• Do not have a disciplinary history.

Proposed Rule 3170(b) would provide that each member organization that either is notified by the Exchange or otherwise has actual knowledge that it is a taping firm must establish, maintain, and enforce special written procedures for supervising the telemarketing activities of all of its registered persons. A taping firm required to establish, maintain, and enforce special written procedures pursuant to proposed Rule 3170(b) would be required to establish and implement the procedures within 60 days of receiving notice from the Exchange or obtaining actual knowledge that it is a taping firm. The procedures required by proposed Rule 3170(b) would include procedures for tape recording all telephone conversations between the taping firm's registered persons and both existing and potential customers and for reviewing the tape recordings to ensure compliance with applicable securities laws and regulations and applicable Exchange rules. The procedures must be appropriate for the taping firm's business, size, structure, and customers, and must be maintained for a period of three years from the date that the taping firm establishes and implements the procedures. All tape recordings made pursuant to the requirements of proposed Rule 3170(b) must be retained for a period of not less than three years from the date the tape was created, the first two years in an easily accessible place. Each taping firm would be required to catalog the retained tapes by registered person and date. By the 30th day of the month following the end of each calendar quarter, each taping firm subject to the requirements of proposed Rule 3170(b) would be required to submit to the Exchange a report on the taping firm's supervision of the telemarketing activities of its registered persons.

Proposed Rule 3170(c) would provide that a member organization that becomes a taping firm for the first time may reduce its staffing levels to fall below the threshold levels within 30 days after receiving notice from the Exchange pursuant to the provisions of proposed Rule 3170(b)(1) or obtaining actual knowledge that it is a taping firm, provided the member organization promptly notifies the Exchange's Department of Member Regulation in writing of its becoming subject to the Rule. Once the member organization has reduced its staffing levels to fall below the threshold levels, it must not rehire a person terminated to accomplish the staff reduction for a period of 180 days. On or prior to reducing staffing levels pursuant to proposed Rule 3170(c), a member organization would be required to provide the Exchange's Department of Member Regulation with written notice identifying the terminated person(s).

Proposed Rule 3170(d) would provide that, pursuant to the Rule 9600 Series, the Exchange could, in exceptional circumstances, taking into consideration all relevant factors, exempt any taping firm unconditionally or on specified terms and conditions from the requirements of proposed Rule 3170. A taping firm seeking an exemption would be required to file a written application pursuant to the Rule 9600 Series within 30 days after receiving notice from the Exchange or obtaining actual knowledge that it is a taping firm. A member organization that becomes a taping firm for the first time could elect to reduce its staffing levels pursuant to the provisions of proposed Rule 3170(c) or, alternatively, to seek an exemption pursuant to proposed Rule 3170(d), as appropriate. A taping firm would not be able to seek relief from proposed Rule 3170 by both reducing its staffing levels pursuant to proposed Rule 3170(c) and requesting an exemption.

The Exchange does not currently have a rule comparable to proposed Rule 3170. The Exchange believes that adopting proposed Rule 3170 will provide for more effective supervision of member organizations that have a significant number of registered persons with disciplinary history, thereby resulting is enhanced customer protection.

Conforming Changes

The Exchange also proposes to make certain conforming changes to Rules 36, 70, 86, 345, 405, 407, 408,[20] 410, 416A, 472, 476A, 2210, and 9217 to delete or update cross-references to the proposed rules as applicable. The Exchange also proposes certain technical changes within Rule 86[21] and 345.10[22] that are unrelated to this proposal.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[23] in general, and furthers the objectives of Section 6(b)(5) of the Act,[24] in particular, because it is designed to promote just and equitable principles of trade and to remove impediments to and perfect the mechanism of a free and open market and a national market system. Specifically, the Exchange believes that the proposed rule change supports the objectives of the Act by providing greater harmonization between Exchange rules and FINRA rules of similar purpose, resulting in less burdensome and more efficient regulatory compliance. In particular, Exchange member organizations that are also FINRA members are subject to Exchange supervisory rules and FINRA Rules 3110, 3120, 3150, and 3170, and harmonizing these rules by adopting proposed Rules 3110, 3120, 3150, and 3170 would promote just and equitable principles of trade by requiring a single standard for supervision. The Exchange believes that to the extent the Exchange has proposed changes that differ from the FINRA version of the Exchange rules, such changes are generally technical in nature and do not change the substance of the proposed rules. The Exchange also believes that the proposed rule change will update and add specificity to the requirements governing supervision, which will promote just and equitable principles of trade and help to protect investors. As such the Exchange believes that the proposed rule change meets the requirements of Section 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The

[20] The Exchange also proposes to replace ''allied member'' in Rule 408 with ''principal executive.'' *See* note 11, *supra.*

[21] The Exchange proposes to update a reference to Rules 17a–3 and 17a–4 under the Act.

[22] The Exchange proposes to delete a reference to ''registered options representative.''

[23] 15 U.S.C. 78f(b).

[24] 15 U.S.C. 78f(b)(5).

Exchange believes that the proposed rule change is not intended to address competitive issues but rather to achieve greater consistency between the Exchange's rules and FINRA's rules concerning supervision.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [25] and Rule 19b–4(f)(6) thereunder.[26] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) [27] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[28] the Commission may designate a shorter period of time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest, because it allows the Exchange to immediately conform its supervision rules to corresponding FINRA rules. This will ensure that Dual Members generally will be subject to a single set of rules governing supervision. As noted by the Exchange, the proposal would harmonize NYSE and FINRA rules, resulting in less burdensome and more efficient regulatory compliance. In addition, the proposal will update and add specificity to the Exchange's requirements governing supervision, which will promote just and equitable principles of trade and help to protect investors. For these reasons, the Commission designates the proposed rule change to be operative upon filing.[29]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [30] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2014–56 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2014–56. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Section, 100 F Street NE., Washington, DC 20549–1090, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing will also be available for inspection and copying at the NYSE's principal office. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2014–56 and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73547; File No. SR–BOX–2014–25]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule on the BOX Market LLC (''BOX'') Options Facility

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2014, BOX Options Exchange LLC (the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) of the Act,[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend the Fee Schedule to amend the Fee Schedule [sic] on the BOX Market LLC (''BOX'') options facility. While changes to the fee schedule pursuant to this proposal will be effective upon filing, the changes will become operative on November 1, 2014. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at *http://boxexchange.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make a number of changes to the BOX Fee Schedule.

Exchange Fees

Non-Auction Transactions

First, the Exchange proposes to amend Section I (Exchange Fees) to establish a subsection entitled ''Non-Auction Transactions.'' [5] The Exchange then proposes to adopt the current fee structure for Non-Auction Transactions in Select Symbols for all Non-Auction transactions on BOX. With this change the Select Symbols fee structure outlined in Section I.C. of the BOX Fee Schedule will be removed.

Currently, Non-Auction Transactions in non-Select Symbols are subject to the fee structure outlined in Section I of the BOX Fee Schedule. For every Non-Auction Transaction, Public Customers are assessed a $0.07 fee per contract and Professional Customers and Broker Dealers $0.42 per contract. Market Makers are assessed a per contract fee based upon the Market Maker's Monthly ADV in all transactions executed on BOX, as calculated at the end of each month. All Non-Auction Transactions for that month are charged the same per contract fee according to the ADV achieved by the Market Maker, which ranges from $0.13 to $0.35.

In proposed Section I.A. (Non-Auction Transactions), the Exchange proposes to adopt a pricing model where the Exchange will assess transaction fees and credits dependent upon three factors: (i) The account type of the Participant submitting the order; (ii) whether the Participant is a liquidity provider or liquidity taker; and (iii) the account type of the contra party. Non-Auction Transactions in Penny Pilot Classes will also be assessed different fees or credits than Non-Auction Transactions in Non-Penny Pilot Classes.

The Exchange also proposes to specify that these transactions will now be exempt from the Liquidity Fees and Credits outlined in Section II of the BOX Fee Schedule. The proposed fee structure for all Non-Auction Transactions is as follows:

Account type	Contra party	Penny pilot classes		Non-penny pilot classes	
		Maker fee/credit	Taker fee/credit	Maker fee/credit	Taker fee/credit
Public Customer	Public Customer	$0.00	$0.00	$0.00	$0.00
	Professional Customer/Broker Dealer.	(0.22)	(0.22)	(0.57)	(0.57)
	Market Maker	(0.22)	(0.22)	(0.57)	(0.57)

011); 72689 (July 28, 2014), 79 FR 44917 (SR–EDGA–2014–16); and 72691 (July 28, 2014), 79 FR 44892 (SR–EDGX–2014–19).

[4] *See* Letter from Sal Arnuk and Joe Saluzzi, Themis Trading LLC, to Elizabeth M. Murphy, Secretary, Commission, dated August 21, 2014; and Letter from Ira D. Hammerman, General Counsel, SIFMA, to Kevin M. O'Neill, Deputy Secretary, Commission, dated August 22, 2014 (letters commenting on SR–BATS–2014–18).

[5] *See* Securities Exchange Act Release Nos. 73101, 79 FR 56418 (Sept. 19, 2014) (SR–BATS–2014–028); 73102, 79 FR 56419 (Sept. 19, 2014) (SR–BYX–2014–011); 73098, 79 FR 56415 (Sept. 19, 2014) (EDGA–2014–16); and 73099, 79 FR 56418 (Sept. 19, 2014) (SR–EDGX–2014–19).

[6] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] Non-Auction Transactions are those transactions executed on the BOX Book.

Account type	Contra party	Penny pilot classes		Non-penny pilot classes	
		Maker fee/credit	Taker fee/credit	Maker fee/credit	Taker fee/credit
Professional Customer or Broker Dealer.	Public Customer	0.55	0.59	0.90	0.94
	Professional Customer/Broker Dealer.	0.20	0.35	0.30	0.35
	Market Maker	0.20	0.39	0.30	0.39
Market Maker	Public Customer	0.51	0.55	0.85	0.90
	Professional Customer/Broker Dealer.	0.00	0.05	0.00	0.10
	Market Maker	0.10	0.29	0.10	0.29

For example, if a Public Customer submitted an order to the BOX Book in a Penny Pilot Class (making liquidity), the Public Customer would be credited $0.22 if the order interacted with a Market Maker's order and the Market Maker (taking liquidity) would be charged $0.55. To expand on this example, if the Market Maker instead submitted an order to the BOX Book in a Penny Pilot Class (making liquidity), the Market Maker would be charged $0.51 if the order interacted with a Public Customer's order and the Public Customer (taking liquidity) would again be credited $0.22.

Tiered Volume Rebate for Non-Auction Transactions

Accordingly, the Exchange proposes to adopt the same tiered volume-based rebate for Market Makers and Public Customers in Non-Auction Transactions that was previously applied to Non-Auction Transactions in Select Symbols. Specifically, Market Makers and Public Customers will receive a per contract rebate based on ADV considering all transactions executed on BOX by the Market Maker or Public Customer, respectively, as calculated at the end of each month. All Non-Auction Transactions for that month will receive the same per contract rebate according to the ADV achieved by the Market Maker or Public Customer. However, the Exchange proposes to specify that Non-Auction Transactions where a Public Customer order interacts with another Public Customer order will be exempt from the per contract rebate listed below. These transactions will still count toward the Public Customer's monthly ADV.

The new per contract rebate for Market Makers and Public Customers in Non-Auction Transactions as set forth in Section I.A.1. of the BOX Fee Schedule will be as follows:

	Per contract rebate
Market Maker Monthly ADV:	
100,001 contracts and greater	($0.15)
60,001 contracts to 100,000 contracts	(0.10)
35,001 contracts to 60,000 contracts	(0.07)
10,001 contracts to 35,000 contracts	(0.03)
1 contract to 10,000 contracts	0.00
Public Customer Monthly ADV:	
35,001 contracts and greater	(0.10)
15,001 contracts to 35,000 contracts	(0.06)
5,001 contracts to 15,000 contracts	(0.03)
1 contract to 5,000 contracts	0.00

Auction Transactions

The Exchange then proposes to amend Section I (Exchange Fees) to establish a subsection entitled ''Auction Transactions.'' [6] The Auction Transactions fees for Public Customers, Professional Customers and Broker Dealers will remain unchanged. For Market Makers, the Exchange proposes to adopt a fee of $0.20 for PIP Orders, COPIP Orders and Agency Orders.[7] Currently Market Makers are assessed a per contract fee based upon the Market Maker's Monthly ADV in all transactions executed on BOX, as calculated at the end of each month. All PIP, COPIP and Agency Orders for that month are charged the same per contract fee according to the ADV achieved by the Market Maker, which ranges from $0.13 to $0.35. The Exchange then proposes to remove the Tiered Fee Schedule for Market Makers based upon Monthly Average Daily Volume in current Section I.B.

The new Auction Transactions as set forth in Section I.B. of the BOX Fee Schedule will be as follows:

[6] Auction Transactions are those transactions executed through the Price Improvement Period (''PIP''), the Complex Order Price Improvement Period (''COPIP''), the Solicitation Auction mechanism, and the Facilitation Auction mechanism. All COPIP transactions will be charged per contract per leg.

[7] A PIP Order or COPIP Order is a Customer Order (an agency order for the account of either a customer or a broker-dealer) designated for the PIP or COPIP, respectively. An Agency Order is a block-size order that an Order Flow Provider seeks to facilitate as agent through the Facilitation Auction or Solicitation Auction mechanism.

	Account type			
	Public customer	Professional customer	Broker dealer	Market maker
PIP Order, COPIP Order, or Agency Order.	$0.00	$0.37	$0.37	$0.20
Improvement Order in PIP or COPIP [8].	0.15	0.37	0.37	0.30
Responses in the Solicitation or Facilitation Auction Mechanisms.	0.15	0.37	0.37	0.30
Primary Improvement Order,[9] Facilitation Order, or Solicitation Order.	Based on ADV, see Section I. B.1.	Based on ADV, see Section I. B.1.	Based on ADV, see Section I. B.1.	Based on ADV, see Section I. B.1.

Liquidity Fees and Credits

Since all Non-Auction Transactions will now fall under Section I [sic] the new fee structure and be exempt from Section II Liquidity Fees and Credits, BOX proposes to remove subsection C (Non-Auction Transactions) from Section II. With the removal of subsection C, the Exchange proposes to move the bullet regarding non-immediately marketable orders to Section II.A (PIP and COPIP Transactions). A non-immediately marketable order that executes against a PIP Order or a COPIP Order, therefore becoming an Unrelated Order, will continue to be charged as an Improvement Order for purposes of the BOX Fee Schedule.

The Exchange then proposes to edit the language in proposed Section II.C, formerly Section II.D. (Exempt Transactions) and add the following fees for transactions which occur on the opening or re-opening of trading. For these transactions, which are deemed neither to ''add'' nor ''remove'' liquidity, the Exchange proposes to assess a flat fee per contract of $0.00 for Public Customers, $0.20 for Professional Customers and Broker Dealers and $0.12 for Market Makers. The Exchange also proposes to clarify that outbound Eligible Orders routed to an Away Exchange, as defined in Rule 15000 Series, remain subject to the fees outlined in Section IV. Eligible Orders Routed to an Away Exchange.

Finally, the Exchange proposes to remove the ''Select Symbols'' language in Section II.C. (Exempt Transactions) that states that Non-Auction Transactions in Select Symbols will be considered exempt from all liquidity fees and credits. With the proposed changes, all Non-Auction Transactions will be considered exempt.

MNX

The Exchange also proposes to amend the Fee Schedule to remove the reference to the Mini Nasdaq 100 Index (NDX) [sic].

Because the Exchange has delisted the Mini-NDX® Index (MNX), the Exchange proposes to remove the reference to MNX from the BOX Fee Schedule. Currently, Section I (Exchange Fees) of the BOX Fee Schedule provides for a surcharge to be applied to options on any index traded on BOX; which includes a $0.22 per contract surcharge for options on MNX. The Exchange has since delisted options on MNX and they are no longer traded on BOX. As such, no related surcharge will apply and the Exchange is proposing to remove the reference from the BOX Fee Schedule.

Other

Finally, the Exchange is proposing to make additional non-substantive changes to the Fee Schedule. Specifically, the Exchange is renumbering certain footnotes, headings and internal references to accommodate the above proposed changes to the Fee Schedule. The Exchange also proposes to move the BOX Volume Rebate from current Section I.E of the Fee Schedule to proposed Section I.B (Auction Transactions).

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act, in general, and Section 6(b)(4) and 6(b)(5) of the Act,[10] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among BOX Participants and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The proposed changes will allow the Exchange to be competitive with other exchanges and to apply fees and credits in a manner that is equitable among all BOX Participants. Further, the Exchange operates within a highly competitive market in which market participants can readily direct order flow to any other competing exchange if they determine fees at a particular exchange to be excessive.

Exchange Fees

Non-Auction Transactions

The Exchange believes adopting the current fee structure for Non-Auction Transactions in Select Symbols for all Non-Auction Transactions, regardless of symbol, is reasonable, equitable and not unfairly discriminatory. Even though the Select Symbol fee structure for Non-Auction Transactions was only adopted last month, it was well received by Participants and the industry and the Exchange believes it is appropriate to now apply it to all Non-Auction Transactions. The proposed fee structure is intended to attract order flow to the Exchange by offering all market participants incentives to submit their Non-Auction orders to the Exchange. The practice of providing additional incentives to increase order flow is, and has been, a common practice in the options markets.[11] Further, the Exchange believes it is appropriate to provide incentives for market participants which will result in greater liquidity and ultimately benefit all Participants trading on the Exchange.

The Exchange also believes it is equitable, reasonable and not unfairly discriminatory to assess fees and credits according to the account type of the Participant originating the order and the contra party. This proposed fee structure was recently adopted by the Exchange for Non-Auction Transactions

[8] An Improvement Order is a response to a PIP or COPIP auction.

[9] A Primary Improvement Order is the matching contra order submitted to the PIP or COPIP on the opposite side of an agency order.

[10] 15 U.S.C. 78f(b)(4) and (5).

[11] *See* International Securities Exchange LLC (''ISE'') Schedule of Fees, Section I. Regular Order Fees and Rebates for Standard Options, Non-Select Symbols (page 6); NASDAQ OMX PHLX, (''PHLX''), Pricing Schedule Section B, ''Customer Rebate Program''; and NYSE Arca, Inc (''Arca'') Options Fees and Charges, ''Customer Monthly Posting Credit Tiers and Qualifications for Executions in Penny Pilot Issues'' (page 4).

in Select Symbols [12] and is similar to the model adopted by the Exchange for Complex Orders Fees [13] and has been accepted by both the Commission and the industry.[14] The result of this structure is that a Participant does not know the fee it will be charged when submitting certain orders. Therefore, the Participant must recognize that it could be charged the highest applicable fee on the Exchange's schedule, which may, instead, be lowered or changed to a credit depending upon how the order interacts. This structure has been favorably received by the industry and BOX Participants; therefore the Exchange is proposing to apply the same structure to all Non-Auction Transactions. After adopting this type of structure for Non-Auction Transactions, a Public Customer submitting an order on the BOX Book will recognize that it will not pay a fee for these transactions and that depending upon with whom the order executes, the Public Customer may receive an additional benefit for submitting the order. Likewise, a Professional Customer or Broker Dealer submitting an order will recognize that it will not be charged more than $0.59 in Penny Pilot issues and $0.94 in Non-Penny Pilot issues. The same is true for Market Makers, who will recognize that their maximum charge when submitting a Non-Auction order will be $0.55 in Penny Pilot issues and $0.90 in Non-Penny Pilot issues.

The Exchange believes that the proposed fees and credits for Public Customers in Non-Auction Transactions are reasonable. Under the proposed fee structure Public Customers will either pay a Maker fee of $0.00 or receive a Maker/Taker credit of $0.22 for Penny Pilot classes and $0.57 for Non-Penny Pilot classes. These potential fees and credits are reasonable and will at all times be less than the current $0.07 Exchange Fee that Public Customers pay in Non-Auction Transactions.

The Exchange believes providing a credit or charging no fee to Public Customers for all Non-Auction Transactions is equitable and not unfairly discriminatory. The securities markets generally, and BOX in particular, have historically aimed to improve markets for investors and develop various features within the market structure for Public Customer benefit. Accordingly, the Exchange believes that charging no fee or providing a credit for Public Customers is appropriate and not unfairly discriminatory. Public Customers are less sophisticated than other Participants and the credit will help to attract a high level of Public Customer order flow to the BOX Book and create liquidity, which the Exchange believes will ultimately benefit all Participants trading on BOX.

Finally, the Exchange believes it is reasonable, equitable and not unfairly discriminatory to give Public Customers a credit when their orders execute against a non-Public Customer and, accordingly, charge non-Public Customers a higher fee when their orders execute against a Public Customer. As stated above, the Exchange aims to improve markets by developing features for the benefit of its Public Customers. Similar to the payment for order flow and other pricing models that have been adopted by the Exchange and other exchanges to attract Public Customer order flow, the Exchange increases fees to non-Public Customers in order to provide incentives for Public Customers. The Exchange believes that providing incentives for Non-Auction Transactions by Public Customers is reasonable and, ultimately, will benefit all Participants trading on the Exchange by attracting Public Customer order flow.

The Exchange believes that charging Professional Customers and Broker Dealers higher fees than Public Customers for Non-Auction Transactions is equitable and not unfairly discriminatory. Professional Customers, while Public Customers by virtue of not being Broker Dealers, generally engage in trading activity more similar to Broker Dealer proprietary trading accounts (submitting more than 390 standard orders per day on average). The Exchange believes that the higher level of trading activity from these Participants will draw a greater amount of BOX system resources than that of non-professional, Public Customers. Because this higher level of trading activity will result in greater ongoing operational costs, the Exchange aims to recover its costs by assessing Professional Customers and Broker Dealers higher fees for transactions.

The Exchange also believes it is equitable and not unfairly discriminatory for BOX Market Makers to be assessed lower fees than Professional Customers and Broker Dealers for Non-Auction Transactions because of the significant contributions to overall market quality that Market Makers provide. Specifically, Market Makers can provide higher volumes of liquidity and lowering their fees will help attract a higher level of Market Maker order flow to the BOX Book and create liquidity, which the Exchange believes will ultimately benefit all Participants trading on BOX. As such, the Exchange believes it is appropriate that Market Makers be charged lower transaction fees than Professional Customers and Broker Dealers for Non-Auction Transactions.

The Exchange believes that the proposed fees and credits for all other Participants in Non-Auction Transactions are reasonable. Under the proposed fee structure, a Professional Customer or Broker Dealer making liquidity and interacting with a Professional Customer, Broker Dealer or Market Marker will either be charged a fee of $0.20 for Penny Pilot Classes or $0.30 for Non-Penny Pilot Classes. If the Professional Customer or Broker Dealer is instead taking liquidity in either Penny Pilot or Non-Penny Pilot Classes, it will be charged $0.35 if it interacts with a Professional Customer or Broker Dealer and $0.39 if it interacts with a Market Maker. The Exchange believes the fees listed above are reasonable as they are lower than the current $0.42 Exchange Fee charged to Broker Dealers and Professional Customers in Non-Auction Transactions.

Similarly, in the proposed fee structure a Market Maker making liquidity in both Penny Pilot and Non-Penny Pilot Classes will either be charged a fee of $0.00 for interacting with a Professional Customer or Broker Dealer or $0.10 for interacting with another Market Maker. If the Market Maker is instead taking liquidity, it will be charged $0.05 (for Penny Pilot Classes) and $0.10 (for Non-Penny Pilot Classes) if it interacts with a Professional Customer or Broker Dealer. If a Market Maker is taking liquidity and interacts with another Market Maker they will be charged $0.29 in all situations. The Exchange believes the fees listed above are reasonable as they are, in most situations, lower than the current $0.13 to $0.35 Exchange Fee range for Market Makers under the BOX Fee Schedule and are in line with what is currently charged by the industry.[15]

[12] *See* Securities Exchange Act Release No. 73397 (October 21, 2014), 79 FR 63982 (October 27, 2014) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Fee Schedule on the BOX Market LLC Options Facility).

[13] *See* Securities Exchange Act Release No. 71312 (January 15, 2014), 79 FR 3649 (January 22, 2014) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule To Establish Fees for Complex Order Price Improvement Period (''COPIP'') Transactions).

[14] This type of structure was also adopted by NYSE Arca in 2012. *See* Securities Release No. 68405 (December 11, 2012), 77 FR 74719 (December 17, 2012) (SR–NYSEArca–2012–137).

[15] Many U.S. Options Exchanges do not differentiate their fees between auction and non-auction transactions. However, the general range for

Continued

The Exchange believes it is reasonable, equitable and not unfairly discriminatory for Professional Customers, Broker Dealers and Market Makers to be charged higher fees for both making and taking liquidity when interacting with Public Customers. In the proposed fee structure, a Professional Customer or Broker Dealer interacting with a Public Customer will be charged a $0.55 Maker fee or $0.59 Taker fee for Penny Pilot Classes and a $0.90 Maker fee or $0.94 Taker fee for Non-Penny Pilot Classes. Similarly a Market Marker interacting with a Public Customer will be charged a $0.51 Maker fee or $0.55 Taker fee for Penny Pilot Classes and a $0.85 Maker fee or $0.90 Taker fee for Non-Penny Pilot Classes. While these fees are higher than what these Participants are currently charged for Non-Auction Transactions in Non-Select Symbols, the Exchange believes they are reasonable as they are in line when compared to similar fees in the options industry.[16] Further, as stated above, the Exchange believes charging a higher fee for interactions with a Public Customer is equitable and not unfairly discriminatory because it allows the Exchange to incentivize Public Customer order flow by offering credits to Public Customers in Non-Auction Transactions. The Exchange believes that providing incentives for Non-Auction Transactions by Public Customers will benefit all Participants trading on the Exchange by attracting this Public Customer order flow.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory for Professional Customers, Broker Dealers and Market Makers to be charged a higher fee for orders removing liquidity when compared to the fee they receive for orders that add liquidity. Charging a lower fee for orders that add liquidity will promote liquidity on the Exchange and ultimately benefit all participants on BOX. Further, the concept of incentivizing orders that add liquidity over orders that remove liquidity is commonly accepted within the industry as part of the ''Make/Take'' liquidity model.[17]

Further, the Exchange believes it is equitable and not unfairly discriminatory to charge the Professional Customer or Broker Dealer more for taking liquidity against a Market Maker than they are charged for taking liquidity against other Professional Customers or Broker Dealers. As stated above, the Exchange proposes to provide certain incentives to Market Makers because of the high volumes of liquidity they can provide and increasing fees for Professional Customers and Broker Dealers taking liquidity will allow the Exchange to offer these incentives, ultimately benefiting all Participants trading on BOX.

Finally, the Exchange also believes it is reasonable to charge Professional Customers, Broker Dealers, and Market Makers less for certain executions in Penny Pilot issues compared to Non-Penny Pilot issues because these classes are typically more actively traded; assessing lower fees will further incentivize order flow in Penny Pilot issues on the Exchange, ultimately benefiting all Participants trading on BOX. Additionally, the Exchange believes it is reasonable to give a greater credit to Public Customers for Non-Auction Transactions in Non-Penny Pilot issues as compared to Penny Pilot issues. Since these classes have wider spreads and are less actively traded, giving a larger credit will further incentivize Public Customers to trade in these classes, ultimately benefitting all Participants trading on BOX.

The Exchange believes that the proposed Non-Auction Transactions fee structure will keep the Exchange competitive with other exchanges and will be applied in an equitable manner among all BOX Participants. The Exchange believes the proposed fee structure is reasonable and competitive with fee structures in place on other exchanges. Further, the Exchange believes that the competitive marketplace impacts the fees proposed for BOX.

Tiered Volume Rebate for Non-Auction Transactions

BOX believes it is reasonable, equitable and not unfairly discriminatory to introduce tiered volume based rebates for Market Makers and Public Customers in all Non-Auction Transactions. Other exchanges employ similar incentive programs,[18] and the Exchange believes that its proposed volume thresholds and rebates are reasonable and competitive when compared to incentive structures at other exchanges.

Additionally, the Exchange believes that the proposed volume thresholds are reasonable because they will incentivize Public Customers and Market Makers to direct order flow to the Exchange to obtain the benefit of the rebate, which will in turn benefit all market participants by increasing liquidity on the Exchange. The Exchange believes that its proposed volume threshold and rebate is competitive when compared to rebate structures at other exchanges. Finally, the Exchange believes it is reasonable to exempt Non-Auction Transactions where a Public Customer order interacts with another Public Customer order from the per contract rebate. The Exchange does not believe a rebate in this situation is appropriate, as neither Public Customer will be paying a fee for the transaction. Further, these transactions will still count toward the Public Customer's monthly ADV.

The Exchange also believes it is equitable and not unfairly discriminatory to only adopt these structures for Public Customers and Market Makers. The proposed volume credits are intended to further encourage Public Customer and Market Maker Non-Auction order flow to the Exchange. Increased Public Customer and Market Maker volume will provide greater liquidity, which benefits all market participants on the Exchange. The practice of incentivizing increased Public Customer order flow is common in the options markets. Further, Market Makers also provide significant contributions to overall market quality. Specifically, Market Makers can provide high volumes of liquidity and lowering their Non-Auction Transaction fees will potentially help attract a higher level of

Market Maker fees is between $0.10 and $0.89. *See* NASDAQ OMX BX (''BX'') Options Pricing, Chapter XV, Sec. 2; BX charges both BX Options Market Makers and Non-Customer/Non-BX Options Market Makers a fee of $0.46 to remove liquidity in Penny Pilot Options and a fee of $0.89 to remove liquidity in Non-Penny Pilot Options, a fee to add liquidity in Penny Pilot Options of $0.40 to BX Options Market Makers and $0.45 to Non-Customer/Non-BX Options Market Makers, and a fee to add liquidity in Non-Penny Pilot Options of $0.50 to BX Options Market Makers (or $0.85 when interacting with Customer) and $0.88 for Non-Customer/Non-BX Options Market Makers. *See* NYSE Arca Options (''Arca'') Fees and Charges page 3; Arca charges NYSE Arca Market Makers $0.16 for manual executions, $0.49 to take liquidity in Penny Pilot Issues, and $0.87 to take liquidity in Non Penny Pilot Issues. *See* International Securities Exchange (''ISE'') Schedule of Fees, Section I; ISE charges Market Makers $0.10 for making liquidity in select symbols and $0.42 for taking liquidity in select symbols.

[16] *Id.* Professional Customer and Broker Dealers are also charged anywhere from $0.10 to $0.89 within the option exchange fee schedules referenced above.

[17] The ''Make/Take'' model is currently used by the International Securities Exchange LLC (''ISE') and NASDAQ OMX PHLX LLC (''PHLX'').

[18] *See* Section B of the PHLX Pricing Schedule entitled ''Customer Rebate Program'' and CBOE's Volume Incentive Program (VIP). CBOE's Volume Incentive Program (''VIP'') pays certain tiered rebates to Trading Permit Holders for electronically executed multiply-listed option orders which include AIM orders. Note that these exchanges base these rebate programs on the percentage of total national Public Customer volume traded on their respective exchanges, which the Exchange is not proposing to do.

Market Maker order flow and create liquidity, which the Exchange believes will ultimately benefit all Participants trading on BOX.

Auction Transactions

The Exchange believes it reasonable to remove the tiered fee structure for Market Makers based upon ADV. The tiered fee structure was adopted to incentivize Market Makers to direct order flow to the Exchange, which the Exchange believes is now unnecessary with the adoption of the new Non-Auction Transactions fee structure as well as the Tiered Volume Rebates for Market Makers in Non-Auction Transactions. Additionally, in Auction Transactions Market Makers remain eligible for the BOX Volume Rebate for all PIP and COPIP Orders of 250 and under contracts. The Exchange believes it is reasonable to adopt a flat $0.20 per contract fee for Market Makers in PIP Orders, COPIP Orders, and Agency Orders. Specifically, the Exchange believes the fee strikes the appropriate balance between the $0.13 to $0.35 fees that Market Makers are currently charged for these orders and is reasonable when compared to similar fees among the industry.[19] Finally, the Exchange believes it is equitable and not unfairly discriminatory to charge a Market Maker less for PIP Orders, COPIP Orders, and Agency Orders than what is charged to Professional Customers and Broker Dealers. Generally, Market Makers have obligations on BOX that other Participants do not. They must maintain active two-sided markets in the classes in which they are appointed and must meet certain minimum quoting requirements. Market Makers can also provide high volumes of liquidity and assessing lower transaction fee [sic] may help attract a higher level of Market Maker order flow and create liquidity, which the Exchange believes will ultimately benefit all Participants trading on BOX.

Liquidity Fees and Credits

The Exchange believes that exempting all Non-Auction Transactions from Section II (Liquidity Fees and Credits) is reasonable, equitable and not unfairly discriminatory. The Exchange's Liquidity Fees and Credits are intended to attract order flow to the Exchange by offering incentives to all market participants to submit orders to the Exchange and the Exchange believes that the proposed fee structure will provide appropriate incentives to encourage Participants to submit Non-Auction Transactions to the Exchange. The Exchange believes that exempting Non-Auction Transactions from liquidity fees and credits is reasonable compared to the similar fees and credits offered by the other exchanges. The Exchange believes exempting Non-Auction Transactions from liquidity fees and credits is not unfairly discriminatory as the exemption from the liquidity fees and credits applies equally to all Participants on the Exchange.

The Exchange believes it is reasonable edit [sic] the Exempt Transactions subsection and to assess a flat fee for transactions which occur on the opening or re-opening of trading and are deemed neither to ''add'' nor ''remove'' liquidity. With the proposed fee structure for Non-Auction Transactions, which assess fees and credits dependent upon whether the Participant is a liquidity provider or liquidity taker, transactions on the opening or re-opening will not being [sic] charged an Exchange fee. For example, under the proposed Non-Auction fee structure a transaction on the opening would not be charged an Exchange Fee under Section I of the BOX Fee Schedule. Instead the Exchange is proposing to ensure that these transactions are assessed a fee. The Exchange has previously had this type of fee within the BOX Fee Schedule[20] and other exchanges with liquidity fees and credits also spell out how these transactions are treated within their respective fee schedules.[21] The Exchange believes assessing a flat fee of $0.00 for Public Customers, $0.20 for Professional Customers and Broker Dealers and $0.12 for Market Makers is in line with the Non-Auction Transactions fees outlined in the new fee structure. The Exchange believes it is equitable and not unfairly discriminatory for Public Customers to be charged no fee for transactions which occur on the opening or re-opening of trading. As stated above, the Exchange aims to improve markets by developing features for the benefit of its Public Customers. The Exchange also believes it is equitable and not unfairly discriminatory to charge a Market Maker less for these transactions than what is charged to Professional Customers and Broker Dealers; as stated above, Market Makers have obligations that other Participants do not and can also provide high volumes of liquidity that will ultimately benefit all Participants on the Exchange.

MNX

The Exchange believes it is reasonable to remove from the BOX Fee Schedule a reference to a fee that is no longer applicable as options on MNX have been delisted and are no longer traded on BOX. The Exchange also believes it is equitable and not unfairly discriminatory to remove all references to MNX as this applies equally to all Participants on the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that adopting the proposed fee structure for all Non-Auction Transactions will not impose a burden on competition among various Exchange Participants. BOX currently assesses distinct standard contract Exchange Fees for different account and transaction types. The Exchange believes that applying a fee structure that is determined according to whether the order removes or adds liquidity, the account type of the Participant submitting the order, and the contra party will result in Participants being charged appropriately for these transactions. Submitting an order is entirely voluntary and Participants can determine which type of order they wish to submit, if any, to the Exchange.

Further, the Exchange believes that this proposal will enhance competition between exchanges because it is designed to allow the Exchange to better compete with other exchanges for order flow.

Finally, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing exchanges. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

[21] *See* ISE Gemini, LLC (''ISE Gemini'') Schedule of Fees Section I. Footnote 4 and Section II. Footnote 4. *See* NASDAQ OMX BX, Inc. (''BX'') Chapter XV Options Pricing Sec. 2(2). *See* NASDAQ Options Market LLC (''NOM'') Chapter XV Options Pricing Sec. 2(2).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act [22] and Rule 19b–4(f)(2) thereunder,[23] because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–BOX–2014–25 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BOX–2014–25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BOX–2014–25, and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–73541; File No. SR–BX–2014–055]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Cancel-Replacement Orders and Routing

November 6, 2014.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 28, 2014, NASDAQ OMX BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to add specificity to the Exchange's options trading rules. The Exchange proposes to define cancel-replacement orders and also describe a route timer at in Chapter VI, entitled ''Trading Systems.''

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqomxbx.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Chapter VI to add additional specificity to its rules. The Exchange proposes to amend Section 1, Definitions, to define a cancel-replacement order. The Exchange proposes to amend Section 11, Order Routing, to add greater specificity to the Rulebook concerning a route timer.

Cancel-Replacement Orders

A market participant today has the option of either sending in a cancel order and then separately sending in a new order which serves as a replacement of the original order (two separate messages) or sending a single cancel-replacement order in one message.

If an order is submitted to the System and then subsequently a cancel order is sent to the System cancelling the original order, the original order will be cancelled by the System provided the original order was not already filled partially or in its entirety. A subsequent replacement order would be treated as a new order by the System and will not

retain the priority of the cancelled order.

An order that is entered as one single message (''cancel-replacement order'') containing two orders (versus two messages as described above) will also result in the original order being cancelled, provided the original order was not already filled partially or in its entirety.[3] The replacement order will be considered a new order by the System and will have time priority as of the time that order is entered into the System, except in the case that the replacement order only serves to reduce the size of the order. A cancel-replacement order which only reduces the size of the order will continue to retain the priority of the original order.[4] The replacement order will not retain the priority of the cancelled order except when the replacement *reduces* the size of the order and all other terms and conditions are retained. This is similar to the manner in which partially executed orders are prioritized in the System.

By way of example, if the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, presuming the original order was not filled in its entirety or partially, the entire original order would be cancelled. If the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, and 600 contracts were already filled, the cancel-replacement order would be returned to the market participant. If the original order is for 600 contracts and a market participant submits a cancel-replacement order for 600 contracts and in doing so, amends a term or condition such as the order type, and 300 contracts were already filled, the order would be modified to 300 contracts. Finally, if the original order is for 600 contracts and a market participant submits a cancel-replacement order solely reducing the size of the order by 300 contracts, the order would be modified to 300 contracts and the original order would retain its priority. In the previous examples provided, the orders would not retain the priority of the original orders.

The Exchange proposes to add the following definition in Chapter VI, Section 1, ''Cancel-replacement order shall mean a single message for the immediate cancellation of a previously received order and the replacement of that order with a new order with new terms and conditions. If the previously placed order is already filled partially or in its entirety, the replacement order is automatically canceled or reduced by the number of contracts that were executed. The replacement order will not retain the priority of the cancelled order except when the replacement order reduces the size of the order and all other terms and conditions are retained.'' This language is being added to Section 1(e)(1) to reflect the manner in which cancel-replacement orders function today. This filing does not reflect a change to the System; rather, the Exchange is memorializing in its rules the manner in which cancel-replacement orders are treated today.

Route Timer

Today, the System provides a number of routing options pursuant to which orders are sent to other available market centers for potential execution, per the entering market participant's instructions.[5] The System routing options are SEEK or SRCH. With SEEK and SRCH, an order will first check the System for available contracts for execution. After checking the System for available contracts, orders are sent to other available market centers for potential execution, per the entering firm's instructions.

The Exchange proposes to add language in a new Section 11(a)(1)(C) to specify that after an order is initially routed,[6] pursuant to either the SEEK or SRCH routing option, the order will post to the book and will be routed after a time period (''Route Timer'') not to exceed one second as specified by the Exchange on its Web site provided that the order's limit price would lock or cross other market center(s).[7] If, during the Route Timer, any new interest arrives opposite the order that is equal to or better than the away best bid or offer (''ABBO'') price, the order will trade against such new interest at the ABBO price. Eligible unexecuted orders will be routed at the end of the Route Timer provided the order was not filled and the order's limit price would continue to lock or cross the ABBO. If an order was routed with either the SEEK or SRCH routing option, and has size after such routing, it will execute against contra side interest in the book, post in the book, and route again pursuant to the process described above, if applicable, if the order's limit price would lock or cross another market center(s).

This language is being added to Section 11 to reflect the manner in which the Exchange imposes a Route Timer on routed orders today to permit quote updates to occur prior to subsequent routing. This filing does not reflect a change to the System, rather the Exchange is memorializing in its rules the manner in which orders are routed today.

The Exchange also proposes to amend rule text in Section 11(a)(1)(A) of Chapter VI concerning the SEEK routing option. The Exchange proposes to add language which clarifies the differences between SEEK and SRCH routing options with respect to contracts that remain un-executed after routing and are posted on the book. The Exchange proposes to state, ''Once on the book *at the limit price,* should the order subsequently be locked or crossed by another market center, the System will not route the order to the locking or crossing market center.'' The Exchange believes this language more clearly differentiates an order routed pursuant to SEEK as compared to the SRCH routing option. An order routed pursuant to the SEEK routing option is routable until it is posted at its limit price. Once posted at its limit price, an order routed pursuant to the SEEK routing option would not continue to route, as compared to an order routed pursuant to the SRCH routing option. An order routed pursuant to the SRCH routing option is routable for the life of the order. The routing functionality is similar to functionality currently on Phlx.[8]

The Exchange also proposes to correct a typographical error in Chapter VI, Section 11(a)(1).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act[9] in general, and furthers the

[3] With cancel-replacement orders, the original order is automatically canceled or reduced by the number of contracts that were executed depending on the volume of the original order that was filled. The market participant is required to enter the original order reference number when a cancel-replacement order is sent to the System as one message.

[4] When a cancel-replacement order is sent to the System as one message the original order number reference is maintained by the System.

[5] Participants can designate orders as either available for routing or not available for routing. *See* Chapter VI, Sec. 11(a).

[6] If an order is only partially routed the portion that was not routed will be posted to the book.

[7] Pursuant to Section 11(c) of Chapter VI, orders sent by the System pursuant to the SEEK and SRCH routing options to other markets would not retain time priority with respect to other orders in the System. If an order routed pursuant to SEEK or SRCH is subsequently returned, in whole or in part, that order, or its remainder, will receive a new time stamp reflecting the time of its return to the System.

[8] *See* Phlx Rule 1080(m).

[9] 15 U.S.C. 78f(b).

objectives of Section 6(b)(5) of the Act [10] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to define cancel-replacement orders will add transparency to the rules. The Exchange is not amending the manner in which the System handles these orders. The Exchange is memorializing, in its rules, the method by which orders are handled by the System. The Exchange is defining cancel-replacement orders within Chapter VI, Section 1.

Specifically, with respect to cancel-replacement orders that reduce size, the Exchange believes that allowing cancel-replacement orders where only size is reduced to retain the priority of the original order is consistent with the manner in which the Exchange treats partially executed orders, which similarly apply the priority of the executed portion of the order to the remaining portion of the order. In addition, by permitting market participants' orders to remain on the book with the original priority and reduced size, the Exchange is providing market participants an ability to reduce exposure. The Exchange believes that adding transparency and specificity to the Rules protects investors and the public interest by reducing the potential for investor confusion.

The Exchange is also memorializing the manner in which the Exchange routes unexecuted portions of an order that will be subsequently routed to other markets when it comes back and subsequently locks and/or crosses the market. The Exchange will continue to re-route eligible unexecuted orders pursuant to a Route Timer. Contracts which remain unexecuted will be posted to the book provided the order's limit price would not lock or cross the ABBO. Specifically, the Exchange is describing the Route Timer that applies to eligible unexecuted portions of an order which will be subsequently routed. The timer protects investors and the public interest by providing a brief time period to allow the opportunity for markets to update quotes prior to subsequent routes.

The Exchange seeks to add language concerning the specific manner in which the Exchange will handle the routed order by specifying the routing methods in which SEEK or SRCH orders will route to the away market(s). The Exchange is adding clarifying language to make clear that after an order is initially routed, pursuant to either the SEEK or SRCH routing option, the order will post to the book and will be routed after a time period (''Route Timer'') not to exceed one second as specified by the Exchange on its Web site provided that the order would lock or cross other market center(s). If, during the Route Timer, any new interest arrives opposite the order that is equal to or better than the ABBO price, the order will trade against such new interest at the ABBO price. Eligible unexecuted orders will be routed at the end of the Route Timer provided the order was not filled and it would continue to lock or cross the ABBO. If an order was routed with either the SEEK or SRCH routing option, and has size after such routing, it will execute against contra side interest in the book, post in the book, and route again pursuant to the process described above, if applicable, if the order would lock or cross another market center(s).

Further, the proposal to amend rule text in Section 11(a)(1)(A) of Chapter VI concerning SEEK orders clarifies the differences between SEEK and SRCH routing options with respect to contracts that remain un-executed after routing and are posted on the book. The Exchange seeks to clearly note that once an order routed pursuant to the SEEK routing option is on the order book at the limit price, it will not route, despite the order locking or crossing another market center. The Exchange believes this language more clearly differentiates an order routed pursuant to the SEEK routing option as compared to SRCH routing option.

The Exchange believes this language adds specificity and detail to the rule text so that market participants may anticipate the manner in which orders are handled by the Exchange when routing. The Exchange believes that adding transparency and specificity to the Rules protects investors and the public interest by reducing the potential for investor confusion.

The Exchange's proposal is intended to provide additional specificity to the rules in the manner in which the System treats cancel-replacement orders and handles routing of eligible unexecuted portions of previously routed orders, which is designed to promote just and equitable principles of trade.

The Exchange is not proposing to amend the manner in which the System operates. Cancel-replacement orders have been treated in this fashion since BX Options was first launched. Further, the Routing Timer for subsequent routes has also been in place on BX Options since its launch. The Exchange is proposing these additions to the rules in order to provide greater specificity to the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

BX does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange is seeking to provide greater transparency in its rules. The amendments are non-substantive and would apply to all market participants in the same manner. Permitting cancel-replacement orders to retain their original priority does not impose a burden on competition because the priority is retained only in the instance that size alone is changed and only if it is reduced. Permitting all market participants to reduce their exposure without penalty does not burden competition, rather it promotes competition by allowing participants the ability to change their orders in a changing market, provided the order was not already partially filled or filled in its entirety.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[11] and subparagraph (f)(6) of Rule 19b–4 thereunder.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78s(b)(3)(a)(ii).

[12] 17 CFR 240.19b–4(f)(6).

the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved. The Exchange has provided the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2014–055 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–BX–2014–055. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2014–055 and should be submitted on or before December 4, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[File No. 500–1]

Order of Suspension of Trading; In the Matter of Kolasco Corp.

November 10, 2014.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Kolasco Corp. because of questions regarding control over the company and the accuracy of company information, including in filings with the Commission, concerning, among other things, the company's acting officers. Kolasco Corp. is a Nevada corporation with its principal place of business located in Toronta, Canada. Its stock is quoted on OTC Link, operated by OTC Markets Group Inc., under the ticker: KLSC.

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed company.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of the above-listed company is suspended for the period from 9:30 a.m. EST, on November 10, 2014 through 11:59 p.m. EST, on November 21, 2014.

By the Commission.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

Advisory Committee on Veterans Business Affairs

AGENCY: U.S. Small Business Administration.

ACTION: Notice of open Federal Advisory Committee Meeting.

SUMMARY: The SBA is issuing this notice to announce the location, date, time, and agenda for the next meeting of the Advisory Committee on Veterans Business Affairs. The meeting will be open to the public.

DATES: Wednesday, December 17, 2014 from 9 a.m. to 4 p.m.

ADDRESSES: U.S. Small Business Administration, 409 3rd Street SW., Washington, DC 20416. Room: Eisenhower Conference room C, located on the Concourse Level Floor.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2), SBA announces the meeting of the Advisory Committee on Veterans Business Affairs. The Advisory Committee on Veterans Business Affairs serves as an independent source of advice and policy recommendation to the Administrator of the U.S. Small Business Administration.

The purpose of this meeting is scheduled as a full committee. It will focus on strategic planning, updates on past and current events and the ACVBA's objectives for 2015. For information regarding our veterans' resources and partners, please visit our Web site at *www.sba.gov/vets.*

FOR FURTHER INFORMATION CONTACT: The meeting is open to the public, however, advance notice of attendance is requested. Anyone wishing to attend and/or make a presentation to the Advisory Committee must contact Barbara Carson, by December 12, 2014, by email in order to be placed on the agenda. Comments for the Record should be emailed prior to the meeting for inclusion in the public record, verbal presentations; however, will be limited to five minutes in the interest of time and to accommodate as many presenters as possible. Written comments should be emailed to Barbara Carson Acting Associate Administrator, Office of Veterans Business Development, U.S. Small Business Administration, 409 3rd Street SW., Washington, DC 20416.

Additionally, if you need accommodations because of a disability or require additional information, please contact Barbara E. Carson, Designated Federal Official for the Advisory Committee on Veterans Business Affairs at (202) 205–6773; or by email at *barbara.carson@sba.gov* . For more information, please visit our Web site at *www.sba.gov/vets.*

BILLING CODE 8025–01–P

SMALL BUSINESS ADMINISTRATION

Notice of Open Federal Interagency Task Force Meeting

AGENCY: U.S. Small Business Administration.

ACTION: Notice of open Federal Interagency Task Force Meeting.

SUMMARY: The SBA is issuing this notice to announce the location, date, time, and vagenda for its public meeting of the Interagency Task Force on Veterans Small Business Development. The meeting will be open to the public.

DATES: *Date and Time:* December 18, 2014, from 9:00 a.m. to 12:00 noon.

ADDRESSES: SBA Headquarters, 409 3rd Street SW., Washington, DC 20416, in the Eisenhower Conference Room B, Concourse Level.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2), SBA announces the meeting of the Interagency Task Force on Veterans Small Business Development. The Task Force is established pursuant to Executive Order 13540 and focused on coordinating the efforts of Federal agencies to improve capital, business development opportunities and pre-established Federal contracting goals for small business concerns owned and controlled by veterans (VOB's) and service-disabled veterans (SDVOSB'S). Moreover, the Task Force shall coordinate administrative and regulatory activities and develop proposals relating to ''six focus areas'': (1) Access to capital (loans, surety bonding and franchising); (2) Ensure achievement of pre-established contracting goals, including mentor protégé and matching with contracting opportunities; (3) Increase the integrity of certifications of status as a small business; (4) Reducing paperwork and administrative burdens in accessing business development and entrepreneurship opportunities; (5) Increasing and improving training and counseling services; and (6) Making other improvements to support veteran's business development by the Federal government. On November 1, 2011, the Interagency Task Force on Veterans Small Business Development submitted its first report to the President, which included 18 recommendations that were applicable to the ''six focus areas'' identified above. The purpose of the meeting is to discuss progress on the recommendations and next steps identified by the Interagency Task Force (IATF) in the Fiscal Year (FY) 14 Annual Report. The agenda will include updates from each of the members, public comment, and planning for the FY 14 of the IATF's Annual Report. In addition, the Task Force will allow time to obtain public comment from individuals and representatives of organizations regarding the areas of focus.

FOR FURTHER INFORMATION CONTACT: The meeting is open to the public; however, advance notice of attendance is requested. Anyone wishing to attend and/or make a presentation to the Task Force must contact Barbara Carson, by December 12, 2014 by email in order to be placed on the agenda. Comments for the record should be applicable to the ''six focus areas'' of the Task Force and emailed prior to the meeting for inclusion in the public record, verbal presentations; however, will be limited to five minutes in the interest of time and to accommodate as many presenters as possible.

Written comments should be emailed to Barbara Carson, Acting Associate Administrator, Office of Veterans Business Development, U.S. Small Business Administration, 409 3rd Street SW., Washington, DC 20416, at the email address for the Task Force, *vetstaskforce@sba.gov.* Additionally, if you need accommodations because of a disability or require additional information, please contact Cheryl Simms, Designated Federal Official for the Task Force at (202) 205–6773; or by email at *cheryl.simms@sba.gov.* For more information, please visit our Web site at *www.sba.gov/vets.*

Dated: October 30, 2014.

BILLING CODE 4710–05–P

DEPARTMENT OF STATE

[Public Notice: 8947]

U.S. Advisory Commission on Public Diplomacy; Notice of Meeting

The U.S. Advisory Commission on Public Diplomacy will hold a public meeting from 10:00 a.m. until 12:00 p.m., Thursday, December 11, 2014 in Room 902 (ninth floor) of the Hart Senate Office Building, at the corner of Second Street and Constitution Ave. NE., Washington, DC 20002.

The meeting's topic will be on ''A Report on United States Public Diplomacy and International Broadcasting Activity Worldwide'' and will feature findings from the Commission's Congressionally-mandated Comprehensive Annual Report on State Department and Broadcasting Board of Governors-led foreign public engagement activities. Representatives from the State Department and the BBG will be in attendance to discus the report, which focuses on both Washington and field-directed activities.

This meeting is open to the public, Members and staff of Congress, the State Department, Defense Department, the media, and other governmental and non-governmental organizations. To attend and make any requests for reasonable accommodation, email *pdcommission@state.gov* by 5 p.m. on Thursday, December 4, 2014. Please arrive for the meeting by 9:45 a.m. to allow for a prompt meeting start.

The United States Advisory Commission on Public Diplomacy appraises U.S. Government activities intended to understand, inform, and influence foreign publics. The Advisory Commission may conduct studies, inquiries, and meetings, as it deems necessary. It may assemble and disseminate information and issue reports and other publications, subject to the approval of the Chairperson, in consultation with the Executive Director. The Advisory Commission may undertake foreign travel in pursuit of its studies and coordinate, sponsor, or oversee projects, studies, events, or other activities that it deems desirable and necessary in fulfilling its functions.

The Commission consists of seven members appointed by the President, by and with the advice and consent of the Senate. The members of the Commission shall represent the public interest and shall be selected from a cross section of educational, communications, cultural, scientific, technical, public service, labor, business, and professional backgrounds. Not more than four members shall be from any one political party. The President designates a member to chair the Commission.

The current members of the Commission are: Mr. William Hybl of Colorado, Chairman; Ambassador Lyndon Olson of Texas, Vice Chairman; Mr. Sim Farar of California, Vice Chairman; Ambassador Penne Korth-Peacock of Texas; Ms. Lezlee Westine of Virginia; and Anne Terman Wedner of Illinois. One seat on the Commission is currently vacant.

The following individual has been nominated to the Commission but awaits Senate confirmation as of this writing: Alfredo Balsera of Florida.

To request further information about the meeting or the U.S. Advisory Commission on Public Diplomacy, you may contact its Executive Director, Katherine Brown, at *BrownKA4@state.gov*.

Dated: November 6, 2014.

Office of the Secretary of Transportation

Notice of Availability of Guidance on Accelerated Decisionmaking in Environmental Reviews

AGENCY: Office of the Secretary of Transportation, Department of Transportation (DOT).

ACTION: Notice of availability.

SUMMARY: DOT is announcing the availability of guidance implementing Section 1319 of MAP–21, on Accelerated Decisionmaking in Environmental Reviews. This section of MAP–21 provides for the use of errata sheets on the Draft Environmental Impact Statement, in lieu of a Final EIS (FEIS), when the EIS has limited or factual changes. It also states that the lead agency under NEPA shall issue a combined FEIS and ROD unless circumstances exist to make it impracticable. This eliminates the 30-day wait period between the release of the FEIS and ROD. This guidance builds on the interim guidance that was released by FHWA and FTA in January 2013, but applies to the entire Department. The FHWA and FTA interim guidance is retained as a supplemental appendix specific to those agencies. The guidance is available at *http://www.dot.gov/office-policy/transportation-policy/guidance-accelerated-decision-making-environmental-reviews*.

FOR FURTHER INFORMATION CONTACT: Rebecca Higgins, Department of Transportation, 1200 New Jersey Ave. SE. W84–318, Washington, DC 20590; email *Rebecca.Higgins@dot.gov;* telephone (202) 366–7098.

Issue Date: November 3, 2014.

Shoshana Lew, Deputy Assistant Secretary for Policy.

Federal Aviation Administration

Notice of Memorandum of Agreement for Replacing the Griffin—Spalding County Airport (6A2), Griffin, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Memorandum of Agreement.

SUMMARY: The FAA has entered into a Memorandum of Agreement for replacing the Griffin—Spalding County

Airport (6A2), in Griffin, Georgia with the City of Griffin, Spalding County, and the Griffin-Spalding County Airport Authority. This Agreement sets forth the parties' obligations and commitments with regard to planning and constructing a replacement airport.

DATES: December 15, 2014.

FOR FURTHER INFORMATION CONTACT: Larry F. Clark, Manager, Federal Aviation Administration, Atlanta Airports District Office, 1701 Columbia Ave., Campus Building, Suite 2–260, College Park, GA 30337.

SUPPLEMENTARY INFORMATION: On October 28, 2014, the City of Griffin and Spalding County, herein referred to as the Sponsor, and the Griffin-Spalding County Airport Authority entered into a Memorandum of Agreement (Agreement) with the FAA for replacing the Griffin-Spalding County Airport (6A2) in Griffin, Georgia. This Agreement sets forth the parties' obligations and commitments with regard to planning and constructing a replacement airport and outlines the process the parties will undertake to decommission 6A2 in the future. Prior to decommissioning 6A2, the FAA will provide notice and an opportunity for public comment as required by 49 U.S.C. 47107(h)(2).

On September 26, 2014, the Federal Aviation Administration added the proposed Griffin-Spalding County Replacement Airport to its National Plan of Integrated Airport Systems. The runway length and airport design at the existing airport are insufficient to support aviation needs. The sponsor evaluated all reasonable and practicable alternatives to address these constraints and proposed construction of the replacement airport to the FAA. The FAA issued a Finding of No Significant Impact/Record of Decision for the proposed replacement airport on March 12, 2013.

Any person may inspect, by appointment, the Agreement in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon appointment and request, inspect the Agreement, notice and other documents determined by the FAA to be related to the Agreement in person at the Griffin-Spalding County Airport, 1035 Hill Street, Griffin, GA 30224.

Issued in College Park, Georgia, on November 5, 2014.

Larry F. Clark,

Manager, FAA Atlanta Airports District Office.

[Summary Notice No. PE–2014–116]

Petition for Exemption; Summary of Petition Received

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of 14 CFR. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before December 3, 2014.

ADDRESSES: You may send comments identified by Docket Number FAA–2014–0804 using any of the following methods:

- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Send comments to the Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590.
- *Fax:* Fax comments to the Docket Management Facility at 202–493–2251.
- *Hand Delivery:* Bring comments to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: To read background documents or comments received, go to *http://www.regulations.gov* at any time or to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jake Troutman, (202) 267–9521, 800 Independence Avenue SW., Washington, DC 20951.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on November 6, 2014.

James M. Crotty,

Acting Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2014–0804

Petitioner: Allied Drones

Section of 14 CFR: Part 21 Subpart H, 45.23(b), 61.113(a) and (b), 91.3(a) and (c), 91.7(a), 91.9(b)(2), 91.103, 91.109, 91.119, 91.121, 91.151(a), 91.203(a) and (b), 91.405(a), 91.407(a)(1), 91.409(a)(2), and 91.417(a) and (b).

Description of Relief Sought: The petitioner, developer and operator of tether-powered small unmanned aircraft systems (sUAS), is seeking an exemption to commercially operate their tether-powered sUAS, weighing 55 pounds or less, to conduct aerial infrastructure inspections and surveys for the bridge, tower, and building construction and maintenance industries.

Petition for Exemption

Docket No.: FAA–2014–0496.

Petitioner: Empire Airlines.

Section of 14 CFR Affected: 14 CFR 61.160(b)

Description of Relief Sought: The petitioner is seeking relief from sections 61.160(b) and 61.169. The relief sought would allow the petitioner to issue documentation to pilots employed by Empire Airlines to apply for an airline transport pilot certificate with reduced aeronautical experience. Empire Airlines seeks to utilze these pilots' initial basic indoctrination training, general subjects training, type rating training, and training that conforms to Advisory Circular 61.138, in lieu of an Associate's or Bachelor's degree program with corresponding aviation-related coursework at an institution of high education which has received an FAA Letter of Authorization.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway in California

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review of actions by the California Department of Transportation (Caltrans), pursuant to 23 USC 327, and

SUMMARY: The FHWA, on behalf of Caltrans, is issuing this notice to announce actions taken by Caltrans, that are final within the meaning of 23 U.S.C. 139(*l*)(1). The actions relate to the Bayview Transportation Improvements Project (Federal-aid project number HP21L–5934(115)) affecting various streets within Bayview and Hunters Point in the City and County of San Francisco, State of California. Those actions grant approval for the project.

DATES: By this notice, the FHWA, on behalf of Caltrans, is advising the public of final agency actions subject to 23 U.S.C. 139(*l*)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before April 13, 2015. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Boris Deunert, Senior Environmental Planner, Caltrans District 4 Office of Local Assistance, 12th Floor, 111 Grand

Avenue, Oakland, CA 94623, (Tel: 510 286 6371, Email: *boris.deunert@dot.ca.gov*) Office Hours: 7:00 a.m. to 4:30 p.m. Mon. to Fri., Pacific Standard Time

SUPPLEMENTARY INFORMATION: Effective July 1, 2007, the Federal Highway Administration (FHWA) assigned, and the California Department of Transportation (Caltrans) assumed, environmental responsibilities for this project pursuant to 23 U.S.C. 327. Notice is hereby given that Caltrans has taken final agency actions subject to 23 U.S.C. 139(*l*)(1) by issuing a Finding of No Significant Impact (FONSI) for the following highway project in the State of California: The Bayview Transportation Improvements project is a federally funded project sponsored by the Public Works Department of the City and County of San Francisco. The project aims to improve traffic operations, accommodate approved and planned growth, and develop a more direct access route from U.S. Highway 101 and Interstate 280 to the Candlestick Point and Hunters Point Shipyard areas of San Francisco. Within the project area, the proposals include new and improved roadways, transit improvements (including infrastructure for a Bus Rapid Transit and a new Transit Center), and bicycle and pedestrian improvements. The Caltrans Federal-aid project number is HP21L–5934 (115). The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Final Environmental Assessment (FEA) for the project, approved on 29 August 2014, and in the Finding of No Significant Impact (FONSI) issued on 29 August 2014, and in other documents in the Caltrans project records. The FEA, FONSI, and other project records are available by contacting Caltrans at the address provided above. The FEA and FONSI can be viewed and downloaded from the project Web site at *http://sfdpw.org/index.aspx?page=59* , or viewed at public libraries in the project area. This notice applies to all Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including, but not limited to:

1. National Environmental Policy Act (NEPA) [42.U.S.C. 4321–4351]; Federal-Aid Highway Act [23 U.S.C. 109 and 23 U.S.C. 128]
2. Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303]
3. National Historic Preservation Act of 1966, as amended [16 U.S.C. 470 (f) et sq.)
4. Section 7 of the Endangered Species Act of 1973 (ESA) [16 U.S.C 1531–1544 and Section 1536]
5. Clean Air Act [42 U.S.C. 7401–7671 (q)]
6. Floodplain Management, Executive Order 11988
7. Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations, Executive Order 12898

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(*l*)(1).

Issued on: October 22, 2014.

Gary Sweeten,

North Team Leader, Project Delivery Team, Federal Highway Administration, Sacramento, California.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Availability Regarding a Record of Decision for the Virginia Avenue Tunnel Reconstruction Project in Washington, DC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Availability Regarding a Record of Decision (ROD) for the Virginia Avenue Tunnel Reconstruction Project in Washington, DC.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) and Federal Highway Administration (FHWA) procedures, this notice announces the availability of the ROD regarding the Virginia Avenue Tunnel Reconstruction Project in Washington, DC The Division Administrator, FHWA-District of Columbia signed the ROD on November 4, 2014.

ADDRESSES: The FHWA ROD for the Virginia Avenue Reconstruction Project can be viewed and downloaded from the project Web site at *http://www.virginiaavenuetunnel.com* or viewed at the following locations: Southeast Neighborhood Library, 403 7th Street SE., Washington, DC 20003; or the Southwest Neighborhood Library, 900 Wesley Place SW., Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Hicks, Environmental/Urban Engineer, 1990 K Street, Suite 510, Washington, DC 20006–1103, (202) 219–3513; email: *Michael.Hicks@dot.gov.* The FHWA District of Columbia Division normal business hours are 8 a.m. to 4:30 p.m. (Eastern Time). You may also contact Mr. Faisal Hameed, Deputy Chief Engineer, Project Development & Environment, Infrastructure Project Management Administration (IPMA), District Department of Transportation, 55 M Street SE., Suite 500, Washington, DC 20003; telephone: 202–671–2326; email: *Faisal.Hameed@dc.gov.* The District Department of Transportation normal business hours are 8:15 a.m. to 4:45 p.m.

SUPPLEMENTARY INFORMATION: The Virginia Avenue Tunnel Reconstruction Project ROD was developed through preparation of the Final Environmental Impact Statement for the Virginia Avenue Tunnel Reconstruction Project in the District of Columbia. CSX Transportation, Inc. (CSX), the owner of the Virginia Avenue Tunnel, requested approval from FHWA to allow the short-term closure of I–695 ramps located at 6th and 8th Streets SE and occupancy of a portion of the 11th Street Bridge right-of-way located on Interstate 695 (I–695) to allow the reconstruction of the Virginia Avenue Tunnel. The tunnel is located in the Capitol Hill neighborhood of Washington, DC beneath eastbound Virginia Avenue SE. from 2nd Street SE. to 9th Street SE.; Virginia Avenue Park between 9th and 11th Streets; and the 11th Street Bridge right-of-way. The tunnel is also aligned on the south side of I-695. The final agency actions documented in the FHWA Record of Decision (ROD) were taken in full consideration of the information presented in the Draft Environmental Impact Statement approved on July 2, 2013, the Final Environmental Impact Statement approved on June 5, 2014, public and agency comments, and in other documents in the FHWA administrative record. The final agency actions also considered the DEIS public hearing held on July 31, 2013; and public meetings held on September 14, 2011, November 30, 2011, May 21, 2012, September 27, 2012, July 1, 2014 and July 31, 2014.

Authority: 23 CFR 771.127; 49 CFR 1.81, 1.85.

Issued On: November 4, 2014.

Joseph C. Lawson,

Division Administrator, District of Columbia.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2014–0133]

Agency Information Collection Activities; New Information Collection: State Commercial Driver's License Program Plan

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for its review and approval and invites public comment. The FMCSA requests approval of a new ICR titled, *''State Commercial Driver's License Program Plan.''* as a result of requirements from Section 32305 of the Moving Ahead for Progress in the 21st Century Act (MAP–21), Public Law 112–141, dated July 6, 2012. The Act requires States to submit a plan to the Secretary describing the actions the State will take to address any deficiencies in the State's commercial driver's license (CDL) program, as identified by the Secretary in the most recent audit of the program. This ICR is needed to ensure that the States are complying with notification and recordkeeping requirements for information related to testing, licensing, violations, convictions and disqualifications and that the information is accurate, complete and transmitted and recorded within certain time periods as required by the Commercial Motor Vehicle Safety Act of 1986 (CMVSA), as amended.

DATES: We must receive your comments on or before January 12, 2015.

ADDRESSES: You may submit comments identified by Federal Docket Management System (FDMS) Docket Number FMCSA–2014–0133 using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Services; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the Agency name and docket number. For detailed instructions on submitting comments and additional information on the exemption process, see the Public Participation heading below. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov,* and follow the online instructions for accessing the dockets, or go to the street address listed above.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement for the Federal Docket Management System published in the **Federal Register** on January 17, 2008 (73 FR 3316), or you may visit *http://edocket.access.gpo.gov/2008/pdfE8–794.pdf.*

Public Participation: The Federal eRulemaking Portal is available 24 hours each day, 365 days each year. You can obtain electronic submission and retrieval help and guidelines under the ''help'' section of the Federal eRulemaking Portal Web site. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments online. Comments received after the comment closing date will be included in the docket and will be considered to the extent practicable.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Gordon, Office of State Programs, Commercial Driver's License Division (MC–ESL),, Federal Motor Carrier Safety Administration, West Building 6th Floor, 1200 New Jersey Avenue SE., Washington, DC 20590. Telephone: 304–549–2651; email *michael.gordon2@dot.gov.*

SUPPLEMENTARY INFORMATION:

Background: The FMCSA is responsible for compliance and oversight of State Drivers Licensing Agencies (SDLAs). SDLAs are required to comply with the requirements of 49 CFR Part 384, titled ''State Compliance with Commercial Driver's License Program.'' Section 32305 of MAP–21 amends 49 U. S.C. 31311 by adding paragraph (d) State Commercial Driver's License Program Plan requirements. In paragraph (d)(1), a State shall submit a plan to the Secretary of Transportation for complying with the requirements under this section during the period beginning on the date the plan is submitted and ending on September 30, 2016. In paragraph (d)(2), a plan submitted by a State under paragraph (d)(1) shall identify—(A) the actions that the State will take to address any deficiencies in the State's Commercial Driver's License Program, as identified by the Secretary in the most recent audit of the program; and (B) other actions that the State will take to comply with the requirements under subsection (a). Paragraph (d)(3) establishes the following: ''(A) Implementation Schedule—A plan submitted by a State under paragraph (d)(1) shall include a schedule for the implementation of the actions identified under paragraph (d)(2). In establishing the schedule, the State shall prioritize actions to address any deficiencies highlighted by the Secretary as critical in the most recent audit of the program. (B) Deadline for Compliance with the requirements.—A plan submitted by a State under paragraph (1) shall include assurances that the State will take the necessary actions to comply with the requirements of subsection (a) not later than September 30, 2015.

This collection of information supports the DOT strategic goal of safety by requiring the States to assure that drivers of CMVs are properly licensed according to all applicable Federal requirements

States will be required to complete a Commercial Driver's License Program Plan using a spreadsheet or pdf document that will be provided by FMCSA to each SDLA. The plan will be completed by the State and provided to FMCSA's CDL Division via the Automated Compliance Review System (ACRS), for review and concurrence. FMCSA may reject a State's Commercial Driver's License Program Plan if it is determined to be deficient by not adequately addressing the State's deficiencies, and/or assurances. Within the plan, the State will identify any deficiencies from the most recent audit and will be required to provide detailed information to demonstrate how the State will obtain compliance with Section 32305(a) of MAP–21 by September 30, 2015 and remain in compliance through September 30, 2016. This will enable FMCSA to determine a State's level of compliance with the CDL requirements. Previous to

MAP–21, there was no requirement for a SDLA to submit a Commercial Driver's License Program Plan.

The spreadsheet was developed by FMCSA. The spreadsheet will be sent to each SDLA. The SDLA will complete the spreadsheet and send directly to FMCSA via electronic transmission. FMCSA will then review each plan to assess each State's level of compliance with the CDL requirements. The spreadsheets will then be uploaded into FMCSA's Automated Compliance Review System (ACRS). Appropriate feedback will be provided from MC–ESL to each State after review.

Title: State Commercial Driver's License Program Plan.

OMB Control Number: 2126–00XX.

Type of Request: New collection.

Respondents: State Driver Licensing Agencies (SDLAs).

Estimated Number of Respondents: 51 State respondents.

Estimated Time per Response: 40 hours per SDLA.

Expiration Date: New collection.

Frequency of Response: One-time effort.

Estimated Total Annual Burden: 2,040 hours.

FMCSA estimates that each SDLA would need approximately 40 hours to complete the State Commercial Driver's License Program Plan and submit it to FMCSA. The Program Plan is completed on a one-time basis as required by section 32305 of MAP–21. There is no continuing information collection function associated with submitting this Program Plan. The Program Plan asks for information which is readily available to the filer.

For the purposes of the CDL program, the District of Columbia is considered a State. Therefore, there are 51 State responses with an estimated 40 hours per response to complete and submit the Program Plan to FMCSA.

The FMCSA estimates the SDLAs total annual burden is 2,040 hours (51 responses × 40 hours = 2,040 hours).

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize or include your comments in the request for OMB's clearance of this information collection.

Issued under the authority of 49 CFR 1.87 on: November 4, 2014.

G. Kelly Regal,

Associate Administrator for Office of Research and Information Technology and Chief Information Officer.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2010–0167]

RIN 2126–AB20

Electronic Logging Devices and Hours of Service Supporting Documents; Research Report on Attitudes of Truck Drivers and Carriers on the Use of Electronic Logging Devices and Driver Harassment

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of Availability of Research Report.

SUMMARY: On March 28, 2014, the Federal Motor Carrier Safety Administration (FMCSA) published a Supplemental Notice of Proposed Rulemaking (SNPRM) that proposed amendments to the Federal Motor Carrier Safety Regulations (FMCSRs) to establish: Minimum performance and design standards for hours-of-service (HOS) electronic logging devices (ELDs); requirements for the mandatory use of these devices by drivers currently required to prepare HOS records of duty status (RODS); requirements concerning HOS supporting documents; and measures to address concerns about harassment resulting from the mandatory use of ELDs. FMCSA announces the availability of a new report: ''Attitudes of Truck Drivers and Carriers on the Use of Electronic Logging Devices and Driver Harassment.'' This project surveyed drivers on their attitudes regarding carrier harassment and examined whether reported harassment experiences varied due to the hours-of-service logging method used by the driver. The survey is an effort to further address the potential for harassment associated with ELDs and provides results that are consistent with the Agency's discussion of harassment in the ELD SNPRM. A copy of the report has been placed in the docket referenced at the beginning of this notice.

DATES: Comments must be received by December 15, 2014.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2010–0167 addressing the Research Report using any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: For information concerning this report, please contact Mr. Albert Alvarez, Research Division of the Office of Analysis, Research, and Technology, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001 or by telephone at 202–385–2377.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials pertaining to the report. This notice does not extend the earlier comment period pertaining to the ELD SNPRM published March 28, 2104.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2010–0167), indicate the specific section of the report to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and put the docket number, ''FMCSA–2010–0167'' in the ''Keyword'' box, and click ''Search.'' When the new screen

appears, click on ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

FMCSA will consider all comments and material received during the comment period pertaining to the report.

Viewing Comments and Documents

To view comments, as well as other documents available in the docket, go to *http://www.regulations.gov* and insert the docket number, ''FMCSA–2010–0167'' in the ''Keyword'' box and click ''Search.'' Next, click the ''Open Docket Folder'' button and choose the document listed to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m. Monday through Friday, except Federal holidays.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov*, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy*.

II. The Research Report

This research report, titled, ''Attitudes of Truck Drivers and Carriers on the Use of Electronic Logging Devices and Driver Harassment,'' examines the nature of harassment as viewed by truck drivers who are required to record their hours of service for the purposes of Federal reporting regulations. As it examines their perceptions, this research also reviews:

- Whether drivers' experiences and interactions with their carriers fall into the category of harassment.
- If these experiences occur with any regularity (once or twice a month or more).
- Whether these interactions are made possible as a result of the carrier using HOS data collected via an ELD and whether it was a standalone ELD or part of a comprehensive system that included ELD capability.

These experiences and perceptions are reviewed both for truck drivers and for carrier personnel who manage truck drivers. The data collected from carrier personnel is similar to that collected from the drivers; that is, carriers were asked about the regularity of specific interactions with drivers at their firm, and whether the drivers might consider such actions (if they occur) harassment.

Drivers are analyzed according to the systems they used for logging their HOS (i.e., paper or ELD). Carrier personnel are also considered according to the primary HOS logging method used by their company.

Additional data was collected regarding attitudes about ELDs, reactions to definitions of harassment and coercion developed by the FMCSA, ways in which drivers are compensated and evaluated, and profiles of both the drivers and the carrier companies.

For the complete report, visit docket number FMCSA–2010–0167 or *http://www.fmcsa.dot.gov/safety/research-and-analysis/publications*.

Issued on: November 5, 2014.

G. Kelly Regal,

Associate Administrator, Office of Research and Information Technology and Chief Information Officer.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Notice of Intent To Prepare an Environmental Impact Statement and Section 4(f) Evaluation for the I–20 East Transit Initiative Heavy Rail Transit Extension in DeKalb County, Georgia

AGENCY: Federal Transit Administration (FTA), (DOT).

ACTION: Notice of intent to prepare an environmental impact statement (EIS) and section 4(f) evaluation.

SUMMARY: The Federal Transit Administration (FTA) and the Metropolitan Atlanta Rapid Transit Authority (MARTA) intend to prepare an Environmental Impact Statement (EIS) and an evaluation per 49 U.S.C. 303 and 23 CFR part 774 (''Section 4(f)'') for MARTA's I–20 East Heavy Rail Transit (HRT) Extension project, which would extend the existing Blue Line from the Indian Creek MARTA Station to the Mall at Stonecrest in eastern DeKalb County. The EIS and Section 4(f) Evaluation will be prepared in accordance with regulations implementing the National Environmental Policy Act (NEPA), Section 4(f), as well as FTA's regulations and guidance implementing NEPA (40 CFR parts 1500 through 1508 and 23 CFR 771.105).

The extension of the existing MARTA Blue Line HRT was selected as a component of a multimodal Locally Preferred Alternative (LPA) resulting from the I–20 East Transit Initiative Detailed Corridor Analysis (DCA) completed in April 2012. The LPA also includes new Bus Rapid Transit (BRT) service along I–20 between downtown Atlanta and a new station at Wesley Chapel Road, east of I–285 in DeKalb County. The NEPA analysis for the BRT project is being advanced separately in an Environmental Assessment (EA).

The FTA originally published a NOI to perform federal environmental review for the entire I–20 East Transit Initiative LPA on August 28, 2012 (77 FR 52128). Project scoping activities for the I–20 East Transit Initiative LPA occurred in September 2012. In today's issue of the **Federal Register**, FTA is rescinding the August 28, 2012 NOI and issuing this notice to advise interested agencies and the public regarding updates to the Purpose and Need of the LPA that have occurred since the scoping activities. Specifically, the Purpose and Need for both the HRT Extension project and the BRT project have been revised to reflect their distinct and independent utility. The revised Purpose and Need for the HRT Extension project is presented later in this Notice.

SUPPLEMENTARY INFORMATION:

Description of the Proposed Project and Study Area

The first phase of the I–20 East Transit Initiative was the two year-long DCA. This DCA built upon a number of transit studies previously completed in the corridor and identified and evaluated transit improvements in the I–20 East Corridor from downtown Atlanta to the Mall at Stonecrest in eastern DeKalb County. The result of the DCA was the selection of a multimodal LPA comprised of an extension of the existing Blue heavy rail transit (HRT) line from MARTA's Indian Creek Station to the Mall at Stonecrest in eastern DeKalb County and new BRT service along I–20 between downtown Atlanta and a new station at Wesley Chapel Road, east of I–285 in DeKalb County.

The EIS, which focuses on the HRT Extension, has a study area that extends from the MARTA Indian Creek Station

south for 3.5 miles along I–285, then east for approximately 8.5 miles to the Mall at Stonecrest. The study area extends up to one-half mile on each side of the alignment in order to evaluate the direct, indirect, and cumulative impacts associated with the implementation of transit in the corridor.

Purpose and Need

The LPA presented to the public at Public Scoping Meetings on September 10, 11, and 13, 2012 included both the BRT and HRT components of the LPA. The BRT component is a separate project that is being addressed in an Environmental Assessment. The EIS Purpose and Need has been revised to specifically address the HRT Extension project as follows:

The purpose of the I–20 East HRT Extension project is to increase east-west mobility options between the City of Atlanta and Southeast DeKalb County and to improve transit access between residential areas and activity and employment centers both within the corridor and across the region—with minimal impacts to private property, historical resources and neighborhoods, and parklands by:

- Providing reliable and efficient transit service with sufficient capacity to address future travel demand projected in the I–20 corridor through a one-seat ride into downtown Atlanta and other activity centers in the corridor.
- Providing an alternative to automobile travel on congested roadways in the corridor, particularly the most congested areas east of I–285.
- Connecting to the existing MARTA rail network, thereby addressing a gap in the current system and improving regional transit accessibility and access to jobs for those who live and work in South DeKalb County.
- Completing an important link in the region's long term transit vision, Concept 3.
- Encouraging redevelopment and revitalization in key activity centers through investment opportunities around fixed transit stations.

The project is needed to:

- Meet the needs of corridor residents by providing a high capacity transit alternative to the current transportation system in a corridor that does not have sufficient capacity or planned capacity to address future travel demand. Few roadway investments are planned along the I–20 East Corridor between I–285 and the Mall at Stonecrest through 2040.
- Address increasing congestion and unreliable travel times in the corridor by providing an alternative to automobile trips into and out of Atlanta. Transit travel times on the current MARTA and Georgia Regional Transportation Authority (GRTA) Xpress bus systems to destinations east of I–285 are expected to double between 2010 and 2040, with the majority of travel times greater than 80 minutes.
- Improve regional mobility and access to jobs and services for corridor residents, especially the transit-dependent population. The I–20 East corridor has a higher transit-dependent population than the metro Atlanta region and the State of Georgia, with approximately 10% zero-car households.
- Provide a direct link to the existing MARTA rail and bus network for residents of South DeKalb County, closing a critical gap in the existing network for the historically underserved and choice transit riders in the corridor. By offering a connection into the existing MARTA heavy rail system, residents and workers in the area would be provided with a one-seat ride to a direct connection to the City of Atlanta, the City of Decatur, DeKalb County and various regional employment centers. Citizens east of I–285 currently have a constrained number of options to access the MARTA system, requiring travel either by bus or by car, experiencing (and contributing to) congested roadway conditions and unreliable transit travel times due to operations in mixed traffic. This expansion will close a critical gap in the existing network by providing a proximate, direct, and reliable link for the traditionally underserved and choice transit riders in the corridor.
- Implement the region's future transit vision as well as regional and local land use and development plans for future investment in the corridor. Both the Atlanta Regional Commission's (ARC) Plan 2040 financially constrained regional transportation plan and the Concept 3 Transit Vision include the I–20 Corridor as a key link in the future regional transit network. The Regional Development Plan, DeKalb County Comprehensive Transportation Plan, and numerous local plans and studies incorporate fixed guideway transit as a catalyst for redevelopment in the I–20 East corridor.
- Promote reinvestment by providing the transit infrastructure needed to support investment in transit oriented development at key activity centers, such as the Wesley Chapel Road and Mall at Stonecrest. There is significant projected economic benefit for the corridor and the region through transit oriented development and related investment opportunities that will create jobs, revitalize key areas, and contribute to a transit oriented development pattern served directly by the MARTA system.

Study Alternatives

MARTA completed a two year-long DCA that evaluated potential alignments and transit technologies for transit improvements in the I–20 East Corridor. From multiple alignment and transit technology alternatives, an LPA was selected and adopted by the MARTA Board of Directors in April 2012. The LPA included both a BRT and an HRT Extension project. The EIS will evaluate vertical and horizontal alternatives of the HRT portion of the adopted LPA as well as a No-Build alternative. These alternatives are described as follows:

1. No Build Alternative: This alternative reflects the existing transportation system plus any committed MARTA and Georgia Regional Transit Authority (GRTA) local and express bus service in the corridor, as well as all other transportation investments included in the Atlanta Regional Commission's (ARC) long-range transportation plan. ARC is the Metropolitan Planning Organization (MPO) for the Atlanta urbanized area. The I–20 East BRT project is included in the No-Build Alternative because its implementation is expected to precede that of the I–20 East HRT Extension by several years. NEPA requires the consideration of a No Build Alternative as a means of comparing and evaluating the impacts and benefits of the Build Alternative.

2. Build Alternative: The Build Alternative to be evaluated in the EIS is the extension of the existing MARTA east-west HRT line from the Indian Creek Station, south parallel to I–285, then east parallel to I–20 to the Mall at Stonecrest in eastern DeKalb County. The HRT service would include new stations at Covington Highway, Wesley Chapel Road, Panola Road, Lithonia Industrial Blvd., and the Mall at Stonecrest. It is expected that the HRT service would be implemented in two phases. The first phase would extend the existing MARTA east-west HRT line from Indian Creek Station to Wesley Chapel Road. The second phase would extend from Wesley Chapel Road to the Mall at Stonecrest. The HRT alignment would generally be located adjacent to the interstate and would utilize Georgia Department of Transportation (GDOT) right-of-way wherever possible.

The scope of the environmental analysis and procedures shared in the NOI published August 28, 2012 and at

the Public Scoping Meetings in September of 2012 remain unchanged.

Yvette G. Taylor,

Regional Administrator, FTA Region IV.

[FR Doc. 2014–26769 Filed 11–12–14; 8:45 am]

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Notice to Rescind Notice of Intent To Prepare an Environmental Impact Statement and Environmental Assessment for the I–20 East Transit Initiative in the City of Atlanta and DeKalb County, Georgia

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Rescind Notice of Intent to prepare an environmental impact statement and environmental assessment.

SUMMARY: The FTA in cooperation with the Metropolitan Atlanta Rapid Transit Authority (MARTA) is issuing this notice to advise the public that the Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) and Environmental Assessment (EA) for the proposed public transportation improvement project in the City of Atlanta and DeKalb County, Georgia is being rescinded.

FOR FURTHER INFORMATION CONTACT: Mr. Stan Mitchell, Environmental Protection Specialist, Federal Transit Administration Region IV, 230 Peachtree Street NW., Atlanta, GA 30303, phone 404–865–5643, email *stanley.a.mitchell@dot.gov.*

SUPPLEMENTARY INFORMATION: The FTA, as lead federal agency, and MARTA published a NOI on August 28, 2012 (77 FR 52128) to prepare an EIS and EA for the MARTA I–20 East Transit Initiative project. This project would extend the existing east-west rail Heavy Rail Transit (HRT) line from the Indian Creek Station to the Mall at Stonecrest in eastern DeKalb County and also create a new Bus Rapid Transit (BRT) service along I–20 between downtown Atlanta and a new station at Wesley Chapel Road, east of I–285 in DeKalb County.

Since that time, FTA and MARTA have conducted scoping activities which have led to reevaluating the project in terms of Purpose and Need. Based on these scoping activities, FTA is rescinding the August 28, 2012 NOI, and, in today's issue of the **Federal Register**, is issuing a new NOI for the HRT extension. The environmental impacts of the BRT service along I–20 will be evaluated as a separate project in an environmental assessment. No changes will be made to the HRT or BRT services as described in the August 28, 2012 NOI. Comments and questions concerning the proposed action should be directed to FTA at the address provided above.

Yvette G. Taylor,

Regional Administrator, FTA Region IV.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. DOT–MARAD 2014–0140]

Request for Comments of a Previously Approved Information Collection: Request for Waiver of Service Obligation, Request for Deferment of Service Obligation, Application for Review

AGENCY: Maritime Administration (MARAD), Department of Transportation.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below is being forwarded to the Office of Management and Budget (OMB) for review and comments. A **Federal Register** Notice with a 60-day comment period soliciting comments on the following information collection was published on July 14, 2014 (**Federal Register** 40836, Vol. 79, No. 134).

DATES: Comments must be submitted on or before December 15, 2014.

FOR FURTHER INFORMATION CONTACT: Anne Wehde, 202–366–5469, Office of Maritime Workforce Development, Maritime Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Title: Request for Waiver of Service Obligation, Request for Deferment of Service Obligation, Application for Review.

OMB Control Number: 2133–0510.

Type of Request: Renewal of a Previously Approved Information Collection.

Abstract: This information collection is essential for determining if a student or graduate of the United States Merchant Marine Academy (USMMA) or subsidized student or graduate of a State maritime academy has a waive able situation preventing them from fulfilling the requirements of a service obligation contract signed at the time of their enrollment in a Federal maritime training program. It also permits the Maritime Administration (MARAD) to determine if a graduate, who wishes to defer the service obligation to attend graduate school, is eligible to receive a deferment. Their service obligation is required by law.

Affected Public: U.S. Merchant Marine Academy students and graduates, and subsidized students and graduates.

Estimated Number of Respondents: 11.

Estimated Number of Responses: 11.

Annual Estimated Total Annual Burden Hours: 3.30.

ADDRESSES: Send comments regarding the burden estimate, including suggestions for reducing the burden, to the Office of Management and Budget, Attention: Desk Officer for the Office of the Secretary of Transportation, 725 17th Street NW., Washington, DC 20503. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.93.

Dated: November 6, 2014.

Julie P. Agarwal,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. AB 290 (Sub-No. 370X)]

Norfolk Southern Railway Company—Discontinuance of Service Exemption—in Clermont, Brown and Adams Counties, Ohio

AGENCY: Surface Transportation Board, DOT.

ACTION: Correction to notice of petition for exemption.

On September 30, 2014, Norfolk Southern Railway Company (NSR) filed with the Surface Transportation Board a petition under 49 U.S.C. 10502 for exemption from the provisions of 49 U.S.C. 10903 to discontinue rail service over approximately 40.7 miles of rail line between milepost CT 32.83 at Williamsburg and milepost CT 73.50 at Plum Run in Clermont, Brown and Adams Counties, Ohio.

On October 20, 2014, notice of the petition for exemption was served and published in the **Federal Register** (79 FR 62,708). The notice erroneously stated that replies to the petition were due on or before October 30, 2014. This notice corrects that statement. Replies are due on or before November 10, 2014. All other information in the notice is correct.

Board decisions and notices are available on our Web site at ''*WWW.STB.DOT.GOV.''*

Decided: November 6, 2014.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Brendetta S. Jones,

Clearance Clerk.

BILLING CODE 4915–01–P

U.S.-CHINA ECONOMIC AND SECURITY REVIEW COMMISSION

Notice of Open Public Hearing

AGENCY: U.S.-China Economic and Security Review Commission.

ACTION: Notice of Official Public Release of the Commission's 2014 Annual Report to Congress on November 20, 2014, Washington, DC.

SUMMARY: Notice is hereby given of the following public hearing of the U.S.-China Economic and Security Review Commission.

Name: Dennis C. Shea, Chairman of the U.S.-China Economic and Security Review Commission. The Commission is mandated by Congress to investigate, assess, and report to Congress annually on ''the national security implications of the economic relationship between the United States and the People's Republic of China.'' Pursuant to this mandate, the Commission will hold an official public release of the Commission's 2014 Annual Report to Congress on November 20, 2014.

Purpose of Meeting: Pursuant to this mandate, the Commission will hold an official public conference in Washington, DC to release the 2014 Annual Report on November 20, 2014.

The Commission is subject to the Federal Advisory Committee Act (FACA) with the enactment of the Science, State, Justice, Commerce and Related Agencies Appropriations Act, 2006 that was signed into law on November 22, 2005 (Pub. L. 109–108). In accord with FACA, meetings of the Commission to make decisions concerning the substance and recommendations of its 2014 Annual Report to Congress are open to the public.

Topics Addressed

The Commission's 2014 Annual Report contains the following chapters and sections:

Chapter 1: U.S.-China Economic and Trade Relations
- Section 1: Year in Review: Economics and Trade
- Section 2: U.S.-China Bilateral Trade and Economic Challenges
- Section 3: China's Health Care Industry, Drug Safety, and Market Access for U.S. Medical Goods and Services
- Section 4: U.S.-China Clean Energy Cooperation

Chapter 2: Military and Security Issues Involving China
- Section 1: Year in Review: Security and Foreign Affairs
- Section 2: China's Military Modernization
- Section 3: China's Domestic Stability

Chapter 3: China and the World
- Section 1: China and Asia's Evolving Security Architecture
- Section 2: Recent Developments in China's Relationship with North Korea
- Section 3: Taiwan
- Section 4: Hong Kong

Location, Date and Time: Rayburn House Office Building, Room 2118. Thursday, November 20, 2014, 9:30 a.m. Eastern Time. Please check our Web site, *www.uscc.gov,* for possible changes to public meeting. *Reservations are not required to attend the hearing.*

FOR FURTHER INFORMATION CONTACT: Any member of the public seeking further information concerning the hearing should contact Reed Eckhold, 444 North Capitol Street NW., Suite 602, Washington, DC 20001; phone: 202–624–1496, or via email at *reckhold@uscc.gov. Reservations are not required to attend the hearing.*

Authority: Congress created the U.S.-China Economic and Security Review Commission in 2000 in the National Defense Authorization Act (Public Law 106–398), as amended by Division P of the Consolidated Appropriations Resolution, 2003 (Pub. L. 108–7), as amended by Public Law 109–108 (November 22, 2005).

Dated: November 7, 2014.

Michael Danis,

Executive Director, U.S.-China Economic and Security Review Commission.

[FR Doc. 2014–26892 Filed 11–12–14; 8:45 am]

BILLING CODE 1137–00–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0778]

Agency Information Collection (Disability Benefits Questionnaires—Group 3) Activity Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 15, 2014.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov*. Please refer to ''OMB Control No. 2900–0778'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Titles:

a. Central Nervous System and Neuromusculo Diseases, Disability Benefits Questionnaire, VA Form 21–0960C–5.

b. Headaches (Including Migraine Headaches), Disability Benefits Questionnaire, VA Form 21–0960C–8.

c. Multiple Sclerosis (MS), Disability Benefits Questionnaire, VA Form 21–0960C–9.

d. Esophageal Disorders (Including GERD), Disability Benefits Questionnaire, VA Form 21–0960G–1.

e. Gallbladder and Pancreas Conditions, Disability Benefits Questionnaire, VA Form 21–0960G–2.

f. Intestinal Disorders (Other Than Surgical or Infectious) (Including Irritable Bowel Syndrome, Crohn's

Disease, Ulcerative Colitis, and Diverticulitis) Disability Benefits Questionnaire, VA Form 21–0960G–3.

g. Intestines Surgical and/or Infectious Intestinal Disorders (Bowel Resection, Colostomy, Ileostomy, Bacterial and Parasitic Infections) Disability Benefits Questionnaire, VA Form 21–0960G–4.

h. Hepatitis, Cirrhosis and Other Liver Conditions, Disability Benefits Questionnaire, VA Form 21–0960G–5.

i. Peritoneal Adhesions Disability Benefits Questionnaire, VA Form 21–0960G–6.

j. Stomach and Duodenal Conditions (Not Including GERD or Esophageal Disorders) Disability Benefits Questionnaire, VA Form 21–0960G–7.

k. Infectious Intestinal Disorders, Including Bacterial and Parasitic Infections Disability Benefits Questionnaire, VA Form 21–0960G–8.

l. Rectum and Anus Disability Benefits Questionnaire, VA Form 21–0960H–2.

m. Breast Conditions and Disorders Disability Benefits Questionnaire, VA Form 21–0960K–1.

n. Gynecological Conditions Disability Benefits Questionnaire, VA Form 21–0960K–2.

o. Sleep Apnea Disability Benefits Questionnaire, VA Form 21–0960L–2.

p. Osteomyelitis Disability Benefits Questionnaire, VA Form 21–0960M–11.

q. Ear Conditions (Including Vestibular and Infectious) Disability Benefits Questionnaire, VA Form 21–0960N–1.

OMB Control Number: 2900–0778.

Type of Review: Revised collection.

Abstract: Data collected on VA Form 21–0960 series will be used obtain information from claimants treating physician that is necessary to adjudicate a claim for disability benefits.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on April 15, 2014, at pages 48296–48297.

Affected Public: Individuals or households.

Estimated Annual Burden:

a. VA Form 21–0960C–5—5,000.
b. VA Form 21–0960C–8—3,750.
c. VA Form 21–0960C–9—7,500.
d. VA Form 21–0960G–1—10,000.
e. VA Form 21–0960G–2—1,250.
f. VA Form 21–0960G–3—1,250.
g. VA Form 21–0960G–4—1,250.
h. VA Form 21–0960G–5—5,000.
i. VA Form 21–0960G–6—1,250.
j. VA Form 21–0960G–7—2,500.
k. VA Form 21–0960G–8—1,250.
l. VA Form 21–0960H–2—2,500.
m. VA Form 21–0960K–1—7,500.
n. VA Form 21–0960K–2—10,000.
o. VA Form 21–0960L–2—1,250.
p. VA Form 21–0960M–11—10,000.
q. VA Form 21–0960N–1—6,250.

Estimated Average Burden per Respondent:

a. VA Form 21–0960C–5—30 minutes.
b. VA Form 21–0960C–8—15 minutes.
c. VA Form 21–0960C–9—45 minutes.
d. VA Form 21–0960G–1—15 minutes.
e. VA Form 21–0960G–2—15 minutes.
f. VA Form 21–0960G–3—15 minutes.
g. VA Form 21–0960G–4—15 minutes.
h. VA Form 21–0960G–5—30 minutes.
i. VA Form 21–0960G–6—15 minutes.
j. VA Form 21–0960G–7—15 minutes.
k. VA Form 21–0960G–8—15 minutes.
l. VA Form 21–0960H–2—15 minutes.
m. VA Form 21–0960K–1—15 minutes.
n. VA Form 21–0960K–2—30 minutes.
o. VA Form 21–0960L–2—15 minutes.
p. VA Form 21–0960M–11—15 minutes.
q. VA Form 21–0960N–1—15 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents:

a. VA Form 21–0960C–5—10,000.
b. VA Form 21–0960C–8—15,000.
c. VA Form 21–0960C–9—10,000.
d. VA Form 21–0960G–1—40,000.
e. VA Form 21–0960G–2—5,000.
f. VA Form 21–0960G–3—5,000.
g. VA Form 21–0960G–4—5,000.
h. VA Form 21–0960G–5—10,000.
i. VA Form 21–0960G–6—5,000.
j. VA Form 21–0960G–7—10,000.
k. VA Form 21–0960G–8—5,000.
l. VA Form 21–0960H–2—10,000.
m. VA Form 21–0960K–1—30,000.
n. VA Form 21–0960K–2—20,000.
o. VA Form 21–0960L2—5,000.
p. VA Form 21–0960M–11—40,000.
q. VA Form 21–0960N–1—25,000.

Dated: November 6, 2014.

By direction of the Secretary.

RIN 0938–AS12

Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule, Clinical Laboratory Fee Schedule, Access to Identifiable Data for the Center for Medicare and Medicaid Innovation Models & Other Revisions to Part B for CY 2015

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule with comment period.

SUMMARY: This major final rule with comment period addresses changes to the physician fee schedule, and other Medicare Part B payment policies to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services, as well as changes in the statute. See the Table of Contents for a listing of the specific issues addressed in this rule.

DATES: *Effective date:* The provisions of this final rule are effective on January 1, 2015, with the exception of amendments to parts 412, 413, and 495 which are effective October 31, 2014.

Comment date: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on December 30, 2014.

Compliance date: The compliance date for new data collection requirements in § 403.904(c)(8) is January 1, 2016.

ADDRESSES: In commenting, please refer to file code CMS–1612–FC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *www.regulations.gov*. Follow the instructions for ''submitting a comment.''

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1612–FC, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1612–FC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT: Donta Henson, (410) 786–1947 for any physician payment issues not identified below.

Gail Addis, (410) 786–4522, for issues related to the refinement panel.

Chava Sheffield, (410) 786–2298, for issues related to practice expense methodology, impacts, the sustainable growth rate, conscious sedation, or conversion factors.

Kathy Kersell, (410) 786–2033, for issues related to direct practice expense inputs.

Jessica Bruton, (410) 786–5991, for issues related to potentially misvalued services or work RVUs.

Craig Dobyski, (410) 786–4584, for issues related to geographic practice cost indices or malpractice RVUs.

Ken Marsalek, (410) 786–4502, for issues related to telehealth services.

Pam West, (410) 786–2302, for issues related to conditions for therapists in private practice or therapy caps.

Ann Marshall, (410) 786–3059, for issues related to chronic care management.

Marianne Myers, (410) 786–5962, for issues related to ambulance extender provisions.

Amy Gruber, (410) 786–1542, for issues related to changes in geographic area designations for ambulance payment.

Anne Tayloe-Hauswald, (410) 786–4546, for issues related to clinical lab fee schedule.

Corinne Axelrod, (410) 786–5620, for issues related to Rural Health Clinics or Federally Qualified Health Centers.

Renee Mentnech, (410) 786–6692, for issues related to access to identifiable data for the Centers for Medicare & Medicaid models.

Marie Casey, (410) 786–7861 or Karen Reinhardt, (410) 786–0189, for issues related to local coverage determination process for clinical diagnostic laboratory tests.

Frederick Grabau, (410) 786–0206, for issues related to private contracting/opt-out.

David Walczak, (410) 786–4475, for issues related to payment policy for substitute physician billing arrangements (locum tenens).

Melissa Heesters, (410) 786–0618, for issues related to reports of payments or other transfers of value to covered recipients.

Alesia Hovatter, (410) 786–6861, for issues related to physician compare.

Christine Estella, (410) 786–0485, for issues related to the physician quality reporting system.

Alexandra Mugge, (410) 786–4457, for issues related to EHR incentive program.

Patrice Holtz, (410) 786–5663, for issues related to comprehensive primary care initiative.

Terri Postma, (410) 786–4169, for issues related to Medicare Shared Savings Program.

Kimberly Spalding Bush, (410) 786–3232, for issues related to value-based modifier and improvements to physician feedback.

Elizabeth Holland, (410) 786–1309, Medicare EHR Incentive Program (Medicare payment adjustments and hardship exceptions).

Elisabeth Myers (CMS), (410) 786–4751, Medicare EHR Incentive Program (Medicare payment adjustments and hardship exceptions).

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of

the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

We note that CPT codes and descriptions are copyright 2013 American Medical Association. All Rights Reserved. CPT is a registered trademark of the American Medical Association (AMA). Applicable Federal Acquisition Regulations (FAR) and Defense Federal Acquisition Regulations (DFAR) apply.

I. Executive Summary and Background

A. Executive Summary

1. Purpose

This major final rule with comment period revises payment polices under the Medicare Physician Fee Schedule (PFS) and makes other policy changes related to Medicare Part B payment. These changes are applicable to services furnished in CY 2015.

2. Summary of the Major Provisions

The Social Security Act (the Act) requires us to establish payments under the PFS based on national uniform relative value units (RVUs) that account for the relative resources used in furnishing a service. The Act requires that RVUs be established for three categories of resources: Work, practice expense (PE); and malpractice (MP) expense; and, that we establish by regulation each year's payment amounts for all physicians' services, incorporating geographic adjustments to reflect the variations in the costs of furnishing services in different geographic areas. In this major final rule with comment period, we establish RVUs for CY 2015 for the PFS, and other Medicare Part B payment policies, to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services, as well as changes in the statute. In addition, this final rule with comment period includes discussions and proposals regarding:

- Misvalued PFS Codes.
- Telehealth Services.
- Chronic Care Management Services.
- Establishing Values for New, Revised, and Misvalued Codes.
- Updating the Ambulance Fee Schedule regulations.
- Changes in Geographic Area Delineations for Ambulance Payment.
- Updating the—
  - ++ Physician Compare Web site.
  - ++ Physician Quality Reporting System.
  - ++ Medicare Shared Savings Program.
  - ++ Electronic Health Record (EHR) Incentive Program.
- Value-Based Payment Modifier and the Physician Feedback Program.

3. Summary of Costs and Benefits

The Act requires that annual adjustments to PFS RVUs may not cause annual estimated expenditures to differ by more than $20 million from what they would have been had the adjustments not been made. If adjustments to RVUs would cause expenditures to change by more than $20 million, we must make adjustments to preserve budget neutrality. These adjustments can affect the distribution of Medicare expenditures across specialties. In addition, several proposed changes would affect the specialty distribution of Medicare expenditures. When considering the combined impact of work, PE, and MP RVU changes, the projected payment impacts are small for most specialties; however, the impact would be larger for a few specialties.

We have determined that this final rule with comment period is economically significant. For a detailed discussion of the economic impacts, see section VII. of this final rule with comment period.

B. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Act, ''Payment for Physicians' Services.'' The system relies on national relative values that are established for work, PE, and MP, which are adjusted for geographic cost variations. These values are multiplied by a conversion factor (CF) to convert the RVUs into payment rates. The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101–239, enacted on December 19, 1989) (OBRA '89), and the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101–508, enacted on November 5, 1990) (OBRA '90). The final rule published on November 25, 1991 (56 FR 59502) set forth the first fee schedule used for payment for physicians' services.

We note that throughout this final rule with comment period, unless otherwise noted, the term ''practitioner'' is used to describe both physicians and nonphysician practitioners (NPPs) who are permitted to bill Medicare under the PFS for services furnished to Medicare beneficiaries.

1. Development of the Relative Values

a. Work RVUs

The work RVUs established for the initial fee schedule, which was implemented on January 1, 1992, were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original work RVUs for most codes under a

cooperative agreement with the Department of Health and Human Services (HHS). In constructing the code-specific vignettes used in determining the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the federal government, and obtained input from numerous physician specialty groups.

As specified in section 1848(c)(1)(A) of the Act, the work component of physicians' services means the portion of the resources used in furnishing the service that reflects physician time and intensity. We establish work RVUs for new, revised and potentially misvalued codes based on our review of information that generally includes, but is not limited to, recommendations received from the American Medical Association/Specialty Society Relative Value Update Committee (RUC), the Health Care Professionals Advisory Committee (HCPAC), the Medicare Payment Advisory Commission (MedPAC), and other public commenters; medical literature and comparative databases; as well as a comparison of the work for other codes within the Medicare PFS, and consultation with other physicians and health care professionals within CMS and the federal government. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters, and the rationale for their recommendations.

b. Practice Expense RVUs

Initially, only the work RVUs were resource-based, and the PE and MP RVUs were based on average allowable charges. Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432, enacted on October 31, 1994), amended section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physicians' service beginning in 1998. We were required to consider general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising PEs. The PE RVUs continue to represent the portion of these resources involved in furnishing PFS services.

Originally, the resource-based method was to be used beginning in 1998, but section 4505(a) of the Balanced Budget Act of 1997 (Pub. L. 105–33, enacted on August 5, 1997) (BBA) delayed implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4-year transition period from the charge-based PE RVUs to the resource-based PE RVUs.

We established the resource-based PE RVUs for each physicians' service in a final rule, published on November 2, 1998 (63 FR 58814), effective for services furnished in CY 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, payment rates were not fully based upon resource-based PE RVUs until CY 2002. This resource-based system was based on two significant sources of actual PE data: The Clinical Practice Expert Panel (CPEP) data and the AMA's Socioeconomic Monitoring System (SMS) data. (These data sources are described in greater detail in the CY 2012 final rule with comment period (76 FR 73033).)

Separate PE RVUs are established for services furnished in facility settings, such as a hospital outpatient department (HOPD) or an ambulatory surgical center (ASC), and in nonfacility settings, such as a physician's office. The nonfacility RVUs reflect all of the direct and indirect PEs involved in furnishing a service described by a particular HCPCS code. The difference, if any, in these PE RVUs generally results in a higher payment in the nonfacility setting because in the facility settings some costs are borne by the facility. Medicare's payment to the facility (such as the outpatient prospective payment system (OPPS) payment to the HOPD) would reflect costs typically incurred by the facility. Thus, payment associated with those facility resources is not made under the PFS.

Section 212 of the Balanced Budget Refinement Act of 1999 (Pub. L. 106–113, enacted on November 29, 1999) (BBRA) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the **Federal Register** (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the CY 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating direct PE RVUs from the top-down to the bottom-up methodology beginning in CY 2007. We adopted a 4-year transition to the new PE RVUs. This transition was completed for CY 2010. In the CY 2010 PFS final rule with comment period, we updated the practice expense per hour (PE/HR) data that are used in the calculation of PE RVUs for most specialties (74 FR 61749). In CY 2010, we began a 4-year transition to the new PE RVUs using the updated PE/HR data, which was completed for CY 2013.

c. Malpractice RVUs

Section 4505(f) of the BBA amended section 1848(c) of the Act to require that we implement resource-based MP RVUs for services furnished on or after CY 2000. The resource-based MP RVUs were implemented in the PFS final rule with comment period published November 2, 1999 (64 FR 59380). The MP RVUs are based on commercial and physician-owned insurers' malpractice insurance premium data from all the states, the District of Columbia, and Puerto Rico. For more information on MP RVUs, see section II.C. of this final rule with comment period.

d. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review RVUs no less often than every 5 years. Prior to CY 2013, we conducted periodic reviews of work RVUs and PE RVUs independently. We completed five-year reviews of work RVUs that were effective for calendar years 1997, 2002, 2007, and 2012.

Although refinements to the direct PE inputs initially relied heavily on input from the RUC Practice Expense Advisory Committee (PEAC), the shifts to the bottom-up PE methodology in CY 2007 and to the use of the updated PE/HR data in CY 2010 have resulted in significant refinements to the PE RVUs in recent years.

In the CY 2012 PFS final rule with comment period (76 FR 73057), we finalized a proposal to consolidate reviews of work and PE RVUs under section 1848(c)(2)(B) of the Act and reviews of potentially misvalued codes under section 1848(c)(2)(K) of the Act into one annual process.

With regard to MP RVUs, we completed five-year reviews of MP that were effective in CY 2005 and CY 2010. This final rule with comment period establishes a five-year review for CY 2015.

In addition to the five-year reviews, beginning for CY 2009, CMS, and the RUC have identified and reviewed a number of potentially misvalued codes on an annual basis based on various identification screens. This annual review of work and PE RVUs for potentially misvalued codes was supplemented by the amendments to section 1848 of the Act, as enacted by section 3134 of the Affordable Care Act, which requires the agency to periodically identify, review and adjust values for potentially misvalued codes.

e. Application of Budget Neutrality To Adjustments of RVUs

As described in section VI.C. of this final rule with comment period, in accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if revisions to the RVUs caused expenditures for the year to change by more than $20 million, we make adjustments to ensure that expenditures did not increase or decrease by more than $20 million.

2. Calculation of Payments Based on RVUs

To calculate the payment for each physicians' service, the components of the fee schedule (work, PE, and MP RVUs) are adjusted by geographic practice cost indices (GPCIs) to reflect the variations in the costs of furnishing the services. The GPCIs reflect the relative costs of physician work, PE, and MP in an area compared to the national average costs for each component. (See section II.D. of this final rule with comment period for more information about GPCIs.)

RVUs are converted to dollar amounts through the application of a CF, which is calculated based on a statutory formula by CMS's Office of the Actuary (OACT). The CF for a given year is calculated using (a) the productivity-adjusted increase in the Medicare Economic Index (MEI) and (b) the Update Adjustment Factor (UAF), which is calculated by taking into account the Medicare Sustainable Growth Rate (SGR), an annual growth rate intended to control growth in aggregate Medicare expenditures for physicians' services, and the allowed and actual expenditures for physicians' services. The formula for calculating the Medicare fee schedule payment amount for a given service and fee schedule area can be expressed as:

$$\text{Payment} = [(\text{RVU work} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU MP} \times \text{GPCI MP})] \times \text{CF}.$$

3. Separate Fee Schedule Methodology for Anesthesia Services

Section 1848(b)(2)(B) of the Act specifies that the fee schedule amounts for anesthesia services are to be based on a uniform relative value guide, with appropriate adjustment of an anesthesia conversion factor, in a manner to assure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. Therefore, there is a separate fee schedule methodology for anesthesia services. Specifically, we establish a separate conversion factor for anesthesia services and we utilize the uniform relative value guide, or base units, as well as time units, to calculate the fee schedule amounts for anesthesia services. Since anesthesia services are not valued using RVUs, a separate methodology for locality adjustments is also necessary. This involves an adjustment to the national anesthesia CF for each payment locality.

4. Most Recent Changes to the Fee Schedule

The CY 2014 PFS final rule with comment period (78 FR 74230) implemented changes to the PFS and other Medicare Part B payment policies. It also finalized many of the CY 2013 interim final RVUs and established interim final RVUs for new and revised codes for CY 2014 to ensure that our payment system is updated to reflect changes in medical practice, coding changes, and the relative values of services. It also implemented section 635 of the American Taxpayer Relief Act of 2012 (Pub. L. 112–240, enacted on January 2, 2013) (ATRA), which revised the equipment utilization rate assumption for advanced imaging services furnished on or after January 1, 2014.

Also, in the CY 2014 PFS final rule with comment period, we announced the following for CY 2014: the total PFS update of −20.1 percent; the initial estimate for the SGR of −16.7 percent; and a CF of $27.2006. These figures were calculated based on the statutory provisions in effect on November 27, 2013, when the CY 2014 PFS final rule with comment period was issued.

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67, enacted on December 26, 2013) established a 0.5 percent update to the PFS CF through March 31, 2014 and the Protecting Access to Medicare Act of 2014 (Pub. L. 113–93, enacted on April 1, 2014) (PAMA) extended this 0.5 percent update through December 31, 2014. As a result, the CF for CY 2014 that was published in the CY 2014 final rule with comment period (78 FR 74230) was revised to $35.8228 for services furnished on or after January 1, 2014 and on or before December 31, 2014. The PAMA provides for a 0.0 percent update to the PFS for services furnished on or after January 1, 2015 and on or before March 31, 2015.

The Pathway for SGR Reform Act extended through March 31, 2014 several provisions of Medicare law that would have otherwise expired on December 31, 2013. The PAMA extended these same provisions further through March 31, 2015. A list of these provisions follows.

- The 1.0 floor on the work geographic practice cost index
- The exceptions process for outpatient therapy caps
- The manual medical review process for therapy services
- The application of the therapy caps and related provisions to services furnished in HOPDs

In addition, section 220 of the PAMA included several provisions affecting the valuation process for services under the PFS. Section 220(a) of the PAMA amended section 1848(c)(2) of the Act to add a new subparagraph (M). The new subparagraph (M) provides that the Secretary may collect or obtain information from any eligible professional or any other source on the resources directly or indirectly related to furnishing services for which payment is made under the PFS, and that such information may be used in the determination of relative values for services under the PFS. Such information may include the time involved in furnishing services; the amounts, types and prices of practice expense inputs; overhead and accounting information for practices of physicians and other suppliers, and any other elements that would improve the valuation of services under the PFS. This information may be collected or obtained through surveys of physicians or other suppliers, providers of services, manufacturers, and vendors; surgical logs, billing systems, or other practice or facility records; EHRs; and any other mechanism determined appropriate by the Secretary. If we use this information, we are required to disclose the source and use of the information in rulemaking, and to make available aggregated information that does not disclose individual eligible professionals, group practices, or information obtained pursuant to a nondisclosure agreement. Beginning with fiscal year 2014, the Secretary may compensate eligible professionals for submission of data.

Section 220(c) of the PAMA amended section 1848(c)(2)(K)(ii) of the Act to expand the categories of services that the Secretary is directed to examine for the purpose of identifying potentially misvalued codes. The nine new categories are as follows:

- Codes that account for the majority of spending under the PFS.
- Codes for services that have experienced a substantial change in the hospital length of stay or procedure time.
- Codes for which there may be a change in the typical site of service since the code was last valued.
- Codes for which there is a significant difference in payment for the same service between different sites of service.
- Codes for which there may be anomalies in relative values within a family of codes.
- Codes for services where there may be efficiencies when a service is furnished at the same time as other services.
- Codes with high intra-service work per unit of time.
- Codes with high PE RVUs.
- Codes with high cost supplies.

(See section II.B. of this final rule with comment period for more information about misvalued codes.).

Section 220(i) of the PAMA also requires the Secretary to make publicly available the information we considered when establishing the multiple procedure payment reduction (MPPR) policy for the professional component of advanced imaging procedures. The policy reduces the amount paid for the professional component when two advanced imaging procedures are furnished in the same session. The policy was effective for individual physicians on January 1, 2012 and for physicians in the same group practice on January 1, 2013.

In addition, section 220 of the PAMA includes other provisions regarding valuation of services under the PFS that take effect in future years. Section 220(d) of the PAMA establishes an annual target from CY 2017 through CY 2020 for reductions in PFS expenditures resulting from adjustments to relative values of misvalued services. The target is calculated as 0.5 percent of the estimated amount of expenditures under the fee schedule for the year. If the net reduction in expenditures for the year is equal to or greater than the target for the year, the funds shall be redistributed in a budget-neutral manner within the PFS. The amount by which such reduced expenditures exceed the target for the year shall be treated as a reduction in expenditures for the subsequent year, for purposes of determining whether the target has or has not been met. The legislation includes an exemption from budget neutrality of reduced expenditures if the target is not met. Other provisions of section 220 of the PAMA include a 2-year phase-in for reductions in RVUs of at least 20 percent for potentially misvalued codes that do not involve coding changes, and certain adjustments to the fee schedule areas in California. These provisions will be addressed as we implement them in future rulemaking.

On March 5, 2014, we submitted to MedPAC an estimate of the SGR and CF applicable to Medicare payments for physicians' services for CY 2015, as required by section 1848(d)(1)(E) of the Act. The actual values used to compute physician payments for CY 2015 will be based on later data and are scheduled to be published by November 1, 2014, as part of the CY 2015 PFS final rule with comment period.

C. Health Information Technology

The Department of Health and Human Services (HHS) believes all patients, their families, and their health care providers should have consistent and timely access to patient health information in a standardized format that can be securely exchanged between the patient, providers, and others involved in the patient's care. (HHS August 2013 Statement, ''Principles and Strategies for Accelerating Health Information Exchange,'' see *http://www.healthit.gov/sites/default/files/acceleratinghieprinciples_strategy.pdf*) HHS is committed to accelerating health information exchange (HIE) through the use of safe, interoperable health information technology (health IT), including electronic health records (EHRs), across the broader care continuum through a number of initiatives: (1) Alignment of incentives and payment adjustments to encourage provider adoption and optimization of health IT and HIE services through Medicare and Medicaid payment policies; (2) adoption of common standards and certification requirements for interoperable HIT; (3) support for privacy and security of patient information across all HIE-focused initiatives; and (4) governance of health information. These initiatives are designed to encourage HIE among health care providers, including professionals and hospitals eligible for the Medicare and Medicaid EHR Incentive Programs and those who are not eligible for the EHR Incentive Programs, and are designed to improve care delivery and coordination across the entire care continuum. For example, the Transition of Care Measure #2 in Stage 2 of the Medicare and Medicaid EHR Incentive Programs requires HIE to share summary records for more than 10 percent of care transitions. In addition, to increase flexibility in the Office of the National Coordinator for Health Information Technology's (ONC) regulatory certification structure, ONC expressed in the 2014 Edition Release 2 final rule (79 FR 54472–73) an intent to propose future changes to the ONC HIT Certification Program that would permit more efficient certification of health IT for other health care settings, such as long-term and post-acute care and behavioral health settings.

We believe that health IT that incorporates usability features and has been certified to interoperable standards can effectively and efficiently help all providers improve internal care delivery practices, support management of patient care across the continuum, and support the reporting of electronically specified clinical quality measures (eCQMs).

II. Provisions of the Proposed Rule for PFS

A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)

1. Overview

Practice expense (PE) is the portion of the resources used in furnishing a service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages, but excluding malpractice expenses, as specified in section 1848(c)(1)(B) of the Act. As required by section 1848(c)(2)(C)(ii) of the Act, we use a resource-based system for determining PE RVUs for each physician's service. We develop PE RVUs by considering the direct and indirect practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies, and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more detailed information about the methodology for translating the resources involved in furnishing each service into service-specific PE RVUs. We refer readers to the CY 2010 PFS final rule with comment period (74 FR 61743 through 61748) for a more detailed explanation of the PE methodology.

2. Practice Expense Methodology

a. Direct Practice Expense

We determine the direct PE for a specific service by adding the costs of the direct resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing that service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are generally based on our review of recommendations received from the RUC and those provided in response to public comment periods. For a detailed explanation of the direct PE methodology, including examples, we refer readers to the Five-Year Review of Work Relative Value Units under the PFS and Proposed Changes to the Practice Expense Methodology proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

b. Indirect Practice Expense Per Hour Data

We use survey data on indirect PEs incurred per hour worked in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the practice expense per hour (PE/HR) by specialty that was obtained from the AMA's Socioeconomic Monitoring Surveys (SMS). The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Expense Information Survey (PPIS). The PPIS is a multispecialty, nationally representative, PE survey of both physicians and nonphysician practitioners (NPPs) paid under the PFS using a survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available. We used the PPIS data to update the PE/HR data for the CY 2010 PFS for almost all of the Medicare-recognized specialties that participated in the survey.

When we began using the PPIS data in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we transitioned its use over a 4-year period from the previous PE RVUs to the PE RVUs developed using the new PPIS data. As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), the transition to the PPIS data was complete for CY 2013. Therefore, PE RVUs from CY 2013 forward are developed based entirely on the PPIS data, except as noted in this section.

Section 1848(c)(2)(H)(i) of the Act requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

Supplemental survey data on independent labs from the College of American Pathologists were implemented for payments beginning in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing independent diagnostic testing facilities (IDTFs), were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments beginning in CY 2007. Neither IDTFs, nor independent labs, participated in the PPIS. Therefore, we continue to use the PE/HR that was developed from their supplemental survey data.

Consistent with our past practice, the previous indirect PE/HR values from the supplemental surveys for these specialties were updated to CY 2006 using the MEI to put them on a comparable basis with the PPIS data.

We also do not use the PPIS data for reproductive endocrinology and spine surgery since these specialties currently are not separately recognized by Medicare, nor do we have a method to blend the PPIS data with Medicare-recognized specialty data.

Previously, we established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead used the PPIS-based PE/HR. We continue previous crosswalks for specialties that did not participate in the PPIS. However, beginning in CY 2010 we changed the PE/HR crosswalk for portable x-ray suppliers from radiology to IDTF, a more appropriate crosswalk because these specialties are more similar to each other for work time.

For registered dietician services, the resource-based PE RVUs have been calculated in accordance with the final policy that crosswalks the specialty to the ''All Physicians'' PE/HR data, as adopted in the CY 2010 PFS final rule with comment period (74 FR 61752) and discussed in more detail in the CY 2011 PFS final rule with comment period (75 FR 73183).

c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(1) Direct Costs

The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing each of the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of $400 from our PE database and another service has a direct cost sum of $200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

(2) Indirect Costs

Section II.A.2.b. of this final rule with comment period describes the current data sources for specialty-specific indirect costs used in our PE calculations. We allocated the indirect costs to the code level on the basis of the direct costs specifically associated with a code and the greater of either the clinical labor costs or the physician work RVUs. We also incorporated the survey data described earlier in the PE/HR discussion. The general approach to developing the indirect portion of the PE RVUs is as follows:

- For a given service, we use the direct portion of the PE RVUs calculated as previously described and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator. In other words, the initial indirect allocator is calculated so that the direct costs equal the average percentage of direct costs of those specialties furnishing the service. For example, if the direct portion of the PE RVUs for a given service is 2.00 and direct costs, on average, represented 25 percent of total costs for the specialties that furnished the service, the initial indirect allocator would be calculated so that it equals 75 percent of the total PE RVUs. Thus, in this example, the initial indirect allocator would equal 6.00, resulting in

a total PE RVUs of 8.00 (2.00 is 25 percent of 8.00 and 6.00 is 75 percent of 8.00).

• Next, we add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had work RVUs of 4.00 and the clinical labor portion of the direct PE RVUs was 1.50, we would add 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to the initial indirect allocator of 6.00 to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.

• Next, we incorporate the specialty-specific indirect PE/HR data into the calculation. In our example, if, based on the survey data, the average indirect cost of the specialties furnishing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties furnishing the second service with an indirect allocator of 5.00, the indirect portion of the PE RVUs of the first service would be equal to that of the second service.

d. Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a hospital or other facility setting, we establish two PE RVUs: Facility and nonfacility. The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. Because in calculating the PE RVUs for services furnished in a facility, we do not include resources that would generally not be provided by physicians when furnishing the service in a facility, the facility PE RVUs are generally lower than the nonfacility PE RVUs. Medicare makes a separate payment to the facility for its costs of furnishing a service.

e. Services With Technical Components (TCs) and Professional Components (PCs)

Diagnostic services are generally comprised of two components: A professional component (PC); and a technical component (TC). The PC and TC may be furnished independently or by different providers, or they may be furnished together as a ''global'' service. When services have separately billable PC and TC components, the payment for the global service equals the sum of the payment for the TC and PC. To achieve this we use a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global service, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global service, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global.)

f. PE RVU Methodology

For a more detailed description of the PE RVU methodology, we refer readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746).

(1) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty-specific PE/HR data calculated from the surveys.

(2) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service. Apply a scaling adjustment to the direct inputs.

Step 2: Calculate the aggregate pool of direct PE costs for the current year. This is the product of the current aggregate PE (direct and indirect) RVUs, the CF, and the average direct PE percentage from the survey data used for calculating the PE/HR by specialty.

Step 3: Calculate the aggregate pool of direct PE costs for use in ratesetting. This is the product of the aggregated direct costs for all services from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3, calculate a direct PE scaling adjustment to ensure that the aggregate pool of direct PE costs calculated in Step 3 does not vary from the aggregate pool of direct PE costs for the current year. Apply the scaling factor to the direct costs for each service (as calculated in Step 1).

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs, as long as the same CF is used in Step 2 and Step 5. Different CFs will result in different direct PE scaling factors, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling factors offset one another.

(3) Create the Indirect Cost PE RVUs

Create indirect allocators.

Step 6: Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global service.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: The direct PE RVUs; the clinical PE RVUs; and the work RVUs.

For most services the indirect allocator is: Indirect PE percentage * (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

• If the service is a global service (that is, a service with global, professional, and technical components), then the indirect PE allocator is: Indirect percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs + work RVUs.

• If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: Indirect PE percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs.

(**Note:** For global services, the indirect PE allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs will be allocated using the work RVUs, and for the TC service, indirect PEs will be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes in the examples in Table 1, the formulas were divided into two parts for each service.

• The first part does not vary by service and is the indirect percentage (direct PE RVUs/direct percentage).

• The second part is either the work RVU, clinical labor PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying

the current aggregate pool of PE RVUs by the average indirect PE percentage from the survey data.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the work time for the service, and the specialty's utilization for the service across all services furnished by the specialty.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (*Note:* For services with TCs and PCs, we calculate the indirect practice cost index across the global service, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global service.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(4) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 6 to the indirect PE RVUs from Step 17 and apply the final PE budget neutrality (BN) adjustment. The final PE BN adjustment is calculated by comparing the results of Step 18 to the current pool of PE RVUs. This final BN adjustment is required to redistribute RVUs from step 18 to all PE RVUs in the PFS, and because certain specialties are excluded from the PE RVU calculation for ratesetting purposes, but we note that all specialties are included for purposes of calculating the final BN adjustment. (See ''Specialties excluded from ratesetting calculation'' later in this section.)

(5) Setup File Information

• *Specialties excluded from ratesetting calculation:* For the purposes of calculating the PE RVUs, we exclude certain specialties, such as certain nonphysician practitioners paid at a percentage of the PFS and low-volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 1.

TABLE 1—SPECIALTIES EXCLUDED FROM RATESETTING CALCULATION

Specialty code	Specialty description
49	Ambulatory surgical center.
50	Nurse practitioner.
51	Medical supply company with certified orthotist.
52	Medical supply company with certified prosthetist.
53	Medical supply company with certified prosthetist-orthotist.
54	Medical supply company not included in 51, 52, or 53.
55	Individual certified orthotist.
56	Individual certified prosthetist.
57	Individual certified prosthetist-orthotist.
58	Medical supply company with registered pharmacist.
59	Ambulance service supplier, e.g., private ambulance companies, funeral homes, etc.
60	Public health or welfare agencies.
61	Voluntary health or charitable agencies.
73	Mass immunization roster biller.

• *Crosswalk certain low volume physician specialties:* Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• *Physical therapy utilization:* Crosswalk the utilization associated

with all physical therapy services to the specialty of physical therapy.

• *Identify professional and technical services not identified under the usual TC and 26 modifiers:* Flag the services that are PC and TC services, but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), is associated with the global service, CPT code 93000 (Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report).

• *Payment modifiers:* Payment modifiers are accounted for in the creation of the file consistent with current payment policy as implemented in claims processing. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier. Similarly, for those services to which volume adjustments are made to account for the payment modifiers, time adjustments are applied as well. For time adjustments to surgical services, the intraoperative portion in the work time file is used; where it is not present, the intraoperative percentage from the payment files used by contractors to process Medicare claims is used instead. Where neither is available, we use the payment adjustment ratio to adjust the time accordingly. Table 2 details the manner in which the modifiers are applied.

TABLE 2—APPLICATION OF PAYMENT MODIFIERS TO UTILIZATION FILES

Modifier	Description	Volume adjustment	Time adjustment
80,81,82	Assistant at Surgery	16%	Intraoperative portion.
AS	Assistant at Surgery—Physician Assistant.	14% (85% * 16%)	Intraoperative portion.
50 or LT and RT	Bilateral Surgery	150%	150% of work time.
51	Multiple Procedure	50%	Intraoperative portion.
52	Reduced Services	50%	50%.
53	Discontinued Procedure	50%	50%.
54	Intraoperative Care only	Preoperative + Intraoperative Percentages on the payment files used by Medicare contractors to process Medicare claims.	Preoperative + Intraoperative portion.
55	Postoperative Care only	Postoperative Percentage on the payment files used by Medicare contractors to process Medicare claims.	Postoperative portion.
62	Co-surgeons	62.5%	50%.
66	Team Surgeons	33%	33%.

We also make adjustments to volume and time that correspond to other payment rules, including special multiple procedure endoscopy rules and multiple procedure payment reductions (MPPR). We note that section 1848(c)(2)(B)(v) of the Act exempts certain reduced payments for multiple imaging procedures and multiple therapy services from the BN calculation under section 1848(c)(2)(B)(ii)(II) of the Act. These MPPRs are not included in the development of the RVUs.

For anesthesia services, we do not apply adjustments to volume since the average allowed charge is used when simulating RVUs, and therefore, includes all adjustments. A time adjustment of 33 percent is made only for medical direction of two to four cases since that is the only situation where time units are duplicative.

• *Work RVUs:* The setup file contains the work RVUs from this final rule with comment period.

(6) Equipment Cost Per Minute

The equipment cost per minute is calculated as:

*(1/(minutes per year * usage)) * price * ((interest rate/(1 − (1/((1 + interest rate)∧ life of equipment)))) + maintenance)*

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); generally 150,000 minutes.
usage = variable, see discussion below.
price = price of the particular piece of equipment.
life of equipment = useful life of the particular piece of equipment.
maintenance = factor for maintenance; 0.05.
interest rate = variable, see discussion below.

Usage: We currently use an equipment utilization rate assumption of 50 percent for most equipment, with the exception of expensive diagnostic imaging equipment, for which we use a 90 percent assumption as required by Section 1848(b)(4)(C) of the Act.

Maintenance: This factor for maintenance was proposed and finalized during rulemaking for CY 1998 PFS (62 FR 33164). Several stakeholders have suggested that this maintenance factor assumption should be variable. We solicited comments regarding reliable data on maintenance costs that vary for particular equipment items. We received several comments about variable maintenance costs, which we will consider in future rulemaking. We note, however, that we do not believe that high-level summary data from informal surveys constitutes reliable data. Rather than assertions that a particular maintenance rate is typical, multiple invoices containing equipment prices that are accompanied by maintenance contracts would provide support for a maintenance cost other than our currently assumed 5 percent. We continue to seek reliable data about variable maintenance costs, as we consider adjustments to our methodology to accommodate variable maintenance costs.

Per-use Equipment Costs: Several stakeholders have also suggested that our PE methodology should incorporate usage fees and other per-use equipment costs as direct costs. We also solicited comment on adjusting our cost formula to include equipment costs that do not vary based on the equipment time. We received a comment that addressed how to incorporate usage fees and other per-use equipment costs into our methodology, and received several comments that addressed how we should reclassify the anomalous supply inputs removed from the direct PE database. We will consider these comments in future rulemaking, including the way these anomalous supply inputs fit in to any future proposals related to per-use costs.

Interest Rate: In the CY 2013 final rule with comment period (77 FR 68902), we updated the interest rates used in

developing an equipment cost per minute calculation. The interest rate was based on the Small Business Administration (SBA) maximum interest rates for different categories of loan size (equipment cost) and maturity (useful life). The interest rates are listed in Table 3. (See 77 FR 68902 for a thorough discussion of this issue.)

TABLE 3—SBA MAXIMUM INTEREST RATES

Price	Useful life	Interest rate (%)
<$25K	<7 Years	7.50
$25K to $50K	<7 Years	6.50
>$50K	<7 Years	5.50
<$25K	7+ Years	8.00
$25K to $50K	7+ Years	7.00
>$50K	7+ Years	6.00

Note: PE RVUs in Table 5, row 27, may not match Addendum B due to rounding.
*The direct adj = [current pe rvus * CF * avg dir pct]/[sum direct inputs] = [step2]/[step3].
**The indirect adj = [current pe rvus * avg ind pct]/[sum of ind allocators] = [step9]/[step10].
Note: The use of any particular conversion factor (CF) in Table 5 to illustrate the PE Calculation has no effect on the resulting RVUs.
Note: The Other Adjustment includes an adjustment for the equipment utilization change.

3. Changes to Direct PE Inputs for Specific Services

In this section, we discuss other CY 2015 revisions related to direct PE inputs for specific services. The final direct PE inputs are included in the final rule CY 2015 direct PE input database, which is available on the CMS Web site under downloads for the CY 2015 PFS final rule with comment period at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html*.

a. RUC Recommendation for Monitoring Time following Moderate Sedation

We received a recommendation from the RUC regarding appropriate clinical labor minutes for post-procedure moderate sedation monitoring and post-procedure monitoring. The RUC recommended 15 minutes of RN time for one hour of monitoring following moderate sedation and 15 minutes of RN time per hour for post-procedure monitoring (unrelated to moderate sedation). For 17 procedures listed in Table 5, the recommended clinical labor minutes differed from the clinical labor minutes in the direct PE database. We proposed to accept, without refinement, the RUC recommendation to adjust these clinical labor minutes as indicated in Table 5 as ''Change to Clinical Labor Time.''

TABLE 5—CODES WITH CHANGES TO POST-PROCEDURE CLINICAL LABOR MONITORING TIME

CPT Code	Current monitoring time (min)	RUC recommended total post-procedure monitoring time (min)	Change to clinical labor time (min)
32553	30	60	30
35471	21	60	39
35475	60	30	−30
35476	60	30	−30
36147	18	30	12
37191	60	30	−30
47525	6	15	9
49411	30	60	30
50593	30	60	30
50200	15	60	45
31625	20	15	−5
31626	25	15	−10
31628	25	15	−10
31629	25	15	−10
31634	25	15	−10
31645	10	15	5
31646	10	15	5

Comment: We received two comments supporting our proposal to accept the RUC recommendation, without refinement, to adjust the clinical labor minutes as indicated in Table 5. One commenter noted that the RUC recommendation was a more accurate reflection of the monitoring time, particularly for codes 50593 (Ablation, renal tumor(s), unilateral, percutaneous, cryotherapy) and 50200 (Renal biopsy; percutaneous, by trocar or needle), than the current time.

Response: We appreciate commenters' support for our proposal. After consideration of comments received, we are finalizing our proposal to accept, without refinement, the RUC recommendation to adjust the clinical labor minutes as indicated in Table 5 as ''Change to Clinical Labor Time.''

b. RUC Recommendation for Standard Moderate Sedation Package

We received a RUC recommendation to modify PE inputs included in the standard moderate sedation package. Specifically, the RUC indicated that several specialty societies have pointed to the need for a stretcher during procedures for which moderate sedation is inherent in the procedure. Although the RUC did not recommend that we make changes to PE inputs for codes at this time, the RUC indicated that its future recommendations would include the stretcher as a direct input for procedures including moderate sedation.

The RUC recommended three scenarios that it would use in the future to allocate the equipment time for the stretcher based on the procedure time and whether the stretcher would be available for other patients to use during a portion of the procedure. Although we appreciate the RUC's attention to the differences in the time required for the stretcher based on the time for the procedure, we believe that one of the purposes of standard PE input packages is to reduce the complexity associated with assigning appropriate PE inputs to individual procedures while, at the same time, maintaining relativity between procedures. Since we generally allocate inexpensive equipment items to the entire service period when they are likely to be unavailable for another use during the full service period, we believe it is preferable to treat the stretcher consistently across services. Therefore, we proposed to modify the standard moderate sedation input package to include a stretcher for the same length of time as the other equipment items in the moderate sedation package. The revised moderate sedation input package will be applied to relevant codes as we review them through future notice and comment rulemaking. In seeking comments on the proposal, we stated that it would be useful to hear stakeholders' views and the reasoning behind them on this issue, especially from those who think that the stretcher, as expressed through the allocation of equipment minutes, should be allocated with more granularity than the equipment costs that are allocated to other similar items.

Comment: We received comments supporting our proposal to add the stretcher to the moderate sedation package, including support to include the stretcher for the same length of time as the other equipment items included in the moderate sedation package since it is used by the patient for the duration

of their recovery and not available to other patients during that time.

Response: We appreciate the commenters' support for our proposal. After consideration of comments received, we are finalizing our proposal to add the stretcher to the moderate sedation package for the same length of time as the other equipment items in the moderate sedation package. We note that we will not apply this change retroactively, but will make the change to the moderate sedation package for codes being finalized for 2015, as well as interim final codes for 2015. For a detailed discussion of the specific codes impacted by this change, we refer readers to sections II.F. of this final rule with comment period.

c. RUC Recommendation for Migration From Film to Digital Practice Expense Inputs

The RUC provided a recommendation regarding the PE inputs for digital imaging services. Specifically, the RUC recommended that we remove a list of supply and equipment items associated with film technology since these items are no longer a typical resource input; these items are detailed in Table 6. The RUC also recommended that the Picture Archiving and Communication System (PACS) equipment be included for these imaging services since these items are now typically used in furnishing imaging services. We received a description of the PACS system as part of the recommendation, which included both items that appear to be direct PE items and items for which indirect PE RVUs are allocated in the PE methodology. As we have previously indicated, items which are not clinical labor, medical supplies, or medical equipment, or are not individually allocable to a particular patient for a particular procedure, are not categorized as direct costs in the PE methodology. Since we did not receive any invoices for the PACS system prior to the proposed rule, we were unable to determine the appropriate pricing to use for the inputs. We proposed to accept the RUC recommendation to remove the film supply and equipment items, and to allocate minutes for a desktop computer (ED021) as a proxy for the PACS workstation as a direct expense. Specifically, for the 31 services that already contain ED021 (computer, desktop, w-monitor), we proposed to retain the time that is currently included in the direct PE input database. For the remaining services that are valued in the nonfacility setting, we proposed to allocate the full clinical labor intraservice time to ED021, except for codes without clinical labor, in which case we proposed to allocate the intraservice work time to ED021. For services valued only in the facility setting, we proposed to allocate the post-service clinical labor time to ED021, since the film supply and/or equipment inputs were previously associated with the post-service period.

TABLE 6—RUC-RECOMMENDED SUPPLY AND EQUIPMENT ITEMS REMOVED FOR DIGITAL IMAGING SERVICES

CMS Code	Description
SK013	computer media, dvd.
SK014	computer media, floppy disk 1.44mb.
SK015	computer media, optical disk 128mb.
SK016	computer media, optical disk 2.6gb.
SK022	film, 8inx10in (ultrasound, MRI).

SK028	film, fluoroscopic 14 x 17.
SK033	film, x-ray 10in x 12in.
SK034	film, x-ray 14in x 17in.
SK035	film, x-ray 14in x 36in.
SK037	film, x-ray 8in x 10in.
SK038	film, x-ray 8in x 10in (X-omat, Radiomat).
SK086	video tape, VHS.
SK089	x-ray developer solution.
SK090	x-ray digitalization separator sheet.
SK091	x-ray envelope.
SK092	x-ray fixer solution.
SK093	x-ray ID card (flashcard).
SK094	x-ray marking pencil.
SK098	film, x-ray, laser print.
SM009	cleaner, x-ray cassette-screen.
ED014	computer workstation, 3D reconstruction CT–MR.
ED016	computer workstation, MRA post processing.
ED023	film processor, PET imaging.
ED024	film processor, dry, laser.
ED025	film processor, wet.
ED027	film processor, x-omat (M6B).
ER018	densitometer, film.
ER029	film alternator (motorized film viewbox).
ER067	x-ray view box, 4 panel.

We note that the RUC exempted certain procedures from its recommendation because (a) the dominant specialty indicated that digital technology is not yet typical or (b) the procedure only contained a single input associated with film technology, and it was determined that the sharing of images, but not actual imaging, may be involved in the service. However, we do not believe that the most appropriate approach in establishing relative values for services that involve imaging is to exempt services from the transition from film to digital PE inputs based on information reported by individual specialties. Although we understand that the migration from film technology to digital technology may progress at different paces for particular specialties, we do not have information to suggest that the migration is not occurring for all procedures that require the storage of images. Just as it was appropriate to use film inputs as a proxy for some services for which digital inputs were typical pending these changes in the direct PE input database, we believe it is appropriate to use digital inputs as a proxy for the services that may still use film, pending their migration to digital technology. In addition, since the RUC conducted its collection of information from the specialties over several years, we believe the migration process from film to digital inputs has likely continued over the time period during which the information was gathered, and that the digital PE inputs will reflect typical use of technology for most if not all of these services before the change to digital inputs would take effect beginning January 1, 2015.

We noted that we believed that, for the sake of relativity, we should remove the equipment and supply inputs noted below from all procedures in the direct PE database, including those listed in Table 7. We sought comment on whether the computer workstation, which we proposed to use as a proxy for the PACS workstation, is the appropriate input for the services listed in Table 7, or whether an alternative input is a more appropriate reflection of direct PE costs.

Finally, we noted that the RUC recommendation also indicated that, given the labor-intensive nature of reviewing all clinical labor tasks associated with film technology, these times would be addressed as these codes are reviewed. We agreed with the RUC that reviewing and adjusting the times for each code would be difficult and labor-intensive since the direct PE input database does not allow for a comprehensive adjustment of the clinical labor time based on changes in particular clinical labor tasks. To make broad adjustments such as this across codes, the PE database would need to contain the time associated with individual clinical labor tasks rather than reflecting only the sum of times for the pre-service period, service period, and post-service period, as it does now. We recognized this situation presents a challenge in implementing RUC recommendations such as this one, and makes it difficult to understand the basis of both the RUC's recommended clinical labor times and our refinements of those recommendations. Therefore, we stated that we were considering revising the direct PE input database to include task-level clinical labor time information for every code in the database. As an example, we referred readers to the supporting data files for the direct PE inputs, which include public use files that display clinical labor times as allocated to each individual clinical labor task for a sample of procedures. We displayed this information as we attempt to increase the transparency of the direct PE database. We stated that we hoped that this modification would enable us to more accurately allocate equipment minutes to clinical labor tasks in a more consistent and efficient manner. Given the number of procedures and the volume of information involved, we sought comments on the feasibility of this approach. We note that we did not propose to make any changes to PE inputs for CY 2015 based on this modification to the design of the direct PE input database.

As discussed in section II.G. of this final rule with comment period, some of the RUC recommendations for 2015 included film items as practice expense inputs. For existing codes, the database from the proposed rule already included the PACS workstation proxy. However, for new services, as with the current items in the database, we have replaced the film items with the PACS workstation proxy. The codes affected by this change are listed in Table 8.

Comment: We received many comments on our proposal to remove the equipment and supply inputs associated with film technology from the direct PE database. In general, commenters supported our proposal to remove the film inputs from the direct PE database. Some commenters supported our use of the desktop computer as a proxy for the PACS workstation, but other commenters opposed using this item as a proxy. Commenters opposed to using the desktop computer as the proxy item stated that the PACS workstation was significantly more expensive and included greater functionality than a desktop computer. Some commenters opposed our proposal to maintain the current equipment time allocated to the computer desktop for the 31 services that already included this equipment item, suggesting that it was incorrect to eliminate the film inputs without proportionately increasing the proxy time for ED021. Some commenters requested a delay in implementation until stakeholders provide invoices or otherwise work with CMS to identify prices for the PACS items. Some commenters suggested CMS should develop a means to allocate digital technology costs to individual services, even if it is difficult to do so. Another commenter explained that it is difficult for stakeholders to obtain invoices that display prices for individual items, such as the PACS workstation, since the price of the particular items is often bundled with other related equipment and services. Many commenters urged CMS to work with stakeholders to obtain invoices, while other commenters requested that CMS accept the RUC recommendation regarding the PACS workstation.

Response: We appreciate commenters' support for our proposal to incorporate the transition from film to digital imaging technology into the direct PE input database. With regard to the pricing of the PACS workstation, as with all inputs, we would prefer to use actual paid invoices to establish the input price. However, in the absence of invoices demonstrating the actual cost, we believe that use of a proxy to price the appropriate inputs, in this case the PACS workstation, is preferable to

continuing to use inputs that we know are no longer typical. We made the proposal to use the computer, desktop, w-monitor (ED021), priced at $2,501, as a proxy based on our assessment of similar resource costs between the item and the PACS workstation. Although some commenters stated that the item was not an appropriate proxy, these commenters did not provide any evidence to indicate that the resource costs are not similar or to suggest a more appropriate proxy. Nor were any paid invoices submitted. Absent such information, we continue to believe that using the proxy item is the best approach to incorporate the direct PE cost of the digital imaging technology.

With regard to the 31 services that already included the desktop computer as an equipment input, we will include the desktop computer as a proxy for the PACS workstation using the same methodology as for the services that did not previously contain the desktop computer. To clearly differentiate the desktop computer proxy from the desktop computer currently included in these services, and to facilitate accurate replacement of this input when we do receive pricing information, we will create a new equipment item called ''desktop computer (proxy for PACS workstation),'' which will be allocated to each procedure using the methodology described above.

Comment: Some commenters opposed our removal of the film inputs from services that were not included in the RUC recommendation, but did not provide a rationale for their opposition.

Response: For the reasons we explained in making the proposal and reiterate above, we continue to believe that it is appropriate to remove these items from the direct PE database.

Comment: Some commenters provided specific suggestions regarding the use of digital inputs should CMS decide to move forward with the proposal. Commenters requested that for portable x-ray services, CMS include a flat plate receptor/image capture plate to capture the image, specialized software to process the image, and multiple high definition monitors used by the interpreting radiologist. Commenters provided an invoice for the image capture plate at a price of $25,600 indicating that this item replaces the film as the media to record the image.

Response: We appreciate that commenters provided us with an invoice for the image capture plate. However, services furnished by portable x-ray providers are reported using the same procedure codes as services provided using fixed machines. Since the typical x-ray service is furnished using fixed equipment, we are not including the image capture plate that is associated with portable equipment as an input for the imaging procedure codes. We also do not believe that high definition monitors used by the interpreting radiologist are appropriately included in the technical component of imaging procedures; rather, these are indirect costs associated with the professional component of the service. Therefore, we are not including the high definition monitors as an input for these services. Finally, to determine whether the software is appropriately categorized as a direct PE input, we need more information about the functionality of the software, and whether it is used in furnishing the typical x-ray service (including services furnished using fixed machinery). Until we have information that supports the inclusion of this item as a direct cost, we will not include the software for x-ray services.

Comment: Commenters were supportive of the increased transparency with regard to the direct PE inputs, but several commenters suggested that there may be more feasible approaches to break out the individual clinical labor tasks associated with each portion of the service (pre-service period, service period, and post-service period). The RUC suggested that we post all PE worksheets and supporting materials in code-order on our Web site. Other commenters did not suggest a specific alternative approach to providing detail for the individual clinical labor tasks.

Response: We appreciate the RUC's suggestion regarding the posting of the PE worksheets, but we do not believe that this would enable us to accomplish a comprehensive cross-code analysis and refinement to clinical labor times within the direct PE input database to increase consistency for identical clinical labor tasks between codes. Since we did not receive other suggestions from commenters on an approach to break out the individual clinical labor tasks associated with each service period to enable us to conduct the necessary analysis, we will pursue the approach described in the proposed rule. We will consider the comments submitted and continue to work with interested stakeholders regarding the best approaches to displaying the supporting files. We note that public use files continue to be available in the same format as in previous years, but that additional public use files now display the clinical labor tasks for each service period, providing greater transparency and enabling comparisons across codes. We note that we have refined the file structure based on comments, and we continue to seek input on whether there are additional or alternative ways to display this information to enhance its clarity, and note that there are challenges inherent in the display of this information in a two-dimensional format. We refer readers to the public use files available on the CMS Web site under downloads for the CY 2015 PFS final rule with comment period at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html*

d. Inputs for Digital Mammography Services

Mammography services are currently reported and paid using both CPT codes and G-codes. To meet the requirements of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), we established G-codes for use beginning in CY 2002 to pay for mammography services using new digital technologies (G0202 screening mammography digital; G0204 diagnostic mammography digital; G0206 diagnostic mammography digital). We continued to use the CPT codes for mammography services furnished using film technology (77055 (Mammography; unilateral); 77056 (Mammography; bilateral); 77057 (Screening mammography, bilateral (2-view film study of each breast)). As we discussed previously in this section, the RUC has recommended that all imaging codes, including mammography, be valued using digital rather than film inputs because the use of film is no longer typical. A review of Medicare claims data shows that the mammography CPT codes are billed extremely infrequently, and that the G-codes are billed for the vast majority of mammography claims, confirming the RUC's conclusion that the typical service uses digital technology. As such, we stated that we do not believe there is a reason to continue the separate CPT codes and G-codes for mammography services since both sets of codes would have the same values when priced based upon the typical digital technology. Accordingly, we proposed to delete the mammography G-codes beginning for CY 2015 and to pay all mammography using the CPT codes.

We indicated that, although we believed that the CPT codes should now be used to report all mammography services, we had concerns about whether the current values for the CPT codes accurately reflect the resource inputs associated with furnishing the services. Because the CPT codes have not been recently reviewed and

significant technological changes have occurred since the current values were established, we did not believe it would be appropriate to retain the current values for the CPT codes. Therefore, we proposed to value the CPT codes using the RVUs previously established for the G-codes. We believed these values would be most appropriate since they were established to reflect the use of digital technology, which is now typical.

As discussed in section II.B of this final rule with comment period, we proposed these CPT codes as potentially misvalued and requested that the RUC and other interested stakeholders review these services in terms of appropriate work RVUs, work time assumptions, and direct PE inputs. However, as discussed in section II.B. of this final rule with comment period, we will continue to maintain separate payment rates for film and digital mammography while we consider revaluation of all mammography services. For CY 2015, we will therefore maintain both the G-codes and CPT codes; we will continue using the 2014 RVUs from each of the following codes to price them for 2015: G0202, G0204, G0206, 77055, 77056, and 77057. 2015. We also note that we will continue to pay for film mammography services at the 2014 rates until we revalue the mammography services.

We refer readers to section II.B. of this final rule with comment period, where we address comments received on this proposal.

e. Radiation Treatment Vault

In previous rulemaking (77 FR 68922, 78 FR 74346), we indicated that we included the radiation treatment vault as a direct PE input for several recently reviewed radiation treatment codes for the sake of consistency with its previous inclusion as a direct PE input for some other radiation treatment services, but that we intended to review the radiation treatment vault input and address whether or not it should be included in the direct PE input database for all services in future rulemaking. Specifically, we questioned whether it was consistent with the principles underlying the PE methodology to include the radiation treatment vault as a direct cost given that it appears to be more similar to building infrastructure costs than to medical equipment costs. In response to this discussion, we received comments and invoices from stakeholders who indicated that the vault should be classified as a direct cost. However, upon review of the information received, we believed that the specific structural components required to house the linear accelerator are similar in concept to components required to house other medical equipment such as expensive imaging equipment. In general, the electrical, plumbing, and other building specifications are often unique to the intended functionality of a given building, including costs that are attributable to the specific medical equipment housed in the building, but those building characteristics do not represent direct medical equipment costs in our established PE methodology. Therefore, we believed that the special building requirements indicated for the radiation treatment vault to house a linear accelerator do not represent a direct cost in our PE methodology, and that the vault construction is instead accounted for in the indirect PE methodology, just as the building and infrastructure costs are treated for other PFS services including those with specialized infrastructure costs to accommodate specific equipment. Therefore, we proposed to remove the radiation treatment vault as a direct PE input from the radiation treatment procedures listed in Table 9, because we believed that the vault is not, itself, medical equipment; and therefore, it is accounted for in the indirect PE methodology.

TABLE 9—HCPCS CODES AFFECTED BY PROPOSED REMOVAL OF RADIATION TREATMENT VAULT

HCPCS	Short descriptor
77373	Sbrt delivery.
77402	Radiation treatment delivery.
77403	Radiation treatment delivery.
77404	Radiation treatment delivery.
77406	Radiation treatment delivery.
77407	Radiation treatment delivery.
77408	Radiation treatment delivery.
77409	Radiation treatment delivery.
77411	Radiation treatment delivery.
77412	Radiation treatment delivery.
77413	Radiation treatment delivery.
77414	Radiation treatment delivery.
77416	Radiation treatment delivery.
77418	Radiation tx delivery imrt.

Comment: We received many comments regarding our proposal to remove the radiation treatment vault as a direct cost from the radiation treatment delivery codes. Although one commenter supported the proposal, most commenters opposed the proposal. In general, commenters reiterated their rationale for inclusion of the vault as a direct practice expense input, asserting that the vault is necessary for the functioning of the equipment, serves a unique medical need, cannot be separated from the treatment delivered by the linear accelerator, and cannot be repurposed for another use. Commenters also stated that the Internal Revenue Code treats the vault as medical equipment that is separately depreciable from the building itself. For the most part, commenters objected to the removal of the vault given the context of declining Medicare payment for radiation oncology services over the past few years, or in conjunction with the revised radiation treatment code set. Specifically, several commenters suggested that stakeholders cannot provide meaningful comment about the impact of the vault proposal in the context of other pending changes. Some commenters requested a phase-in of any decrease in payment so that providers of radiation therapy services have an opportunity to adjust their practice costs. Several commenters also suggested that the change in payment could exacerbate problems in access to oncology services for Medicare patients.

Response: We appreciate commenters' concerns regarding the proposal to remove the vault as a direct practice expense input. We understand the essential nature of the vault in the provision of radiation therapy services and its uniqueness to a particular piece of medical equipment but are not convinced that either of these factors leads to the conclusion that the vault should be considered medical equipment for purposes of the PE methodology under the PFS. We appreciate the information commenters provided regarding the IRS treatment of the vault under tax laws, but the purposes and goals of the tax code and the PFS PE methodology are different, and, as such, attempts to draw parallels between the two are not necessarily instructive or relevant. We are not finalizing our proposal at this time, but intend to further study the issues raised by the vault and how it relates to our PE methodology.

Comment: A commenter noted that removing the vault as a direct cost also reduces the amount of indirect PE allocated for these procedures, and that this proposal does not shift the vault from direct PE to indirect PE, but rather drops the cost of the vault entirely. Another commenter stated that since the pool of indirect PE RVUs associated with radiation oncology services is fixed, the issue in question is how the indirect costs involved in furnishing treatment services compare to the indirect costs in providing other radiation oncology services.

Response: We understand the concerns of commenters regarding the importance of ensuring that the costs related to the vault are included in the

PE methodology. We want to point out, however, that within the established PE methodology, the allocation of indirect PE to individual codes has significant impact on the PE RVUs that determine Medicare payment for individual services. In other words, we believe it is important for stakeholders to recognize that practice expense costs not included in the direct PE input database contribute to the development of PE RVUs through the data used to allocate indirect PE RVUs. We also want to point out that the pool of indirect PE RVUs is not fixed at the specialty level. Rather, the pool of indirect costs under the entire PFS is maintained from year to year, as delineated in step 11 of the PE methodology above. Therefore, changes in the allocation of indirect PE for particular PFS services based on changes in either direct PE inputs, work RVUs, work time, or utilization data, impacts the amount of indirect PE allocated to all other PFS services, not just those furnished by specialties that furnish that service.

After continued review of the issues pertaining to the vault in the context of the comments, we believe that these issues require further study. Therefore, at this time, we will continue to include the vault as a direct PE input for the services listed in Table 9.

f. Clinical Labor Input Errors

Subsequent to the publication of the CY 2014 PFS final rule with comment period, it came to our attention that, due to a clerical error, the clinical labor type for CPT code 77293 (Respiratory Motion Management Simulation (list separately in addition to code for primary procedure)) was entered as L052A (Audiologist) instead of L152A (Medical Physicist), which has a higher cost per minute. We proposed a correction to the clinical labor type for this service.

Comment: Commenters appreciated our proposal to correct this error.

Response: We appreciate commenters' support for our proposal, and are finalizing the assignment of clinical labor type L152A to code 77293 as proposed. The CY 2015 Direct Practice Expense Input database reflects this correction.

In conducting a routine data review of the database, we also discovered that, due to a clerical error, the RN time allocated to CPT codes 33620 (Apply r&l pulm art bands), 33621 (Transthor cath for stent), and 33622 (Redo compl cardiac anomaly) was entered in the nonfacility setting, rather than in the facility setting where the code is valued. When a service is not valued in a particular setting, any inputs included in that setting are not included in the calculation of the PE RVUs for that service. Therefore, we proposed to move the RN time allocated to these procedures to the facility setting. The PE RVUs listed in Addendum B reflect these technical corrections.

We did not receive any comments on this proposal; therefore, we are finalizing our proposal to move the RN time allocated to these procedures to the facility setting. The CY 2015 Direct Practice Expense Input database reflects this correction.

g. Work Time

Subsequent to the publication of the CY PFS 2014 final rule with comment period, several inconsistencies in the work time file came to our attention. First, for some services, the total work time, which is used in our PE methodology, did not equal the sum of the component parts (pre-service, intra-service, post-service, and times associated with global period visits). The times in the CY 2015 work time file reflect our corrected values for total work time. Second, for a subset of services, the values in the pre-positioning time, pre-evaluation time, and pre-scrub-dress-wait time, were inadvertently transposed. We note that this error had no impact on calculation of the total times, but has been corrected in the CY 2015 work time file. Third, minor discrepancies for a series of interim final codes were identified between the work time file and the way we addressed these codes in the preamble text. Therefore, we have made adjustments to the work time file to reflect the decisions indicated in the preamble text. The work time file is available on the CMS Web site under the supporting data files for the CY 2015 PFS final rule with comment period at *http://www.cms.gov/PhysicianFeeSched/*. Note that for comparison purposes, the CY 2014 work time file is located at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices-Items/CMS-1600-FC.html*.

Comment: A commenter supported our proposal to correct the work times associated with the procedures affected by this proposal.

Response: We appreciate the commenter's support for our proposal. After consideration of the comment received, we are finalizing our proposal to adjust the work time file as proposed. The work time file is available on the CMS Web site under the supporting data files for the CY 2015 PFS final rule with comment period at *http://www.cms.gov/PhysicianFeeSched/*

h. Updates to Price for Existing Direct Inputs.

In the CY 2011 PFS final rule with comment period (75 FR 73205), we finalized a process to act on public requests to update equipment and supply price and equipment useful life inputs through annual rulemaking beginning with the CY 2012 PFS proposed rule. During 2013, we received a request to update the price of SD216 (catheter, balloon, esophageal or rectal (graded distention test)) from $217 to $237.50. We also received a request to update the price of SL196 (kit, HER–2/neu DNA Probe) from $105 to $144.50. We received invoices that documented updated pricing for each of these supply items. We proposed to increase the price associated with these supply items.

We continue to believe it is important to maintain a periodic and transparent process to update the price of items to reflect typical market prices in our ratesetting methodology, and we continue to study the best way to improve our current process. We remind stakeholders that we have difficulty obtaining accurate pricing information. The goal of the current transparent process is to offer the opportunity for the community to both request supply price updates by providing us copies of paid invoices, and to object to proposed changes in price inputs for particular items by providing additional information about prices available to the practitioner community. We remind stakeholders that PFS payment rates are developed within a budget neutral, relative value system, and any increases in price inputs for particular supply items result in corresponding decreases to the relative values of all other direct PE inputs.

We also received a RUC recommendation to update the prices associated with two supply items. Specifically, the RUC recommended that we increase the price of SA042 (pack, cleaning and disinfecting, endoscope) from $15.52 to $17.06 to reflect the addition of supply item SJ009 (basin, irrigation) to the pack, and increase the price of SA019 (kit, IV starter) from $1.37 to $1.60 to reflect the addition of supply item SA044 (underpad 2 ft. x 3 ft. (Chux)) to the kit. We proposed to update the prices for both of these items based on these recommendations.

Comment: We received several comments regarding our concern about obtaining accurate pricing information for equipment and supply items included in the direct PE database. The RUC indicated that it would continue to work with specialty societies to obtain

paid invoices. A commenter suggested that a sample of paid invoices be obtained from practices and submitted with the PE materials to the RUC, or directly to CMS. Another commenter expressed concern regarding CMS's assertion that invoices are difficult to obtain, given that the RUC process collects lists of resources required to furnish services in the physician office using a standardized process that is typically accompanied by invoices. Another commenter stated that CMS used only the lowest-cost invoice for a particular equipment item since the other invoices included ''soft costs,'' and that CMS should establish an approach that would allow invoices to be used even if they contain ''soft costs.''

Response: We appreciate the RUC's assistance in obtaining paid invoices from the specialty societies. These invoices are helpful in pricing inputs. We disagree that we use the lowest-cost invoice because it had the lowest cost; rather, we often use the lowest-cost invoice because we do not have a method to use invoices that include costs that are not included as part of the equipment costs, so called ''soft costs,'' within the PE methodology. We do not believe it would serve accuracy or relativity to include as part of the pricing inputs ''soft costs'' that increase the price of particular supply or equipment items. We would welcome further input on potential approaches for ''backing out'' these costs.

Comment: One commenter disagreed with CMS's position that the RUC PE Subcommittee's review results in biased or inaccurate resource input costs because the prices are largely maintained in the direct PE input database by CMS.

Response: Although we did not raise this point in the CY 2015 PFS proposed rule, we refer readers to our discussion in previous rulemaking (for example, the CY 2011 PFS final rule with comment period at 75 FR 73250 and the CY 2014 PFS final rule with comment period at 78 FR 74246) regarding issues associated with obtaining appropriate prices for medical equipment and supply items included in the direct PE database. We note that the RUC provides recommendations regarding the use of particular items in furnishing a service, but does not provide CMS with recommendations regarding the prices of direct PE item. Without assigning a price, the input cannot be factored in to our PE RVU methodology. Our price information is almost exclusively anecdotal, and generally updated only through voluntary submission of a small number of invoices from the same practitioners that furnish and are paid for the services that use the particular inputs. Therefore, we continue to believe there is potential for bias in the information we receive.

Comment: In its comment, the RUC suggested that an annual CMS review of paid invoices for high-cost supplies would be appropriate. A commenter referenced comments made on the CY 2014 PFS final rule with comment period, and expressed agreement with those commenters that the provision of pricing information is sensitive because of issues involving proprietary pricing information and price negotiations for individual practitioners. This commenter also agreed with CMS that such information would be less sensitive if it confirmed inputs contained in the direct PE database. However, the commenter noted that requiring paid invoices from this point forward only partially addresses the concern since many existing inputs are not based on paid invoices; specifically, societies working on inputs for new, revised, or potentially misvalued services are disadvantaged in comparison to many existing inputs due to fee schedule relativity. The commenter suggested that CMS may need to undertake a comprehensive review of all direct PE inputs and obtain paid invoices to systematically address its concerns.

Response: We share commenters' concerns that codes that are being reviewed may be disadvantaged relative to codes that contain input prices that may not be based on paid invoices; and note that we rely on the public process to ensure continued relativity within the direct PE inputs. We encourage interested stakeholders to review updates to prices, as well as prices for new items, to ensure that they appear reasonable and current, and to provide us with updated pricing information, particularly regarding high cost supplies that have a greater impact on relativity. We refer readers to section II.F. of this final rule with comment period, in which we detail price updates, as well as establish new prices, for inputs included in new, revised, and potentially misvalued codes.

Comment: We received some comments in support of our proposal to update the price for SL196 (kit, HER–2/neu DNA Probe).

Response: We appreciate the commenters' support for our proposal to update the price for SL196. After publication of our proposal, we obtained new information suggesting that further study of the price of this item is necessary before proceeding to update the input price. Therefore, we are not finalizing our proposal to update the price for SL196, and will consider this matter in future rulemaking.

Comment: We did not receive any comments regarding our proposal to update the price for of SD216 (catheter, balloon, esophageal or rectal (graded distention test)).

Response: We are finalizing the price updates for SD216.

Comment: We received comments in support of the price update to SA019 (kit, IV starter) and SA042 (pack, cleaning and disinfecting, endoscope).

Response: We appreciate the commenters' support for our proposal to update the price for SA019 and SA042. After consideration of comments received, we are finalizing the price updates for SA019 and SA042.

i. New Standard Supply Package for Contrast Imaging

The RUC recommended creating a new direct PE input standard supply package ''Imaging w/contrast, standard package'' for contrast enhanced imaging, with a price of $6.82. This price reflects the combined prices of the medical supplies included in the package; these items are listed in Table 10. We proposed to accept this recommendation, but sought comment on whether all of the items included in the package are used in the typical case. The CY 2015 direct PE database reflects this change and is available on the CMS Web site under the supporting data files for the CY 2015 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/*.

TABLE 10—STANDARD CONTRAST IMAGING SUPPLY PACKAGE

Medical supply description	SCMS supply code	Unit	Quantity	Price
Kit, IV starter	SA019	Kit	1	$1.60
Gloves, non-sterile	SB022	Pair	1	0.084

TABLE 10—STANDARD CONTRAST IMAGING SUPPLY PACKAGE—Continued

Medical supply description	SCMS supply code	Unit	Quantity	Price
Angiocatheter 14g–24g	SC001	Item	1	1.505
Heparin lock	SC012	Item	1	0.917
IV tubing (extension)	SC019	Foot	*3	1.590
Needle, 18–27g	SC029	Item	1	0.089
Syringe 20ml	SC053	Item	1	0.558
Sodium chloride 0.9% inj. bacteriostatic (30ml uou)	SH068	Item	1	0.700
Swab-pad, alcohol	SJ053	Item	1	0.013
Total				7.06

*The price for SC019 (IV tubing, (extension)) is $0.53 per foot.

Comment: Commenters supported our proposal to create the standard supply package for contrast imaging. Some commenters expressed concern that the proposed supply package did not include the full range of supplies typically used when performing contrast imaging. One commenter stated that, for echocardiography labs that utilize contrast-enhanced ultrasound, additional items are typically part of the contrast imaging supply package, including 2x2 gauze pads, a stopcock, and tape. Another commenter suggested that a power injector should also be included in the standard contrast imaging supply package. Commenters also noted that CMS provided limited information regarding how the prices were assigned to the supply items, and pointed to discrepancies between the direct PE database files and the prices quoted in the table.

Response: We appreciate commenters' support for our proposal. We note that the RUC recommendation for the standard contrast imaging supply package also noted that the inputs for CTA and MRA studies would include the standard contrast imaging supply pack in addition to a stop cock (SC050) and additional tubing. While we acknowledge a commenter's suggestion that additional items may be used when echocardiography labs conduct contrast-enhanced ultrasound studies, we do not have information to suggest that these items are used for other imaging studies, such as CT and MRI contrast-enhanced studies. We would welcome more information on whether these items should be included in the newly created standard contrast imaging kit, as well as whether the power injector is used whenever the other inputs in the standard contrast imaging supply package are used, or whether they are used only in certain instances. We note that the reason for the discrepancy in the price for the IV starter kit is that we proposed to update the price at the same time that we proposed to create a new contrast imaging kit. Since we are finalizing the price update for SA019 (kit, IV starter), we are also finalizing a revised price for the new standard contrast imaging package of $7.06. Finally, we disagree with the commenter's suggestion that CMS provided limited information about the pricing for the items included in the kit, as these items are existing inputs in the direct PE database, and the codes associated with these items were listed in the table in the proposed rule. After consideration of comments received, we are finalizing our proposal to create a standard contrast imaging supply pack, with a revised price of $7.06.

j. Direct PE Inputs for Stereotactic Radiosurgery (SRS) Services (CPT Codes 77372 and 77373)

In the CY 2014 PFS final rule with comment period (78 FR 74245), we summarized comments received about whether CPT codes 77372 and 77373 would accurately reflect the resources used in furnishing the typical SRS delivery if there were no coding distinction between robotic and non-robotic delivery methods. Until now, SRS services furnished using robotic methods were billed using contractor-priced G-codes G0339 (Image-guided robotic linear accelerator based stereotactic radiosurgery, complete course of therapy in one session or first session of fractionated treatment), and G0340 (Image-guided robotic linear accelerator-based stereotactic radiosurgery, delivery including collimator changes and custom plugging, fractionated treatment, all lesions, per session, second through fifth sessions, maximum five sessions per course of treatment). We indicated that we would consider deleting these codes in future rulemaking.

Most commenters responded that the CPT codes accurately described both services, and the RUC stated that the direct PE inputs for the CPT codes accurately accounted for the resource costs of the described services. One commenter objected to the deletion of the G-codes but did not include any information to suggest that the CPT codes did not describe the services or that the direct PE inputs for the CPT codes were inaccurate. Based on a review of the comments received, we had no indication that the direct PE inputs included in the CPT codes would not reflect the typical resource inputs involved in furnishing an SRS service. Therefore, in the CY 2014 proposed rule we proposed to recognize only the CPT codes for SRS services, and to delete the G-codes used to report robotic delivery of SRS.

Comment: We received several comments regarding our proposal to delete the SRS G-codes. Some commenters supported our proposal, but most opposed our proposal on the grounds that the direct PE inputs included in the CPT codes do not reflect the typical resource inputs used in furnishing robotic SRS services. Some commenters urged CMS to delay this policy change and continue to contractor price the G-codes until a more appropriate solution can be found.

Response: After consideration of the comments regarding the appropriate inputs to use in pricing the SRS services, we have concluded that at this time, we lack sufficient information to make a determination about the appropriateness of deleting the G-codes and paying for all SRS/SBRT services using the CPT codes. Therefore, we will not delete the G-codes for 2015, but will instead work with stakeholders to identify an alternate approach and reconsider this issue in future rulemaking.

k. Inclusion of Capnograph for Pediatric Polysomnography Services

We proposed to include equipment item EQ358, Sleep capnograph, polysomnography (pediatric), for CPT codes 95782 (Polysomnography; younger than 6 years, sleep staging with

4 or more additional parameters of sleep, attended by a technologist) and 95783 (Polysomnography; younger than 6 years, sleep staging with 4 or more additional parameters of sleep, with initiation of continuous positive airway pressure therapy or bi-level ventilation, attended by a technologist). Based upon our understanding that capnography is a required element of sleep studies for patients younger than 6 years, we proposed to allocate this equipment item to 95782 for 602 minutes, and 95783 for 647 minutes. Based on the invoice we received for this equipment item, we proposed to price EQ358 at $4,534.23.

Comment: We received two comments in support of our proposal to include the capnograph in CPT codes 95782 and 95783.

Response: We appreciate commenters' support for our proposal. After consideration of comments received, we are finalizing our proposal to include the capnograph in CPT codes 95782 and 95783.

4. Using OPPS and ASC Rates in Developing PE RVUs

Accurate and reliable pricing information for both individual items and indirect PEs is critical to establish accurate PE RVUs for PFS services. As we have addressed in previous rulemaking, we have serious concerns regarding the accuracy of some of the information we use in developing PE RVUs. In particular, as discussed in the CY 2014 PFS final rule with comment period, we have several longstanding concerns regarding the accuracy of direct PE inputs, including both items and procedure time assumptions, and prices of individual supplies and equipment (78 FR 74248–74250). In addition to the concerns regarding the inputs used in valuing particular procedures, we also noted that the allocation of indirect PE is based on information collected several years ago (as described above) and will likely need to be updated in the coming years.

To mitigate the impact of some of these potentially problematic data used in developing values for individual services, in rulemaking for the CY 2014 PFS, we proposed to limit the nonfacility PE RVUs for individual codes so that the total nonfacility PFS payment amount would not exceed the total combined amount that Medicare would pay for the same code in the facility setting. In developing the proposal, we sought a reliable means for Medicare to set upper payment limits for office-based procedures and believed OPPS and ASC payment rates would provide an appropriate comparison because these rates are based on relatively more reliable cost information in settings with cost structures that generally would be expected to be higher than in the office setting.

We received many comments regarding our proposal, the vast majority of which urged us to withdraw the proposal. Some commenters questioned the validity of our assumption that facilities' costs for providing all services are necessarily higher than the costs of physician offices or other nonfacility settings. Other commenters expressed serious concerns with the asymmetrical comparisons between PFS payment amounts and OPPS/ASC payment amounts. Finally, many commenters suggested revisions to technical aspects of our proposed policy.

In considering all the comments, however, we were persuaded that the comparison of OPPS (or ASC) payment amounts to PFS payment amounts for particular procedures is not the most appropriate or effective approach to ensuring that PFS payment rates are based on accurate cost assumptions. Commenters noted several flaws with the approach. First, unlike PFS payments, OPPS and ASC payments for individual services are grouped into rates that reflect the costs of a range of services. Second, commenters suggested that since the ASC rates reflect the OPPS relative weights to determine payment rates under the ASC payment system, and are not based on cost information collected from ASCs, the ASC rates should not be used in the proposed policy. For these and other reasons raised by commenters, we did not propose a similar policy for the CY 2015 PFS. If we consider using OPPS or ASC payment rates in developing PFS PE RVUs in future rulemaking, we would consider all of the comments received regarding the technical application of the previous proposal.

After thorough consideration of the comments regarding the CY 2014 proposal, we continue to believe that there are various possibilities for leveraging the use of available hospital cost data in the PE RVU methodology to ensure that the relative costs for PFS services are developed using data that is auditable and comprehensively and regularly updated. Although some commenters questioned the premise that the hospital cost data are more accurate than the information used to establish PE RVUs, we continue to believe that the routinely updated, auditable resource cost information submitted contemporaneously by a wide array of providers across the country is a valid reflection of ''relative'' resources and could be useful to supplement the resource cost information developed under our current methodology based upon a typical case that are developed with information from a small number of representative practitioners for a small percentage of codes in any particular year.

Section 220(a)(1) of the PAMA added a new subparagraph (M) under section 1848(c)(2) of the Act that gives us authority to collect information on resources used to furnish services from eligible professionals (including physicians, non-physician practitioners, PTs, OTs, SLPs and qualified audiologists), and other sources. It also authorizes us to pay eligible professionals for submitting solicited information. We will be exploring ways of collecting better and updated resource data from physician practices, including those that are provider-based, and other non-facility entities paid through the PFS. We believe such efforts will be challenging given the wide variety of practices, and that any effort will likely impose some burden on eligible professionals paid through the PFS regardless of the scope and manner of data collection. Currently, through one of the validation contracts discussed in section II.B. of this final rule with comment period, we have been gathering time data directly from physician practices. Through this project, we have learned much about the challenges for both CMS and the eligible professionals of collecting data directly from practices. Our own experience has shown that is difficult to obtain invoices for supply and equipment items that we can use in pricing direct PE inputs.

Many specialty societies also have noted the challenges in obtaining recent invoices for medical supplies and equipment (78 FR 74249). Further, PE calculations rely heavily on information from the Physician Practice Expense Information Survey (PPIS) survey, which, as discussed earlier, was conducted in 2007 and 2008. When we implemented the results of the survey, many in the community expressed serious concerns over the accuracy of this or other PE surveys as a way of gathering data on PE inputs from the diversity of providers paid under the PFS.

In addition to data collection, section 1848(c)(2)(M) of the Act as added by section 220(a) of the PAMA provides authority to develop and use alternative approaches to establish PE relative values, including the use of data from other suppliers and providers of services. We are exploring the best approaches for exercising this authority, including with respect to use of hospital outpatient cost data. We understand that

many stakeholders will have concerns regarding the possibility of using hospital outpatient cost data in developing PE RVUs under the PFS, and we want to be sure we are aware of these prior to considering or developing any future proposal relying on those data.

Therefore, in the CY 2015 PFS proposed rule (79 FR 40333), we sought comment on the possible uses of the Medicare hospital outpatient cost data (not the APC payment amount) in potential revisions of the PFS PE methodology. This could be as a means to validate or, perhaps, in setting the relative resource cost assumptions within the PFS PE methodology. We noted that the resulting PFS payment amounts would not necessarily conform to OPPS payment amounts since OPPS payments are grouped into APCs, while PFS payments would continue to be valued individually and would remain subject to the relativity inherent in establishing PE RVUs, budget neutrality adjustments, and PFS updates. We expressed particular interest in comments that compare such possibilities to other broad-based, auditable, mechanisms for data collection, including any we might consider under the authority provided under section 220(a) of the PAMA. We urged commenters to consider a wide range of options for gathering and using the data, including using the data to validate or set resource assumptions for only a subset of PFS services, or as a base amount to be adjusted by code or specialty-level recommended adjustments, or other potential uses. We appreciate the many thoughtful comments that we received on whether and how to use the OPPS cost data in establishing PE relative values. We will consider these as we continue to think about mechanisms to improve the accuracy of PE values.

In addition to soliciting comments as noted above, in the CY 2015 proposed rule we stated that we continue to seek a better understanding regarding the growing trend toward hospital acquisition of physicians' offices and how the subsequent treatment of those locations as off-campus provider-based outpatient departments affects payments under PFS and beneficiary cost-sharing. MedPAC continues to question the appropriateness of increased Medicare payment and beneficiary cost-sharing when physicians' offices become hospital outpatient departments, and to recommend that Medicare pay selected hospital outpatient services at PFS rates (MedPAC March 2012 and June 2013 *Report to Congress*). We noted that we also remain concerned about the validity of the resource data as more physician practices become provider-based. Our survey data reflects the PE costs for particular PFS specialties, including a proportion of practices that may have become provider-based since the survey was conducted. Additionally, as the proportion of provider-based offices varies among physician specialties, so do the relative accuracy of the PE survey data. Our current PE methodology primarily distinguishes between the resources involved in furnishing services in two sites of service: The non-facility setting and the facility setting. In principle, when services are furnished in the non-facility setting, the costs associated with furnishing services include all direct and indirect PEs associated with the work and the PE of the service. In contrast, when services are furnished in the facility setting, some costs that would be PEs in the office setting are incurred by the facility. Medicare makes a separate payment to the facility to account for some portion of these costs, and we adjust PEs accordingly under the PFS. As more physician practices become hospital-based, it is difficult to know which PE costs typically are actually incurred by the physician, which are incurred by the hospital, and whether our bifurcated site-of service differential adequately accounts for the typical resource costs given these relationships. We also have discussed this issue as it relates to accurate valuation of visits within the postoperative period of 10- and 90-day global codes in section II.B.4 of this final rule with comment period.

To understand how this trend is affecting Medicare, including the accuracy of payments made through the PFS, we need to develop data to assess the extent to which this shift toward hospital-based physician practices is occurring. To that end, during CY 2014 rulemaking we sought comment regarding the best method for collecting information that would allow us to analyze the frequency, type, and payment for services furnished in off-campus provider-based hospital departments (78 FR 74427). We received many thoughtful comments. However, the commenters did not present a consensus opinion regarding the options we presented in last year's rule. Based on our analysis of the comments, we stated that we believed the most efficient and equitable means of gathering this important information across two different payment systems would be to create a HCPCS modifier to be reported with every code for physicians' and hospital services furnished in an off-campus provider-based department of a hospital.

We proposed that the modifier would be reported on both the CMS–1500 claim form for physicians' services and the UB–04 (CMS form 1450) for hospital outpatient claims. (We note that the requirements for a determination that a facility or an organization has provider-based status are specified in § 413.65, and we define a hospital campus to be the physical area immediately adjacent to the provider's main buildings, other areas and structures that are not strictly contiguous to the main buildings but are located within 250 yards of the main buildings, and any other areas determined on an individual case basis, by the CMS regional office.)

Therefore, we proposed to collect this information on the type and frequency of services furnished in off-campus provider-based departments in accordance with our authority under section 1848(c)(2)(M) of the Act (as added by section 220(a) of the PAMA) beginning January 1, 2015. The collection of this information would allow us to begin to assess the accuracy of the PE data, including both the service-level direct PE inputs and the specialty-level indirect PE information that we currently use to value PFS services. Furthermore, this information would be critical in order to develop proposed improvements to our PE data or methodology that would appropriately account for the different resource costs among traditional office, facility, and off-campus provider-based settings. We also sought additional comment on whether a code modifier is the best mechanism for collecting this service-level information.

Comment: Many commenters agreed on the need to collect information on the frequency, type, and payment of services furnished in off-campus provider-based departments of hospitals, however, several commenters expressed concern that the HCPCS modifier would create additional administrative burden for providers. Many of these commenters stated that the new modifier would require significant changes to hospitals' billing systems, including a separate charge master for outpatient off-campus PBDs and training for staff on how to use the new modifier. Several commenters thought that education and training would be required for physician offices to attach a modifier to services furnished in an off-campus provider-based department. These same commenters suggested that a new place of service (POS) code would be more appropriate for physician billing. Several commenters suggested that CMS

should re-propose a detailed data collection methodology, test it with providers, make adjustments, and allow additional time for implementation.

Response: While we understand commenters' concerns about the additional administrative burden of reporting a new HCPCS modifier, we have weighed the burden of reporting the modifier for each service against the benefit of having data that will allow us to obtain and assess accurate information on the type and frequency of outpatient hospital services furnished in off-campus provider-based departments, and we do not believe that the modifier is excessively burdensome for providers to report. When billing for hospital services, providers must know where services are furnished in order to accurately complete value code 78 of an outpatient claim or item 32 for service location on the practitioner claim. However, as discussed later in this section, we agree that a POS code on the professional claim allows for the same type of data collection as a modifier and would be less burdensome than the modifier for practitioners. We discuss the timeframe for implementation later in this section.

Comment: Some commenters who were concerned about the administrative burden of the new HCPCS modifier suggested several alternative methods for CMS to collect data on services furnished in off-campus provider-based departments. Several of these commenters recommended that CMS consider establishing of a new POS code for professional claims, or for both professional and hospital claims, because they believed this approach would be less administratively burdensome than attaching a modifier to each service reported on the claim that was furnished in an off-campus provider-based department. Some commenters preferred identifying services furnished in provider-based departments on the Medicare cost report (CMS–2552–10). Some commenters suggested using provider numbers and addresses to identify off-campus PBDs, or changing the provider enrollment process to be able to track this data. Yet other commenters suggested creating a new bill type to track off-campus PBD services.

Commenters generally recommended that CMS choose the least administratively burdensome approach that would ensure accurate data collection, but did not necessarily agree on what approach would optimally achieve that result. Some commenters believed that a HCPCS modifier would more clearly identify specific services furnished at off-campus PBDs, and would provide better information about the type and level of care furnished. Some commenters believed that a HCPCS modifier would be the least administratively burdensome approach because hospitals and physicians already report a number of claims-based modifiers. However, other commenters stated that additional modifiers would increase administrative burden because this approach would increase the modifiers that would need to be considered when billing.

Response: With respect to creating a new POS code to obtain data on services furnished in off-campus PBDs of a hospital, we note that POS codes are only reported on professional claims and are not included on institutional claims. Therefore, a POS code could not be easily implemented for hospital claims. However, POS codes are already required to be reported on every professional claim, and POS 22 is currently used when physicians' services are furnished in an outpatient hospital department. (More information on existing POS codes is available on the CMS Web site at *http://www.cms.gov/Medicare/Coding/place-of-service-codes/Place_of_Service_Code_Set.html*).

Though we considered proposing a new POS code for professional claims to collect data on services furnished in the off-campus hospital setting, we note that previous GAO and OIG reports (October 2004 A–05–04–0025, January 2005 A–06–04–00046, July 2010 A–01–09–00503, September 2011 A–01–10–00516) have noted frequent inaccuracies in the reporting of POS codes. Additionally, at the time the proposed rule was developed, we had concerns that using a POS code to report this information might not give us the reliable data we are looking to collect, especially if such data were to be cross-walked with hospital claims for the same service, since the hospital claim would have a modifier, not a POS code. However, we have been persuaded by public comments suggesting that use of a POS code on professional claims would be less administratively burdensome than use of a modifier, and would be more familiar to those involved in practitioner billing. Specifically, since a POS code is already required on every professional claim, we believe that creating a new POS code to distinguish outpatient hospital services that are furnished on the hospital campus versus in an off-campus provider-based department would require less staff training and education than would the use of a modifier on the professional claim. Additionally, professional claims only have space for four modifiers; while a very small percentage of professional claims have four modifiers, required use of an additional modifier for every professional claim could lead to more occurrences where there would not be space for all applicable payment modifiers for a specific service. Unlike institutional claims, we note that a new professional claim is required whenever the place of service changes. That is, even if the same practitioner treats the same patient on the same day in the office and the hospital, the services furnished in the office setting must be submitted on one claim with POS 11 (Office), while those furnished in the outpatient hospital department would be submitted on a separate claim with POS 22 (Outpatient Hospital). Likewise, if a new POS code were to be created for off-campus outpatient provider-based hospital department, a separate claim for services furnished in that setting would be required relative to a claim for outpatient services furnished on the hospital's main campus by the same practitioner to the same patient on the same day. Based on public comments and after further consultation with Medicare billing experts, we believe that use of the POS code on professional claims would be no less accurate than use of a modifier on professional claims in identifying services furnished in off-campus PBDs. In addition, we believe that the POS code would be less administratively burdensome for practitioners billing using the professional claim since a POS code is already required for every professional claim.

With respect to adding new fields to existing claim forms or creating a new bill type, we do not believe that this data collection warrants these measures. We believe that those changes would create greater administrative burden than the proposed HCPCS modifier and POS codes, especially since providers are already accustomed to using modifiers and POS codes. Revisions to the claim form to add new fields or an additional bill type would create significant administrative burden to revise claims processing systems and educate providers that is not necessary given the availability of a modifier and POS codes. Though providers may not be familiar with this new modifier or any new POS code; since these types of codes already exist generally for hospital and professional claims, providers and suppliers should already have an understanding of these types of codes and how to apply them. Finally, we do not believe that expansions to the claim form or use of a new bill type

would provide us with detailed information on exactly which services were furnished in an off-campus PBD versus those furnished on the main campus when those services are furnished on the same day.

We also do not believe that we could accurately determine which services are furnished at off-campus provider-base departments (PBDs) using currently available NPI and facility address data. Hospitals are required to report the nine-digit ZIP code indicating where a service was furnished for purposes of paying properly for physician and anesthesia services paid off the PFS when that ZIP code differs from the master address for the hospital on file in CMS claims systems in value code 78 (pub 100–04, transmittal 1681, February 13, 2009). However, the billing ZIP code for the hospital main campus could be broad enough to incorporate on and off-campus provider-based departments. Further, a ZIP code reported in value code 78 does not allow CMS to distinguish between services furnished in different locations on the same date. Therefore, we do not believe that a comparison of the ZIP code captured in value code 78 and the main campus ZIP code is sufficiently precise.

Finally, while we considered the suggestion that CMS use currently reported Medicare hospital cost report (CMS–2552–10) data to identify services furnished at off-campus PBDs, we note that though aggregate data on services furnished in different settings must be reported through the appropriate cost center, we would not be able to obtain the service-specific level of detail that we would be able to obtain from claims data.

We will take under consideration the suggestion that CMS create a way for hospitals to report their acquisition of physician offices as off-campus PBDs through the enrollment process, although this information, as currently reported, would not allow us to know exactly which services are furnished in off-campus provider based departments and which services are furnished on the hospital's main campus when a hospital provides both on the same day.

Comment: Commenters noted that the proposed modifier would not allow CMS to know the precise location of the off-campus provider-based department for billed services or when services are furnished at different off-campus provider-based locations in the same day.

Response: We agree that neither the proposed modifier nor a POS code provides details on the specific provider-based location for each furnished service. However, we believe that collecting information on the type and frequency of services furnished at all off-campus locations will assist CMS in better understanding the distribution of services between on and off-campus locations.

Comment: MedPAC believed there may be some value in collecting data on services furnished in off-campus provider-based departments to validate the accuracy of site-of-service reporting when the physician's office is off-campus but bills as an outpatient department. MedPAC indicated that any data collection effort should not prevent the development of policies to align payment rates across settings. MedPAC encouraged CMS to seek legislative authority to set equal payment rates across settings for evaluation and management office visits and other select services.

Response: We thank MedPAC for its support of our data collection efforts to learn more about the frequency and types of services that are being furnished in off-campus PBDs.

Comment: Many commenters suggested that providers would not be able to accurately apply the new modifier by the January 1, 2015 implementation timeline and recommended a one-year delay before providers would be required to apply the modifier to services furnished at off-campus PBDs. Some commenters requested only a six-month delay in implementation. Commenters indicated that significant revisions to internal billing processes would require additional time to implement.

Response: Though we believe that the January 1st effective date that applies to most policies adopted in the final rules with comment period for both the PFS and the OPPS would provide sufficient lead time, we understand commenters' concerns with the proposed timeline for implementation given that the new reporting requirements may require changes to billing systems as well as education and training for staff. With respect to the POS code for professional claims, we will request two new POS codes to replace POS code 22 (Hospital Outpatient) through the POS Workgroup and expect that it will take some time for these new codes to be established. Once the revised POS codes are ready and integrated into CMS claims systems, practitioners would be required to use them, as applicable. More information on the availability of the new POS codes will be forthcoming in subregulatory guidance, but we do not expect the new codes to be available prior to July 1, 2015. There will be no voluntary reporting period of the POS codes for applicable professional claims because each professional claim requires a POS code in order to be accepted by Medicare. However, we do not view this to be problematic because we intend to give prior notice on the POS coding changes and, as many public commenters noted, because practitioners are already accustomed to using a POS on every claim they submit.

We also are finalizing our proposal to create a HCPCs modifier for hospital services furnished in an off-campus PBD setting; but we are adopting a voluntary reporting period for the new HCPCS modifier for one year. That is, reporting the new HCPCS modifier for services furnished at an off-campus PBD will not be mandatory until January 1, 2016, in order to allow providers time to make systems changes, test these changes, and train staff on use of the new modifier before reporting is required. We welcome early reporting of the modifier and believe a full year of preparation should provide hospitals with sufficient time to modify their systems for accurate reporting.

Comment: Many commenters expressed concern that this data collection would eventually lead to equalizing payment for similar services furnished in the non-facility setting and the off-campus PBD setting. Several commenters noted that the trend of hospitals acquiring physician practices is due to efforts to better integrate care delivery, and suggested that CMS weigh the benefits of care integration when deciding payment changes. Some commenters suggested that CMS should use the data to equalize payment for similar services between these two settings. These commenters suggest that there is little difference in costs and care between the two settings that would warrant the difference in payment. Several of these commenters highlighted beneficiary cost sharing as one reason for site-neutral payment, noting that the total payment amount for hospital outpatient services is generally higher than the total payment amount for those same services when furnished in a physician's office.

Response: We appreciate the comments received. At this time, we are only finalizing a data collection in this final rule with comment period. We did not propose, and therefore, are not finalizing any adjustment to payments furnished in the off-campus PBD setting.

Comment: Several commenters noted that the CMS proposal would not provide additional information on how a physician practice billed prior to becoming an off-campus PBD, which would be important for analyzing the impact of this trend.

Response: We agree that, in analyzing the impact of this trend, it is important to understand physician billing patterns that were in place prior to becoming an off-campus PBD, and we will continue to evaluate ways to analyze claims data to gather this information. We believe that collecting data using the additional modifier and POS code as finalized in this rule will be an important tool in furthering this analysis.

Comment: Some commenters suggested that the term ''off-campus'' needs to be better defined. Commenters asked how billing would occur for hospitals with multiple campuses since the CMS definition of campus references main buildings and does not include remote locations. One commenter also asked whether the modifier is intended to cover services furnished in free-standing emergency departments.

Response: For purposes of the modifier and the POS codes we are finalizing in this final rule with comment period, we define a ''campus'' using the definition at § 413.65(a)(2) to be the physical area immediately adjacent to the provider's main buildings, other areas and structures that are not strictly contiguous to the main buildings but are located within 250 yards of the main buildings, and any other areas determined on an individual case basis, by the CMS regional office, to be part of the provider's campus. We agree with commenters that our intent is to capture data on outpatient services furnished off of the hospital's main campus and off of any of the hospital's other campuses. The term ''remote location of a hospital'' is defined in our regulations at section 413.65(a)(2). Under the regulation, a ''remote location'' includes a hospital campus other than the main hospital campus. Specifically, a remote location is ''a facility or an organization that is either created by, or acquired by, a hospital that is a main provider for the purposes of furnishing inpatient hospital services under the name, ownership, and financial and administrative control of the main provider . . . .'' Therefore, we agree with the commenters that the new HCPCS modifier and the POS code for off-campus PBDs should not be reported for services furnished in remote locations of a hospital. The term ''remote location'' does not include ''satellite'' locations of a hospital. However, since a satellite facility is one that provides inpatient services in a building also used by another hospital, or in one or more entire buildings located on the same campus as buildings used by another hospital, the new HCPCS modifier and the POS code for off-campus hospital PBDs should not be reported for services furnished in satellite facilities. Satellite facilities are described in our regulations at § 412.22(h). Accordingly, reporting of the modifier and the POS code that identifies an off-campus hospital PBD would be required for outpatient services furnished in PBDs that are located beyond 250 yards from the main campus of the hospital, excluding services furnished in a remote location or satellite facility of the hospital.

We also appreciate the comment on emergency departments. We do not intend for hospitals to report the new modifier for services furnished in emergency departments. We note that there is already a POS code for the emergency department, POS 23 (emergency room-hospital), and this would continue to be used on professional claims for services furnished in emergency departments. That is, the new POS code for off-campus hospital PBDs that will be created for purposes of this data collection would not apply to emergency department services. Hospitals and practitioners that have questions about which departments are considered to be ''off-campus PBDs'' should review additional guidance that CMS releases on this policy and work with the appropriate CMS regional office if individual, specific questions remain.

Comment: Several commenters asked for clarification on when to report the modifier for services furnished both on and off-campus on the same day. Commenters provided several scenarios of visits and diagnostic services furnished on the same day.

Response: The location where the service is actually furnished would dictate the use of the modifier and the POS codes, regardless of where the order for services is initiated. We expect the modifier and the POS code for off-campus PBDs to be reported in locations in which the hospital expends resources to furnish the service in an off-campus PBD setting. For example, hospitals would not report the modifier for a diagnostic test that is ordered by a practitioner who is located in an off-campus PBD when the service is actually furnished on the main campus of the hospital. This issue does not impact use of the POS codes since practitioners submit a different claim for each POS where they furnish services for a specific beneficiary.

Comment: A few commenters asked for clarification on whether their entity constitutes a provider-based department.

Response: Provider-based departments are departments of the hospital that meet the criteria in § 413.65.

Comment: A commenter recommended that CMS publish the data it acquires through adoption of this modifier.

Response: Data collected through the new HCPCS modifier would be part of the Medicare Limited Data Set and would be available to the public for purchase along with the rest of the Limited Data Set. Similarly, professional claims data with revised POS coding would be available as a standard analytic file for purchase.

In summary, after consideration of the comments received, we are finalizing our proposal with modifications. For professional claims, instead of finalizing a HCPCS modifier, in response to comments, we will be deleting current POS code 22 (outpatient hospital department) and establishing two new POS codes—one to identify outpatient services furnished in on-campus, remote or satellite locations of a hospital, and another to identify services furnished in an off-campus hospital PBD setting that is not a remote location of a hospital, a satellite location of a hospital or a hospital emergency department. We will maintain the separate POS code 23 (emergency room-hospital) to identify services furnished in an emergency department of the hospital. These new POS codes will be required to be reported as soon as they become available, however advance notice of the availability of these codes will be shared publicly as soon as practicable.

For hospital claims, we are creating a HCPCS modifier that is to be reported with every code for outpatient hospital services furnished in an off-campus PBD of a hospital. This code will not be required to be reported for remote locations of a hospital defined at § 412.65, satellite facilities of a hospital defined at § 412.22(h) or for services furnished in an emergency department. This 2-digit modifier will be added to the HCPCS annual file as of January 1, 2015, with the label ''PO,'' the short descriptor ''Serv/proc off-campus pbd,'' and the long descriptor ''Services, procedures and/or surgeries furnished at off-campus provider-based outpatient departments.'' Reporting of this new modifier will be voluntary for 1 year (CY 2015), with reporting required beginning on January 1, 2016. Additional instruction and provider education will be forthcoming in subregulatory guidance.

B. Potentially Misvalued Services Under the Physician Fee Schedule

1. Valuing Services Under the PFS

Section 1848(c) of the Act requires the Secretary to determine relative values for physicians' services based on three components: Work, PE, and malpractice. Section 1848(c)(1)(A) of the Act defines the work component to mean, ''the portion of the resources used in furnishing the service that reflects physician time and intensity in furnishing the service.'' In addition, section 1848(c)(2)(C)(i) of the Act specifies that ''the Secretary shall determine a number of work relative value units (RVUs) for the service based on the relative resources incorporating physician time and intensity required in furnishing the service.''

Section 1848(c)(1)(B) of the Act defines the PE component as ''the portion of the resources used in furnishing the service that reflects the general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising practice expenses.'' Section 1848(c)(2)(C)(ii) of the Act requires that PE RVUs be determined based upon the relative PE resources involved in furnishing the service. (See section II.A. of this final rule with comment period for more detail on the PE component.)

Section 1848(c)(1)(C) of the Act defines the MP component as ''the portion of the resources used in furnishing the service that reflects malpractice expenses in furnishing the service.'' Section 1848(c)(2)(C)(iii) of the Act specifies that MP expense RVUs shall be determined based on the relative MP expense resources involved in furnishing the service. (See section II.C. of this final rule with comment period for more detail on the MP component.)

2. Identifying, Reviewing, and Validating the RVUs of Potentially Misvalued Services

a. Background

Section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the RVUs established under the PFS. Section 1848(c)(2)(K) of the Act requires the Secretary to periodically identify potentially misvalued services using certain criteria and to review and make appropriate adjustments to the relative values for those services. Section 1848(c)(2)(L) of the Act also requires the Secretary to develop a process to validate the RVUs of certain potentially misvalued codes under the PFS, using the same criteria used to identify potentially misvalued codes, and to make appropriate adjustments.

As discussed in section I.B. of this final rule with comment period, each year we develop appropriate adjustments to the RVUs taking into account recommendations provided by the American Medical Association/Specialty Society Relative Value Scale Update Committee (RUC), the Medicare Payment Advisory Commission (MedPAC), and others. For many years, the RUC has provided us with recommendations on the appropriate relative values for new, revised, and potentially misvalued PFS services. We review these recommendations on a code-by-code basis and consider these recommendations in conjunction with analyses of other data, such as claims data, to inform the decision-making process as authorized by the law. We may also consider analyses of work time, work RVUs, or direct PE inputs using other data sources, such as Department of Veteran Affairs (VA), National Surgical Quality Improvement Program (NSQIP), the Society for Thoracic Surgeons (STS), and the Physician Quality Reporting Initiative (PQRI) databases. In addition to considering the most recently available data, we also assess the results of physician surveys and specialty recommendations submitted to us by the RUC. We also consider information provided by other stakeholders. We conduct a review to assess the appropriate RVUs in the context of contemporary medical practice. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available, in addition to taking into account the results of consultations with organizations representing physicians. In accordance with section 1848(c) of the Act, we determine and make appropriate adjustments to the RVUs.

In its March 2006 Report to the Congress, MedPAC discussed the importance of appropriately valuing physicians' services, noting that ''misvalued services can distort the price signals for physicians' services as well as for other health care services that physicians order, such as hospital services.'' In that same report MedPAC postulated that physicians' services under the PFS can become misvalued over time. MedPAC stated, ''When a new service is added to the physician fee schedule, it may be assigned a relatively high value because of the time, technical skill, and psychological stress that are often required to furnish that service. Over time, the work required for certain services would be expected to decline as physicians become more familiar with the service and more efficient in furnishing it.'' We believe services can also become overvalued when PE declines. This can happen when the costs of equipment and supplies fall, or when equipment is used more frequently than is estimated in the PE methodology, reducing its cost per use. Likewise, services can become undervalued when physician work increases or PE rises.

As MedPAC noted in its March 2009 Report to Congress, in the intervening years since MedPAC made its initial recommendations, ''CMS and the RUC have taken several steps to improve the review process.'' Also, since that time the Congress added section 1848(c)(2)(K)(ii) to the Act, which augments our efforts. It directs the Secretary to specifically examine, as determined appropriate, potentially misvalued services in the following seven categories:

- Codes and families of codes for which there has been the fastest growth;
- Codes and families of codes that have experienced substantial changes in PEs;
- Codes that are recently established for new technologies or services;
- Multiple codes that are frequently billed in conjunction with furnishing a single service;
- Codes with low relative values, particularly those that are often billed multiple times for a single treatment;
- Codes which have not been subject to review since the implementation of the RBRVS (the so-called 'Harvard-valued codes'); and
- Other codes determined to be appropriate by the Secretary.

Section 220(c) of the Protecting Access to Medicare Act of 2014 (PAMA) further expanded the categories of codes that the Secretary is directed to examine by adding nine additional categories. These are:

- Codes that account for the majority of spending under the PFS;
- Codes for services that have experienced a substantial change in the hospital length of stay or procedure time;
- Codes for which there may be a change in the typical site of service since the code was last valued;
- Codes for which there is a significant difference in payment for the same service between different sites of service;
- Codes for which there may be anomalies in relative values within a family of codes;

- Codes for services where there may be efficiencies when a service is furnished at the same time as other services;
- Codes with high intra-service work per unit of time;
- Codes with high PE RVUs; and
- Codes with high cost supplies.

Section 1848(c)(2)(K)(iii) of the Act also specifies that the Secretary may use existing processes to receive recommendations on the review and appropriate adjustment of potentially misvalued services. In addition, the Secretary may conduct surveys, other data collection activities, studies, or other analyses, as the Secretary determines to be appropriate, to facilitate the review and appropriate adjustment of potentially misvalued services. This section of the Act also authorizes the use of analytic contractors to identify and analyze potentially misvalued codes, conduct surveys or collect data, and make recommendations on the review and appropriate adjustment of potentially misvalued services. Additionally, this section provides that the Secretary may coordinate the review and adjustment of any RVU with the periodic review described in section 1848(c)(2)(B) of the Act. Section 1848(c)(2)(K)(iii)(V) of the Act specifies that the Secretary may make appropriate coding revisions (including using existing processes for consideration of coding changes) that may include consolidation of individual services into bundled codes for payment under the physician fee schedule.

b. Progress in Identifying and Reviewing Potentially Misvalued Codes

To fulfill our statutory mandate, we have identified and reviewed numerous potentially misvalued codes as specified in section 1848(c)(2)(K)(ii) of the Act, and we plan to continue our work examining potentially misvalued codes as authorized by statute over the coming years. As part of our current process, we identify potentially misvalued codes for review, and request recommendations from the RUC and other public commenters on revised work RVUs and direct PE inputs for those codes. The RUC, through its own processes, also identifies potentially misvalued codes for review. Through our public nomination process for potentially misvalued codes established in the CY 2012 PFS final rule with comment period, other individuals and stakeholder groups submit nominations for review of potentially misvalued codes as well.

Since CY 2009, as a part of the annual potentially misvalued code review and Five-Year Review process, we have reviewed over 1,250 potentially misvalued codes to refine work RVUs and direct PE inputs. We have assigned appropriate work RVUs and direct PE inputs for these services as a result of these reviews. A more detailed discussion of the extensive prior reviews of potentially misvalued codes is included in the CY 2012 PFS final rule with comment period (76 FR 73052 through 73055). In the CY 2012 final rule with comment period, we finalized our policy to consolidate the review of physician work and PE at the same time (76 FR 73055 through 73958), and established a process for the annual public nomination of potentially misvalued services.

In the CY 2013 final rule with comment period, we built upon the work we began in CY 2009 to review potentially misvalued codes that have not been reviewed since the implementation of the PFS (so-called ''Harvard-valued codes''). In CY 2009, we requested recommendations from the RUC to aid in our review of Harvard-valued codes that had not yet been reviewed, focusing first on high-volume, low intensity codes (73 FR 38589). In the fourth Five-Year Review, we requested recommendations from the RUC to aid in our review of Harvard-valued codes with annual utilization of greater than 30,000 (76 FR 32410). In the CY 2013 final rule with comment period, we identified Harvard-valued services with annual allowed charges that total at least $10,000,000 as potentially misvalued. In addition to the Harvard-valued codes, in the CY 2013 final rule with comment period we finalized for review a list of potentially misvalued codes that have stand-alone PE (codes with physician work and no listed work time, and codes with no physician work that have listed work time).

In the CY 2014 final rule with comment period, we finalized for review a list of potentially misvalued services. We included on the list for review ultrasound guidance codes that had longer procedure times than the typical procedure with which the code is billed to Medicare. We also finalized our proposal to replace missing post-operative hospital E/M visit information and work time for approximately 100 global surgery codes. For CY 2014, we also considered a proposal to limit PFS payments for services furnished in a nonfacility setting when the nonfacility PFS payment for a given service exceeds the combined Medicare Part B payment for the same service when it is furnished in a facility (separate payments being made to the practitioner under the PFS and to the facility under the OPPS). Based upon extensive public comment, we did not finalize this proposal. We address our current consideration of the potential use of OPPS data in establishing RVUs for PFS services, as well as comments received, in section II.B. of this final rule with comment period.

c. Validating RVUs of Potentially Misvalued Codes

Section 1848(c)(2)(L) of the Act requires the Secretary to establish a formal process to validate RVUs under the PFS. The Act specifies that the validation process may include validation of work elements (such as time, mental effort and professional judgment, technical skill and physical effort, and stress due to risk) involved with furnishing a service and may include validation of the pre-, post-, and intra-service components of work. The Secretary is directed, as part of the validation, to validate a sampling of the work RVUs of codes identified through any of the 16 categories of potentially misvalued codes specified in section 1848(c)(2)(K)(ii)of the Act. Furthermore, the Secretary may conduct the validation using methods similar to those used to review potentially misvalued codes, including conducting surveys, other data collection activities, studies, or other analyses as the Secretary determines appropriate to facilitate the validation of RVUs of services.

In the CY 2011 PFS proposed rule (75 FR 40068) and CY 2012 PFS proposed rule (76 FR 42790), we solicited public comments on possible approaches, methodologies, and data sources that we should consider for a validation process. We provided a summary of the comments along with our responses in the CY 2011 PFS final rule with comment period (75 FR 73217) and the CY 2012 PFS final rule with comment period (76 FR 73054 through 73055).

We contracted with two outside entities to develop validation models for RVUs. Given the central role of time in establishing work RVUs and the concerns that have been raised about the current time values used in rate setting, we contracted with the Urban Institute to collect time data from several practices for services selected by the contractor in consultation with CMS. These data will be used to develop time estimates. The Urban Institute will use a variety of approaches to develop objective time estimates, depending on the type of service. Objective time estimates will be compared to the current time values used in the fee schedule. The project team will then convene groups of physicians from a

range of specialties to review the new time data and their potential implications for work and the ratio of work to time. The Urban Institute has prepared an interim report, Development of a Model for the Valuation of Work Relative Value Units, which discusses the challenges encountered in collecting objective time data and offers some thoughts on how these can be overcome. This interim report is available on the CMS Web site at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Downloads/RVUs-Validation-UrbanInterimReport.pdf*. Collection of time data under this project has just begun. A final report will be available once the project is complete.

The second contract is with the RAND Corporation, which is using available data to build a validation model to predict work RVUs and the individual components of work RVUs, time, and intensity. The model design was informed by the statistical methodologies and approach used to develop the initial work RVUs and to identify potentially misvalued procedures under current CMS and RUC processes. RAND will use a representative set of CMS-provided codes to test the model. RAND consulted with a technical expert panel on model design issues and the test results. We anticipate a report from this project by the end of the year and will make the report available on the CMS Web site.

Descriptions of both projects are available on the CMS Web site at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Downloads/RVUs-Validation-Model.pdf*.

We acknowledge comments received regarding the Urban Institute and RAND projects, but note that we did not solicit comments on these projects because we made no proposals related to them. Any changes to payment policies under the PFS that we might make after considering these reports would be issued in a proposed rule and subjected to public comment before they would be finalized and implemented.

3. CY 2015 Identification and Review of Potentially Misvalued Services

a. Public Nomination of Potentially Misvalued Codes

In the CY 2012 PFS final rule with comment period, we finalized a process for the public to nominate potentially misvalued codes (76 FR 73058). The public and stakeholders may nominate potentially misvalued codes for review by submitting the code with supporting documentation during the 60-day public comment period following the release of the annual PFS final rule with comment period. Supporting documentation for codes nominated for the annual review of potentially misvalued codes may include the following:

- Documentation in the peer reviewed medical literature or other reliable data that there have been changes in physician work due to one or more of the following: Technique; knowledge and technology; patient population; site-of-service; length of hospital stay; and work time.
- An anomalous relationship between the code being proposed for review and other codes.
- Evidence that technology has changed physician work, that is, diffusion of technology.
- Analysis of other data on time and effort measures, such as operating room logs or national and other representative databases.
- Evidence that incorrect assumptions were made in the previous valuation of the service, such as a misleading vignette, survey, or flawed crosswalk assumptions in a previous evaluation.
- Prices for certain high cost supplies or other direct PE inputs that are used to determine PE RVUs are inaccurate and do not reflect current information.
- Analyses of work time, work RVU, or direct PE inputs using other data sources (for example, VA NSQIP, STS National Database, and the PQRS databases).
- National surveys of work time and intensity from professional and management societies and organizations, such as hospital associations.

After we receive the nominated codes during the 60-day comment period following the release of the annual PFS final rule with comment period, we evaluate the supporting documentation and assess whether the nominated codes appear to be potentially misvalued codes appropriate for review under the annual process. In the following year's PFS proposed rule, we publish the list of nominated codes and indicate whether we are proposing each nominated code as a potentially misvalued code.

During the comment period to the CY 2014 final rule with comment period, we received nominations and supporting documentation for four codes to be considered as potentially misvalued codes. Although we evaluated the supporting documentation for two of the nominated codes to ascertain whether the submitted information demonstrated that the code should be proposed as potentially misvalued, we did not identify the other two codes until after the publication of the proposed rule. We apologize for this oversight and will address the nomination of CPT codes 92227 and 92228 in the proposed rule for CY 2016.

We proposed CPT code 41530 (submucosal ablation of the tongue base, radiofrequency, 1 or more sites, per session) as potentially misvalued based on public nomination due to a significant decrease in two of the direct PE inputs.

Comment: The commenter that nominated this code as potentially misvalued thanked CMS for proposing this code as potentially misvalued, but indicated that the RUC had made recommendations for this code for CY 2015 and further review was no longer necessary. Another commenter suggested that this code should be removed from the list of potentially misvalued codes since it saves Medicare millions of dollars per year.

Response: The RUC only provided us with recommendations for PE inputs for CPT code 41530. Under our usual process, we value work and PE at the same time and would expect to receive RUC recommendations on both before we revalue this service. We disagree with the commenter's statement that codes that may save money for the Medicare program should not be considered as potentially misvalued. Our aim, consistent with our statutory directive, is to value all services appropriately under the PFS to reflect the relative resources involved in furnishing them. After consideration of public comments, we are finalizing CPT code 41530 as potentially misvalued.

We did not propose CPT code 99174 (instrument-based ocular screening (for example, photoscreening, automated-refraction), bilateral) as potentially misvalued, because it is a non-covered service, and we only consider nominations of active codes that are covered by Medicare at the time of the nomination (see 76 FR 73059).

Comment: Commenters did not disagree with CMS not proposing this code as potentially misvalued, but did raise a variety of comments about the code that were unrelated to our proposal.

Response: We continue to believe that our policy to limit the designation of potentially misvalued to those codes that are covered by Medicare is appropriate, so that we focus our limited resources on those services that have an impact on the Medicare program and its beneficiaries. Therefore, we are not including CPT code 99174 on

our final list of potentially misvalued codes for CY 2015.

b. Potentially Misvalued Codes

(1) Review of High Expenditure Services Across Specialties With Medicare Allowed Charges of $10,000,000 or More

We proposed 68 codes listed in Table 11 as potentially misvalued codes under the newly established statutory category, ''codes that account for the majority of spending under the physician fee schedule.'' To develop this list, we identified the top 20 codes by specialty (using the specialties used in Table 11) in terms of allowed charges. We excluded those codes that we have reviewed since CY 2009, those codes with fewer than $10 million in allowed charges, and E/M services. E/M services were excluded for the same reason that we excluded them in a similar review for CY 2012. The reason was explained in the CY 2012 final rule with comment period (76 FR 73062 through 73065).

We stated that we believed that a review of the codes in Table 11 is warranted to assess changes in physician work and to update direct PE inputs since these codes have not been reviewed since CY 2009 or earlier. Furthermore, since these codes have significant impact on PFS payment at the specialty level, a review of the relativity of the codes is essential to ensure that the work and PE RVUs are appropriately relative within the specialty and across specialties, as discussed previously. For these reasons, we proposed the codes listed in Table 11 as potentially misvalued.

TABLE 11—POTENTIALLY MISVALUED CODES IDENTIFIED THROUGH THE HIGH EXPENDITURE BY SPECIALTY SCREEN

HCPCS	Short descriptor
11100 ..	Biopsy skin lesion.
11101 ..	Biopsy skin add-on.
11730 ..	Removal of nail plate.
11750 ..	Removal of nail bed.
14060 ..	Tis trnfr e/n/e/l 10 sq cm/.
17110 ..	Destruct b9 lesion 1–14.
31575 ..	Diagnostic laryngoscopy.
31579 ..	Diagnostic laryngoscopy.
36215 ..	Place catheter in artery.
36475 ..	Endovenous rf 1st vein.
36478 ..	Endovenous laser 1st vein.
36870 ..	Percut thrombect av fistula.
51720 ..	Treatment of bladder lesion.
51728 ..	Cystometrogram w/vp.
51798 ..	Us urine capacity measure.
52000 ..	Cystoscopy.
55700 ..	Biopsy of prostate.
65855 ..	Laser surgery of eye.
66821 ..	After cataract laser surgery.
67228 ..	Treatment of retinal lesion.
68761 ..	Close tear duct opening.
71010 ..	Chest x-ray 1 view frontal.
71020 ..	Chest x-ray 2vw frontal&latl.
71260 ..	Ct thorax w/dye.
73560 ..	X-ray exam of knee 1 or 2.
73562 ..	X-ray exam of knee 3.
73564 ..	X-ray exam knee 4 or more.
74183 ..	Mri abdomen w/o & w/dye.
75978 ..	Repair venous blockage.
76536 ..	Us exam of head and neck.
76700 ..	Us exam abdom complete.
76770 ..	Us exam abdo back wall comp.
76775 ..	Us exam abdo back wall lim.
77263 ..	Radiation therapy planning.
77334 ..	Radiation treatment aid(s).
78452 ..	Ht muscle image spect mult.
88185 ..	Flowcytometry/tc add-on.
91110 ..	Gi tract capsule endoscopy.
92136 ..	Ophthalmic biometry.
92250 ..	Eye exam with photos.
92557 ..	Comprehensive hearing test.
93280 ..	Pm device progr eval dual.
93306 ..	Tte w/doppler complete.
93351 ..	Stress tte complete.
93978 ..	Vascular study.
94010 ..	Breathing capacity test.
95004 ..	Percut allergy skin tests.
95165 ..	Antigen therapy services.
95957 ..	Eeg digital analysis.
96101 ..	Psycho testing by psych/phys.
96118 ..	Neuropsych tst by psych/phys.
96372 ..	Ther/proph/diag inj sc/im.
96375 ..	Tx/pro/dx inj new drug addon.
96401 ..	Chemo anti-neopl sq/im.
96409 ..	Chemo iv push sngl drug.
97032 ..	Electrical stimulation.
97035 ..	Ultrasound therapy.
97110 ..	Therapeutic exercises.
97112 ..	Neuromuscular reeducation.
97113 ..	Aquatic therapy/exercises.
97116 ..	Gait training therapy.
97140 ..	Manual therapy 1/> regions.
97530 ..	Therapeutic activities.
G0283	Elec stim other than wound.

Comment: Many commenters disagreed with the high expenditure screen in principle, stating that the frequency with which a service is furnished (and therefore the total expenditures) is not an indication that the service is misvalued. Specifically, commenters explained that many of the services are highly utilized because of the nature of the Medicare beneficiary population, and not because there is abuse or overutilization. Commenters asserted that the current misvalued code screens can produce a redundant list of potentially misvalued codes while failing to identify codes that are being incorrectly reported. Another commenter urged CMS to work with the RUC to ensure that the code lists identified by the misvalued code screens are accurate. A commenter asked CMS to provide justification for including codes with charges greater than $10 million on the potentially misvalued codes list. Some commenters urged us to reconsider including particular families of codes that were reviewed prior to 2009; others asked that CMS exclude all codes that have been reviewed in the last 10 years; and still others requested that we exclude codes that were bundled several years ago. A commenter stated that the emphasis on codes with spending of more than $10 million demonstrates an agenda to cut spending rather than to ensure appropriate payment, and expressed concern that CMS was simply nominating high value services. Commenters recommended that CMS not finalize its proposed list of potentially misvalued codes, and instead develop a more targeted list of codes that are likely to be misvalued (not just potentially misvalued). Commenters wanted CMS to exempt codes when there have not been fundamental changes in the way the services are furnished or there is no indication that their values are inaccurate, so that specialty societies do not have to go through the work of reviewing them.

Several commenters questioned the statutory authority for CMS's proposal. One commenter questioned CMS's authority under the relevant statute to select potentially misvalued codes by specialty. The commenter stated that identifying the top 20 codes by specialty in terms of allowed charges does not appear to align with a direct reading of the relevant statutory authority, which allows CMS to identify codes that account for the majority of spending under the PFS, but does not provide for the identification of codes by specialty. The commenter said that a more direct interpretation of the statutory authority would be to select codes based on allowed charges irrespective of specialty, and then to narrow the universe of codes based upon the top codes in terms of allowed charges. Another commenter believed the proposed screen did not comport with the statutory selection criteria because the majority or near majority of spending under the PFS is for evaluation and management (E/M) codes, which CMS excluded from review. The commenter said that if CMS believes that E/M services should not be reviewed—a position the commenter said they would certainly understand—then such a determination is sufficient to meet the statutory mandate to review codes accounting for the majority of PFS spending, and it would then be

appropriate for CMS and the RUC to focus efforts on other categories of potentially misvalued codes. The commenter urged CMS at the very least to develop a more targeted list of potentially misvalued services in the category of codes accounting for the majority of PFS spending, and to include codes that are likely to be misvalued, not just potentially misvalued.

Response: Potentially misvalued code screens are intended to identify codes that are possibly misvalued. By definition, these screens do not assert that codes are certainly or even likely misvalued. As we discussed in the CY 2012 PFS final rule with comment period (76 FR 73056), the screens serve to focus our limited resources on categories of codes where there is a high risk of significant payment distortions. One goal is to avoid perpetuating payment for the services at a rate that does not appropriately reflect the relative resources involved in furnishing the service. In implementing this statutory provision, we consider whether the codes meeting the screening criteria have a significant impact on payment for all PFS services due to the budget neutral nature of the PFS. That is, if codes meeting the screening criteria are indeed misvalued, they would be inappropriately impacting the relative values of all PFS services. Addressing included codes therefore indirectly addresses other codes that do not meet the screening criteria but are themselves misvalued because high expenditure codes are misvalued. We agree with the commenters that high program expenditures and high utilization have varying causes and do not necessarily reflect misvalued codes. However, we continue to believe that the high expenditure screen is nevertheless an appropriate means of focusing our reviews, ensuring appropriate relativity among PFS services, and identifying services that are either over or undervalued. The high expenditure screen is likely to identify misvalued codes, both directly and indirectly.

Regarding screening for codes by specialty, as we discussed above, the included codes have significant impact on PFS payment at the specialty level, therefore a review of the relativity of the codes is essential to ensure that the work and PE RVUs are appropriately relative within the specialty and across specialties. We mentioned in the CY 2012 final rule with comment period how stakeholders have noted that many of the services previously identified under the potentially misvalued codes initiative were concentrated in certain specialties. To develop a robust and representative list of codes for review, we examine the highest PFS expenditure services by specialty and we identify those codes that have not been recently reviewed (76 FR 73060).

Although we understand commenters' concerns that the screens can produce redundant results, we note that we exempted codes that have been reviewed since 2009 for this very reason. We believe that the practice of medicine can change significantly over a 10-year period, and disagree with commenters' suggestions that no changes would occur over a 10-year period that would significantly affect a procedure's valuation.

Regarding the exclusion of E/M services, we refer the commenters to the extensive discussion in the CY 2012 PFS final rule with comment period (76 FR 73060 through 73065). It is true that E/M services account for significant volume under the PFS, but there are significant issues with reviewing these codes as discussed in the CY 2012 final rule with comment period, and as a result we did not propose to include these codes as potentially misvalued.

Comment: Some commenters suggested other screens that could be used to identify misvalued codes. In addition, even though our proposal only relates to identifying potentially misvalued codes, some commenters commented on our mechanisms for re-valuing misvalued codes.

Response: The only screen for which we made a proposal and sought comments was the high expenditure screen. However, we will consider the suggestions for other screens as we develop proposals in future years. Similarly, our proposal only related to identifying potentially misvalued codes and not how to re-value them if they were finalized as potentially misvalued.

Comment: Several commenters requested that CMS postpone the review of potentially misvalued codes until the revised process we proposed for reviewing new, revised, and potentially misvalued codes is in place.

Response: Although we believe that the revised process for reviewing new, revised, and potentially misvalued codes will improve the transparency of the PFS code review process, we do not believe it is appropriate to postpone the review of all potentially misvalued codes until the new process is implemented. We note that the codes identified in this rule as potentially misvalued would be revalued under the new process, which will be phased in starting for CY 2016 and will apply for all codes revalued for CY 2017.

Comment: Commenters raised several codes that they believed should not be included in the high expenditure screen for a variety of reasons, for example if the code is related to other codes that were recently reviewed and the utilization for the identified service is expected to change significantly as a result of coding changes in the family. Commenters also suggested that codes that have been referred to the CPT Editorial Panel should be excluded from the potentially misvalued codes list.

Response: We acknowledge commenters' suggestion that we exclude particular codes from the screen, but since we are not finalizing a particular list of codes for this screen in this final rule we are not addressing these at this time. We note that we do not agree with commenters that codes that have been referred to CPT by the RUC should be excluded from the potentially misvalued list; rather, we believe that only when these codes are either deleted or revised, and/or we receive new RUC recommendations for re-valuing these codes, would it be appropriate to remove these services from the list.

Comment: A commenter suggested that CMS's high expenditure screen may not account for the fact that many radiology codes have already gone through numerous five-year reviews; have well-established RVUs that are included on the RUC's multispecialty point of comparison (MPC) list; have been included in new, bundled codes; or have PE RVUs that were affected by changes in clinical labor times or equipment utilization assumption changes. The commenter also suggested that the screens do not account for the value that patients receive in terms of better, timelier diagnoses and avoidance of invasive procedures.

Response: We acknowledge that certain types of procedures have been identified through multiple screens; however, we continue to believe that it is appropriate to include most codes that are identified via these screens and not to exclude codes simply because many other procedures furnished by that specialty have already been reviewed. We further note that the presence of codes on the MPC list makes the case for their review more compelling, given their importance in ensuring overall relativity throughout the PFS. With respect to changes in PE RVUs, we note that cross-cutting policies that affect large numbers of codes are aimed at ensuring overall relativity but do not address the inputs associated with each procedure affected by the change. Finally, a code's status as potentially misvalued does not imply

that the service itself is not of inherent value; rather, that its valuation may be inaccurate in either direction.

After considering the comments received, as well as the other proposals we are finalizing, we believe it is appropriate to finalize the high expenditure screen as a tool to identify potentially misvalued codes. However, given the resources required over the next several years to revalue the services with global periods, we believe it is best to concentrate our efforts on these valuations. Therefore, we are not finalizing the codes identified through the high expenditure screen as potentially misvalued at this time. Also, we are not responding to comments at this time regarding whether particular codes should or should not be included in the high expenditure code screen and identified as potentially misvalued codes. We will re-run the high expenditure screen at a future date, and will propose at that time the specific set of codes to be reviewed that meet the high expenditure criteria.

(2) Epidural Injection and Fluoroscopic Guidance—CPT Codes 62310, 62311, 62318, 62319, 77001, 77002 and 77003

For CY 2014, we established interim final rates for four epidural injection procedures, CPT codes 62310 (Injection(s), of diagnostic or therapeutic substance(s) (including anesthetic, antispasmodic, opioid, steroid, other solution), not including neurolytic substances, including needle or catheter placement, includes contrast for localization when performed, epidural or subarachnoid; cervical or thoracic), 62311 (Injection(s), of diagnostic or therapeutic substance(s) (including anesthetic, antispasmodic, opioid, steroid, other solution), not including neurolytic substances, including needle or catheter placement, includes contrast for localization when performed, epidural or subarachnoid; lumbar or sacral (caudal)), 62318 (Injection(s), including indwelling catheter placement, continuous infusion or intermittent bolus, of diagnostic or therapeutic substance(s) (including anesthetic, antispasmodic, opioid, steroid, other solution), not including neurolytic substances, includes contrast for localization when performed, epidural or subarachnoid; cervical or thoracic) and 62319 (Injection(s), including indwelling catheter placement, continuous infusion or intermittent bolus, of diagnostic or therapeutic substance(s) (including anesthetic, antispasmodic, opioid, steroid, other solution), not including neurolytic substances, includes contrast for localization when performed, epidural or subarachnoid; lumbar or sacral (caudal)). These interim final values resulted in CY 2014 payment reductions from the CY 2013 rates for all four procedures.

In the CY 2014 final rule with comment period (78 FR 74340), we described in detail our interim valuation of these codes. We indicated we established interim final work RVUs for these codes that were less than those recommended by the RUC because we did not believe that the RUC-recommended work RVUs accounted for the substantial decrease in time it takes to furnish these services as reflected in the RUC survey data for these four codes. Since the RUC provided no indication that the intensity of the procedures had changed, we indicated that we believed the work RVUs should reflect the reduction in time. We also established interim final direct PE inputs for these four codes based on the RUC-recommended inputs without any refinement. These recommendations included the removal of the radiographic-fluoroscopy room for CPT codes 62310, 62311, and 62318 and a portable C-arm for CPT code 62319.

In response to the comments we received objecting to the CY 2014 interim final values for these codes, we looked at other injection procedures. Other injection procedures, including some that commenters recommended we use to value these epidural injection codes, include the work and practice expenses of image guidance in the injection code. In the proposed rule, we detailed many of these procedures, which include the image guidance in the injection CPT code. Since our analysis of the Medicare data and comments received on the CY 2014 final rule with comment period indicated that these services are typically furnished with imaging guidance, we believe it would be appropriate for the codes to be bundled and the inputs for image guidance to be included in the valuation of the epidural injection codes as it is for transforaminal and paravertebral codes. We stated that we did not believe the epidural injection codes can be appropriately valued without considering the image guidance, and that bundling image guidance will help assure relativity with other injection codes that include the image guidance. To determine how to appropriately value resources for the combined codes, we indicated that we believed more information is needed. Accordingly, we proposed to include CPT codes 62310, 62311, 62318, and 62319 on the potentially misvalued code list so that we can obtain information to value them with the image guidance included. In the meantime, we proposed to use the CY 2013 input values for CPT codes 62310, 62311, 62318 and 62319 to value these codes for CY 2015. Specifically, we proposed to use the CY 2013 work RVUs and work times.

Because it was clear that inputs that are specifically related to image guidance, such as the radiographic fluoroscopic room, are included in these proposed direct PE inputs for the epidural injection codes, we believed allowing separate reporting of the image guidance codes would overestimate the resources used in furnishing the overall service. To avoid this situation, we also proposed to prohibit the billing of image guidance codes in conjunction with these four epidural injection codes. We stated that we believed our two-tiered proposal to utilize CY 2013 input values for this family while prohibiting separate billing of imaging guidance best ensures that appropriate reimbursements continue to be made for these services, while we gather additional data and input on the best way to value them through codes that include both the injection and the image guidance.

Comment: The commenters did not object to identifying these codes as potentially misvalued and generally agreed with our proposal to revert to the 2013 inputs for CY 2015.

Response: We appreciate support for our proposal.

Comment: Several commenters agreed that it would be appropriate to bundle the image guidance with the epidural procedures. Other commenters suggested that we create both a bundled code and a stand-alone epidural injection code.

Response: We appreciate commenters' support for our proposal to bundle image guidance with the epidural procedures. As part of the review process, consideration can be given to how to best implement bundled codes.

Comment: Other commenters expressed concern that the bundling approach CMS proposed to use until these codes are reviewed did not incorporate the work or time for fluoroscopy. Some requested that we add the payment for fluoroscopic guidance to the epidural injection codes, as we have done in the past for facet joint injections and other services. Commenters requested that we continue to allow the image guidance codes to be separately billed until these services are revalued. Another commenter suggested that it may be premature to prohibit separate billing for image guidance, as there is considerable variation on the

use of fluoroscopic guidance between codes within this family.

Response: We understand commenters' concerns about our proposal to prohibit separate billing for image guidance, and note that these concerns are part of the reason we are referring these codes to the RUC as potentially misvalued. However, given that significant resources are allocated to fluoroscopic guidance within the current injection codes, we do not believe it is appropriate to continue to allow the image guidance to be separately billed while we evaluate these epidural injection codes as potentially misvalued services.

After considering comments received, we are finalizing CPT codes 62310, 62311, 62318, and 62319 as potentially misvalued, finalizing the proposed RVUs for these services, and prohibiting separate billing of image guidance in conjunction with these services.

(3) Neurostimulator Implantation (CPT Codes 64553 and 64555)

We proposed CPT codes 64553 (Percutaneous implantation of neurostimulator electrode array; cranial nerve) and 64555 (Percutaneous implantation of neurostimulator electrode array; peripheral nerve (excludes sacral nerve)) as potentially misvalued after stakeholders questioned whether the codes included the appropriate direct PE inputs when furnished in the nonfacility setting.

Comment: A commenter encouraged CMS to include these codes on the potentially misvalued code list to ensure that they are adequately reimbursed in the nonfacility setting, while another commenter disagreed that the work for CPT codes 64553 and 64555 needed to be reviewed.

Response: In general, when a code is proposed as potentially misvalued, unless we receive information that clearly demonstrates it is not potentially misvalued, we finalize the code as potentially misvalued. When we finalize a code as potentially misvalued, we then review the inputs for the code. As a result of such review, inputs can be adjusted either upward or downward.

We appreciate the support for our proposal expressed by some commenters. Since the commenter opposing the addition of these codes to the potentially misvalued code list did not provide justification for its assertion that the work RVUs for CPT codes 64553 and 64555 did not need to be reviewed, after consideration of comments received, we are finalizing CPT codes 64553 and 64555 as potentially misvalued.

(4) Mammography (CPT Codes 77055, 77056, and 77057, and HCPCS Codes G0202, G0204, and G0206)

Medicare currently pays for mammography services through both CPT codes, (77055 (mammography; unilateral), 77056 (mammography; bilateral) and 77057 (screening mammography, bilateral (2-view film study of each breast)) and HCPCS G-codes, (G0202 (screening mammography, producing direct digital image, bilateral, all views), G0204 (diagnostic mammography, producing direct digital image, bilateral, all views), and G0206 (diagnostic mammography, producing direct digital image, unilateral, all views)). The CPT codes were designed to be used for mammography regardless of whether film or digital technology is used. However, for Medicare purposes, the HCPCS G-codes were created to describe mammograms using digital technology in response to special payment rules for digital mammography included in the Medicare Benefit Improvements and Protection Act of 2000 (BIPA).

The RUC recommended that CMS update the direct PE inputs for all imaging codes to reflect the migration from film-to-digital storage technologies since digital storage is now typically used in imaging services. Review of the Medicare data with regard to the application of this policy to mammography confirmed that virtually all mammography is now digital. As a result, we proposed that CPT codes 77055, 77056, and 77057 be used to report mammography regardless of whether film or digital technology is used, and to delete the HCPCS G-codes G0202, G0204, and G0206. We proposed to establish values for the CPT codes by crosswalking the values established for the digital mammography G-codes for CY 2015. (See section II.B. of this final rule with comment period for more discussion of this policy.) In addition, since the G-code values have not been evaluated since they were created in CY 2002 we proposed to include CPT codes 77055, 77056, and 77057 on the list of potentially misvalued codes.

Comment: With regard to whether the mammography codes should be included on the potentially misvalued codes list, commenters had differing opinions. One commenter stated that the work RVUs for digital mammography are the same as those for analog mammography, and maintained that the BIPA-directed payment for digital mammography of 1.5 times the TC of the analog mammography codes appropriately captures the practice expense resources required for digital mammography. Another commenter stated that digital mammography rates resulted from a statutory construct and do not reflect the actual costs of the digital resources necessary to furnish the services. One commenter noted that moving from the non-resource-based values to resource-based values will result in a significant reduction to the valuation of these services, and that this reduction will result from the resource-based PE methodology, not from the RUC review. Another commenter indicated that the RUC should not survey these codes, but requested that if the RUC does survey these codes, they should not do so until after CMS finalizes the new breast tomosynthesis codes (3D mammography) and film-to-digital transition. Another commenter indicated that CMS needed to consider that three-dimensional (3D) mammography codes involve additional resources over the two-dimensional (2D) mammography codes. A commenter suggested that this proposal fails to take into account the increasing use of tomography.

Response: The commenters' disagreement about whether these codes are misvalued would suggest that a review is warranted. Given that more than a decade has passed since these services were reviewed, we continue to believe that it is appropriate to review the work RVUs for these services. By including these codes on the potentially misvalued code list, we will have information to determine whether the current values are still appropriate. Finally, we anticipate that the survey results for the mammography codes will reflect the equipment that is typically used. We note that until these services are reviewed, we do not have adequate information to respond to the suggestion that the valuation for these services will be significantly reduced. However, we do acknowledge that the PE methodology is not intended to account for the actual costs in furnishing a service; rather, it is required to account for the relative resources in furnishing that service. We also note that there are new CPT codes for reporting mammography using tomosynthesis and we have RUC recommendations for these codes. We believe it is most appropriate to value the mammography code family together, and receipt of RUC recommendations on the other mammography codes will assist us in our review. Accordingly, we are including all mammography codes except those newly created for tomosynthesis on the potentially misvalued code list.

Comment: Although commenters agreed with our assessment that digital

technology has replaced analog mammography as typical, not all agreed that it was appropriate to delete G-codes and use the CPT codes. One commenter supported the deletion of the G-codes. Other commenters suggested that deletion of the G-codes was unnecessary. Another commenter stated that the coding system frequently reflects differences in approach and technique, and that the equipment for analog and digital mammography are different enough to warrant separate reporting so we should not delete the G-codes. Some who supported continuation of the G-codes asked us to delay implementation as they were concerned that other payers would not have time to update their requirements by January 1, 2015. Another commenter applauded CMS's decision to delete the G-codes.

Response: In further consideration of this proposal, we discovered that while the CPT codes for diagnostic mammography apply to mammography, whether film or digital technology is used, the descriptor for the screening mammography CPT code specifically refers to film. In light of this and that fact that we anticipate revaluing these codes when we have the benefit of RUC recommendations for all codes in the family, we believe it is appropriate to continue to recognize both the CPT codes and the G-codes for mammography for CY 2015, as we consider appropriate valuations now that digital mammography is typical. Therefore, we are not finalizing our proposal to delete the G-codes. We are, however, making a change in the descriptors to make clear that the G0202, G0204, and G0206 are specific to 2–D mammography. These codes are to be reported with either G0279 or CPT code 77063 when mammography is furnished using 3–D mammography.

Comment: A commenter requested that CMS ensure reimbursement rates remain adequate to protect access for Medicare beneficiaries. Another commenter suggested that these changes could result in barriers to access for Medicare beneficiaries.

Response: We are strongly supportive of access to mammography for Medicare beneficiaries. As stated elsewhere in this final rule with comment period, we believe that accurate valuation incentivizes appropriate utilization of services.

After consideration of public comments, we are modifying our proposal as follows: We will include CPT codes 77055, 77056, and 77057 on the potentially misvalued codes list; we will continue to recognize G0202, G0204 and G0206 but will modify the descriptors so that they are specific to 2–D digital mammography, and instead of using the digital values we will continue to use the CY 2014 work and PE RVUs to value the mammography CPT codes. We expect that the CPT Editorial Panel will consider the descriptor for screening mammography, CPT code 77057, in light of the prevailing use of digital mammography.

(5) Abdominal Aortic Aneurysm Ultrasound Screening (G0389)

When Medicare began paying for abdominal aortic aneurysm (AAA) ultrasound screening, HCPCS code G0389 (Ultrasound, B-scan and/or real time with image documentation; for abdominal aortic aneurysm (AAA) screening) in CY 2007, we set the RVUs at the same level as CPT code 76775 (Ultrasound, retroperitoneal (e.g., renal, aorta, nodes), B-scan and/or real time with image documentation; limited). We noted in the CY 2007 final rule with comment period that CPT code 76775 was used to report the service when furnished as a diagnostic test and that we believed the service reflected by G0389 used equivalent resources and work intensity to those contained in CPT code 76775 (71 FR 69664 through 69665).

In the CY 2014 proposed rule, we proposed to replace the ultrasound room included as a direct PE input for CPT code 76775 with a portable ultrasound unit based upon a RUC recommendation. Since the RVUs for G0389 were crosswalked from CPT code 76775, the proposed PE RVUs for G0389 in the CY 2014 proposed rule were reduced as a result of this change. However, we did not discuss the applicability of this change to G0389 in the preamble to the proposed rule, and did not receive any comments on G0389 in response to the proposed rule. We finalized the change to CPT code 76775 in the CY 2014 final rule with comment period and as a result, the PE RVUs for G0389 were also reduced.

We proposed G0389 as potentially misvalued in response to a stakeholder suggestion that the reduction in the RVUs for G0389 did not accurately reflect the resources involved in furnishing the service. We sought recommendations from the public and other stakeholders, including the RUC, regarding the appropriate work RVU, time, direct PE input, and malpractice risk factors that reflect the typical resources involved in furnishing the service.

Until we receive the information needed to re-value this service, we proposed to value this code using the same work and PE RVUs we used for CY 2013. We proposed MP RVUs based on the five-year review update process as described in section II.C of this final rule with comment period. We stated that we believe this valuation would ameliorate the effect of the CY 2014 reduction that resulted from the RVUs for G0389 being tied to those for another code while we assess appropriate valuation through our usual methodologies. Accordingly, we proposed a work RVU of 0.58 for G0389 and proposed to assign the 2013 PE RVUs until this procedure is reviewed.

Comment: Many commenters supported our proposal to include this service on the potentially misvalued codes list. Some commenters agreed that the crosswalk used to set rates for this service does not appear to be appropriate at this time, whether due to changes in the way the service is provided, or because the specialty mix has shifted, and suggested that it would be appropriate to establish a Category I CPT code for this service. Another commenter suggested that CMS consider crosswalking G0389 to CPT code 93979 (Duplex scan of aorta, inferior vena cava, iliac vasculature, or bypass grafts; unilateral or limited study). One commenter believed it was unnecessary to survey this code, but recommended that we instead maintain the general ultrasound room as a direct PE input and 2013 PE RVUs.

Response: We appreciate commenters' support for our proposal to include G0389 on the potentially misvalued codes list and are finalizing this proposal. We are finalizing this code as potentially misvalued in large part because we are unsure of the correct valuation. Therefore, we believe it is most appropriate to retain the 2013 inputs until we receive new recommendations, rather than making another change or retaining these inputs indefinitely as commenters suggested.

After consideration of comments received, we are finalizing our proposal to add G0389 to the potentially misvalued codes list, and to maintain the 2013 work and PE RVUs while we complete our review of the code. The MP RVUs will be calculated as discussion in section II.C. of this rule.

(6) Prostate Biopsy Codes—(HCPCS Codes G0416, G0417, G0418, and G0419)

For CY 2014, we modified the code descriptors of G0416 through G0419 so that these codes could be used for any method of prostate needle biopsy services, rather than only for prostate saturation biopsies. The CY 2014 descriptions are:

• G0416 (Surgical pathology, gross and microscopic examination for prostate needle biopsies, any method; 10–20 specimens).
• G0417 (Surgical pathology, gross and microscopic examination for prostate needle biopsies, any method; 21–40 specimens).
• G0418 (Surgical pathology, gross and microscopic examination for prostate needle biopsies, any method; 41–60 specimens).
• G0419 (Surgical pathology, gross and microscopic examination for prostate needle biopsies, any method; greater than 60 specimens).

Subsequently, we have discussed prostate biopsies with stakeholders, and reviewed medical literature and Medicare claims data in considering how best to code and value prostate biopsy pathology services. After considering these discussions and information, we believed it would be appropriate to use only one code to report prostate biopsy pathology services. Therefore, we proposed to revise the descriptor for G0416 to define the service regardless of the number of specimens, and to delete codes G0417, G0418, and G0419. We believe that using G0416 to report all prostate biopsy pathology services, regardless of the number of specimens, would simplify the coding and mitigate overutilization incentives. Given the infrequency with which G0417, G0418, and G0419 are used, we did not believe that this was a significant change.

Based on our review of medical literature and examination of Medicare claims data, we indicated that we believe that the typical number of specimens evaluated for prostate biopsies is between 10 and 12. Since G0416 currently is used for between 10 and 12 specimens, we proposed to use the existing values for G0416 for CY 2015, since the RVUs for this service were established based on similar assumptions.

In addition, we proposed G0416 as a potentially misvalued code for CY 2015 and sought public comment on the appropriate work RVUs, work time, and direct PE inputs.

Comment: One commenter supported the elimination of the G-codes as a means of simplifying coding requirements, but other commenters opposed our proposal to consolidate the coding into G0416, disagreeing that this would help establish ''straightforward coding and maintain accurate payment'' as suggested in the proposed rule. Some commenters suggested that we retain the current codes so that biopsy procedures requiring more than 10 specimens can be reimbursed accurately, and indicated that consolidating the coding would further confuse physicians and their staff who have not yet adapted to the CY 2014 coding changes for these G-codes. Other commenters asserted that these changes threaten to undermine access to high quality pathology services. Commenters also stated that the decision to furnish more extensive pathological analysis is not at the discretion of the pathologist, and the pathologist should not be penalized when he or she receives more cores to analyze.

With respect to our proposing G0416 as potentially misvalued, commenters stated that the recent change to these codes has already been confusing and suggests that there is not a clear understanding of what these codes represent, thus making an assessment of their valuation difficult. Commenters further stated that it is unreasonable to consider this a misvalued code when the payment is already 30 percent below what they think it should be, and that CMS has failed to provide justification for why it is potentially misvalued.

The RUC and others suggested that it would be most accurate to utilize CPT code 88305 (Level IV—surgical pathology, gross and microscopic examination) for the reporting of prostate biopsies and to allow the reporting of multiple units. Given the additional granularity and scrutiny given to CPT code 88305 in the CY 2014 final rule, the commenters indicated that they believe that the agency's intent to establish straightforward coding and accurate payment for these services would be realized with this approach.

Response: Given that the typical analysis of prostate biopsy specimens differs significantly from the typical analyses reported using CPT code 88305, as regards the number of blocks used to process the specimen and thus the amount of work involved, we believe that by distinguishing prostate biopsies from other types of biopsies results in more accurate pricing for prostate biopsies. Since CPT code 88305 was revalued with the understanding that prostate biopsies are billed separately, we believe that allowing CPT code 88305 to be reported in multiple units for prostate biopsies would account for significantly more resources than is appropriate. With respect to the concern about higher numbers of specimens, we note that our claims data on the G-codes shows that the vast majority of the claims used G0416, rather than any of the G-codes for greater numbers of specimens.

After consideration of comments received, we are finalizing our proposal to include G0416 on the potentially misvalued codes list, to modify the descriptor to reflect all prostate biopsies, and to maintain the current value until we receive and review information and recommendations from the RUC. We are also finalizing our proposal to delete codes G0417, G0418, and G0419.

(7) Obesity Behavioral Group Counseling—GXXX2 and GXXX3

Pursuant to section 1861(ddd) of the Act, we added coverage for a new preventive benefit, Intensive Behavioral Therapy for Obesity, effective November 29, 2011, and created HCPCS code G0447 (Face-to-face behavioral counseling for obesity, 15 minutes) for reporting and payment of individual behavioral counseling for obesity. Coverage requirements specific to this service are delineated in the Medicare National Coverage Determinations Manual, Pub. 100–03, Chapter 1, Section 210, available at *http://www.cms.gov/manuals/downloads/ncd103c1_Part4.pdf*.

It was brought to our attention that behavioral counseling for obesity is sometimes furnished in group sessions, and questions were raised about whether group sessions could be billed using HCPCS code G0447. To improve payment accuracy, we proposed to create two new HCPCS codes for the reporting and payment of group behavioral counseling for obesity. Specifically, we proposed to create GXXX2 (Face-to-face behavioral counseling for obesity, group (2–4), 30 minutes) and GXXX3 (Face-to-face behavioral counseling for obesity, group (5–10), 30 minutes). We indicated that the coverage requirements for these services would remain in place, as described in the National Coverage Determination for Intensive Behavioral Therapy for Obesity cited above. The practitioner furnishing these services would report the relevant group code for each beneficiary participating in a group therapy session.

Since we believed that the face-to-face behavioral counseling for obesity services described by GXXX2 and GXXX3 would require similar per minute work and intensity as HCPCS code G0447, we proposed work RVUs of 0.23 and 0.10 for HCPCS codes GXXX2 and GXXX3, with work times of 8 minutes and 3 minutes respectively. Since the services described by GXXX2 and GXXX3 would be billed per beneficiary receiving the service, the work RVUs and work time that we proposed for these codes were based upon the assumed typical number of beneficiaries per session, 4 and 9, respectively. Accordingly, we proposed

a work RVU of 0.23 with a work time of 8 minutes for GXXX2 and a work RVU of 0.10 with a work time of 3 minutes for GXXX3. We proposed to use the direct PE inputs for GXXX2 and GXXX3 currently included for G0447 prorated to account for the differences in time and number of beneficiaries, and to crosswalk the malpractice risk factor from HCPCS code G0447 to both HCPCS codes GXXX2 and GXXX3, as we believe the same specialty mix will furnish these services. We requested public comment on the proposed values for HCPCS codes GXXX2 and GXXX3.

Comment: Commenters generally supported our proposal to establish a separate payment mechanism for obesity behavioral group counseling services, but raised several concerns regarding the coding structure and valuation of these services. Commenters stated that the work times were inaccurate, requested that the service be valued based on a smaller number of typical group participants, and questioned the need for two G-codes when group counseling services under the PFS are generally billed with a single G-code. A commenter also stated that the lower payment for larger groups will create disincentives for furnishing this service except when there is a full 10-person group, which could limit access. Commenters suggested that CMS only finalize a single G-code for group counseling for intensive behavioral therapy for obesity, and crosswalk the work RVU and work time for this service from the Medical Nutrition Therapy (MNT) group code.

Response: We appreciate commenters' support for our proposal to provide new codes for group obesity counseling services. After reviewing the comments, we agree that it is reasonable to create a single code for group obesity counseling and crosswalk the work RVU and work time from the MNT group code. The individual code for intensive obesity behavioral therapy and the individual MNT code are valued the same, so in the absence of evidence that group composition is different, we believe it makes sense to use the same values. Therefore, we will crosswalk the work RVU of 0.25 and the work time of 10 minutes to a single new G-code for group obesity counseling, G0473 (Face-to-face behavioral counseling for obesity, group (2–10), 30 minutes).

4. Improving the Valuation and Coding of the Global Package

a. Overview

Since the inception of the PFS, we have valued and paid for certain services, such as surgery, as part of global packages that include the procedure and the services typically furnished in the periods immediately before and after the procedure (56 FR 59502). For each of these codes (usually referred to as global surgery codes), we establish a single PFS payment that includes payment for particular services that we assume to be typically furnished during the established global period.

There are three primary categories of global packages that are labeled based on the number of post-operative days included in the global period: 0-day; 10-day; and 90-day. The 0-day global codes include the surgical procedure and the pre-operative and post-operative physicians' services on the day of the procedure, including visits related to the service. The 10-day global codes include these services and, in addition, visits related to the procedure during the 10 days following the procedure. The 90-day global codes include the same services as the 0-day global codes plus the pre-operative services furnished one day prior to the procedure and post-operative services during the 90 days immediately following the day of the procedure.

Section 40.1 of the Claims Processing Manual (Pub. 100–04, Chapter 12 Physician/Nonphysician Practitioners) defines the global surgical package to include the following services when furnished during the global period:

- Preoperative Visits—Preoperative visits after the decision is made to operate beginning with the day before the day of surgery for major procedures and the day of surgery for minor procedures;
- Intra-operative Services—Intra-operative services that are normally a usual and necessary part of a surgical procedure;
- Complications Following Surgery—All additional medical or surgical services required of the surgeon during the postoperative period of the surgery because of complications that do not require additional trips to the operating room;
- Postoperative Visits—Follow-up visits during the postoperative period of the surgery that are related to recovery from the surgery;
- Postsurgical Pain Management—By the surgeon;
- Supplies—Except for those identified as exclusions; and
- Miscellaneous Services—Items such as dressing changes; local incisional care; removal of operative pack; removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes; and changes and removal of tracheostomy tubes.

b. Concerns With the 10- and 90-Day Global Packages

CMS supports bundled payments as a mechanism to incentivize high-quality, efficient care. Although on the surface, the PFS global codes appear to function as bundled payments similar to those Medicare uses to make single payments for multiple services to hospitals under the inpatient and outpatient prospective payment systems, the practical reality is that these global codes function significantly differently than other bundled payments. First, the global surgical codes were established several decades ago when surgical follow-up care was far more homogenous than today. Today, there is more diversity in the kind of procedures covered by global periods, the settings in which the procedures and the follow-up care are furnished, the health care delivery system and business arrangements used by Medicare practitioners, and the care needs of Medicare beneficiaries. Despite these changes, the basic structures of the global surgery packages are the same as the packages that existed prior to the creation of the resource-based relative value system in 1992. Another significant difference between this and other typical models of bundled payments is that the payment rates for the global surgery packages are not updated regularly based on any reporting of the actual costs of patient care. For example, the hospital inpatient and outpatient prospective payment systems (the IPPS and OPPS, respectively) derive payment rates from hospital cost and charge data reported through annual Medicare hospital cost reports and the most recent year of claims data available for an inpatient stay or primary outpatient service.

Because payment rates are based on consistently updated data, over time, payment rates adjust to reflect the average resource costs of current practice. Similarly, many of the new demonstration and innovation models track costs and make adjustments to payments. Another significant difference is that payment for the PFS global packages relies on valuing the combined services together. This means that there are no separate PFS values established for the procedures or the follow-up care, making it difficult to estimate the costs of the individual global code component services.

In the following paragraphs, we address a series of concerns regarding the accuracy of payment for 10- and 90-day global codes, including: The fundamental difficulties in establishing

appropriate relative values for these packages, the potential inaccuracies in the current information used to price global codes, the limitations on appropriate pricing in the future, the potential for global packages to create unwarranted payment differentials among specialties, the possibility that the current codes are incompatible with current medical practice, and the potential for these codes to present obstacles to the adoption of new payment models.

Concerns such as these commonly arise when developing payment mechanisms, for example fee-for-service payment rates, single payments for multiple services, or payment for episodes of care over a period of time. However, in the case of the post-operative portion of the 10- and 90-day global codes, we believe that together with certain unique aspects of PFS rate setting methodology, these concerns create substantial barriers to accurate valuation of these services relative to other PFS services.

(1) Fundamental Limitations in the Appropriate Valuation of the Global Packages With Post-Operative Days

In general, we face many challenges in valuing PFS services as accurately as possible. However, the unique nature of global surgery packages with 10- and 90-day post-operative periods presents additional challenges distinct from those presented in valuing other PFS services. Our valuation methodology for PFS services generally relies on assumptions regarding the resources involved in furnishing the ''typical case'' for each individual service unlike other payment systems that rely on actual data on the costs of furnishing services. Consistent with this valuation methodology, the RVUs for a global code should reflect the typical number and level of E/M services furnished in connection with the procedure. However, it is much easier to maintain relativity among services that are valued on this basis when each of the services is described by codes of similar unit sizes. In other words, because codes with long post-operative periods include such a large number of services, any variations between the ''typical'' resource costs used to value the service and the actual resource costs associated with particular services are multiplied. The effects of this problem can be two-fold, skewing the accuracy of both the RVUs for individual global codes and the Medicare payment made to individual practitioners. The RVUs of the individual global service codes are skewed whenever there is any inaccuracy in the assumption of the typical number or kind of services in the post-operative periods. This inaccuracy has a greater impact than inaccuracies in assumptions for non-global codes because it affects a greater number of service units over a period of time than for individually priced services. Furthermore, in contrast to prospective payment systems, such inaccuracies under the PFS are not corrected over time through a ratesetting process that makes year-to-year adjustments based on data on actual costs. For example, if a 90-day global code is valued based on an assumption or survey response that ten post-operative visits is typical, but practitioners reporting the code in fact typically only furnish six visits, then the resource assumptions are overestimated by the value of the four visits multiplied by the number of the times the procedure code is reported. In contrast, when our assumptions are incorrect about the typical resources involved in furnishing a PFS code that describes a single service, any inaccuracy in the RVUs is limited to the difference between the resource costs assumed for the typical service and the actual resource costs in furnishing one individual service. Such a variation between the assumptions used in calculating payment rates and the actual resource costs could be corrected if the payments for packaged services were updated regularly using data on actual services furnished. Medicare's prospective payment systems have more mechanisms in place than the PFS does to adjust over time for such variation To make adjustments to the RVUs to account for inaccurate assumptions under the current PFS methodology, the global surgery code would need to be identified as potentially misvalued, survey data would have to reflect an accurate account of the number and level of typical post-operative visits, and we (with or without a corresponding recommendation from the RUC or others) would have to implement a change in RVUs based on the change in the number and level of visits to reflect the typical service.

These amplified inaccuracies may also occur whenever Medicare pays an individual practitioner reporting a 10- or 90-day global code. Practitioners may furnish a wide range of post-operative services to individual Medicare beneficiaries, depending on individual patient needs, changes in medical practice, and dynamic business models. Due to the way the 10- and 90-day global codes are constructed, the number and level of services included for purposes of calculating the payment for these services may vary greatly from the number and level of services that are actually furnished in any particular case. In contrast, the variation between the ''typical'' and the actual resource cost for the practitioner reporting an individually valued PFS service is constrained because the practitioner is only reporting and being paid for a specific service furnished on a particular date.

For most PFS services, any difference between the ''typical'' case on which RVUs are based and the actual case for a particular service is limited to the variation between the resources assumed to be involved in furnishing the typical case and the actual resources involved in furnishing the single specific service. When the global surgical package includes more or a higher level of E/M services than are actually furnished in the typical post-operative period, the Medicare payment is based on an overestimate of the quantity or kind of services furnished, not merely an overestimation of the resources involved in furnishing an individual service. The converse is true if the RVUs for the global surgical package are based on fewer or a lower level of services than are typically furnished for a particular code.

(2) Questions Regarding Accuracy of Current Assumptions

In previous rulemaking (77 FR 68911 through 68913), we acknowledged evidence suggesting that the values included in the post-operative period for global codes may not reflect the typical number and level of post-operative E/M visits actually furnished.

In 2005, the OIG examined whether global surgical packages are appropriately valued. In its report on eye and ocular surgeries, ''National Review of Evaluation and Management Services Included in Eye and Ocular Adnexa Global Surgery Fees for Calendar Year 2005'' (A–05–07–00077), the OIG reviewed a sample of 300 eye and ocular surgeries, and counted the actual number of face-to-face services recorded in the patients' medical records to establish whether and, if so, how many post-operative E/M services were furnished by the surgeons. For about two-thirds of the claims sampled by the OIG, surgeons furnished fewer E/M services in the post-operative period than were included in the global surgical package payment for each procedure. A small percentage of the surgeons furnished more E/M services than were included in the global surgical package payment. The OIG identified the number of face-to-face services recorded in the medical record, but did not review the medical necessity

of the surgeries or the related E/M services. The OIG concluded that the RVUs for these global surgical packages are too high because they include a higher number of E/M services than typically are furnished within the global period for the reviewed procedures.

Following that report, the OIG continued to investigate E/M services furnished during global surgical periods. In May 2012, the OIG published a report entitled ''Musculoskeletal Global Surgery Fees Often Did Not Reflect the Number of Evaluation and Management Services Provided'' (A–05–09–00053). For this investigation, the OIG sampled 300 musculoskeletal global surgeries and again found that, for the majority of sampled surgeries, physicians furnished fewer E/M services than were included as part of the global period payment for that service. Once again, a small percentage of surgeons furnished more E/M services than were included in the global surgical package payment. The OIG concluded that the RVUs for these global surgical packages are too high because they include a higher number of E/M services than typically are furnished within the global period for the reviewed procedures.

In both reports, the OIG recommended that we adjust the number of E/M services identified with the studied global surgical payments to reflect the number of E/M services that are actually being furnished. However, since it is not necessary under our current global surgery payment policy for a surgeon to report the individual E/M services actually furnished during the global surgical period, we do not have objective data upon which to assess whether the RVUs for global period surgical services reflect the typical number or level of E/M services that are furnished. In the CY 2013 PFS proposed rule (77 FR 44738), we previously sought public comments on collecting these data. As summarized in the CY 2013 PFS final rule (77 FR 68913) we did not discover a consensus among stakeholders regarding either the most appropriate means to gather the data, or the need for, or the appropriateness of using such data in valuing these services. In response to our comment solicitation, some commenters urged us to accept the RUC survey data as accurate in spite of the OIG reports and other concerns that have been expressed regarding whether the visits included in the global periods reflected the typical case. Others suggested that we should conduct new surveys using the RUC approach or that we should mine hospital data to identify the typical number of visits furnished. Some comments suggested eliminating the 10- and 90-day global codes.

(3) Limitations on Appropriate Future Valuations of 10- and 90-Day Global Codes

Historically, our attempts to adjust RVUs for global services based on changes in the typical resource costs (especially with regard to site of service assumptions or changes to the number of post-surgery visits) have been difficult and controversial. At least in part, this is because the relationship between the work RVUs for the 10- and 90-day global codes (which includes the work RVU associated with the procedure itself) and the number of included post-operative visits in the existing values is not always clear. Some services with global periods have been valued by adding the work RVU of the surgical procedure and all pre- and post-operative E/M services included in the global period. However, in other cases, as many stakeholders have noted, the total work RVUs for surgical procedures and post-operative visits in global periods are estimated as a single value without any explicit correlation to the time and intensity values for the individual service components. Although we would welcome more objective information to improve our determination of the ''typical'' case, we believe that even if we engaged in the collection of better data on the number and level of E/M services typically furnished during the global periods for global surgery services, the valuation of individual codes with post-operative periods would not be straightforward. Furthermore, we believe it would be important to frequently update the data on the number and level of visits furnished during the post-operative periods in order to account for any changes in the patient population, medical practice, or business arrangements. Practitioners paid through the PFS do not report such data.

(4) Unwarranted Payment Disparities

Subsequent to our last comment solicitation regarding the valuation of the post-operative periods (77 FR 68911 through 68913), some stakeholders have raised concerns that global surgery packages contribute to unwarranted payment disparities between practitioners who do and do not furnish these services. These stakeholders have addressed several ways the 10- and 90-day global packages may contribute to unwarranted payment disparities.

The stakeholders noted that, through the global surgery packages, Medicare pays practitioners who furnish E/M services during post-surgery periods regardless of whether the services are actually furnished, while practitioners who do not furnish global procedures with post-operative visits are only paid for E/M services that are actually furnished. In some cases, it is possible that the practitioner furnishing the global surgery procedure may not furnish any post-operative visits. Although we have policies to address the situation when post-operative care is transferred from one practitioner to another, the beneficiary might simply choose to seek care from another practitioner without a formal transfer of care. The other practitioner would then bill Medicare separately for E/M services for which payment was included in the global payment to the original practitioner. Those services would not have been separately billable if furnished by the original practitioner.

These circumstances can lead to unwarranted payment differences, allowing some practitioners to receive payment for fewer services than reflected in the Medicare payment. Practitioners who do not furnish global surgery services bill and are paid only for each individual service furnished. When global surgery values are based on inaccurate assumptions about the typical services furnished in the post-operative periods, these payment disparities can contribute to differences in aggregate RVUs across specialties. Since the RVUs are intended to reflect differences in the relative resource costs involved in furnishing a service, any disparity between assumed and actual costs results not only in paying some practitioners for some services that are not furnished, it also skews relativity between specialties.

Stakeholders have also pointed out that payment disparities can arise because E/M services reflected in global periods generally include higher PE values than the same services when billed separately. The difference in PE values between separately billed visits and those included in global packages result primarily from two factors that are both inherent in the PFS pricing methodology.

First, there is a different mix of PE inputs (clinical labor/supplies/equipment) included in the direct PE inputs for a global period E/M service and a separately billed E/M service. For example, the clinical labor inputs for separately reportable E/M codes includes a staff blend listed as ''RN/LPN/MTA'' (L037D) and priced at $0.37 per minute. Instead of this input, some codes with post-operative visits include the staff type ''RN'' (L051A) priced at a higher rate of $0.51 per minute. For these codes, the higher resource cost

may accurately reflect the typical resource costs associated with those particular visits. However, the different direct PE inputs may drive unwarranted payment disparities among specialties who report global surgery codes with post-operative periods and those that do not. The only way to correct these potential discrepancies under the current system, which result from the specialty-based differences in resource costs, would be to include standard direct PE inputs for these services regardless of whether or not the standard inputs are typical for the specialties furnishing the services.

Second, the indirect PE allocated to the E/M visits included in global surgery codes is higher than that allocated to separately furnished E/M visits. This occurs because the range of specialties furnishing a particular global service is generally not as broad as the range of specialties that report separate individual E/M services. Since the specialty mix for a service is a key factor in determining the allocation of indirect PE to each code, a higher amount of indirect PE can be allocated to the E/M services that are valued as part of the global surgery codes than to the individual E/M codes. Practitioners who use E/M codes to report visits separately are paid based on PE RVUs that reflect the amount of indirect PE allocated across a wide range of specialties, which has the tendency to lower the amount of indirect PE. For practitioners who are paid for visits primarily through post-operative periods, indirect PE is generally allocated with greater specificity. Two significant steps would be required to alleviate the impact of this disparity. First, we would have to identify the exact mathematical relationship between the work RVU and the number and level of post-operative visits for each global code; and second, we would have to propose a significant alteration of the PE methodology in order to allocate indirect PE that does not correlate to the specialties reporting the code in the Medicare claims data.

Furthermore, stakeholders have pointed out that the PE RVUs for codes with 10- or 90-day post-operative periods reflect the assumption that all outpatient visits occur in the higher-paid non-facility office setting, when many of these visits are likely to be furnished in provider-based departments, which would be paid at the lower, PFS facility rate if they were billable separately. As we note elsewhere in this final rule with comment period, we do not have data on the volume of physicians' services furnished in provider-based departments, but public information suggests that it is not insignificant and that it is growing. When these services are paid as part of a global package, there is no adjustment made based on the site of service. Therefore, even though the PFS payment for services furnished in post-operative global periods might include clinical labor, disposable supply, and medical equipment costs (and additional indirect PE allocation) that are incurred by the facility and not the practitioner reporting the service, the RVUs for global codes reflect all of these costs associated with the visits.

(5) Incompatibility of Current Packages With Current Practice and Unreliability of RVUs for Use in New Payment Models

In addition to these issues, the 10- and 90-day global periods reflect a long-established but no longer exclusive model of post-operative care that assumes the same practitioner who furnishes the procedure typically furnishes the follow-up visits related to that procedure. In many cases, we believe that models of post-operative care are increasingly heterogeneous, particularly given the overall shift of patient care to larger practices or team-based environments.

We believe that RVUs used to establish PFS payments are likely to serve as critical building blocks to developing, testing, and implementing a number of new payment models, including those that focus on bundled payments to practitioners or payments for episodes of care. Therefore, we believe it is critical for us to ensure that the PFS RVUs accurately reflect the resource costs for individual PFS services instead of reflecting potentially skewed assumptions regarding the number of services furnished over a long period of time in the ''typical'' case. To the extent that the 10- and 90-day global periods reflect inaccurate assumptions regarding resource costs associated with individual PFS services, we believe they are likely to be obstacles to a wide range of potential improvements to PFS payments, including the potential incorporation of payment bundling designed to foster efficiency and quality care for Medicare beneficiaries.

c. Proposed Transformation of 10- and 90-Day Global Packages Into 0-Day Global Packages

Although we have marginally addressed some of the concerns noted above with global packages in previous rulemaking, we do not believe that we have made significant progress in addressing the fundamental issues with the 10- and 90-day post-operative global packages. In the context of the misvalued code initiative, we believe it is critical for the RVUs used to develop PFS payment rates reflect the most accurate resource costs associated with PFS services. Based on the issues discussed above, we do not believe we can effectively address the issues inherent in establishing values for the 10- and 90-day global packages under our existing methodologies and with available data. As such, we do not believe that maintaining the post-operative 10-and 90-day global periods is compatible with our continued interest in using more objective data in the valuation of PFS services and accurately valuing services relative to each other. Because the typical number and level of post-operative visits during global periods may vary greatly across Medicare practitioners and beneficiaries, we believe that continued valuation and payment of these face-to-face services as a multi-day package may skew relativity and create unwarranted payment disparities within PFS fee-for-service payment. We also believe that the resource based valuation of individual physicians' services will continue to serve as a critical foundation for Medicare payment to physicians, whether through the current PFS or in any number of new payment models. Therefore, we believe it is critical that the RVUs under the PFS be based as closely and accurately as possible on the actual resources involved in furnishing the typical occurrence of specific services.

To address the issues discussed above, we proposed to retain global bundles for surgical services, but to refine bundles by transforming over several years all 10- and 90-day global codes to 0-day global codes. Medically reasonable and necessary visits would be billed separately during the pre- and post-operative periods outside of the day of the surgical procedure. We propose to make this transition for current 10-day global codes in CY 2017 and for the current 90-day global codes in CY 2018, pending the availability of data on which to base updated values for the global codes.

We believe that transforming all 10- and 90-day global codes to 0-day global codes would:

- Increase the accuracy of PFS payment by setting payment rates for individual services based more closely upon the typical resources used in furnishing the procedures;
- Avoid potentially duplicative or unwarranted payments when a beneficiary receives post-operative care

from a different practitioner during the global period;

- Eliminate disparities between the payment for E/M services in global periods and those furnished individually;
- Maintain the same-day packaging of pre- and post-operative physicians' services in the 0-day global; and
- Facilitate availability of more accurate data for new payment models and quality research.

As we transition these codes, we would need to establish RVUs that reflect the change in the global period for all the codes currently valued as 10- and 90-day global surgery services. We sought assistance from stakeholders on various aspects of this task. Prior to implementing these changes, we intend to gather objective data on the number of E/M and other services furnished during the current post-operative periods and use those data to inform both the valuation of particular services and the overall budget neutrality adjustments required to implement this proposal. We sought comment on the most efficient means of acquiring accurate data regarding the number of visits and other services actually being furnished by the practitioner during the current post-operative periods. For all the reasons stated above, we do not believe that survey data reflecting assumptions of the ''typical case'' meets the standards required to measure the resource costs of the wide range of services furnished during the post-operative periods. We acknowledge that collecting information on these services through claims submission may be the best approach, and we would propose such a collection through future rulemaking. However, we are also interested in alternatives. For example, we sought information on the extent to which individual practitioners or practices may currently maintain their own data on services furnished during the post-operative period, and how we might collect and objectively evaluate that data.

We also sought comment on the best means to ensure that allowing separate payment of E/M visits during post-operative periods does not incentivize otherwise unnecessary office visits during post-operative periods. If we adopt this proposal, we intend to monitor any changes in the utilization of E/M visits following its implementation but we also solicited comment on potential payment policies that will mitigate such a change in behavior.

In developing this proposal, we considered several alternatives to the transformation of all global codes to 0-day global codes. First, we again considered the possibility of gathering data and using the data to revalue the 10- and 90-day global codes. While this option would have maintained the status quo in terms of reporting services, it would have required much of the same effort as this proposal without alleviating many of the problems associated with the 10- and 90-day global periods. For example, collecting accurate data would allow for more accurate estimates of the number and kind of visits included in the post-operative periods at the time of the survey. However, this alternative approach would only mitigate part of the potential for unwarranted payment disparities. For example, the values for the visits in the global codes would continue to include different amounts of PE RVUs than separately reportable visits and would continue to provide incentives to some practitioners to minimize patient visits. Additionally, it would not address the changes in practice patterns that we believe have been occurring whereby the physician furnishing the procedure is not necessarily the same physician providing the post-procedure follow up.

This alternative option would also rest extensively on the effectiveness of using the new data to revalue the codes accurately. Given the unclear relationship between the assigned work RVUs and the post-operative visits across all of these services, incorporating objective data on the number of visits to adjust work RVUs would still necessitate extensive review of individual codes or families of codes by CMS and stakeholders, including the RUC. We believe the investment of resources for such an effort would be better made to solve a broader range of problems.

We also considered other possibilities, such as altering our PE methodology to ensure that the PE inputs and indirect PE for visits in the global period were valued the same as separately reportable E/M codes or requiring reporting of the visits for all 10- and 90-day global services while maintaining the 10- and 90-day global period payment rates. However, we believe this option would require all of the same effort by practitioners, CMS, and other stakeholders without alleviating most of the problems addressed in the preceding paragraphs.

We also considered maintaining the status quo and identifying each of the 10- and 90-day global codes as potentially misvalued through our potentially misvalued code process for review as 10- and 90-day globals. Inappropriate valuations of these services has a major effect on the fee schedule due to the percentage of PFS dollars paid through 10- and 90-day global codes (3 percent and 11 percent, respectively), and thus, valuing them appropriately is critical to appropriate valuation and relativity throughout the PFS. Through the individual review approach, we could review the appropriateness of the global period and the accurate number of visits for each service. Yet revaluing all 3,000 global surgery codes through the potentially misvalued codes approach would not address many of the problems identified above. Unless such an effort was combined with changes in the PE methodology, it would only partially address the valuation and accuracy issues and would leave all the other issues unresolved. Moreover, the valuation and accuracy issues that could be addressed through this approach would rapidly be out of date as medical practice continues to change. Therefore, such an approach would be only partially effective and would impede our ability to address other potentially misvalued codes.

We sought stakeholder input on an accurate and efficient means to revalue or adjust the work RVUs for the current 10- and 90-day global codes to reflect the typical resources involved in furnishing the services including both the pre- and post-operative care on the day of the procedure. We believe that collecting data on the number and level of post-operative visits furnished by the practitioner reporting current 10- and 90-day global codes will be important to ensuring work RVU relativity across these services. We also believe that these data will be important to determine the relationship between current work RVUs and current number of post-operative visits, within categories of codes and code families. However, we believe that once we collect those data, there is a wide range of possible approaches to the revaluation of the large number of individual global services, some of which may deviate from current processes like those undertaken by the RUC. To date, the potentially misvalued code initiative has focused on several hundred, generally high-volume codes per year. This proposal requires revaluing a larger number of codes over a shorter period of time and includes many services with relatively low volume in the Medicare population. Given these circumstances, it does not seem practical to survey time and intensity information on each of these procedures. Absent any new survey data regarding the procedures themselves,

we believe that data regarding the number and level of post-service office visits can be used in conjunction with other methods of valuation, such as:

- Using the current potentially misvalued code process to identify and value the relatively small number of codes that represent the majority of the volume of services that are currently reported with codes with post-operative periods, and then adjusting the aggregate RVUs to account for the number of visits and using magnitude estimation to value the remaining services in the family.
- Valuing one code within a family through the current valuation process and then using magnitude estimation to value the remaining services in the family.
- Surveying a sample of codes across all procedures to create an index that could be used to value the remaining codes.

Although we believe these are plausible options for the revaluation of these services, we believed there may be others. Therefore, we sought input on the best approach to achieve this proposed transition from 10- and 90-day, to 0-day global periods, including the timing of the changes, the means for revaluation, and the most effective and least burdensome means to collect objective, representative data regarding the actual number of visits currently furnished in the post-operative global periods. We also solicited comment on whether the effective date for the transition to 0-day global periods should be staggered across families of codes or other categories. For example, while we proposed to transition 10-day global periods in 2017 and 90-day global periods in 2018, we solicited comment on whether we should consider implementing the transition more or less quickly and over one or several years. We also solicited comment regarding the appropriate valuation of new, revised, or potentially misvalued 10- or 90-day global codes before implementation of this proposal.

We received many comments regarding the proposed transition to 0-day global packages. Many commenters expressed support or opposition to the proposal. Some commenters offered direct responses to the topics for which we specifically sought comment, while others raised questions regarding how the transition would be implemented. In the following paragraphs, we summarize and respond to these comments.

Comment: Several commenters supported the proposal, including commenters representing several medical specialty societies and several health systems. Many of these commenters agreed with the reasons presented in the proposal. These commenters agreed that the current structure of the global surgery codes prevents CMS from accurately valuing and paying for these services, even if CMS had necessary visit data available. Many commenters agreed that the current arrangement may lead to unwarranted payment disparities and that the current packages have not evolved with changes in practice and because of this, likely provide unreliable building blocks for new payment methodologies.

In agreeing with the proposal, MedPAC stated that it ''is essential that the individual services that make up a bundle have accurate values and that there is a mechanism to ensure that the services that are part of the bundle are not paid separately (unbundling). Otherwise, the payment rate for the entire bundle will be inaccurate.'' MedPAC urged CMS to finalize this proposal and plan to use the more accurate valuations to create more accurate bundles in the future.

Response: We appreciate the commenters' support for the proposal, and agree that there are many reasons why the current construction of the global surgery packages is difficult to reconcile with accurate valuation of individual services within the current payment construct of the PFS. We agree that achieving the agency's goal of greater bundling requires accurate valuation of component services in a surgical procedure.

Comment: Some commenters, including several of those representing specialty societies, urged CMS to postpone finalization of the proposal pending the report of stakeholder efforts to conduct a comprehensive analysis of the effect it would have on the provision of surgical care, surgical patients, and the surgeons who care for them.

Response: We share stakeholders' concerns regarding the potential impact of the change on Medicare beneficiaries and practitioners. However, based upon our analysis and the information that stakeholders have provided, we believe delaying the proposal to further study the problems is not warranted given the significant concerns that have been raised with the current construction of the global surgery packages. Instead, as we articulated in making the proposal, we anticipate that further analysis by stakeholders will contribute to implementing the transition in a manner that accurately values and pays for PFS services. We believe that accurate valuation of services furnished to Medicare beneficiaries is overwhelmingly in the best interest of both beneficiaries and those who care for them.

Comment: We received several comments from commenters who opposed our proposal, and in general these commenters shared the concerns of those who urged a delay in finalizing or implementing the proposal. In addition, some commenters who opposed the proposal disputed our contention that the global periods contribute to unwarranted payment disparities, saying that the increased direct and indirect PE and MP RVUs for E/M services furnished in the global surgical post-operative periods accurately account for the increased PE and MP costs of practitioners who furnish these services relative to practitioners who typically furnish separately reportable E/M services.

Response: Just as we do not agree that we should delay addressing significant problems with valuations while we further study the issues, we do not believe these same issues raised by commenters opposing the proposal are impediments to implementation. The issues relating to valuation of global period E/M services using our PE methodology are just one of several important considerations that led us to propose transforming 10- and 90-day global services to 0-day global packages. We continue to believe the proposed transformation to 0-day global packages is a simple and immediate step to improve the valuation of the various services included in surgical care. However, Medicare remains committed to bundled payment as a mechanism for delivery system reform and we will continue to explore the best way to bundle surgical services, including alternatives to the 0-day global surgical bundle.

Comment: Many commenters who opposed the proposal addressed valuation problems that would exist if the proposal were implemented. Some stated that, were CMS to finalize the proposal to pay for post-surgical E/Ms using the same codes, the PE and MP RVUs for the services would be artificially reduced because the data from other specialties would be incorporated. These commenters suggested CMS should consider how to maintain the current differences in payment for these services even if the proposal were finalized. Some commenters suggested that CMS would need to account for the additional practice expense and malpractice costs for post-operative surgical visits.

Response: We develop and establish work, PE, and MP RVUs for specific services to reflect the relative resource costs involved in furnishing the typical

PFS service. In developing the proposal, we noted that by including a significant number of E/Ms in the global periods for surgical services, the PFS ratesetting methodology distinguishes these services from other E/Ms for purposes of developing PE and MP RVUs, potentially to the advantage of particular specialties with higher PE and MP RVUs. In contrast, the work RVUs for individual, separately billed E/M services furnished, for example, by primary care practitioners are valued more generally as individual services, and values are not maintained separately from the work RVUs for E/Ms furnished by other practitioners. Therefore, we do not agree with commenters that Medicare should establish higher PE and MP values for E/M services furnished in the post-surgical period than for other E/M services.

Comment: Several commenters suggested that CMS should not use the OIG reports to generalize its concerns about the provision of surgical care, because the OIG reports represent only a small sample of observations of specific procedures and specialties. Other commenters suggested that the OIG methodology might be flawed because, since CMS does not require documentation of post-operative visits, many practitioners may not document such visits in the medical record.

Response: We do not have any reason to believe that the OIG findings on the global surgical service packages furnished by particular specialties that the OIG reviewed are not generalizable to other global surgery services. Nor did the commenters provide any evidence that the OIG conclusions are likely to be less accurate than the survey estimates that CMS uses to value the services. Finally, having an incorrect number of postoperative visits is only one of the many valuation problems that have been identified for global surgical packages. Additionally, we find the suggestion that physicians do not document medical visits that are occurring in the post-surgical period to be concerning. As a general matter, Medicare does not require documentation to support a billed service beyond information that the physician would normally maintain in the patient's medical record. Even in the absence of billing Medicare or another insurer, we believe that physicians and other practitioners following standard medical practice would document what occurred during a patient encounter in order to ensure the patient's medical history is accurate and up-to-date, and to facilitate continuity in the patient's medical care.

Comment: One commenter asserted that the 90-day global period was created to prevent two behaviors referred to as ''fee-splitting'' and ''itinerant surgery.'' According to the commenter, these terms refer to the practice where a surgeon would provide only the surgery and leave postoperative care to other practitioners. The commenter believes these practices are inconsistent with professional standards, and that it is medically necessary and expected by patients that surgeons will evaluate their patients on a daily basis in the hospital and as needed on an outpatient basis during the recovery period.

Response: We do not believe that the global surgical package was designed to ensure or allocate appropriate post-operative care among practitioners. Under Medicare's current global surgery policy, practitioners can agree on the transfer of care during the global period and, in such cases, modifiers are used in order to split the payment between the procedure and the post-operative care. We do not agree that global surgical packages obligate the surgeon to furnish some or all of the post-operative care. Global surgical packages are valued based on the typical service, and we would not expect every surgery to require the same number of follow-up visits. However, we would expect that over a large number of services, the central tendency would reflect the number of visits we included as typical for purposes of valuing the global package; and as discussed above, we have not found that this is necessarily the case. Even if Medicare maintains the 10- and 90-day global surgery packages, there would be no assurance that the surgeon, and not another practitioner, would furnish all or a certain amount of post-operative care (whether by the patient's choice of practitioner or otherwise). The global payment includes payment for post-operative care with the payment for the surgery, which makes it difficult to know whether or by whom the post-operative care was actually furnished unless there is an official transfer of care. We are confident that the surgical community will continue to furnish appropriate care for Medicare beneficiaries irrespective of changes in the structure of payment for surgical services.

Comment: Several commenters stated that if Medicare adopts a policy to pay for post-operative care using E/M codes rather than through a global package, Medicare will likely pay a higher level of E/M visits when they are separately billed than it does currently, as the existing global packages tend to include more lower level E/M services than those that are generally reported.

Response: We acknowledge that the visits assumed in the global packages are generally valued as lower-level visits than are most commonly furnished, as reflected in Medicare utilization data for separately reportable E/Ms. However, this disparity is only pertinent to the proposal if the global packages are inaccurately valued or, if, under the proposed policy, practitioners who furnish these services are likely to inaccurately report the level of E/M service that is actually being furnished. If the former is true, then we believe this supports the proposal to revalue these services. As with every service, we expect physicians to bill the most appropriate E/M codes that reflect the care that is furnished, including for post-operative care.

Comment: One commenter expressed concern that the proposal to require separate billing for postoperative surgical care provides a basis for the eventual denial of payment to one or more of the postoperative care providers, based on the notion that care furnished by other specialties is duplicative of or replaces care furnished by the surgeon. This commenter stated that multiple providers with differing expertise and training are essential to achieve optimal patient outcomes and expressed concern that this proposal will provide disincentives to optimal patient care.

Response: As we stated in the proposal, we believe that there are various models for postoperative care that can often include multiple providers, and this is another important reason why we believe the services with longer global periods should be transformed to 0-day packages to accommodate heterogeneous models of care that optimize patient outcomes.

Comment: One commenter recommended that CMS establish G-codes for three levels of post-operative visits furnished by the original surgeon or another surgeon with the same board certification, as well as a second set of three level G-codes for postoperative visits furnished by another provider. The commenter also suggested that CMS should develop methods to fairly measure the duration of E/M times through which a large sample of surgeons might report the number and intensity of post-operative visits. The commenter also recommended that CMS track E/M services furnished to surgical patients within the global period by a physician other than the operating surgeon, for the same or similar diagnosis, in order to begin to understand what portion of

postoperative visits are being billed outside of the global period.

The RUC informed CMS that it has identified several large hospital-based physician group practices that internally use CPT code 99024 to report each bundled post-operative visit, and therefore data is already being captured for some Medicare providers. The RUC also suggested that CMS may have denied-claims data available for CPT code 99024 via the Medicare claims processing system. The RUC recommends that CMS work with it to explore the availability, usefulness, and appropriateness of these data from group practices and the CMS denied-claims dataset, in order to gather existing, objective data to validate the actual number of post-operative visits for 10-day and 90-day procedures. The RUC also suggested that CMS should consider reviewing Medicare Part A claims data to determine the length of stay for surgical services furnished in the inpatient acute care hospital setting.

MedPAC stated that data collection could take several years, would be burdensome for CMS and providers, and may be inaccurate since providers would have little incentive to report each visit. Furthermore, MedPAC suggested that such data collection would be unnecessary since the current ratesetting methodology already assumes particular numbers of visits. MedPAC suggested that CMS should reduce the RVUs for the 10- and 90-day global services based on the same assumptions currently used to pay for these services.

Several other commenters agreed with the approach advocated by MedPAC (often referred to as ''reverse-building block'') to revaluing the services. These commenters stated that since CMS has increased RVUs for these services proportionate to the number of E/M services assumed to be included in the postoperative period, for the sake of relativity, the RVUs attributed to the visits can be fairly removed in order to value the new 0-day global codes. Many of these commenters acknowledged that this approach would result in negative or other anomalous values for many of these codes, but asserted that codes with anomalous values might then be individually reviewed. MedPAC suggested that if specialty societies or the RUC believe that the new values for specific global codes are inaccurate, they could present evidence that the codes are misvalued to CMS, presumably through the potentially misvalued code public nomination process. MedPAC further states that for codes without accurate post-operative assumptions, CMS could calculate interim RVUs for these codes based on the average percent reduction for other global codes in the same family.

Many other commenters were against the reverse-building block approach to revaluation. These commenters stated that backing out the bundled E/M services would be highly inappropriate and methodologically unsound since the services were not necessarily valued using a building-block methodology. Many of these commenters, including the RUC, stated that the amount of post-operative work included in the codes can only be appropriately surveyed, vetted, and valued by the RUC.

Response: We appreciate the concerns of commenters regarding the difficulty of revaluing the global surgery codes as 0-day global packages. As we stated in making the proposal, we believe that such stakeholder input and participation in any revaluation will be critical to the accuracy of the resulting values. We will consider all of these comments as we consider mechanisms for revaluations and as we propose new values for specific services. We believe that the challenges involved in revaluation, such as those articulated by commenters, reinforce our understanding that the current construction of the 10- and 90-day global packages are not a sustainable, long-term approach to the accurate valuation of surgical care. As noted above, we will continue to explore appropriate ways of bundling global surgical services.

Comment: In general, commenters supporting the proposal also supported CMS's proposed timeframe to transition 10-day global codes and 90-day global codes to 0-day global surgical packages by 2017 and 2018, respectively. In contrast, most commenters objecting to, or articulating reservations about, the proposal urged CMS to slow its implementation. Some of these commenters suggested that the process used to establish the current values for these CPT codes is ideal and stated that it would take many years to value the many individual services using the same methodologies.

The RUC stated that there are over 4,200 services within the PFS with a 10-day or 90-day global period, so the scope of the proposal is very large and the transition should be staggered over many years. However, the RUC also pointed out that most of these services have relatively low utilization, as only 268 of them (or 6 percent of 10- or 90-day global surgery services) were performed more than 10,000 times annually based on 2013 Medicare claims data.

Response: We appreciate the concerns of the commenters. We agree with those commenters who urged us to move quickly to value services as accurately as possible. We note that most comments suggesting a delay in revaluation were based on a common underlying view that code-level review of the full set of services by the RUC based on practitioner surveys is the only appropriate way to value the services.

As we stated in making the proposal, we do not believe that surveying practitioners who furnish each of these services is a practical or necessarily advisable approach to appropriate valuation. Regardless of when the proposal is implemented, it seems likely that the number of codes to be revalued is much larger than the number of codes that should or can be surveyed. Through its normal process, the RUC routinely makes annual recommendations regarding several hundred codes, and we acknowledge that thousands of services cannot be valued using the typical RUC process in one year. On the other hand we believe that there are other options for revaluing some of the global surgery codes as 0-day global packages, particularly those of low volume, and we have indicated a willingness to work with the RUC to determine appropriate mechanisms for revaluations. Therefore, although we agree that revaluing such a high number of codes is a significant undertaking, we do not believe that that the required revaluations would represent an undue burden between the present and the proposed implementation dates. We also note that in order to focus efforts on revaluing the global surgery packages, we are not asking the RUC to review the nearly 100 services we proposed as potentially misvalued this year under the high expenditure screen. We continue to remain interested in other potential data sources for accurately valuing PFS services, especially the vast majority of 10- and 90-day global codes for which there is not significant volume. We also urge stakeholders to engage with us to help us understand why alternative approaches to the revaluation of the 10- and 90-day global services would require the kind of delay that was urged based on the assumption that the RUC survey approach would be used for all those services.

Additionally, we request stakeholders, including the CPT Editorial Panel and the RUC, to consider the utility of establishing and maintaining separate coding and national Medicare RVUs for the many procedures that have little to no utilization in the Medicare population. For example, there are over 1,000 10-

and 90-day global codes with fewer than 100 annual services in the Medicare database. Although we recognize that some portion of these services may be utilized more extensively by non-Medicare payers, it is also likely that many of these codes may reasonably be consolidated. We request that appropriate coding for surgical services be considered as part of revaluing global surgery.

Comment: Many commenters expressed concerns that requiring beneficiary coinsurance for each follow-up visit could dissuade beneficiaries from returning for necessary follow-up care and, therefore, adversely affect surgical outcomes. Many of these commenters acknowledged that overall patient liability for the total amount of care could be reduced, depending on revaluation, but stated that paying separate coinsurance for follow-up care can cause patients to perceive the net payments as larger, given the frequency of payment required. These commenters stated that the magnitude of these problems might be directly proportionate to how sick the patient is.

Response: We understand the concerns of the commenters, but do not agree that Medicare beneficiaries are unlikely to appreciate the difference between frequency of payment and overall financial liability. We also note that the significant majority of patient encounters with Medicare practitioners generate some degree of beneficiary liability. While liability could prompt the proportion of beneficiaries without secondary insurance to forgo medically reasonable and necessary care for the treatment of illness or injury, we have no reason to conclude that this would be the case specifically for post-operative care. We do acknowledge that surgeons may need to explain the importance of follow-up care so that patients understand and appreciate how compliance with follow-up care can improve the overall quality of care and outcomes. As noted above, while our proposal is to move to 0-day global packages as a simple, immediate adjustment, the agency remains committed to bundling as a key component of payment system delivery reform, and we will consider beneficiary impact as we further consider the appropriate size and construction of a surgical bundle.

Comment: Several commenters expressed concerns that the proposal would result in disjointed or inadequate care and/or disrupt surgical registry data. These commenters suggested that neither patients nor alternate providers are as qualified to determine whether or not a postoperative visit by the surgeon is necessary.

Response: As discussed above, we do not agree that patients who require the post-operative care of a surgeon are likely to forgo such care if Medicare changes how we pay the surgeon for furnishing that care. Although several commenters expressed these and similar kinds of concerns, none explained how the proposed change in payment would change post operative care. We continue to believe that surgeons will continue to furnish appropriate post operative care to Medicare beneficiaries, and we do not agree that concerns about increased patient liability or disjointed care are warranted.

Comment: Several commenters expressed concerns over other Medicare payment policies related to surgical procedures. Some commenters stated that the current multiple procedure payment reduction policies that apply to all 0-, 10-, and 90-day global codes are only appropriate for 10-day and 90-day globals due to the overlap in resource costs during the post-operative period. Other commenters noted that potential reductions in payment to surgeons to account for the reduced post-operative period would negatively impact practitioners who assist at surgery despite the fact that their professional work and responsibilities have not changed.

Response: We appreciate the issues raised by these commenters. Again, we seek continued input from the stakeholder community regarding these and other issues that need to be considered in order to implement the transition. In the case of the MPPR, we note there are several hundred 0-day global codes where these payment policies currently apply. We are especially interested in understanding why stakeholders do not believe the policies effective for the current 0-day global codes would not similarly be appropriate for the current 10-and 90-day codes that will be revalued as 0-day global codes.

Comment: Many of the commenters who opposed or expressed concern about the proposal urged CMS to consider the extent to which this proposal would increase the administrative burden on CMS, MACs, and providers. Other commenters urged CMS to consider that post-operative visits would be subject to the same documentation requirements and other scrutiny as other separately-reportable PFS services. One commenter representing other payers opposed the proposal due to concerns about predicting the usage of post-operative services.

Response: We considered the administrative burden on both CMS and practitioners who furnish these services in making the proposal. In both cases, we note the administrative burden would be no greater than the burden associated with the vast majority of other services paid through the Medicare PFS. We do not believe that the burden of separately reporting post-operative follow-up visits is particularly or unduly burdensome, given that most office visits paid through the PFS are separately reported under current Medicare policies. In comparison to the number of separately reported visits and other PFS services, the number of visits that likely occur in post-operative periods is relatively small. We do not agree that there are inherent reasons that medically necessary post-operative visits should be exempt from the same documentation and other requirements applicable to other PFS services. We appreciate that changes in Medicare policy may affect other insurers who choose to base their payments on the PFS; however, it is our obligation to set our policies based upon the needs of Medicare and its beneficiaries.

Comment: A few commenters urged CMS to consider the possibility that there could be confusion among practitioners and payers if some payers continue to base payment on the 10- or 90-day post-operative periods.

Response: We believe that payment policies that are appropriate for Medicare may not always be optimal for all payers. However, we seek continued input and analysis from other payers as we engage stakeholders in developing our implementation strategy for the transition of 10- and 90-day global services to 0-day global services.

Comment: Several commenters urged CMS to consult with stakeholders as we develop appropriate plans for the global period transition. These commenters cautioned that the structural reorganization of these services is challenging due to the large set of services that will be impacted and could potentially disrupt well-established payment for certain providers.

Response: We appreciate these recommendations and agree that we should continue to consult with stakeholders regarding the implementation of this proposal.

After consideration of all the comments received regarding this proposal, we are finalizing the proposal to transition and revalue all 10- and 90-day global surgery services with 0-day global periods, beginning with the 10-day global services in CY 2017 and following with the 90-day global services in CY 2018. We note that as we

develop implementation details, including revaluations, we will take into consideration all of the comments we received to our global surgery proposal. We will provide additional details during the CY 2016 rulemaking. We are finalizing a transformation to 0-day global codes because we believe this is the most straightforward way to improve the accuracy of valuation for the various components of global surgical packages, including pre- and post-operative visits and performance of the surgical procedure. However, we remain committed to delivery system reform and ensuring Medicare makes appropriate payment for bundles of services whether our payment covers a period of 0, 10 or 90 days. As we begin revaluation of services as 0-day globals, we will actively assess whether there is a better construction of a bundled payment for surgical services.

We also actively seek the analysis and perspective of all affected stakeholders regarding the best means to revalue these services as 0-day global codes. We urge all stakeholders to engage with us regarding potential means of making the transition as seamless as possible, both for patient care and provider impact. We are considering a wide range of approaches to all details of implementation from revaluation to communication and transition, and we are hopeful that sufficient agreement can be reached among stakeholders on important issues such as revaluation of the global services and appropriate coding for post-operative care. We remain committed to collecting objective data regarding the number of visits typically furnished during post-operative periods and will explore the extant source options presented by commenters as we consider other options as well.

5. Valuing Services That Include Moderate Sedation as an Inherent Part of Furnishing the Procedure

The CPT manual includes more than 300 diagnostic and therapeutic procedures, listed in Appendix G, for which CPT has determined that moderate sedation is an inherent part of furnishing the procedure and, therefore, only the single procedure code is appropriately reported when furnishing the service and the moderate sedation. The work of moderate sedation has been included in the work RVUs for these diagnostic and therapeutic procedures based upon their inclusion in Appendix G. Similarly, the direct PE inputs for these services include those inputs associated with furnishing a typical moderate sedation service. To the extent that moderate sedation is typically furnished as part of the diagnostic or therapeutic service, the inclusion of moderate sedation in the valuation of the procedure is appropriate.

In the CY 2014 PFS proposed rule (79 FR 40349), we noted that it appeared that practice patterns for endoscopic procedures were changing, with anesthesia increasingly being separately reported for these procedures. For example, one study showed that while the use of a separate anesthesia professional for colonoscopies and upper endoscopies was just 13.5 percent in 2003, the rate more than doubled to 30.2 percent in 2009. An analysis of Medicare claims data showed that a similar pattern is occurring in the Medicare program. We found that, for certain types of procedures such as digestive surgical procedures, a separate anesthesia service is furnished 53 percent of the time. For some of these digestive surgical procedures, the claims analysis showed that this rate was as high as 80 percent.

Our data clearly indicated that moderate sedation was no longer typical for all of the procedures listed in CPT's Appendix G, and, in fact, the data suggested that the percent of cases in which it is used is declining. For many of these procedures in Appendix G, moderate sedation continued to be furnished. The trend away from the use of moderate sedation toward a separately billed anesthesia service was not universal. We found that it differed by the class of procedures, sometimes at the procedure code level, and continued to evolve over time. Due to the changing nature of medical practice in this area, we noted that we were considering establishing a uniform approach to valuation for all Appendix G services for which moderate sedation is no longer inherent, rather than addressing this issue at the procedure level as individual procedures are revalued.

We sought public comment on approaches to address the appropriate valuation of these services. Specifically, we were interested in approaches to valuing Appendix G codes that would allow Medicare to pay accurately for moderate sedation when it is furnished while avoiding potential duplicative payments when separate anesthesia is furnished and billed. To the extent that Appendix G procedure values are adjusted to no longer include moderate sedation, we requested suggestions as to how moderate sedation should be reported and valued, and how to remove from existing valuations the RVUs and inputs related to moderate sedation.

We noted that in the CY 2014 PFS final rule with comment period, we established values for many upper gastrointestinal procedures, 58 of which were included in Appendix G. For those interim final values, we included the inputs related to moderate sedation. We stated that we did not expect to change existing policies for valuing moderate sedation as inherent in these procedures until we have the opportunity to assess and respond to the comments on the proposed rule on the overall valuation of Appendix G codes.

We received many helpful suggestions in response to our comment solicitation. At this time, we are not making any changes to how we value Appendix G codes for which moderate sedation is an inherent part of the procedure. We intend to address this topic in future notice and comment rulemaking, taking into account the comments we received. In section II.G. of this CY 2015 PFS final rule with comment period, we address interim final values and establish CY 2015 inputs for the lower gastrointestinal procedures, many of which are also listed in Appendix G.

C. Malpractice Relative Value Units (RVUs)

1. Overview

Section 1848(c) of the Act requires that each service paid under the PFS be comprised of three components: Work; PE; and malpractice (MP) expense. As required by section 1848(c) of the Act, beginning in CY 2000, MP RVUs are resource based. Malpractice RVUs for new codes after 1991 were extrapolated from similar existing codes or as a percentage of the corresponding work RVU. Section 1848(c)(2)(B)(i) of the Act also requires that we review, and if necessary adjust, RVUs no less often than every 5 years. For CY 2015, we are proposing to implement the third comprehensive review and update of MP RVUs. For details about prior updates, see the CY 2010 final rule with comment period (74 FR 33537).

2. Methodology for the Proposed Revision of Resource-Based Malpractice RVUs

The proposed MP RVUs were calculated by a CMS contractor based on updated MP premium data obtained from state insurance rate filings. The methodology used in calculating the proposed CY 2015 review and update of resource-based MP RVUs largely paralleled the process used in the CY 2010 update. The calculation required using information on specialty-specific MP premiums linked to a specific service based upon the relative risk factors of the various specialties that furnish a particular service. Because MP premiums vary by state and specialty,

the MP premium information were weighted geographically and by specialty. Accordingly, the proposed MP RVUs were based upon three data sources: CY 2011 and CY 2012 MP premium data; CY 2013 Medicare payment and utilization data; and CY 2015 proposed work RVUs and geographic practice cost indices (GPCIs).

Similar to the previous update, we calculated the proposed MP RVUs using specialty-specific MP premium data because they represent the actual expense incurred by practitioners to obtain MP insurance. We obtained and used MP premium data from state departments of insurance rate filings, primarily for physicians and surgeons. When the state insurance departments did not provide data, we used state rate filing data from the Perr and Knight database, which derives its data from state insurance departments. We used information obtained from MP insurance rate filings with effective dates in 2011 and 2012. These were the most current data available during our data collection process.

We collected MP insurance premium data from all 50 States, the District of Columbia, and Puerto Rico. Rate filings were not available in American Samoa, Guam, or the Virgin Islands. Premiums were for $1 million/$3 million, mature, claims-made policies (policies covering claims made, rather than those covering services furnished, during the policy term). A $1 million/$3 million liability limit policy means that the most that would be paid on any claim is $1 million and the most that the policy would pay for claims over the timeframe of the policy is $3 million. We made adjustments to the premium data to reflect mandatory surcharges for patient compensation funds (funds to pay for any claim beyond the statutory amount, thereby limiting an individual physician's liability in cases of a large suit) in states where participation in such funds is mandatory. We attempted to collect premium data representing at least 50 percent of the medical MP premiums paid.

We included premium information for all physician and NPP specialties, and all risk classifications available in the collected rate filings. Most insurance companies provided crosswalks from insurance service office (ISO) codes to named specialties. We matched these crosswalks to Medicare primary specialty designations (specialty codes). We also used information we obtained regarding surgical and nonsurgical classes. Some companies provided additional surgical subclasses; for example, distinguishing family practice physicians who furnish obstetric services from those who do not.

Although we collected premium data from all states and the District of Columbia, not all specialties had premium data in the rate filings from all states. Additionally, for some specialties, MP premiums were not available from the rate filings in any state. Therefore, for specialties for which there was not premium data for at least 35 states, and specialties for which there was not distinct premium data in the rate filings, we crosswalked the specialty to a similar specialty, conceptually or by available premium data, for which we did have sufficient and reliable data. Additionally, we crosswalked three specialties—physician assistant, registered dietitian and optometry—for which we had data from at least 35 states to a similar specialty type because the available data contained such extreme variations in premium amounts that we found it to be unreliable. The range in premium amounts for registered dietitians is $85 to $20,813 (24,259 percent), for physician assistants is $614 to $35,404 (5,665 percent), and for optometry is $189 to $10,798 (5,614 percent). We crosswalked these specialties to allergy and immunology, the specialty with the lowest premiums for which we had sufficient and reliable data.

Our proposed methodology for updating the MP RVUs conceptually followed the specialty-weighted approach, used in the CY 2010 update. The specialty-weighted approach bases the MP RVUs for a given service upon a weighted average of the risk factors of all specialties furnishing the service. This approach ensures that all specialties furnishing a given service are accounted for in the calculation of the MP RVUs. We also continued to use the risk factor of the dominant specialty for rarely billed services (that is, when CY 2013 claims data reflected allowed services of less than 100).

We proposed minor refinements for updating the CY 2015 MP RVUs as compared to the previous update. These refinements included calculating a combined national average surgical premium and risk factor for neurosurgery and neurology and updating the list of invasive cardiology service HCPCS codes (for example, cardiac catheterization and angioplasty) to be classified as surgery for purposes of assigning service level risk factors. Additionally, we proposed to classify injection procedures used in conjunction with cardiac catheterization as surgery (for purposes of assigning a service specific risk factor). To calculate the risk factor for TC services we proposed to use the *mean* umbrella non-physician MP premiums obtained from Radiology Business Management Association (RBMA) survey data, used for the previous MP RVU update in 2010, and adjusted the premium data to reflect the change in non-surgical premiums for all specialties since the previous MP RVU update.

As discussed in the CY 2015 proposed rule (79 FR 40354 through 40355), we did not include an adjustment under the anesthesia fee schedule to reflect updated MP premium information and stated that we intend to propose an anesthesia adjustment for MP in the CY 2016 PFS proposed rule. We also requested comments on how to reflect updated MP premium amounts under the anesthesiology fee schedule.

We posted our contractors report, ''Report on the CY 2105 Update of Malpractice RVUs'' on the CMS Web site. The report on MP RVUs for the CY 2015 proposed rule and the proposed MP premium amounts and specialty risk factors are accessible from the CMS Web site under the supporting documents section of the CY 2015 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/*. A more detailed explanation of our proposed MP RVU update can be found in the CY 2015 PFS proposed rule (79 FR 40349 through 40355).

3. Response to Public Comments

We received over 70 industry comments on the CY 2015 proposed MP RVU update. A summary of the comments we received on the proposed MP RVU update and our responses are discussed below.

Comment: Two commenters supported our proposal to combine the surgical premium data for neurosurgery and neurology for establishing the surgical risk factor for neurosurgery.

Response: We agree with the commenters and will finalize our approach for determining the surgical premium for neurosurgery as proposed. We will combine surgical premiums for neurology and neurosurgery to calculate a national average surgical premium and risk factor for neurosurgery.

Comment: Three commenters requested that we phase in the reduction for ophthalmology and optometry services over 2 years. The commenters stated that the reduction is due in part to an error we made in calculating the MP RVUs for ophthalmology and optometry codes under the previous MP RVU update in CY 2010. The commenters stated that an immediate implementation of the correction would result in significant

payment reductions for ophthalmologists.

Response: We note that for the CY 2015 MP RVU update we did not correct the mistake that was made in CY 2010. For the CY 2015 MP update we recalculated the MP RVUs based upon the most recently available data for all services, including ophthalmic services. Accordingly, the proposed MP RVU update reflects the use of updated MP premium data and risk factors by specialty and is not affected in any way by the CY 2010 MP RVUs. In doing so, even though the proposed CY 2015 ophthalmology non-surgical risk factor was 14 percent greater than the CY 2010 non-surgical risk factor and the proposed surgical risk factor was 17 percent greater, the proposed MP RVUs for most services with significant ophthalmology volume decreased because the CY 2010 error resulted in MP RVUs that were higher than they should have been. That is, the reduction in MP RVUs for ophthalmology and optometry are solely due to overpayments made due to a mistake during the previous MP RVU update rather than a proposed change in methodology or the use of updated premium data. We do not believe that a previous error is sufficient justification for not fully implementing updated MP RVUs based on more recent premium data. Therefore, we will implement the updated MP RVUs for ophthalmology and optometry services as proposed.

Comment: We received comments regarding the application of our specialty weighted approach for calculating service level risk factors for surgical services. For instance, the same commenters that requested a 2-year phase in of the reduction to ophthalmology services also requested that we exclude optometry from calculating the risk factor for ophthalmic surgery. One commenter stated that ''MP RVUs for cataract and other ophthalmic surgeries are deflated because CMS assumes that optometry is providing the surgical portion of the procedure.'' The commenter also stated that optometrists are involved only during the pre- or post-procedure periods of ophthalmic surgery. Another specialty society stated that it appears that CMS's methodology for calculating service level risk factors for surgical services ''may include the allowed services for surgical assistance possibly discounted to reflect the assistant role under payment policy.'' The commenter also stated that ''specialties that assist at the procedure do not perform it, and the assistant's associated MP risk factor has no bearing on the MP cost for the surgeon.''

Response: The commenter is correct to say that we calculated service level risk factors based on the mix of all practitioners billing for a given service and that the specialty weighted approach is applied to both surgical and non-surgical services . That is, we apply the risk factor(s) of all specialties involved with furnishing the surgical procedure to calculate service level risk factors and MP RVUs. For assistants at surgery, we discount the utilization to reflect his or her role in furnishing the surgical procedure. Although we agree that MP cost for the surgeon may not be affected by the surgical assistant's MP cost, we do not agree with the suggestion that assistants at surgery should be excluded from our specialty weighted approach for determining service level MP risk factors and MP RVUs for surgical services. We believe it is appropriate to apply the specialty risk factor(s) of all practitioners participating in and receiving a payment for the surgical procedure for purposes of determining a service level risk factor and thus the payment for that service. If we were to exclude the risk factors of some specialties that bill a specific code from the calculation of the service level risk factor, the resulting MP RVU would not reflect all utilization. Similarly, we also disagree with the suggestion that pre- and post- utilization should be removed from determining MP RVUs for ophthalmic surgical services. The resources associated with pre- and post-operative periods for ophthalmic surgery are included in the total RVUs for the global surgical package. Accordingly, if we did not include the portion of utilization attributed to pre- and post-operative visits in the calculation of service level risk factors, the MP RVUs for global surgery would overstate the MP costs.

We note that in both of these cases by using the discounted utilization file the weighted average that we use reflects only the proportion of the utilization by these practitioners and only at the payment rate made. Including specialty utilization for all practitioners involved in furnishing the global service reflects the MP risk for the entire global service.

Comment: We received two comments regarding how risk factors are assigned to existing services without Medicare utilization. The commenters stated that we crosswalk to the risk factor of an analogous source code with Medicare utilization for new codes but assign the average risk factor for all physicians to existing services without Medicare utilization. The commenters contend that ''it is inappropriate for a service to have fluctuating MP risk factors simply due to whether it is reported in Medicare claims data for a given year.'' The commenters requested that we crosswalk existing services without Medicare utilization to a recommended source code.

Response: We used the most recently available Medicare claims data (that is, from CY 2013) to determine the service level risk factors, either based on the risk factors of the actual mix of practitioners furnishing the service, or in the case of low volume services, the risk factor of the dominant specialty. We disagree with the commenters' suggestion to assign the risk factor of a recommended specialty to an existing service without Medicare utilization as indicated by our most recently available claims data. In the absence of Medicare utilization we continue to believe that the most appropriate risk factor is the weighted average risk factor for all service codes. The proposed weighted average risk factor for all service codes was 2.11. Using the weighted average risk factor for all services effectively neutralizes the impact of updated MP premiums and risk factors for any specific specialty (or mix of specialties).

Comment: The AMA and the RUC and other commenters agreed with the majority of our proposed claims based dominant specialty designations for codes with less than 100 allowed services; however, the commenters disagreed with our proposed dominant specialty for some services. The commenters believe that some claims have been miscoded, resulting in erroneous specialty designations. One commenter stated that using the dominant specialty from the claims data resulted in unjustifiably low MP RVUs for congenital heart surgery. The commenter stated that congenital heart surgery can only be done by a heart surgeon and requested that we override the dominant specialty in our claims data and use the RUCs recommended specialty.

Response: As discussed in the previous response, we proposed to use CY 2013 claims data to determine the service level MP risk factors, either based on the mix of practitioners furnishing the service, or in the case of low volume services, assigning the risk factor of the dominant specialty. We continue to believe that use of actual claims data to determine the dominant specialty is preferable to using a ''recommended'' specialty. However, we recognize that anomalies in the claims data can occur that would affect the dominant specialty for low volume services, and therefore resulting in the need for a subjective review of some services in place of a complete reliance on claims data. To that end, we

reviewed the commenter's recommendations for overriding the dominant specialty from our claims data with a recommended specialty. After careful consideration of the comments, we will override the dominant specialty from Medicare claims data when the dominant specialty from our claims data is inconsistent with a specialty that could be reasonably expected to furnish the service. For example, our claims data indicates that pulmonary disease is the dominant specialty for HCPCS code 33622 (Reconstruction of complex cardiac anomaly), however as the commenter mentioned, this service is furnished by heart surgeons. A complete listing of low volume services for which we will override the claims based dominant specialty with the recommended specialty to assign a service level risk factor is illustrated in Table 12.

TABLE 12—LOW VOLUME SERVICE CODES WHERE ASSIGNED SPECIALTY USED RATHER THAN CLAIMS BASED DOMINANT SPECIALTY

HCPCS Code	Short descriptor	Claims based dominant specialty	Assigned specialty
25490	Reinforce radius	Otolaryngology	Orthopedic Surgery.
26556	Toe joint transfer	Pulmonary Disease	Orthopedic Surgery.
31320	Diagnostic incision larynx	Cardiology	Otolaryngology.
33620	Apply r&l pulm art bands	Anesthesiology	Cardiac Surgery.
33621	Transthor cath for stent	Cardiology	Cardiac Surgery.
33622	Redo compl cardiac anomaly	Pulmonary Disease	Cardiac Surgery.
33697	Repair of heart defects	Cardiology	Cardiac Surgery.
33766	Major vessel shunt	General Surgery	Cardiac Surgery.
36261	Revision of infusion pump	General Practice	General Surgery.
43341	Fuse esophagus & intestine	Gastroenterology	Thoracic Surgery.
43350	Surgical opening esophagus	General Practice	General Surgery.
49491	Rpr hern preemie reduc	General Practice	General Surgery.
50686	Measure ureter pressure	Internal Medicine	Urology.
54352	Reconstruct urethra/penis	Pediatric Medicine	Urology.
54380	Repair penis	Gastroenterology	Urology.
61000	Remove cranial cavity fluid	Family Practice	Neurosurgery.
61558	Excision of skull/sutures	Family Practice	Neurosurgery.
61567	Incision of brain tissue	Cardiology	Neurosurgery.
74710	X-ray measurement of pelvis	Thoracic Surgery	Diagnostic Radiology.
96003	Dynamic fine wire emg	Cardiology	Physical Therapist/Independent Practice.
96420	Chemo ia push technique	Urology	Hematology Oncology.
99170	Anogenital exam child w imag	Ophthalmology	Pediatric Medicine.
99461	Init nb em per day non-fac	Cardiac Electrophysiology	Pediatric Medicine.

Comment: Some commenters requested that we crosswalk gynecological oncology to general surgery, instead of crosswalking to obstetrics/gynecology because gynecological oncology is more akin to general surgery procedures than obstetrics/gynecology. One specialty society stated that gynecological oncologists are predominantly cancer surgeons with MP risk similar to general surgery.

Response: We agree with the commenters and will crosswalk gynecological oncology to the general surgery premium data and risk factor.

Comment: One commenter requested that we crosswalk clinical laboratory to pathology instead of the risk factor used for TC services because clinical laboratories and pathologists render essentially identical medical procedures that are paid on the Medicare PFS.

Response: We believe that the MP risk for clinical laboratories is more akin to the MP risk of radiation therapy centers, mammography screening centers and IDTFs, for which we assigned the TC risk factor, than to the MP risks for pathologists. The commenters did not provide sufficient rationale to support that MP risk for clinical laboratories is similar to the MP risk of pathologists. Therefore, we will crosswalk clinical laboratory to the TC risk factor as proposed.

Comment: One commenter encouraged us to crosswalk the interventional pain management specialty to a specialty that more closely reflects the risks and services associated with interventional pain management, such as interventional radiology or a comparable surgical subspecialty.

Response: We believe that the MP risk associated with interventional pain management is conceptually similar to the MP risk for anesthesiology more so than to the MP risk for interventional radiology. Given that the commenters did not provide sufficient rationale to support that MP risk for interventional pain management is similar to interventional radiology or to a comparable surgical specialty, we will crosswalk interventional pain management to anesthesiology as proposed.

Comment: We received contrasting comments on our proposal to crosswalk NPPs to the premium and risk factor calculated for allergy/immunology. For instance, one commenter acknowledged the difficulty in identifying comprehensive, accurate premium data across the majority of states, especially for NPPs. To that end, the commenter supported our decision to crosswalk the MP premiums of NPPs to the lowest physician risk factor, allergy/immunology. Another commenter, specifically supported crosswalking registered dieticians to the risk factor calculated for allergy/immunology.

In contrast, the AMA and other commenters did not support crosswalking NPPs with insufficient or unreliable premium data to the premium amounts and risk factor used for allergy/immunology. The commenters stated that allergy/immunology premiums overstate NPP premiums and requested that we use the generally lower MP survey data from the Physician Practice Information Survey (PPIS) for NPPs instead of crosswalking NPPs to the lowest physician specialty (allergy/immunology) or use some other measure of central tendency within the existing collected premium data to determine accurate MP premium risk factors for NPPs. Another commenter suggested that we work with the AMA

to obtain the necessary data to ensure the process for reviewing and updating MP rates is accurate for all providers.

Response: As discussed previously in this section, the resource-based MP RVUs are based on verifiable MP premium data. We do not believe it would be appropriate to base the MP RVUs for nonphysician specialties on survey data and use premium data for all other specialties. Therefore, we do not agree with the commenters that suggested using survey data for NPPs and will finalize the specialty crosswalks for NPPs as proposed. However, in light of the commenter's suggestions, we will explore ways to enhance our MP premium data collection efforts to obtain better premium data for NPPs for future updates. We will also explore other potential measures of central tendency for determining the ''indexed'' specialty as an alternative to using the premium values of the lowest specialty.

Comment: We received two comments regarding the data and or methodology used to calculate the TC and PC of diagnostic services. One specialty group noted that the proposed MP RVUs for the TC of some diagnostic services increased while the MP RVUs for the PC decreased. Specifically, the commenter questioned why the MP RVUs for the PC of diagnostic cardiac catheterization as described by HCPCS codes 93451 through 93461 decreased by 6 to 12 percent while the TC portion for these codes increased by 20 to 33 percent. The commenter encouraged us to review the reasons for this shift to TC MP RVUs. Additionally, the RBMA submitted updated MP premium information collected from IDTFs in 2014. The RBMA requested that we use the recently obtained data reflecting the median ''50th percentile'' premium data for ''umbrella non-physician MP liability'' for calculating CY 2015 MP RVUs for TC services.

Response: To calculate the risk factor for TC services we used the *mean* umbrella non-physician MP premiums obtained from the RBMA survey data (used for the previous MP RVU update in 2010) and adjusted the data to reflect the change in non-surgical premiums for all specialties since the previous MP RVU update, for example, $9,374 deflated by −20.41 percent = $7,455. However, given that the premiums of the lowest physician specialty (allergy/immunology) decreased by more than 20 percent, the proposed CY 2015 risk factor for TC services increased from the previous update in CY 2010 from 0.86 to 0.91, resulting in minor increases in MP RVUs for TC services. However, given that the MP RVUs for TC services are generally low, any increase to the MP RVUs could result in a significant percentage increase. For example, the proposed CY 2015 MP RVU for HCPCS code 93455 increased from 0.04 to 0.05 yielding a 25 percent increase. Therefore, a minor increase in MP RVUs for a TC service could result in a significant percentage change.

We believe that using the updated RBMA premium data without further study is problematic because the updated data reflects only the *median* umbrella non-physician MP premium, rather than the mean as was used for the 2010 MP RVU update and the proposed 2015 MP RVU update.

We believe further study is necessary to reconcile comments on the use of updated RBMA premium data for TC services (which would result in an increase MP RVU for TC services) and our current methodology for calculating the risk factor for PC services relative to the global service and TC service. Therefore, we will finalize the TC premium data as proposed and maintain our current methodology for calculating the PC risk factor. We will consider the request to use the updated premium information from RBMA and alternatives to our current methodology for calculating the PC risk factor as part of our further study and would propose any changes through future rulemaking.

Comment: Several commenters supported our proposal to classify cardiac catheterization and angioplasty services as surgical procedures for the purpose of establishing service level risk factors. The commenters also agreed with our proposal to apply the surgical risk factor to injection procedures used in conjunction with cardiac catheterization. The same commenters identified additional cardiac catheterization and angioplasty services that were not included on the proposed list of invasive cardiology services. Specifically, the commenters requested that we consider adding HCPCS codes 92961, 92986, 92987, 92990, 92992, 92993, 92997, and 92998 to the list of invasive cardiology procedures classified as surgery for purposes of assigning service level risk factors because the MP risk for these services is similar to surgery.

Response: We agree that the MP risk associated with the cardiac catheterization and angioplasty services mentioned by the commenters are more akin to surgical procedures than most non-surgical services. Therefore, we will add cardiac catheterization and angioplasty services as described by HCPCS codes 92961, 92986, 92987, 92990, 92997, and 92998 to the list of services outside of the surgical HCPCS code range to be considered surgery for purposes of assigning service level MP risk factors. We note that HCPCS codes 92992 and 92993 are contractor-priced codes, wherein the Medicare claims processing contractors establish RVUs and payment amounts for these services. Therefore, we are not adding HCPCS codes 92992 and 92993.

Comment: One commenter stated that several injection codes were not included in the list of services outside of the surgical HCPCS code range considered surgery. The commenter requested that we add injection services as described by HCPCS codes 93565, 93566, 93567, and 93568 to the services considered as surgery.

Response: The commenter is mistaken. As discussed in the CY 2015 proposed rule (79 FR 40353 through 40354), we included the injection procedure codes mentioned by the commenter on the list of services outside of the surgical HCPCS code range to be considered surgery for purposes of assigning service level MP risk factors.

Comment: One commenter questioned why the MP RVUs decrease for cardiac catheterization services as described by HCPCS codes 93530, 93531 and 93580. The commenter stated that our proposal to assign the surgical risk factor to invasive cardiology services outside of the surgical HCPCS code range should result in an increase in MP RVUs.

Response: Cardiac catheterizations as described by HCPCS codes 93530, 93531 and 93580 are currently on the list of invasive cardiology services classified as surgery for purposes of assigning service level risk factors. Therefore, the MP RVUs for HCPCS codes 93530, 93531, 93580 were calculated in the last update using the surgical risk factor applicable to the specialty(s) furnishing these services. As discussed previously in this section, the service level risk factors reflect the average risk factor (weighted by allowed services) of the specialties furnishing a given service. Changes in the specialty mix since the previous MP RVU update in 2010 resulted in a decrease in MP RVUs for HCPCS codes 93530, 93531, and 93580. That is, the percentage of allowed services attributed to cardiology decreased for these service codes while the percentage of allowed services furnished by other specialties with risk factors lower than cardiology, such as internal medicine and pediatric medicine, increased.

Comment: Many commenters requested an explanation as to why the MP RVUs decreased for 4 out of the 6 newly bundled image guided breast biopsy procedures. The commenters

stated that given that the MP RVUs assigned to breast biopsy codes are being reduced, CMS is not appropriately capturing the risk a physician assumes when performing a procedure to diagnose cancer. Several commenters also explained that the misdiagnosis of breast cancer is a leading source of MP litigation and that reduction in payment for breast biopsies will have an impact on patient care.

Response: For the image guided breast biopsy procedures as described by HCPCS codes 19081 through 19086, we used the risk factors from source codes as recommended by the RUC. The source codes for breast biopsy codes 19081, 19082, 19083, 19084, 19085 and 19086 are HCPCS codes 32553, 64480, 32551, 64480, 36565, and 76812, respectively. Given that the proposed risk factors for HCPCS codes 32553, 64480, and 32551 decreased from 2014 to 2015, the corresponding ''destination'' service codes, that is HCPCS codes 19081, 19082, 19083, and 19084 also decreased.

Comment: Several commenters recommended that we implement an annual collection and review of MP premium data and rescale the MP RVUs each year, as we do with the PE RVUs. The commenters also stated that an annual update would provide additional transparency and allow stakeholders to identify potential problems and or improvements to MP RVUs more frequently.

Response: We appreciate the comments from stakeholders regarding the frequency that we currently review changes in MP premium data. As discussed in the CY 2015 PFS proposed rule (79 FR 40349 through 40355), there are two main aspects to the update of MP RVUs, recalculation of specialty risk factors based upon updated premium data and recalculation of service level RVUs based upon the mix of practitioners providing the service. We will consider the recommendation from stakeholders to conduct annual MP RVU updates to reflect corrections and changes in the mix of practitioners providing services. We will also consider the appropriate frequency for collecting new MP premium data. After reviewing these issues, we would address potential changes regarding the frequency of MP RVU updates in a future proposed rule.

Comment: One commenter urged us to calculate risk factors for all specialties approved by the American Board Medical Specialties (ABMS) since 2010. The commenter stated that by using the approved ABMS specialties, all specialties and subspecialties will be represented, including the recently approved sub-specialty of Female Pelvic Medicine and Reconstructive Surgery.

Response: We calculate service level risk factors based on the mix of specialties that furnish a given service as indicated by our claims data. Medicare claims data reflects the service volume by Medicare primary specialty designations. Therefore, we can only use MP risk factors by Medicare primary specialty codes.

Comment: We received two comments regarding our discussion of how to reflect updated MP premium data under the anesthesiology fee schedule. One commenter supported our decision to delay the anesthesia MP update and requested to work with us on developing an appropriate method for updating the MP component associated with anesthesia fee schedule services. Another commenter suggested using mean anesthesia MP premiums per provider over a 4- or 5-year period prorated by Medicare utilization to yield the MP expense for anesthesia services. The commenter stated that the calculation of premiums over a longer period of time renders the average more accurate and less volatile than a calculation over a 1-year period.

Response: We appreciate the comments on our potential approach for updating the MP resource costs for anesthesia fee schedule services. We will consider the commenter's suggestions to use multi-year average premiums as we develop a method for updating MP payments for services paid on the anesthesia fee schedule.

4. Result of Evaluation of Comments

After consideration of the public comments received on the CY 2015 MP RVU update, we are finalizing the CY 2015 MP RVU update as proposed with minor modifications. We are crosswalking gynecological oncology to the risk factor for general surgery (instead of the risk factor for obstetrics gynecology). We are also adding HCPCS codes 92961, 92986, 92987, 92990, 92997, and 92998 to the list of services outside of the surgical HCPCS code range considered as surgery for purposes of assigning service level risk factors. Additionally, for determining the risk factor for low volume services, we are overriding the dominant specialty from our claims data with the recommended specialty for the low volume service codes listed in Table 12. For all other low volume services, we are finalizing our proposal to use the risk factor of the dominant specialty from our Medicare claims data. The MP premium amounts, specialty risk factors, and a complete list of service codes outside the surgical HCPCS code range considered surgery for the purpose of assigning service level risk factors, may be found on the CMS Web site under the supporting documents section of the CY 2015 PFS final rule with comment period.

Additional information on the CY 2015 update may be found in our contractor's report, ''Final Report on the CY 2105 Update of Malpractice RVUs,'' which is available on the CMS Web site. It is also located under the supporting documents section of the CY 2015 PFS final rule with comment period located at *http://www.cms.gov/PhysicianFeeSched/*.

D. Geographic Practice Cost Indices (GPCIs)

1. Background

Section 1848(e)(1)(A) of the Act requires us to develop separate Geographic Practice Cost Indices (GPCIs) to measure relative cost differences among localities compared to the national average for each of the three fee schedule components (that is, work, PE, and MP). Although the statute requires that the PE and MP GPCIs reflect the full relative cost differences, section 1848(e)(1)(A)(iii) of the Act requires that the work GPCIs reflect only one-quarter of the relative cost differences compared to the national average. In addition, section 1848(e)(1)(G) of the Act sets a permanent 1.5 work GPCI floor for services furnished in Alaska beginning January 1, 2009, and section 1848(e)(1)(I) of the Act sets a permanent 1.0 PE GPCI floor for services furnished in frontier states (as defined in section 1848(e)(1)(I) of the Act) beginning January 1, 2011. Additionally, section 1848(e)(1)(E) of the Act provided for a 1.0 floor for the work GPCIs, which was set to expire on March 31, 2014. However, section 102 of the PAMA extended application of the 1.0 floor to the work GPCI through March 31, 2015.

Section 1848(e)(1)(C) of the Act requires us to review and, if necessary, adjust the GPCIs at least every 3 years. Section 1848(e)(1)(C) of the Act requires that ''if more than 1 year has elapsed since the date of the last previous adjustment, the adjustment to be applied in the first year of the next adjustment shall be 1/2 of the adjustment that otherwise would be made.'' We completed a review and finalized updated GPCIs in the CY 2014 PFS final rule with comment period (78 FR 74390). Since the last GPCI update had been implemented over 2 years prior, CY 2011 and CY 2012, we phased in 1/2 of the latest GPCI adjustment in CY 2014. We also revised the cost share

weights that correspond to all three GPCIs in the CY 2014 PFS final rule with comment period. We calculated a corresponding geographic adjustment factor (GAF) for each PFS locality. The GAFs are a weighted composite of each area's work, PE and MP GPCIs using the national GPCI cost share weights. Although the GAFs are not used in computing the fee schedule payment for a specific service, we provide them because they are useful in comparing overall areas costs and payments. The actual effect on payment for any actual service will deviate from the GAF to the extent that the proportions of work, PE and MP RVUs for the service differ from those of the GAF.

As previously noted, section 102 of the PAMA extended the 1.0 work GPCI floor through March 31, 2015. Therefore, the CY 2015 work GPCIs and summarized GAFs were revised to reflect the 1.0 work floor. Additionally, as required by sections 1848(e)(1)(G) and 1848(e)(1)(I) of the Act, the 1.5 work GPCI floor for Alaska and the 1.0 PE GPCI floor for frontier states are permanent, and therefore, applicable in CY 2015.

Comment: A few commenters requested that we extend the 1.0 work GPCI floor beyond March 31, 2015.

Response: As discussed in section II.D.1, the 1.0 work GPCI floor is established by statute and expires on March 31, 2015. We do not have authority to extend the 1.0 work GPCI floor beyond March 31, 2015.

As discussed in the CY 2014 PFS final rule with comment period (78 FR 74380) the updated GPCIs were calculated by a contractor to CMS. We used updated Bureau of Labor and Statistics Occupational Employment Statistics (BLS OES) data (2009 through 2011) as a replacement for 2006 through 2008 data for purposes of calculating the work GPCI and the employee compensation component and purchased services component of the PE GPCI. We also used updated U.S. Census Bureau American Community Survey (ACS) data (2008 through 2010) as a replacement for 2006 through 2008 data for calculating the office rent component of the PE GPCI. To calculate the MP GPCI we used updated malpractice premium data (2011 and 2012) from state departments of insurance as a replacement for 2006 through 2007 premium data. We also noted that we do not adjust the medical equipment, supplies and other miscellaneous expenses component of the PE GPCI because we continue to believe there is a national market for these items such that there is not a significant geographic variation in relative costs. Additionally, we updated the GPCI cost share weights consistent with the modifications made to the 2006-based MEI cost share weights in the CY 2014 final rule with comment period. As discussed in the CY 2014 final rule with comment period, use of the revised GPCI cost share weights changed the weighting of the subcomponents within the PE GPCI (employee wages, office rent, purchased services, and medical equipment and supplies). For a detailed explanation of how the GPCI update was developed, see the CY 2014 final rule with comment period (78 FR 74380 through 74391).

2. Proposed Changes to the GPCI Values for the Virgin Islands Payment Locality

As discussed in the CY 2015 proposed rule (79 FR 40355 through 40356) the current methodology for calculating locality level GPCIs relies on the acquisition of county level data (when available). Where data for a specific county are not available, we assign the data from a similar county within the same payment locality. The Virgin Islands have county level equivalents identified as districts. Specifically, the Virgin Islands are divided into 3 districts: Saint Croix; Saint Thomas; and Saint John. These districts are, in turn, subdivided into 20 sub-districts. Although the Virgin Islands are divided into these county equivalents, county level data for the Virgin Islands are not represented in the BLS OES wage data. Additionally, the ACS, which is used to calculate the rent component of the PE GPCI, is not conducted in the Virgin Islands, and we have not been able to obtain malpractice insurance premium data for the Virgin Islands payment locality. Given the absence of county level wage and rent data and the insufficient malpractice premium data by specialty type, we have historically set the three GPCI values for the Virgin Islands payment locality at 1.0.

For CY 2015, we explored using the available data from the Virgin Islands to more accurately reflect the geographic cost differences for the Virgin Islands payment locality as compared to other PFS localities. Although county level data for the Virgin Islands are not represented in the BLS OES wage data, aggregate territory level BLS OES wage data are available. We believe that using aggregate territory level data is a better reflection of the relative cost differences of operating a medical practice in the Virgin Islands payment locality as compared to other PFS localities than the current approach of assigning a value of 1.0. At our request, our contractor calculated the work GPCI, and the employee wage component and purchased services component of the PE GPCI, for the Virgin Islands payment locality using aggregated 2009 through 2011 BLS OES data.

As discussed in this section, the ACS is not conducted in the Virgin Islands and we have not been able to obtain malpractice premium data for the Virgin Islands payment locality. Therefore, we assigned a value of 1.0 for the rent index of the PE GPCI and to the MP GPCI.

Using aggregate territory-level BLS OES wage data resulted in a −2.3 percent decrease in the work GPCI, a −4.48 percent decrease in the PE GPCI and a −3.2 percent decrease to the GAF for the Virgin Islands payment locality. However, with the application of the 1.0 work GPCI floor, there is no change to the work GPCI and the overall impact of using actual BLS OES wage data on the Virgin Islands payment locality is only reflected by the change in PE GPCI (−4.48 percent) resulting in a −2.00 percent decrease to the GAF. As mentioned previously in this section, since we have not been able to obtain malpractice premium data for the Virgin Islands payment locality we maintained the MP GPCI at 1.0. As such, we did not propose any changes to the MP GPCI.

We requested comments on our proposal to use aggregate territory-level BLS OES wage data to calculate the work GPCI and the employee wage component and purchased services component of the PE GPCI for the Virgin Islands payment locality beginning for CY 2015, and for future GPCI updates. However, we did not receive any specific comments on this proposal. As discussed above, we believe that using aggregate territory level BLS OES wage data is a better reflection of the relative cost differences of operating a medical practice in the Virgin Islands payment locality as compared to other PFS localities than the current approach of assigning a value of 1.0. Therefore, we will finalize the changes to the GPCI values for the Virgin Islands payment locality as proposed. See Addenda D and E for the CY 2015 GPCIs and summarized GAFs. Additional information on the changes to GPCI values for the Virgin Islands payment locality may be found in our contractor's report, ''Revised Final Report on the CY 2014 Update of the Geographic Practice Cost Index for the Medicare Physician Fee Schedule,'' which is available on the CMS Web site. It is located under the supporting documents section of the CY 2015 PFS final rule with comment period located at *http://www.cms.gov/PhysicianFeeSched/*.

3. Additional Comments

We received several comments on topics that are not within the scope of proposals in the CY 2015 PFS proposed rule. These comments are briefly discussed below.

Comment: Many commenters continued to request an increase in the GPCI values for the Puerto Rico payment locality. The commenters stated that the cost of practicing medicine in Puerto Rico continues to rise. The commenters believe that commercial rent and utility costs, and the cost of obtaining medical equipment and supplies are higher in Puerto Rico than many states and territories. Commenters contend that the data used to calculate GPCIs do not accurately reflect the cost of operating a medical practice in Puerto Rico.

Response: Aside from proposing to use territory-wide wage data for the Virgin Islands payment locality, we finalized the methodology and values for the 7th GPCI update in the CY 2014 PFS final rule with comment period. We did not propose any changes to the GPCIs for the Puerto Rico payment locality, and the commenters on the CY 2015 PFS proposed rule raised the same issues they raised in response to the proposed GPCI update that we finalized in CY 2014. In the CY 2014 PFS final rule with comment period (78 FR 74380 through 74391), we summarized these comments and responded to these issues.

Comment: A few commenters stated that GPCIs for rural areas are too low which leads to reduced numbers of rural practitioners and reduced access to care. Two commenters stated that the PE GPCI does not account for differences in practice costs for x-rays and imaging studies. The same commenters and another commenter also requested that we replace the current method for calculating the work GPCIs with one that reflects the labor market for physicians and other health professionals as recommended by MedPAC. Another commenter raised questions about state patient compensation fund surcharges for malpractice insurance and the implications of those for the MP GPCI values. Additionally, we received a comment about the physician fee schedule payment localities.

Response: As noted in this section, we finalized the 7th GPCI update in the CY 2014 PFS final rule with comment period and, other than the proposal relating to the use of territory-wide wage data for the Virgin Islands payment locality, we did not propose any further changes in the CY 2015 PFS proposed rule. We will consider these points raised by commenters when we develop a proposal for the 8th GPCI update.

E. Medicare Telehealth Services

1. Billing and Payment for Telehealth Services

Several conditions must be met in order for Medicare payments to be made for telehealth services under the PFS. Specifically, the service must be on the list of Medicare telehealth services and meet all of the following additional requirements for coverage:

- The service must be furnished via an interactive telecommunications system.
- The practitioner furnishing the service must meet the telehealth requirements, as well as the usual Medicare requirements.
- The service must be furnished to an eligible telehealth individual.
- The individual receiving the services must be in an eligible originating site.

When all of these conditions are met, Medicare pays an originating site fee to the originating site and provides separate payment to the distant site practitioner furnishing the service.

Section 1834(m)(4)(F)(i) of the Act defines Medicare telehealth services to include consultations, office visits, office psychiatry services, and any additional service specified by the Secretary, when furnished via a telecommunications system. We first implemented this statutory provision, which was effective October 1, 2001, in the CY 2002 PFS final rule with comment period (66 FR 55246). We established a process for annual updates to the list of Medicare telehealth services as required by section 1834(m)(4)(F)(ii) of the Act in the CY 2003 PFS final rule with comment period (67 FR 79988).

As specified at § 410.78(b), we generally require that a telehealth service be furnished via an interactive telecommunications system. Under § 410.78(a)(3), an interactive telecommunications system is defined as multimedia communications equipment that includes, at a minimum, audio and video equipment permitting two-way, real-time interactive communication between the patient and distant site physician or practitioner.

Telephones, facsimile machines, and electronic mail systems do not meet the definition of an interactive telecommunications system. An interactive telecommunications system is generally required as a condition of payment; however, section 1834(m)(1) of the Act allows the use of asynchronous ''store-and-forward'' technology when the originating site is part of a federal telemedicine demonstration program in Alaska or Hawaii. As specified in regulations at § 410.78(a)(1), store-and-forward means the asynchronous transmission of medical information from an originating site to be reviewed at a later time by the practitioner at the distant site.

Medicare telehealth services may be furnished to an eligible telehealth individual notwithstanding the fact that the practitioner furnishing the telehealth service is not at the same location as the beneficiary. An eligible telehealth individual means an individual enrolled under Part B who receives a telehealth service furnished at an originating site.

Practitioners furnishing Medicare telehealth services are reminded that these services are subject to the same non-discrimination laws as other services, including the effective communication requirements for persons with disabilities of section 504 of the Rehabilitation Act and language access for persons with limited English proficiency, as required under Title VI of the Civil Rights Act of 1964. For more information, see *http://www.hhs.gov/ocr/civilrights/resources/specialtopics/hospitalcommunication*.

Practitioners furnishing Medicare telehealth services submit claims for telehealth services to the Medicare Administrative Contractors that process claims for the service area where their distant site is located. Section 1834(m)(2)(A) of the Act requires that a practitioner who furnishes a telehealth service to an eligible telehealth individual be paid an amount equal to the amount that the practitioner would have been paid if the service had been furnished without the use of a telecommunications system.

Originating sites, which can be one of several types of sites specified in the statute where an eligible telehealth individual is located at the time the service is being furnished via a telecommunications system, are paid a fee under the PFS for each Medicare telehealth service. The statute specifies both the types of entities that can serve as originating sites and the geographic qualifications for originating sites. With regard to geographic qualifications, § 410.78(b)(4) limits originating sites to those located in rural health professional shortage areas (HPSAs) or in a county that is not included in a metropolitan statistical areas (MSAs).

Historically, we have defined rural HPSAs to be those located outside of MSAs. Effective January 1, 2014, we modified the regulations regarding

originating sites to define rural HPSAs as those located in rural census tracts as determined by the Office of Rural Health Policy (ORHP) of the Health Resources and Services Administration (HRSA) (78 FR 74811). Defining ''rural'' to include geographic areas located in rural census tracts within MSAs allows for broader inclusion of sites within HPSAs as telehealth originating sites. Adopting the more precise definition of ''rural'' for this purpose expands access to health care services for Medicare beneficiaries located in rural areas. HRSA has developed a Web site tool to provide assistance to potential originating sites to determine their geographic status. To access this tool, see the CMS Web site at *www.cms.gov/telehealth/*.

An entity participating in a federal telemedicine demonstration project that has been approved by, or received funding from, the Secretary as of December 31, 2000 is eligible to be an originating site regardless of its geographic location.

Effective January 1, 2014, we also changed our policy so that geographic eligibility for an originating site would be established and maintained on an annual basis, consistent with other telehealth payment policies (78 FR 74400). Geographic eligibility for Medicare telehealth originating sites for each calendar year is now based upon the status of the area as of December 31 of the prior calendar year.

For a detailed history of telehealth payment policy, see 78 FR 74399.

2. Adding Services to the List of Medicare Telehealth Services

As noted previously, in the December 31, 2002 **Federal Register** (67 FR 79988), we established a process for adding services to or deleting services from the list of Medicare telehealth services. This process provides the public with an ongoing opportunity to submit requests for adding services. Under this process, we assign any qualifying request to make additions to the list of telehealth services to one of two categories. Revisions to criteria that we use to review requests in the second category were finalized in the November 28, 2011 **Federal Register** (76 FR 73102). The two categories are:

- *Category 1:* Services that are similar to professional consultations, office visits, and office psychiatry services that are currently on the list of telehealth services. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter, a practitioner with the beneficiary in the originating site. We also look for similarities in the telecommunications system used to deliver the proposed service; for example, the use of interactive audio and video equipment.
- *Category 2:* Services that are not similar to the current list of telehealth services. Our review of these requests includes an assessment of whether the service is accurately described by the corresponding code when furnished via telehealth and whether the use of a telecommunications system to deliver the service produces demonstrated clinical benefit to the patient. In reviewing these requests, we look for evidence indicating that the use of a telecommunications system in furnishing the candidate telehealth service produces clinical benefit to the patient. Submitted evidence should include both a description of relevant clinical studies that demonstrate the service furnished by telehealth to a Medicare beneficiary improves the diagnosis or treatment of an illness or injury or improves the functioning of a malformed body part, including dates and findings, and a list and copies of published peer reviewed articles relevant to the service when furnished via telehealth. Our evidentiary standard of clinical benefit does not include minor or incidental benefits.

Some examples of clinical benefit include the following:

- Ability to diagnose a medical condition in a patient population without access to clinically appropriate in-person diagnostic services.
- Treatment option for a patient population without access to clinically appropriate in-person treatment options.
- Reduced rate of complications.
- Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).
- Decreased number of future hospitalizations or physician visits.
- More rapid beneficial resolution of the disease process treatment.
- Decreased pain, bleeding, or other quantifiable symptom.
- Reduced recovery time.

For the list of covered telehealth services, see the CMS Web site at *www.cms.gov/teleheath/*. Requests to add services to the list of Medicare telehealth services must be submitted and received no later than December 31 of each calendar year to be considered for the next rulemaking cycle. For example, qualifying requests submitted before the end of CY 2014 will be considered for the CY 2016 proposed rule. Each request to add a service to the list of Medicare telehealth services must include any supporting documentation the requester wishes us to consider as we review the request. Because we use the annual PFS rulemaking process as a vehicle for making changes to the list of Medicare telehealth services, requestors should be advised that any information submitted is subject to public disclosure for this purpose. For more information on submitting a request for an addition to the list of Medicare telehealth services, including where to mail these requests, see the CMS Web site at *www.cms.gov/telehealth/*.

3. Submitted Requests to the List of Telehealth Services for CY 2015

Under our existing policy, we add services to the telehealth list on a category 1 basis when we determine that they are similar to services on the existing telehealth list with respect to the roles of, and interactions among, the beneficiary, physician (or other practitioner) at the distant site and, if necessary, the telepresenter. As we stated in the CY 2012 final rule with comment period (76 FR 73098), we believe that the category 1 criteria not only streamline our review process for publicly requested services that fall into this category, the criteria also expedite our ability to identify codes for the telehealth list that resemble those services already on this list.

a. Submitted Requests

We received several requests in CY 2013 to add various services as Medicare telehealth services effective for CY 2015. The following presents a discussion of these requests, and our proposals for additions to the CY 2015 telehealth list. Of the requests received, we find that the following services are sufficiently similar to psychiatric diagnostic procedures or office/outpatient visits currently on the telehealth list to qualify on a category one basis. Therefore, we propose to add the following services to the telehealth list on a category 1 basis for CY 2015:

- CPT codes 90845 (Psychoanalysis); 90846 (family psychotherapy (without the patient present); and 90847 (family psychotherapy (conjoint psychotherapy) (with patient present);
- CPT codes 99354 (prolonged service in the office or other outpatient setting requiring direct patient contact beyond the usual service; first hour (list separately in addition to code for office or other outpatient evaluation and management service); and, 99355 (prolonged service in the office or other outpatient setting requiring direct patient contact beyond the usual service; each additional 30 minutes (list

separately in addition to code for prolonged service); and,

• HCPCS codes G0438 (annual wellness visit; includes a personalized prevention plan of service (pps), initial visit; and, G0439 (annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit).

We also received requests to add services to the telehealth list that do not meet our criteria for being on the Medicare telehealth list. We did not propose to add the following procedures for the reasons noted:

• CPT codes 92250 (fundus photography with interpretation and report); 93010 (electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), 93307 (echocardiography, transthoracic, real-time with image documentation (2d), includes m-mode recording, when performed, complete, without spectral or color Doppler echocardiography; 93308 (echocardiography, transthoracic, real-time with image documentation (2d), includes m-mode recording, when performed, follow-up or limited study); 93320 (Doppler echocardiography, pulsed wave and/or continuous wave with spectral display (list separately in addition to codes for echocardiographic imaging); complete); 93321 (Doppler echocardiography, pulsed wave and/or continuous wave with spectral display (list separately in addition to codes for echocardiographic imaging); follow-up or limited study (list separately in addition to codes for echocardiographic imaging); and 93325 (Doppler echocardiography color flow velocity mapping (list separately in addition to codes for echocardiography). These services include a technical component (TC) and a professional component (PC). By definition, the TC portion of these services needs to be furnished in the same location as the patient and thus cannot be furnished via telehealth. The PC portion of these services could be (and typically would be) furnished without the patient being present in the same location. (Note: For services that have a TC and a PC, there is sometimes an entirely different code that is used when only the PC portion of the service is being furnished, and other times the same CPT code is used with a –26 modifier to indicate that only the PC is being billed.) For example, the interpretation by a physician of an actual electrocardiogram or electroencephalogram tracing that has been transmitted electronically, can be furnished without the patient being present in the same location as the physician. Given the nature of these services, it is not necessary to consider including the PC of these services for addition to the telehealth list. When these PC services are furnished remotely, they do not meet the definition of Medicare telehealth services under section 1834(m) of the Act. Rather, these remote services are considered physicians' services in the same way as services that are furnished in-person without the use of telecommunications technology; they are paid under the same conditions as in-person physicians' services (with no requirements regarding permissible originating sites), and should be reported in the same way as other physicians' services (that is, without the –GT or –GQ modifiers).

• CPT codes 96103 (psychological testing (includes psychodiagnostic assessment of emotionality, intellectual abilities, personality and psychopathology, eg, MMPI), administered by a computer, with qualified health care professional interpretation and report); and, 96120 (neuropsychological testing (eg, Wisconsin Card Sorting Test), administered by a computer, with qualified health care professional interpretation and report). These services involve testing by computer, can be furnished remotely without the patient being present, and are payable in the same way as other physicians' services. These remote services are not Medicare telehealth services as defined under the Act; therefore, we need not consider them for addition to the telehealth list, and the restrictions that apply to telehealth services do not apply to these services.

• CPT codes 90887 (interpretation or explanation of results of psychiatric, other medical examinations and procedures, or other accumulated data to family or other responsible persons, or advising them how to assist patient); 99090 (analysis of clinical data stored in computers (eg, ECGs, blood pressures, hematologic data); 99091 (collection and interpretation of physiologic data (eg, ECG, blood pressure, glucose monitoring) digitally stored and/or transmitted by the patient and/or caregiver to the physician or other qualified health care professional, qualified by education, training, licensure/regulation (when applicable) requiring a minimum of 30 minutes of time); 99358 (prolonged evaluation and management service before and/or after direct patient care; first hour); and 99359 (prolonged evaluation and management service before and/or after direct patient care; each additional 30 minutes (list separately in addition to code for prolonged service). These services are not separately payable by Medicare. It would be inappropriate to include services as telehealth services when Medicare does not otherwise make a separate payment for them.

• CPT codes 96101 (psychological testing (includes psychodiagnostic assessment of emotionality, intellectual abilities, personality and psychopathology, eg, MMPI, Rorschach, WAIS), per hour of the psychologist's or physician's time, both face-to-face time administering tests to the patient and time interpreting these test results and preparing the report); 96102 (psychological testing (includes psychodiagnostic assessment of emotionality, intellectual abilities, personality and psychopathology, eg, MMPI and WAIS), with qualified health care professional interpretation and report, administered by technician, per hour of technician time, face-to-face); 96118 (neuropsychological testing (eg, Halstead-Reitan Neuropsychological Battery, Wechsler Memory Scales and Wisconsin Card Sorting Test), per hour of the psychologist's or physician's time, both face-to-face time administering tests to the patient and time interpreting these test results and preparing the report); and, 96119 (neuropsychological testing (eg, Halstead-Reitan Neuropsychological Battery, Wechsler Memory Scales and Wisconsin Card Sorting Test), with qualified health care professional interpretation and report, administered by technician, per hour of technician time, face-to-face). These services are not similar to other services on the telehealth list, as they require close observation of how a patient responds. The requestor did not submit evidence supporting the clinical benefit of furnishing these services on a category 2 basis. As such, we did not propose to add these services to the list of telehealth services.

• CPT codes 57452 (colposcopy of the cervix including upper/adjacent vagina; 57454 colposcopy of the cervix including upper/adjacent vagina; with biopsy(s) of the cervix and endocervical curettage); and, 57460 (colposcopy of the cervix including upper/adjacent vagina; with loop electrode biopsy(s) of the cervix). These services are not similar to other services on the telehealth service list. Therefore, it would not be appropriate to add them on a category 1 basis. The requestor did not submit evidence supporting the clinical benefit of furnishing these services on a category 2 basis. As such, we did not propose to add these services to the list of telehealth services.

• HCPCS code M0064 (brief office visit for the sole purpose of monitoring or changing drug prescriptions used in the treatment of mental psychoneurotic

and personality disorders) is being deleted for CY 2015. This code was created specifically to describe a service that is not subject to the statutory outpatient mental health limitation, which limited payment amounts for certain mental health services. Section 102 of the Medicare Improvements for Patients and Providers Act (Pub. L. 110–275, enacted on July 15, 2008) (MIPPA) required that the limitation on payment for outpatient mental health treatment to 62.5 percent of incurred expenses, in effect since the inception of the Medicare program, be reduced over four years. This limitation on payment for mental health treatment created a higher share of beneficiary coinsurance for these services than for most other Medicare services paid under the PFS. Effective January 1, 2014, 100 percent of expenses incurred for mental health treatment services are considered as incurred for purposes of Medicare, resulting in the same beneficiary cost sharing for these services as for other PFS services. Since the statute was amended to phase out the limitation, and the phase-out was complete effective January 1, 2014, Medicare no longer has a need to distinguish services subject to the mental health limitation from those that are not. Accordingly, the appropriate CPT code can now be used to bill Medicare for the services that would have otherwise been reported using M0064 and M0064 will be eliminated as a telehealth service, effective January 1, 2015.

• Urgent Dermatologic Problems and Wound Care—The American Telemedicine Association (ATA) cited several studies to support adding dermatology services to the telehealth list. However, the request did not include specific codes. Since we did not have specific codes to consider for this request, we cannot evaluate whether the services are appropriate for addition to the Medicare telehealth services list. We note that some of the services that the requester had in mind may be billed under the telehealth office visit codes or the telehealth consultation G-codes.

In summary, we proposed to add the following codes to the telehealth list on a category 1 basis:

• Psychotherapy services CPT codes 90845, 90846 and 90847.

• Prolonged service office CPT codes 99354 and 99355.

• Annual wellness visit HCPCS codes G0438 and G0439.

3. Modifying § 410.78 Regarding List of Telehealth Services

As discussed in section II.E.2. of this final rule with comment period, under the statute, we created an annual process for considering the addition of services to the Medicare telehealth list. Under this process, we propose services to be added to the list in the proposed rule in response to public nominations or our own initiative and seek public comments on our proposals. After consideration of public comments, we finalize additions to the list in the final rule. We have also revised § 410.78(b) each year to include the description of the added services. Because the list of Medicare telehealth services has grown quite lengthy, and given the other mechanisms by which we can make the public aware of the list of Medicare telehealth services for each year, we proposed to revise § 410.78(b) by deleting the description of the individual services for which Medicare payment can be made when furnished via telehealth. Under this proposal, we would continue our current policy to address requests to add to the list of telehealth services through the PFS rulemaking process so that the public would have the opportunity to comment on additions to the list. We also proposed to revise § 410.78(f) to indicate that a list of Medicare telehealth codes and descriptors is available on the CMS Web site.

The following is a summary of the comments we received regarding the proposed addition of services to the list of Medicare telehealth services.

Comment: All commenters supported one or more of our proposals to add psychotherapy services (CPT codes 90845, 90846 and 90847); prolonged service office (CPT codes 99354 and 99355); and annual wellness visit (HCPCS codes G0438 and G0439) to the list of Medicare telehealth services for CY 2015.

Response: We appreciate the commenters' support for the proposed additions to the list of Medicare telehealth services. After consideration of the public comments received, we are finalizing our CY 2015 proposal to add these services to the list of telehealth services for CY 2015 on a category 1 basis.

Comment: Commenters also agreed with our rationale for rejecting other requested additions to the telehealth list. However, one commenter disagreed with our decision not to propose adding dermatology services, including those furnished using store-and-forward technology, to the list of telehealth services. Another commenter objected to our proposal not to add psychological testing services to the telehealth services list.

Response: As we noted in the proposed rule, the request to add dermatology services did not include specific codes. Without specific codes to consider, we cannot evaluate whether the services are appropriate for addition to the Medicare telehealth services list. We note that some of the services that the requester had in mind may be billed under the telehealth office visit codes or the telehealth consultation G–codes.

Concerning payment for services furnished using store-and-forward technology, we note that the statute at section 1861(m) of the Act includes store-and-forward technology as a telecommunication system for telehealth services only in the case of federal telemedicine demonstration programs in Alaska and Hawaii (see § 410.78(d)).

Concerning psychological testing services, we noted that remote services (CPT codes 96103 and 96120) are not Medicare telehealth services as defined under the Act and thus can be furnished when beneficiary is not in the same place as the practitioner. It would also be counter-productive to add these codes to the telehealth list because, if we did, the telehealth originating site, geographic, and other restrictions would apply to these services.

CPT codes 90887, 90991, 93358 and 99359 are not separately payable by Medicare. It would be inappropriate to include services as telehealth services when Medicare does not otherwise make a separate payment for them.

Finally, CPT codes 96101, 96102, 96118 and 96119 are not similar to other services on the telehealth list, as they require close observation of how a patient responds. The requestor did not submit evidence supporting the clinical benefit of furnishing these services on a category 2 basis. As such, we did not propose to add these services to the list of telehealth services.

We received other public comments on matters related to Medicare telehealth services that were not the subject of proposals in the CY 2015 PFS proposed rule. Because we did not make any proposals regarding these matters, we generally do not summarize or respond to such comments in the final rule. However, we are summarizing and responding to the following comments to acknowledge the interests and concerns of the commenters, and a mechanism to address some of those concerns.

Many commenters supported the overall expansion of telehealth by:

• Removing geographic restrictions to include both rural and urban areas.

• Revising permissible originating sites to include a patient's home, domiciliary care and first responder vehicles.

- Adopting a broader definition of telehealth technologies to include services provide via mobile technology, including emails, phone calls, and store-and-forward technologies.
- Adding physical and occupational therapists as practitioners who can remotely furnish telehealth services.
- Adding more services to the telehealth list, including services under category 2.
- Prioritizing coverage of services that include care coordination with the patient's medical home and/or existing treating physicians.
- Considering the use of telehealth technology for the purpose of furnishing direct supervision of services furnished by on-site practitioners.
- Using demonstration projects under CMS's Center for Medicare and Medicaid Innovation (CMMI) to collect clinical evidence on the effect of expanding telehealth and to address how telemedicine can be integrated into new payment and delivery models.

Response: We appreciate the commenters' suggestions. As some commenters noted, we do not have authority to implement many of these revisions under the current statute. The CMS Innovation Center is responsible for developing and testing new payment and service delivery models to lower costs and improve quality for Medicare, Medicaid, and CHIP beneficiaries. As part of that authority, the CMS Innovation Center can consider potential new payment and service delivery models to test changes to Medicare's telehealth payment policies.

In summary, after consideration of the comments we received, we are finalizing our proposal to add psychotherapy services CPT codes 90845, 90846 and 90847; prolonged service office CPT codes 99354 and 99355; and annual wellness visit HCPCS codes G0438 and G0439 to the list of Medicare telehealth services.

In addition, we are finalizing our proposal to change our regulation at § 410.78(b) by deleting the description of the individual services for which Medicare payment can be made when furnished via telehealth. We will continue our current policy to address requests to add services to the list of Medicare telehealth services through the PFS rulemaking process so that the public has the opportunity to comment on additions to the list. We are also finalizing our proposal to revise § 410.78(f) to indicate that a list of Medicare telehealth codes and descriptors is available on the CMS Web site.

We remind all interested stakeholders that we are currently soliciting public requests to add services to the list of Medicare telehealth services. To be considered during PFS rulemaking for CY 2016, these requests must be submitted and received by December 31, 2014. Each request to add a service to the list of Medicare telehealth services must include any supporting documentation the requester wishes us to consider as we review the request. For more information on submitting a request for an addition to the list of Medicare telehealth services, including where to mail these requests, we refer readers to the CMS Web site at *www.cms.gov/telehealth/*.

5. Telehealth Originating Site Facility Fee Payment Amount Update

Section 1834(m)(2)(B) of the Act establishes the Medicare telehealth originating site facility fee for telehealth services furnished from October 1, 2001, through December 31 2002, at $20.00. For telehealth services furnished on or after January 1 of each subsequent calendar year, the telehealth originating site facility fee is increased by the percentage increase in the MEI as defined in section 1842(i)(3) of the Act. The MEI increase for 2015 is 0.8 percent. Therefore, for CY 2015, the payment amount for HCPCS code Q3014 (Telehealth originating site facility fee) is 80 percent of the lesser of the actual charge or $24.83. The Medicare telehealth originating site facility fee and MEI increase by the applicable time period is shown in Table 13.

TABLE 13—THE MEDICARE TELEHEALTH ORIGINATING SITE FACILITY FEE AND MEI INCREASE BY THE APPLICABLE TIME PERIOD

Facility fee	MEI increase	Period
$20.00 ...	N/A	10/01/2001–12/31/2002
20.60 ...	3.0	01/01/2003–12/31/2003
21.20 ...	2.9	01/01/2004–12/31/2004
21.86 ...	3.1	01/01/2005–12/31/2005
22.47 ...	2.8	01/01/2006–12/31/2006
22.94 ...	2.1	01/01/2007–12/31/2007
23.35 ...	1.8	01/01/2008–12/31/2008
23.72 ...	1.6	01/01/2009–12/31/2009
24.00 ...	1.2	01/01/2010–12/31/2010
24.10 ...	0.4	01/01/2011–12/31/2011
24.24 ...	0.6	01/01/2012–12/31/2012
24.43 ...	0.8	01/01/2013–12/31/2013
24.63 ...	0.8	01/01/2014–12/31/2014
24.83 ...	0.8	01/01/2015–12/31/2015

F. Valuing New, Revised and Potentially Misvalued Codes

Establishing valuations for newly created and revised CPT codes is a routine part of maintaining the PFS. Since inception of the PFS, it has also been a priority to revalue services regularly to assure that the payment rates reflect the changing trends in the practice of medicine and current prices for inputs used in the PE calculations. Initially, this was accomplished primarily through the five-year review process, which resulted in revised RVUs for CY 1997, CY 2002, CY 2007, and CY 2012. Under the five-year review process, revisions in RVUs were proposed in a proposed rule and finalized in a final rule. In addition to the five-year reviews, in each year beginning with CY 2009, CMS and the RUC have identified a number of potentially misvalued codes using various identification screens, such as codes with high growth rates, codes that are frequently billed together, and high expenditure codes. Section 3134 of the Affordable Care Act codified the misvalued code initiative in section 1848(c)(2)(K) of the Act.

In the CY 2012 rulemaking process, we proposed and finalized consolidation of the five-year review and the potentially misvalued code activities into an annual review of potentially misvalued codes to avoid redundancies in these efforts and better accomplish our goal of assuring regular assessment of code values. Under the consolidated process, we issue interim final RVUs for all revaluations and new codes in the PFS final rule with comment period, and make payment based upon those values during the calendar year covered by the final rule. (Changes in the PFS methodology that may affect valuations of a variety of codes are issued as proposals in the proposed rule.) We consider and respond to any public comments on the interim final values in the final rule with comment period for the subsequent year. When consolidating these processes, we indicated that it was
